

GRIGORY GRABOVOY
The Teaching about God
Time management
21.08.2004

Hello again
the topic of today's seminar is my Teaching about God
Time management

when we talk
about the time of action for example yes man
then we consider that the time of God's Action
at the level of human perception
matches
with the time of human action

i.e. a person acts in some kind of event system
and at the same time he sees
that God sent him this event system
well, that is , there is the Earth and some kind of platform under your feet
vegetation, etc.

and if we unpack this system the other way around
i.e. to see how God sent this to him at all
i.e. how the event unfolded
then we will see the spatial time of God

i.e. God as if distributing events
well, like some kind of tablecloth there let's say self-assembly yes
where is each next level
it's like the next tablecloth

and it turns out that based on this management
we see that time can be compressed

for example, when managing past events
it is quite possible to see
what if we consider time as a dynamic system
then it is possible according to the type of mobile liquid yes
how to infuse time into the structure of space
where there are maximum bends of space

and it turns out that time itself
begins to filter as if into one system or another

the so-called "internal time clock"
can you introduce such a term

and then it turns out that we understand
The soul of God acting outside of time
after all, someone has to create this watch

and it turns out that then we can clearly define
here are the coordinates of the events according to the structure
well let's say there is a drop of dew in liquid systems
it's the same here
there is a very clear criterion of time
where the event will definitely happen

there is a concentration of time
which is precisely due to the multi-plane movement
Well, maybe it looks more like this
exactly on such a moving dynamic fluid

the light of which gives birth to time
you can even look at it like this

then here we see that the implementation of events
often has a completely static, rigid form
for example in a second for example the same events yes
are stored there for 5 hours
in principle, we can say that it is the same house
in 100 years you can say
what is the specific level of the event
it will be in the form of well- identified values
there is some mountain there Yes for example, a stone, etc.

but to say that in 100 years
the person will be in this place yes
Well, of course it's definitely not possible
unless you agree with him in advance
provided he can get there yes

and it turns out that here is the technology
namely the Eternal development of man
it is still a timeless technology
from the point of view of mandatory human access
on any Wednesday

and here it turns out by analogy with that
God make these clocks of time
God's inner time

what god doing time management structure
He gives the man the opportunity to do the same.

i.e. it turns out that a person
in fact, the blacksmith of his own Eternal Life

if he goes beyond
for example, temporary management structures
then he will see it very clearly
what is decisive in his life

i.e. the picture is very simple, a person goes beyond
Well like settings and control systems
and sees that
Often one light pulse is enough
give for example for your own control system
and that's all
and for the next 100 years he lived there peacefully let's say
lives peacefully

i.e. the control system is greatly simplified
when a person sees for example where
well, let's say the so-called
entry points into time information
and of the time that is synchronized
with the Action of God

because for God in human understanding
time is also an action
any manifestation is also an Action of God

and it turns out that for God this is a personified system
i.e. for Him
what is space there
what time
that any action at all
everything seems to be done with the same level of control
with the same level of primary impulse
everything comes from Him from God

and it turns out that when we look at Reality this way
that time is outgoing yes for example from a person
This is a time regulation mechanism
this is the one that exists
inside a person

i.e. a person's status allows one to regulate
the time axis from as if from within yes
from the internal state of events of the personality there
to a sort of boundary point
where exactly the level goes into the management itself

and then it's time for management
i.e. to recognize
where is the thought
and where is the control?
This technique allows us to clearly distinguish
precisely the boundaries of Thinking
and the limits of real control
i.e. Reality

time from you to the boundary area
changes and can be simply Thinking
you can just determine it by the time characteristics
what do you think or do you manage

Well, these are experienced managers
they almost always start to manage
They immediately translate Thinking
into the management structure
and it turns out that for them this is it
as if this boundary environment does n't exist
they are always in the control zone

but for beginner level
that's exactly the level of initial knowledge
it is very important that as soon as we see
as if a liquid fraction of time
I imagined it as some kind of liquid
but spreading in space, for example, of the past, yes

then we understand
why is there more liquid
in general in the environment in the surrounding
because there is a stabilization of the temporary background
that the future is more fixed and more distributed
if we consider for example
Well as if more stably distributed
from the point of view of favorable development

and if we consider
that's why there is so much liquid
here on planet Earth and the seas, oceans, etc.

then it turns out that it is precisely because
that here is the phase of distribution of continental boundaries
water surface
why do tsunamis, tornadoes, etc. occur there ?

because you can view
where does the time bending of space occur?

and clearly see how to predict
where will this tsunami be anyway

i.e. it is possible to develop a completely clear design
namely personal perception

it's not that there needs to be any specific complex ones
there are formulas or graphs to draw
but to see events
in a precisely temporal context

and it turns out that when we start to develop like this
then we see that the internal time of a person
comparable to God's time

i.e. at some level
at the level of generally speaking manifestation of the human Soul
in all events of the World
the time of man and the time of God coincide

and if there is at least one area of coincidence
then the element of similarity spreads
as if the principles of prolongation yes
for any system
i.e. man is also Eternal

and at the same time the logic works very clearly
it is enough to set the task
see the action of the Soul
anywhere in the world
as a rule this is not necessary
because to realize the whole world at once
it's like an infinite number of phenomena
but it is enough to select only the approximate area
this is where it is realized

so here is the selection of this area
this is a temporary action
a person gives off an impulse
coming as if from the inner content of the person himself
in scope yes
and it turns out that he characterizes this selection as an event

i.e. it's something in optics
well, like some kind of palpation
produces spaces in front of itself
but there are not some specific bricks there
or trees grow there
and this is just the space of Thinking

although if you want to get
bricks or trees to build a house
so that it doesn't collapse
from some possible earthquake there
then you can clearly calculate the stability system
your action alone is enough
synchronize with the Action of God
by the Infinite development of this element
house or tree

then you will see
how can I find this brick anyway
i.e. you have a very clear time schedule literally
will be determined
where are the wells For example there are building materials there yes
from which a house will be made that is favorable

here you can see the state of things
not every kind of construction option
namely, favorable for your development
there for the whole civilization and for Eternal development

and based on this
it turns out that time synchronization
this is a mutual search of people and God
at one level of time, so to speak

God set the task
but He gave time for it to be fulfilled

and that's when we look at
and where did He put this time anyway?

then logically it's very simple
Well, build a house
then we need to look for building material

time is embedded here and in this space

you are looking for
there you buy these materials or acquire them somewhere
you start to think why exactly this way
then you go exactly along this trajectory

and this is where it comes in
Well, on the physical plane, simply
here arises the time of the Soul of God
which coincides with the time of action of all people in general

you act similarly, yes
there are similar systems
i.e. for people there is, for example, there is only one door into the house
is not built in every case
Well, it would be a kind of paradoxical model, yes
separate entrance

but from God's point of view
He always has a private entrance

and here is where the difference exists, yes
between the Action of God and the action of man
in the time interval
precisely in the interval in some specific

when we start talking about Infinity
the entrance becomes one again

and that's why it turns out when we ask the question
how can God act there as a human being
quite simple
you just need to concentrate on the Infinite Environment
and He will act, well, go through the same door

and it turns out that when at the same time
on one status goes
and God and man are close
and they go into Infinite development
then time becomes manageable

i.e. it will no longer be the same liquid
which spreads there as if perhaps chaotically and in some way
although there is essentially no chaos there
it is here that the absence of chaos is very clearly revealed
precisely in the dynamics of development
dynamic as if the level of the liquid phase of time

then when they act simultaneously
both God and man
then time acquires precisely a spheroidal level
which can fit for example Yes
and in the hand of man and in the hand of God
and at the same time this time is omnipresent

i.e. when a person looks somewhere into the future
he sees the same sphere of time again
Well, there is such a concept there, "sphere of time" yes

so in order to move this sphere further
Well there in cubic capacity and something close
it is necessary to add some kind of intellectual function
intelligence of time

i.e. time possessing
intellectual level of reproduction
time reproduces itself as if

and when time reproduces itself
then it turns out to be a person's personality
i.e. a person sees his reflection in time
time is a mirror

and when you look in the mirror of time yes
then you see that as if
well why does the level of some actions happen
i.e. why does a person age at all?

it turns out that if he recorded
for example on one level
Well like the structure of such a mirror yes
there he opened the shutters and made several reflections
then he stops aging

here is a simple element of non-aging

multiple levels of reflections are sufficient
in the structure of time
i.e. matter is organized from time
so mirror-like
and just not a flat option
but there were some like ^{there} with shutters before
Such designs may ^{exist} now too, of course
well, sideways ^{yes}

and it turns out that if you look
on several images at once
you get a fixation
the more reflections the slower the action ^{yes}

and it turns out that when you get such a design
then you already understand the rest
how can we convert, ^{say} , this sphere ^{into} a cube
it is enough to create a number of reflections
i.e. the form changes ^{yes}

i.e. on the one hand it turns out like this
that the form actually becomes more static
the more reflections

but when you look

and when they look at you
to create an element of Reality
in the collective faction of Consciousness
need to create reflections
where each element is involved
and you see that your Soul is building the World in general
specifically at each point

i.e. you reveal the timeline of your own Soul
and this is a very useful quality

because it is you who see the structure
^{Well} there is a peculiar golden color ^{there}
sometimes golden, sometimes silvery
thread
it has a specific length
so she has ^{well} like a segmental shape
this is this kind of, ^{well}, measure of the Soul , ^{let's say}
your Soul can measure events clearly
how much time is left until them

and when a person works
he constantly carries out a kind of measurement

and when you see the work
of this mechanism ^{yes} let's say Soul ^{yes}
Well, in such a simplified understanding
I say "mechanism"
in fact, this is the dynamics of the development of the Soul into the future
it is an inseparable system here
time is inseparable

we can of course take it and stretch it ^{there} like rubber
but i.e. how to break time ^{yes} it is rather complicated
then we will get ^{a kind of} discrete level of events
and to what extent does this need to be done ^{yes}
then why tear ^{it up?}
than to waste time at all
if we decided to take it ^{there} and break it
then it's done by hand
what else can you take and stretch the system ^{yes}

is obtained for the properties of discreteness of space
Need hands
and so you by analogy
how do you collect your body ^{logically}
the external Reality is also modified

from the cube you can get
any other discrete element
i.e. it is enough to at least change
the shape of the sphere of time
the whole world is already ready, ^{yes}
in manifest form

and here is this manifestation
it's a powerful factor actually
cures for virtually any disease
Well, let's say it 's located
in the time control interval
i.e. which ^{is like} then it's manageable

i.e. there are diseases
which also have a timeless form, ^{so to speak} Yes
they do not relate to the structure of a person ^{yes}
these are usually some kind of distortions of space
environmental problems ^{there,} disasters

but here you can follow it very clearly
ecology connection
connection with possible unregulated human development in the future
with how the person feels now

and when he sees, for example , this line
its further development
he understands very clearly in general
what does he need to do in environmental safety

i.e. he is aware of a certain
as if it were my civic duty there Yes
the common earthly debt to the World there, the Creator God
to be able to
generally speaking, and in front of myself too
he was born, which means he chose his path

and it turns out that here it is very clearly defined
this is this collective system of interaction
so let's say the souls of people
i.e. the Souls of people
The soul of every person works at one point too.
well, the effect of omnipresence and Soul

and we see it very clearly technologically
how are the souls of people in general
and the Soul of each person individually
build time
for yourself and collectively

well, that is, it's the same as a home for yourself
and collective yes
there are some halls, concert halls, churches , etc.
why does the church have exactly this shape
there depending on the religion of the country, etc.

because it's synchronization
time of the human soul
and generally speaking of that moment
when God looks at a man
in Human Perception

God is always watching anyway
but it is precisely when a person considers
that he is ready for contact with God
for the next action

but since a person always acts and does something
and he is always ready
then these are like culminating moments
it means actions in temples and prayers
just internal actions
this is the transition level
time
a person seems to choose the time internally

he first goes to the temple or gets ready for prayer
he seems to be trying somewhere or not trying
often he just knows what time it is
if he has a system

and here is this transition system
to the subtle inner world of a person
this is the organization of man but already in time

i.e. up until this part of the lecture
I was just talking about that
what a man does outside of time management
and gets immediately and long-term level
can get control
just like God created the clock of time

then when we already came from there it turns out yes
from the timeless level to that
that we have come into the inner world of man
and got the time of man
those. action in time yes

it doesn't mean that it's like under a shower
you need to get up visually on time
namely in time
one point in time says that
that you act in time

that's the difference
what is the effect of time presence for a person
inside or there on the skin
or just the realization of it
that the inner world is the World
which reproduces and interacts
with the outside world
generally speaking it has time to develop

this is contact with God
where there is a transition
from the timeless level to the time level

logically it is also clear
that God who is
from the level, so to speak, outside of time and also passes
at the level as if Well, it's temporary for a person, yes.
at the level of time itself as such
he can do it naturally
but it's easier if people there follow the same trajectory
it is easier for them to interact at known intervals

and the simplest known interval
logically clear
there is an element where there is no time
and there is an element where there is time
it is easy to understand logically
what exactly is the transition
this is the area of meeting and contact

so it turns out that a person's attitude
for prayer
to the level of information transfer to God
interaction with God
this is precisely the level of organization in fact
timeless space yes
personality of a person including
and the organization of the actual space of time

and it turns out that here we are already starting to approach
to time management
so we create it ourselves
timeless
we create space-time ourselves

and now here is the interval of the transition
when you mean here you look at Reality in this way
that the transition itself is again happening
your personal initiative
then here the level is involved
where God gives you tasks and you complete them

Here is the task execution
is located inside this transition interval
and it is very clearly visible that the tasks have been completed successfully

i.e. if you ask the question where to get manna from heaven, so to speak
Well, yes, that's what you can say
in quotes of course in many ways but in essence that's how it is
where to get completed systems

so that it wouldn't take too long to organize them somewhere
and just take the space
and from here just take and sort of pull yes
into the existing Reality
it's exactly in this place

and it is really possible to create
elements of matter yes
which allow the World to develop
develop there Earth Lands so to speak yes to the planets

because by asking the question
in general how did God create space
and what's the difference anyway
that the products are sold in the store yes
or they can be made control

but the controls are not entirely simple
It's not like they just took it and for example Well as if they materialized
although this is of course possible
but this is when everyone can do it
then it can be systemic
if at least one cannot
so they must be acquired somehow yes
so here it is
Well there to be sold in stores or simply given away

and this is where development takes place
from one point in time
where there is a favorable outcome of events yes
creates precisely the opportunity
well, also like a self-assembled tablecloth

Well, let's say something like this yes in that regard
that here precisely the development of events arises

i.e. it is really possible to make it from one flatbread
make a hundred or more there yes
from one fish you can make many fishes, etc.
where do so many fish in the river come from, that's the question, yes
it's clear that they reproduce

but based on the fact that it does exist
and another principle of organizing the World
this is the moment who created them
and how do they even stay afloat
why doesn't water spill
why does gravity even exist

it turns out that it is very convenient to consider here
this methodology is exactly so to speak of such quality
when you see very clearly

how is space and time organized now

and when you start tracing the line of communication
between these fish
you see how God cuts out space
i.e. you see how He sends a ray of actually Eternal life
and on this beam the movement of fish is shown

and this beam is the configuration
both space and time
i.e. why do fish have this shape
why exactly this thickness of water

and because it works here
what we have is actually the level of creation
at that moment, as if discretely yes
it is God who creates space
i.e. you can see
how God participates in the work of space
and how does He create it at all

i.e. it doesn't just create there
and there are still investigative signs
how the next element of space is created

when you already learn to do it
then you can create organs then it turns out
at least

i.e. it becomes a question of treatment
in this case it is not some kind of flow system
not some kind of control system
this is a process of creation almost similar to that
as God does

and then you are no longer mistaken
i.e. you can clearly build an organ ^{there} , etc.

in this system, ^{well}, in principle, it is simplified
organ construction system

but for the system level
^{there is} precisely the functioning of the systems
precisely in the human body
^{Well}, in principle, it doesn't necessarily have to be just a person
in general, in any ^{yes} as if in complex systems
This is where you can apply and combine
principles of universal control
and time management

i.e. external universal control
^{as if} it exerts control over systemic connections
and here are some well-known systems
very easy to do through time management
which ^{kind of} exist locally ^{yes}
in the form of organs
^{there} in the form of some information objects

but in the same time management system
of course there is also a control system, ^{so to speak}
dynamic system connections
only it is at the level of your Perception
but ^{how} deep in your Soul

it is when you consider the location of the Soul
inside your physical body

i.e. the system level is you yourself
your image reflected in time
controls the entire external system

it turns out that you only need to build one cell
and it turns out that you can
organize the level of the person then

i.e. man was created from a cell ^{yes}
from one impulse of God the whole world was created

and then the question arises
for man, He Himself, i.e. God

and so it recreated itself
including in this impulse

and here it turns out
what exactly is this external knowledge of God about Himself
this is the transfer of time by man

well, that is, for example, God decided to set such a task there
to know about yourself well there's more
from the point of view of human knowledge

i.e. He should understand then
how man thinks His creation
considering that He knows it anyway yes
then he must understand as a human being
i.e. he must become a man at this moment
act as a human being

and when He starts to perform
Well as if in the system of His Perception as a person
then he begins to understand
Well, how does it turn out that He is God here?
He always understands everything.
the only question is
that He seems to begin to perceive
as if a person understood yes

and at the same time understands
i.e. the difference
between God
and all people
absent
This is exactly where the important point lies
exists in this methodology
in this case there is no difference
well, let's say on the information of the Perception of God
because we are talking about God in this case
and all of humanity

there is no difference
i.e. God understands how all people together
this is God's specialty in this

and when He begins
for example, to understand such a structure
then he immediately gets there in principle
A principle created by him himself

a principle created by God himself
equality of all people

after all, there is only one understanding
i.e. it turns out that this is one sphere, ^{yes}
^{like} an internally glowing sphere
in the Soul of every person
It is clear that man is independent
It is clear that in human understanding

he is completely free
there is complete inviolability of the person
because it is impossible to get God anyway
and this is Perception
^{well, I mean} how to get to the level ^{there}
there is the imposition of some kind of ^{external} pressure systems, etc.

i.e. it turns out that when
including God is a man
it still ^{means} He is in the status of control from God

and it turns out that here is the Perception of all people at the same time
then it puts people in a real protection system
^{well} at least from
protection against macrodestruction
because the collective opinion is perceived by God
this is all the future of Eternal development

God perceives it as a level of Eternity after all
and it turns out that He gives them Eternity

i.e. dialog mode
He perceives and makes Eternity at the same time.
because when He perceives everyone
He creates for everyone
One element of universal creation
this is Infinite development immediately

there is none, for ^{example} as if there were no generalized connections
here it is, just in this time interval
when we consider
General Perception
and the Perception of God
or such an element as the Perception of God is such
that He perceives all people at once
that's where the connections are very clearly shown

precisely universality

that's enough, well for example, God can even perceive
two people
it is enough to perceive
that one person does something
movement two different actions ^{yes}
he ^{there} the man made some kind of ^{movement with his hand}
or he thought
and he already gets Infinite Life right away
because any investigative second phenomenon
after monopulse ^{yes}
this is already Infinity

because God only has to think
about two phenomena
It gives Infinity immediately
reproduces

and it turns out that the Gaze of God
always directed towards Infinity
because god just does it
from the essence of the stability of the World
Only then is the world stable when God constantly creates

and it turns out that this is the Law
which God himself clearly established
but the Law which people understand
very simply they can then become ^{as if}
here at this, well, peculiar ^{level}
such a light platform
where is Eternal life
which is already actually what it is in essence
does not depend on time

after all, the concept of "Eternal life"
this life is more eventful
where there is no time at all

i.e. in a logical concept
time moves clearly
but with Eternal life, a person must live Eternally
i.e. there is no other criterion
so it turns out that it 's as if for him
actually, in essence, by and large

time becomes irrelevant

and the more a person develops over time, ^{yes}
the less relevant it becomes
^{well}, there are some problems associated with that
that he will be late somewhere or won't make it somewhere

pay attention here
This is a powerful technological control element.
to increase the time until the meeting
^{well}, that is, not to be late ^{and so} that there are no traffic jams on the roads, etc.
or to restore health in time
recovery ^{there}
^{well}, so that there would be no need later
apply more management in this regard

the history of the development of events is enough
increase
i.e. increase the duration of action
^{well}, that is , it ^{seems} to be artificially stretched
but this is not really the case

what are you doing
you are looking at your status
connected with Infinite development
i.e., you actually move into the phase of Eternity

and here is this glow
gives the opportunity to do things calmly and have time ^{yes}
for any number of cases in principle
^{well} which ones do you want to do

and here another principle emerges by the way
here is complete freedom of man
because a person who has
still a timeless level of control
as a control element
already quite free
you could even say completely free
because it controls the temporal connections of events

and what is the principle of freedom
if there is, ^{well}, at the management level
what is logically clear
but if there is some limitation of actions
^{Well}, for example, a person entered a timeless structure
through the Spiritual level ^{we suppose}

and his Spirit is free
he does the right precise actions

The spirit then begins to act in sync with the body.

Here is synchronization for example

Spirit

Souls

bodies

and Consciousness

in the structure of a kind of management

well, that is, it turns out to be personal freedom of action

i.e. the concept of "freedom"

this is the absence of restrictions, among other things

well, to solve some problem

for example, you want to do something and you still have a lot of things to do , yes

and you need to in this system of affairs so to speak

well, without keeping some kind of record book there

but just going to solve one thing to another

First of all, track events

secondly, to be able to among these

in fact they go like flow systems

perform optimization

here is a concept that makes it clear that "man is free"

chooses and makes for himself

but in order to have time so that some business would not tie me down yes

there is less significance

here it turns out that you can work it out

namely the synchronization system

i.e. when the amplitude of optical movement

Spirit

Souls

bodies

Consciousness

in general, all elements of personality

gives creative development already in time

i.e. the Soul develops time creatively

i.e. creativity where there are no rigid bends

where there is no slowdown

and then you start moving forward

well, favorable i.e. steadily calm joyfully

without any excesses of slowdowns

and it turns out that you become
you also become somehow more free
because
and given that I am talking about that freedom
which needs to be done here again
I emphasize
in this case we are not talking about that
that someone is restricting you or holding ^{your} hand
and you just have time for all these hooks
^{as if} slowing down the development of events
It's not just that they shouldn't be done there, they should be managed

and it turns out when you see the management structure
you become freer internally
this is called "internal time of action"

precisely emancipation
i.e. the distribution of your time of action
Spiritual action on Infinity
this is essentially the action
Well, logically, a free action is an action of freedom

because the Spirit
which extends into Infinity
this is also some kind of action
how to take and spread the Spirit
what kind of mechanism should work

how to make the presence of the Spirit
was in any point of the world of yours

and this is exactly how you can do it
this is one of the methods
you just need to bring out the Spirit on everything
precisely at the control level in optics
above the level of physical events, ^{as it were}
and it turns out to be synchronized
exactly in the glow

what is amplitude ^{da} synchronization
when the Soul Spirit and body do the same thing
^{well,} and Consciousness ^{and} mind, human intelligence
here is the full synchronization

and here it turns out
the Spirit that truly comes from you

absolutely free in action
it's clear that he is already free
in this case he technologically knows the way
that means he'll just do it faster, right?

then you see the controls already in the Infinite phase
here for you Infinity becomes a controlled element

then this is exactly what arises
this question and answer at the same time
that's exactly what time is needed for
to control the Infinite phases of future events

because the projection into Infinity
gives in fact the personality of a person in his action

all events of Infinity
still fall on the subject level
i.e. in the organization of the subject

what are the objects for in this case yes
physical world

and because this is the minimum transition
of some cubic spheroidal
and this is the creation of a subject area
well, the physical world
specific elements of Reality
from the Infinite Phase
it still adds up to final focuses
even optics, for example, yes

you can see how the optics focus
some external phenomenon
and see how it works there even
for example some distant star
some leaf of a tree, etc.
any element of Reality in general
for a specific example there is a disease there
for a specific situation

and here you can find out
nodal points already throughout the Universe

i.e. in this case I was talking about that
that a person, well, works more on himself
yes, in the previous part of the lecture

and now I'm already pointing straight to the controls
where in the Universe do they exist
These are possible problematic points
which need to be controlled

and here it is very clear that
where in general
from the point of view of Infinite development

i.e. the plane of Infinite time
Infinity in general
at first it is like a flat quantity

i.e. you perceive
like a flat glow coming towards you
and to regulate events specifically yours
you have to make a concentration

Well as if reflected from a plane
goes to your events
and you see yourself in a favorable light ^{yes}
this is the level ^{where} they exist as I said
already decided events ^{there}

so in order to take these decided events at all
because most people know how to solve it
what do they want

it turns out that it is exactly what to take
Well like this volume of information
So we have to synchronize and agree, it turns out
with all the Infinite development of the whole future ^{yes}
taking into account all the Infinite past events

i.e. in fact, this is work outside of space
outside of space, ^{including} physical space

and now it's clear why
God creating the World
He was outside of space and time.
because in this case
so that the event ^{would at least} take it for ^{itself}
we need ^{some kind of} form of space, ^{well} how to bend ^{yes}

because an event ^{is like} some kind of egg being glued
to such a bend of space

and what's more

Well, of course it sticks conditionally
and this bend depends on that
how far do you perceive Infinity
i.e. the more you know about future events
to sort of peel off this egg

and here is the development of the Spirit into Infinity
i.e. this is the internal vision of events
simplifies the control system

i.e. achieving control in this case
becomes faster more efficient
because the environment is more flexible
well, like some kind of fruit that just ripens, yes

or like some kind of egg
which actually has
internal and external level of simultaneous development
outside world
inner world
it's like something that will live in the external and so on.
and it turns out that we have a connection
where is available

Well as if the other side of the object of any
i.e. where does the organization of such management take place ?
for example, how to make it so that you can take it and look
on the other hand there is some object there
Let's assume this table
or look at some street
being here

for this you need to have physical vision
just to look at the slope of time
i.e. to place the visual impulse
so that it would kind of roll off
to the other side yes

optics that have a different property in visualization
not what you are looking at
linear level of perception
and take and bend the optics
just as God created space

then what's the difference
you see any object from that side
Means Well, it's like for such large masses, yes

do you want to get inside the object ^{yes}
in fact, I am now giving control clairvoyance
in essence, here is the technology
but to look inside
then you should get it
^{how to} make a transition system here

i.e. to create a level of timelessness
then the time level of dynamic time
and create so-called corridor systems
where inside you see God

i.e. when you are inside any action
you see
even if it's at a certain ^{distance}
either far or close
but it is the Action of God
how did God act here anyway

then you see the internal difference
i.e. any microsystem ^{there at all}
the crystal lattice of any substance, etc.

literally see in real time
how everything moves there, these molecules, etc.

and when do you start
from there, ^{how do you get out ?}
from this system, ^{as if a microcosm}
then keep in mind that here
very clear diagnostic system
the first sign of exit is you personally

i.e. you have logged out of the system correctly
here you still need to know how to get out correctly by the way
i.e. of course there won't be any problems
if you go out ^{there} arbitrarily ^{yes}

but to have the next level of development
^{actually like} the next level of time management
you also need to know how to exit correctly

i.e. in time management technology
there is a very important value
what is the entry trajectory

in some cases it is very important if it matches
with exit trajectory

i.e. you need to be able to somehow get out along the same path
exactly, well, on the beaten path , so to speak
and how to do it

because time moves on logic
as possible at the same time yes
it turns out to go back
i.e. logically this task
practically she well It seems like it can't be resolved or something
except maybe in some mathematical formulas
Well , it can be solved functionally, it's clear

but for example, how can a person do this?

then it turns out that he is already coming to that again
that he should do as God does
for God everything is the same
what is the past tense
that the future is there
or does He think in categories outside of time?

namely the Perception of space
and the birth and creation of space
this is enough for god

but when for a person
for example, we still need to find this path back
then this is done for that
to visualize oneself generally speaking

i.e. a person should always know
where is it located

many time systems
time has different nature
different action
different validity periods by the way
one time interval is valid indefinitely
another one there may have some interval
or the final system of action

and that's when a person is
in many time systems
even the movement of cells in the body

these are also different time intervals
for each cell
then he must work it out
element of one's own presence
i.e. in fact he must organize
your own personality

and that's when you start thinking about it
then it turns out to be work outside of time
this is the organization of a person's personality

in the same way God organized His Person
being outside of time

and it turns out that
why did he make ^{people} like himself
because the organization of personality
it's unique it's an individual process

and therefore having created Himself once
He did the same for people.
because in fact it exists here
exactly the element
as a human, ^{as if} a generally present time
i.e. time is present for all people

and if then we ask the question
this is how a person can pass on knowledge
to another person
it's enough to just go out often

in another person's time slot
and help with events
i.e. precisely with events in time

that's exactly it, exactly on the time axis
future events of man
go out
and just correlate
and that's all

Generally speaking, there is no need to often get involved in the events
themselves
there is a certain ethic that speaks about that
that so that a person, ^{let's say}, could work for an infinite time
with other people's events
it is enough to work in its pure form over time

and it is very clearly visible there
here is the axis of time
She ^{kind of} bent over a little bit , yeah
it is clear that it should be even
take her lift and that's it

and then there is no need to know what events
but if it ^{seems} difficult to rise
Can
where events are connected with Macrosalvation
some to visualize

and here is the principle of independence of man
complete freedom
Well there is a ban on access to his personal information
if she doesn't threaten ^{there} For example ^{yes} civilization to anyone

then it turns out that it is just that
is it possible to provide this system
through time work

where by isolating pure fractions of time
time production management
can you know clearly
that you make a favorable system
for human development
^{there} you heal him
you actually align his life line ^{yes}
for the better

but at the same time you do not touch at all
event picture

time and events
in this case these are different systems
time is separated from events

and only by the thread of time
very clearly defined
how is the situation developing in general ?
where should we move anyway

Well, there is such a concept
^{there} "walk along the thread of some ^{guide} " ^{yes}
it's the same here

That

well let's say in the ancient ^{epics}
a certain thread was thrown
and many similar stories
that people are moving

but at the same time they move along a certain thread
they don't visualize space
a thread is enough for them

and the same thing here
there's just nothing here
it is enough to scan with your inner eye
regular Spiritual diagnostics
In spirit, precisely
and this thread of time is visible

so here it is exactly
The spirit enters the Infinite phase of events

this is exactly a very simple way
it is enough to objectify time
but time is still wasted
at a certain level of contact
with all the events
it turns out that there is a merging point

it is clear that this is God
manifestation of God
but technologically this point exists
in any subject

and here it is very clearly visible
where is the event point ^{as if} in time
is screwed into the structure of the substance
and the creation of matter begins

i.e. time acts as a kind of crystallizer
Well, it's clear that crystals grow over time too, ^{right?}

so to slow down the growth of the crystal
or ^{cure} a person's tumor
it is enough to find this nodal level
where does it happen ^{for example}
Well ^{as if} a temporary structure of development ^{yes}
you can get out very easily

in hard in discrete phase of deceleration
then the tumor begins to crumble

By the way, this is exactly where it is used
time interval break element
where the processes are negative
it's very easy to take the structure as if mechanically
at the optical level
move apart
and you get very simple no problem
that the system begins to be dysfunctional
Well, it's a negative system.

and you don't need to study the cellular composition there for this
or something else
diagnostics of the body consists of
only in control of temporary systems

and every part of the system
it defines it very clearly
state of human time
time of a specific organ and all events at once

i.e. there is a vertical part and there is a horizontal part
that's why the cross exists
vertical is an organic system
horizontal line of the future

and well in other regional systems
there is a crescent moon there
this means a transition to forms, for example , spheroidal
in any other yes

it turns out that time is diverse
where the time of action and the time of development

i.e. it turns out that none of the religions
in essence in this case
doesn't seem to do anything well the same thing
every religion gives

a whole new level of human development

and it turns out that the unification of religions
this is the whole path
this is precisely the integration of religions
integration of creative thinking, etc.

and so here is the integration
i.e. the transition of time into space
and time management for this
we get clear control and management of events

and if possible try this lecture
use
precisely as an applied, clear control element

where do you get control
working directly with the optics of time
with optical time elements
well, and adding, for example, elements of knowledge

It is advisable to work intensively on this lecture
i.e. quickly
without focusing on any particular elements for too long
well, in terms of, for example, sorting it out there Yes
this element is complemented
the next level of management

namely, just go through the controls
as simple as possible easier faster
this lecture is structured exactly like this

This concludes today's seminar.

Thank you very much for your attention
