GRIGORY GRABOVOY
The Teaching about God
Controlling the Action of Eternity
21.06.2005

The topic of my seminar today
This is my Teaching about God
Controlling the Action of Eternity

in this topic i show
how when we reveal the information of Eternity
as such information as an area of information
we must take into account
that this information has certain properties

i.e. what are the further actions of this information
what properties should be expected from this information
and how to manage all the consequences
development of this information

the main essence of management will be exactly in this
and here it is very important to identify
personal context of this action
because when, for example, God created the Eternal World, then
what is behind Eternity
this is also a certain property of management

and then He made a fairly simple version
in management
He simply saw Himself behind the structure of Eternity.
because He still comes to Himself

it turns out that here, in principle, we need to do the same thing
consider any external element of information
Well as if any informational noise
behind the structure of Eternity
as a structure that comes to a person

that's when he starts to see
i.e. the manager begins to see
signal from this system that goes to him
he begins to do primary management of this process

and by the way in this system
structures of final actions are visible

here to determine
where is it located in the information
any final structure

then the final structure is
in one of the peripheral ones , as it were or even departments?
looks like some kind of division
here in such a fairly systematic form
it is precisely this action of Eternity

i.e. if we consider for example
that there is some enterprise there
and there are divisions there, as it were
something that was created in an intellectual way or something

then you can see it here
that we have a structure very similar to that
what do we have generally speaking in the social life of a person
these are some kind of factories or enterprises
at the socio-technological level of management , perhaps?

and we can see
where does the information for creating these systems come from?

i.e. there is an element of Eternity
and there is something that is an action

so in any management structure
in some technological systems
can be seen
how does this action occur
i.e. you can see
how are these enterprises built on information, for example?

then you can see the technological cycle
example, what violations were possibly committed there?
what can you get in management in general?

and this is where we come out
on information of the future
but already from the point of view of that
what can we get in the structure of future events as it were

i.e. we can see the future

which is controlled now

and it is from this position that we proceed
that when we are on the platform of Eternity
we must control the future

because if a person is in control
in the structure of Eternal development
So he controls the future, well it seems absolutely so

but on the other hand we have to build technology
on the system as if including some probabilistic events

and this is the level of management
where the action of Eternity is also a level of control

i.e., in fact, there is a certain area of information
which means Eternity
and it really is

and we still need to manage
and from the system, well, actually, that means as if outside this area

i.e. we can either just artificially invent it
that there is a certain area that is not included in Eternity yes

or consider that everything that exists
outside of Eternity
this is her action

but in reality the action of Eternity
this is a completely unique characteristic in general in management

because there is a person for example
but it cannot be said that everything that exists outside of man
this is a human action

here the analogy is about the same
Man is an infinite quantity
and therefore, just as human action is unique
the action of the Macrosystem is also unique

i.e. the higher the system
the more volume it takes up in information
all the more so because its action is unique

because it turns out that the Macro level

i.e. the information density is high
and in connection with this
any action is clearly demonstrated
that is why the signs of uniqueness are defined

therefore there is a system
man yes
Eternity

and how a person's uniqueness in action
so is the structure of Eternity

and then it turns out that we can find
in the structure of the action of Eternity
exactly those characteristics that correspond
well, practically human actions as in a similar system

why for example did God create in Likeness
and also created man Infinite
at the information level

because then it is easier for God to understand yes

i.e. it turns out that even He doesn't need it
as if to spend some effort
to understand the essence of man

because he created it Eternal Infinite
and it turns out that it is clear that it was God who created him
then a person

if the person there was different in some way
from the point of view of Infinite development
then here it would be possible to sort of
Well, some analytics should be used
from the point of view of the primacy of creation

but when we consider
precisely this point of view of God
then it turns out that we see
that in order to somehow facilitate
do well as if one and the same in Eternal development
in some Eternal magnitude
He had to create man.

and by similar signs
He must then determine the structure of the Eternal development.

i.e. as a universal control system
for the development of Eternity
this is the structure of a person

some kind of , well, let's say, link
or even a comparable system of Reality yes
which controls the system of Eternal Development

it means in the action of Eternity
First of all, there is a reflection

some light coming from God
on the structure of Eternity
and also the property of the Eternity system itself
is also subject to analysis
from the point of view of what a person should do
the system of Eternity will develop in the same way

so it turns out that Eternity is quite harmonious
in relation to a person

why for example can a person live forever

because it is the most natural habitat for him
as if in information so to speak

and it turns out that if we have such a habitat
we start making it our own , i.e. we get used to it
we begin to develop it as a kind of habitat

then it turns out that it's easiest for us
Well, first you have to get used to the idea
that we climbed onto this platform there
well, like on some train, yes
and then we got used to it, he goes
there is something else further on

here we begin to explore the external Reality
and what are the properties of this Reality?
how does it affect us

Well, there is Earth and there is wind on Earth.
how to connect these phenomena

the same is the structure of work
in the structure of Eternity

and are there, for example , some properties
well, like air there for the Earth , etc.

and we begin to analyze the impact on us
why is air useful to us
Well For example breathe there
i.e. a certain required attribute, etc.

same here
we can in the action of Eternity
consider the necessary systems of action
and also some peripheral ones

and it turns out that from peripheral systems

if there is a leaf of a plant somewhere far away
for example, there is chlorophyll there
maybe it is not necessary that it be in such quantity yes

i.e. there is a necessary minimum
there is some kind of natural minimum

that 's from analytics then or something like the ratio of different factors
we begin to define
that subtlety as if yes, the inner boundary of Eternity
it consists of
what if we start to cross over
into the management structure, as if in a deeper sense
we begin to understand
that from here we can understand Eternity itself
i.e. the properties of Eternity as such

then in principle we can see
life is inseparable then

this is how deeply we go into analytics
the more inseparable the process itself, for example, life and phenomena
for example, somehow accompany this life
or are somehow expressed in this life

and here, in principle, is the personification of life itself , so to speak
in connection with the structure of Eternity
we can see
that it is independent there, for example, from the level of human development
there
regardless of his status
from time to time there day there For example Yes

from some place

a person can always be defined by a system of norms
certain norms
i.e. some kind of normal system
for human life
just the norm for a person to do something

and this system of norms is the first criterion
which is the subject of the study
structures of Eternity
here in this management

i.e. why should a person live normally
so in this regard, as it turned out, in this technology
The norm allows us to explore the process
more deeply more accurately

i.e. because the human norm as such is yes
like some island that has
of autonomous level of control

it allows you to control the system more objectively
because you need to have some kind of your own boundary systems
understand what is the Norm in management for a person
well, that is, normal, ordinary social life
in society it means

and in this case we begin to see already
as if micromanifestations of Macromanifestations of Eternity
i.e. here we draw the border
the action itself

so we have found the first level yes
namely the structures of Eternity
we start looking at her pulse
i.e. how it pulsates

and here we find
that generally speaking Eternity has properties
the same pulsation level as, for example, a human pulse

well, it's true, sort of at a distance
formally, at the hearing level, or something
it looks like this
what if you try to listen to the pulse

or consider there
what it can be at the sound level
and try to perceive it from the outside

then the frequency matches
simply the number of beats per unit of time

man perceives the pulse of Eternity
just like your own pulse
but as if at an infinite distance

and it turns out that we get there
in your well it turns out organism
here is a fine line, it is overcome here
we get into the structure of blood pulsation
and that's all

here you can already see a specific example there is hemoglobin
there are all the blood parameters that exist
can be considered separately

human blood

and then we can be fixed while being
at the center of this phenomenon, so to speak, is management
assemble the organism

i.e. if you fix your attention
at this point
somewhere here we crossed this thin line
then the assembly of the organism begins, and yours

in this way it is possible to mean
and treat other people if there is a disease
if a person is healthy
then just focus on how to strengthen the body, etc.

it means the point of Consciousness
which overcomes some kind of internal boundary
in management

i.e. we were moving forward into Eternity
and got inside the body
Well, in general that's how it should be, yes
because these are comparable systems
that means there are transition levels somewhere

and then of course we should see
how to use it

i.e. we can increase the concentration
some kind of management
in some specific organ for example

we can watch
but in general, if we got there
into the structure of Eternal development
Well , there's some kind of turbulence happening on the first level

people who encounter each other for the first time
with this control
it begins
Well, first of all, by the way, they become calmer
life events
but on an informational level
it looks like a system
some informational actions in general
where stability is as if
geometric even in control space
are often connected with these actions of Eternity specifically

like vortex such distant levels
look more like some huge array of information
suddenly it drops out of the control field
and something needs to be done with it

he's a good array in general
i.e. it can be used
somehow in management
share control with him
but in general it's like an array
which requires management as a certain area

and the larger the volume, the larger these areas

and Eternity speaks about it
what arrays are thrown out
may be comparable
with the very information of Eternity

because by level
universal equality of any volume of information
information is distributed

in an event- like normalized time interval

i.e. we can say that the information is large
if it means some events
and how can it be big, for example? yes by weight
but if there are no events there are a lot of yes
what is this information

then it turns out that we can divide
some final event on two levels

the first level is what we are looking at
as a level, well, is it acceptable for us?
i.e. we consider the external world
in which, for example , a person lives there
Well, acceptable for life, yes
this is a large number of events

and here is some additional information
seems to flow or appear from Eternity
we can count
what well for example, there is external physical space
just select this volume in the outer space

and by the way you can see it very clearly here
that is really what happens in the world
division Macrosystem

i.e. it's not like there's a number of events
but the volume is just big

oh we have a lot of events
there is a large volume there

then it turns out we can go out
to the border
between the physical level of space
and for example where the stratosphere is, yes
where there is still some amount of oxygen

in this way it is possible to influence the stratosphere
increase the amount of oxygen by the way

because we found a boundary system
we don't have to go through the whole information space there
we know exactly where this point of contact is in management
and increase control enough

you can increase oxygen here for example
there in this room or there in any other environment

and it turns out that based on management tasks
we can search in the structure of Eternity
these are precisely the boundary systems of the junction
one information with another

and this joint is a universal transition
which by the way does
one information to another
by structure or something of commonality
according to the structure of universality
while maintaining the primary status of information

i.e. how to make a person Eternal
you just need to have information about Eternal development
would have a reverse flow, yes , including

by the way, powerful level of control
when restoring health to other people
the ability to translate into the structure of Eternal development
how to roll this information
in their management structure
into their life structure

after all, it is often necessary for a person to be healthy
he just needs to add
some number of specific events

and here is the translation of specific events
into the structure of Eternal development
this is enough
such a central element of today's lecture
the ability to translate means is it some kind of local event?
into the structure of the Eternal development of a given person

and here he takes the next step
maybe he is in a different place altogether
and maybe you don't consider it
that he is here now yes Means
Well as if in the control space or something

but you mean
that this space contains the movement of all people

i.e. how to fold space
how does it even happen in the collective Consciousness

it is still the combined action of all people
i.e. all people are present in the action of Eternity
at any point in space

so there is a point in Eternity
well, some kind of communicative, so to speak
where everyone understands each other
and can always exchange opinions

and for this you just need to
this influx of space
perceive as a structure not of some emptiness
and the structure of the combined action
Well, there is the Soul of People for example yes Consciousness of people

then it turns out
that we begin to distribute the management of Eternity
depending on the structure
Consciousness
Souls
Spirit
physical body

and by the way then if we consider it this way
docking into the structure of Eternity
in its action Eternity
we can clearly define
and in general where is the human Consciousness located specifically
where is the Soul
there is the Spirit

physical body

i.e. you can specifically control a specific parameter
completely autonomously, as it were

because as soon as we know how to separate
from the structure of Eternity
action
i.e. some local characteristic as a derivative

then accordingly we can
from a single, as it were, level of personality
practically without touching the personality itself

work with specific quantities
for example there by Consciousness
In Spirit
with the Soul of man
with the physical body, etc.

and at the same time in any place where we work
we add controllability to the personality, as it were
in terms of personal management

i.e. the personality gains Consciousness within itself

God does the same
It is like a quantity, let 's say in a systemic form, or something like that.
Eternal and Infinite
I have to somehow consider and perceive
proper movement in general in information

I see He does everyone's job
but then He as a Person must see
where His work takes place

and that's when God begins to differentiate
namely my own work
He sees what a person is capable of achieving
Infinite results in management

and God can differentiate by his own will
He may not differentiate, just do it
and can differentiate
what is he doing

but even if He does not differentiate
It is still perceived the same way, yes

for a person it is necessary as if well for some time in management

strengthen management
to differentiate what he did

why is it necessary to strengthen management
create the element of Eternity

because the derivative of man is an element of Eternity
it means it strengthens the entire external world

and here it arises

the first is kind of a neutral level
occurrences there well actually, any information

what can we see
that as soon as a person applies any effort
by analogy with what God does in any Action
some information arises

but the action of man is also the action of the Eternal magnitude
so when we study the action of Eternity
we study properties in principle
it turns out to be the result of one's own action

and that's when we start to see
the docking of these values
and as it was said, any level of human management
or well, practically self-management

This is where it is very important to see
not by some kind of mechanical control
and the controls are quite harmonious
i.e. management at the level of a natural human task

after all, we are talking about the fact that in the status of this management
the manager is in the structure of Eternity
but at the same time there are some volumes
which are the action of Eternity
but it is still under control
on the platform of Eternity

i.e. nothing unfavorable
in principle it may not happen
on the contrary, as a rule, the percentage is often around one hundred
is located precisely in the favorable management option

the only question is what
how to develop further analytics in general
what to do next
a person must move somewhere constantly

God knows everything
where is he going next anyway
from this point of view

He perceives this information yes
and then it just keeps on going, it turns out logically

i.e. in accordance with this
a person should engage with information further
as soon as he mastered the technology of working with Eternity
then he should consider
what does eternity do
how it develops

as I showed here there are a lot of
comparable systems
according to analytics which give a lot
significant advantage in work and management
because by analogy with that
how can a person consider completely separately
for example, the Spirit at the local level of manifestation
there is Soul
body etc.

it is also possible from a human point of view
review events

we can see from this perspective
each component of the event at the information level
in this way
what we see information
we don't need to go into detail about the events
we can see just what we want

i.e. we should get it here
To perceive what is desired by the spirit
then only Spiritual Management is enough
and events begin to move towards the desired level

here is a component of the event
we do not inform the event
because if we inform some part
kind of fixed control
it is necessary to detail the events there
consider particulars

but in order not to do this
enough through the same value
similar to how we came to the structure

Spirit
body
for example Human Consciousness
and the Soul of man, etc.

in the personal context of management

the personality always remains intact

then the movement of personality is enough
translate into task structure
i.e. it is often not even necessary to consider
the task itself
it's enough to just consider
his own personality as if observing from the side

there is a goal yes

i.e. the manager can always align
any control
i.e. it is always possible to adapt to any system

because he can always consider
its own system of ideal Eternal development

and in ideal development
personality always adapts to any system
and will always level the system to the level of the Norm, yes it works
while maintaining complete freedom of internal perception
those. actions actually

and it turns out that there is nothing to talk about
that a person can't do something there
or is not capable of something
almost impossible
it is clear that a person can always do something
what needs to be done
in terms of Eternal development

and here it is enough to see yourself
i.e. its own essence
can be aligned if available
at least for a little while
always completely in full Norm there
almost all events if there is a desire there

Well, in principle, sometimes if there is time
as a rule, this is if there is a desire, yes

and it turns out that if we, for example , begin to consider

and what kind of environment is this anyway
wish
why is it like that, for example, a lot depends there

and why, for example, does a person have no desire

Firstly, he may underestimate the situation.
well, that is, to consider as a rule, not to underestimate
but just look at some more distant events
and see Norma
and how not to react to the intermediate system

Basically, this is what happens to people by the way
here in the structure of Eternal development

It's not that they don't notice anything there
for example , they don't seem to have control over some situation
as a rule they are more
they consider future events
which are like watching a movie
and see that there are some positive aspects there

then everything in between is perceived
as a controlled environment and generally often not significant
that's why some problems arise

here is the system of desire, it is often not defined
and basically it is not defined
some negative characteristics
or there are unnecessary characteristics of a person

Well, you could say that
that a person, for example , is lazy , yes
or he underestimates it
in fact, as a rule, he simply makes a selection
some positive events
for him, from his point of view
why are they positive

just goes to them
i.e. there are no people there, as a rule, lazy
or some incapable ones
they just make a selection and people go to them

and the only task is that
why does one person or another make such a selection
that's why they form themselves

for example in the structure of Eternal Development

in fact, their own events
according to the structure of future plans and the future in fact

because in Eternity
and man is an Eternal value
His eternal essence
It exists almost everywhere
logically if he wants to look at it

he finds some layers for himself somewhere
i.e. here we get the meaning of his action
it's just in the person's character

for example God created the Infinite World
and all the time moves towards Eternal development

He does it so simply
level of self-perception or something
in human understanding
it's like the character of just such a person
I chose the path and it develops and that's it

and from the point of view of the logic of the primary election
he finds some factors that are already relevant then
Eternity means finds Eternal characteristics

i.e. it turns out to be a level
some kind of deep self-education and self-action
i.e. the level of the primary aspect of understanding one's personality
more determines human movement

and not some kind of temporary factors
or there is the ability to do something or the inability
as I said, such that a person would be incapable
achieve Eternal development
it doesn't even look real somehow
from the point of view of these aspects here are the thoughts
over the essence of man

so it turns out that it's not what it looks like
but it's really not real

if you think about the structure
even the primary appearance of man
it appears from the Eternal magnitude
it means he is connected to her

this means that there are no logical breaks in principle, etc.

it turns out that based on what we
Well, call the Eternal Value
this is what the Eternal is, such a huge space, yes

and data that the space will be modified
somehow it will collapse there too, but it's not really true
expansion is ongoing
even at visual-optical levels
between there are stars, planets, etc.

Well, the planets are more or less stabilized.
and then they move away from each other yes
even by millimeters there in about a hundred years

cyclic level there for geosystem
approximately 1 millimeter
this doesn't mean that they will burst there
they'll spread out somewhere

actually where it is
collective management structure
the balance is very well maintained
the planet may be in a state of habitation
in any system

and here is the main, well, some kind of hinge property
the main thing is the planet itself where there is life
everything else will form

here we see
what is in a person's decision-making system
after all, there is a level that is always the same
life is the prevailing
basically the only level of control

and practically we have here
in general, this is the status of management
that we need to get a practical understanding

that's why a person is in some system
chooses his own path

and that's when we start to analyze

its status of occurrence
here is the primary impulse of emergence
or before its impulse of occurrence yes

for example, you can look at the information
to the status of the primary emergence of man
well, more like an earlier characteristic in time, yes
but it turns out that we instantly get there
on the structure of man again
information comes to a person again
in the form of himself

i.e. a person comes to himself
where does he then choose the primary solution from?

i.e., here is precisely the first element of Perception
these are the elements of the action of Eternity

when he is on the platform of Eternity
he must differentiate
that he is somewhere

for example the created Soul
if we consider the moment before its creation, for example Yes
then there is the Infinite quantity
here is the transition from the Soul of God
to the structure there first creation
it's practically well Consciousness at such speeds
may not perceive the action
but it is really possible to develop the system
to the level of Perception

if we develop the system
then the gap between God and man
in the elements of creation again it does not work

i.e. by and large
no matter how we try to look
for the time before the creation there or after
we still see the structure of the Soul
The soul of a person is his physical body

and it turns out that we can see that here
this is this inseparable connection
between the Soul of man
physical body
there in Spirit

Consciousness
well generally speaking with all personality structures

this is a person as a whole
which includes all the attributes of this action
i.e. man initially exists Eternally
in a certain environment

and from the fact that he is simply confident there, let's say, in action, yes

by and large the original account
he simply makes any decisions often

here he has the opportunity to choose some solutions
he accepts them

and it turns out that right here, exactly
it is necessary to impart knowledge
on the choice of solution in accordance with the
as God does
i.e. directs towards Eternal development

i.e. in fact, we have to do management here
i.e. to teach that on the ideology of precisely Eternal development
as God shows
at the level of human language, perhaps?
human word
there are comparable actions
human actions

here you just need to do everything
not because everyone does it there
or God does it and people do it too

and because here you need to see
that this is a logically completely conscious choice
or a person does the same and lives forever
or for example it turns out that here we are
let's assume we take well how would such a management be
that he makes, well , maybe some other decision
i.e. he wants to do something else there for some time, for example

but he is on the platform of Eternity
he will still come to Eternal development somewhere
somehow it will still be carried out into this plane of control

so basically everything is determined here

it is precisely the task of choosing a person
i.e. where does he make decisions and why?

I showed it right here
what is easier to choose right away Eternal development
and develop there peacefully
than choosing some intermediate control systems

and it is precisely from the intermediate systems
uncertain from the point of view of the Eternal development
these additional action arrays arise
which often arise precisely as comparable arrays

but due to the fact that the one who stands on the platform of Eternity
the speed is very high in control
the arrays seem to move apart by themselves
or, for example, you have to do management
understand what is inside them

and this is the task of understanding
what is given to man in the form of Perception
i.e. a person always understands what is happening
at the level of the Soul
center as if the Soul actually
at the level of the primary status of the Soul organization
on a global scale

the Soul also has the status of universality of action
not only there is personal status natural

and therefore one status is always perceived the same way

and that's when we begin to enter into this status more deeply
it is clear that the Soul of a person in principle always performs a Macrofunction

i.e. the Soul is extended to Eternal development
and the task of the Soul is to the best of its ability
always work for everyone

if he starts a person is more individual or something
perform only some private tasks
then accordingly he has
some kind of a discrepancy
because the Soul can do the work
on Infinite Development
if it starts doing local work

the first problem in management arises yes

i.e. a certain task begins for a person
in overcoming this situation
or he understands logically
looks at what needs to be done and acts further
or some event situations arise there
which go beyond the level of control, as it were Yes
i.e. well, some negative situations

i.e. it turns out that
why for example God may not have from the point of view of man
some negative systems yes
in the Perception of God

because he is well for example, he chose there
the path of development to Infinity
and moves from this point of view

if we look at it from God's point of view
why does God see in a person for example Well, that's it after all
always a positive development option
exists first and foremost

because he's like Well, we can reason by analogy with that
how does God himself act

and here is the level well something comparable or something Yes
such an integrating action
where is there accuracy in the solution yes
this is perhaps even a philosophical development plan
this is still first and foremost
it is the physical body of a person

and that's when the body begins to master
namely the structure of Eternal development
in such an Infinite habitat , so to speak

it turns out that something is already happening here
community in action
and God and man

and the physical body is obtained
it's like an element of interaction
the element of integration in action
or even joint action

i.e. one physical body
this is an ideology of joint action
and the Soul of man and the Soul of God

and here it is already opening
just the inner world of the physical body
where does the interaction come from?
of the human body and his Soul

i.e. we said that in this control system
you can highlight the body separately
but there is always a Soul

where is the Soul, here in this physical body

so here is the physical body
is arranged according to the principle of unity of action

The souls of God and man

then it is clear that the body should be healthy
we need to consider the status of the Soul of God
i.e. God's action yes as a necessary quantity

Well, it's like a logical system of evidence
still to a greater extent
because man is free
he can do whatever he wants
that's how it is considered in management, yes, freedom of will means

but even if you take an atheist there
which for example there is no consideration of God's Action
and considers the action of external Reality as a certain

then external Reality is still a Macro-quantity again
and he perceives the action again of Infinite magnitude
and one way or another he still exists on God's platform
i.e. it brings it to the development platform
the one that God puts
because the external quantity has
some optical coefficient

and he does the management but just without thinking yes
he works more
in a system of some automated or something levels of control

so here is the transfer of information to the choice of solution
in accordance with that
how does god do this for such a category well let's say people
here it is a personal action of the manager
i.e. in management

i.e. it shows what God does
these people already perceive
in the integrated Infinite development
The Action of God through Infinity

i.e. you can teach those people
who, for example , are inactive supporters of Eternal Development there
or vice versa
if they suppose I'm not talking about atheists
an atheist might also want to develop there forever

the question is if a person doesn't want to be there, for example Yes
Evolve forever
he says that he has another task there , for example
you never know what the task might be

then it turns out that from the point of view of that
to pass on knowledge to such a person
it is about Eternal development
and make it Eternal
we just have to show
along the path that management follows
well in the case when with an atheist yes
he still ends up on the platform of God's Action

and here to show exactly the path comparable to that
that his opinion will determine the same path for him
Eternal development

but man is free
how can he get to the platform of Eternity
if he doesn't want to or doesn't know there yes

if he doesn't know, it's still a specific question
he doesn't know, but he will live forever anyway
it may not be and it does n't differentiate
For example there a person does not ask a question lives forever
and that's all
it doesn't mean he doesn't want to

and another question is what if he doesn't want to, for example

then it turns out that here
Well, the manager knows the structure of connections, for example Yes
must be very clearly defined
the next path of development of such a person is

that when he is out of the system
it is still in the structure
Well, here it turns out that Eternity is acting

i.e. if he doesn't want to be there
in the structure of Eternity itself
that means it is in some neighboring one
and the neighboring structure is the action of Eternity
precisely in a unique understanding , perhaps

i.e. Eternity always extends into that system
where should it be yes
as if it chooses its own line of development

but where can she choose
this system line of development

only where the system has not yet been mastered
it means exactly in the personality of that person

who does not want to live
maybe even there right now
Well For example there is a man speaking
he's tired of living there, yes For example

and sooner or later this structure will come to him
it will flow anyway

just for example if here is the development structure
for example, from the point of view of reincarnation, yes
this is the philosophy of reincarnation
that cycles are being worked out
development processes are being studied

but the structure of Eternity flows there
as a system for solving problems
i.e. she still flows into his life
from one side or the other

so here is the structure of Eternity as the action of the system
Here is how I would logically explain it
what if even he doesn't want or he denies it

Human
it will flow to him anyway
as a system that develops into a structure
well, in the one where, for example , the properties of this system do not exist

i.e. to move away from Eternal development
even the one who doesn't want to can't do it
logically simple even understandable

and therefore it is as if his point of view is that of such a person
it just doesn't match
from a logical point of view
this process of Eternal development
to what is happening in this World

i.e. the person simply doesn't want to do it
by studying the Laws of the World
but nevertheless it will still be there
in the system of Eternal development

Means
i.e. we considered in the case of a person working
in the structure of Eternity
or it doesn't work there, doesn't know
but he is not an opponent , let's say he is ardent

and another one, for example, doesn't want to be there
but in any case we see the development of the Eternity system
in all systems

just the one who works, he lives forever and that's it
and in other cases it takes time
so that these people live forever

because the educational path
they will still have the same one

seeing that the structure of Eternity is constantly flowing towards them
they see it as an inevitable Reality
and there's no escape from it anyway
they will still be forced to go in a circle
and master the same basics there

they still have to learn the basics
i.e. those who don't want to, they will still have to learn

the basics of a sort of initial system
where are the final elements
are not yet part of the structure of Eternity
well, i.e. study the properties of the system
from the remote elements of Consciousness

and it turns out that outside of this system
there is a fairly global system
i.e. logically, if you understand it there, feel it out, as it were
that this entire external global system
this is the point where God touches
with a person's personal perception
from the point of view of that
where does Eternity itself begin anyway

here we have come to the characteristic of the border of, as it were, Eternity
which is Eternity itself
how can I even understand this
how is Eternity perceived in general

so this is precisely the Perception from the Infinite magnitude
where God touches the border
and the border turns into Infinity

i.e. Eternity is perceived
from the contact of God actually
and a person
by and large

here's an example there is the front of human Consciousness
as soon as we showed that Eternity is everywhere
even in those personalities
who, for example , doesn't do this there ?
and even in those who generally interfere there, for example
they are still there
in the structure of the movement towards them of Eternity
sooner or later they will end up there

and this is the border control system
this is still a pretty serious level
this is how we perceive Eternity

that's when we come to this point
the stability of the world becomes almost absolute
in management

this is the stability that God gave to man, but
but to which, due to this level of technology
you can come at the level of Consciousness

and that's when you're at the level of Consciousness
come to this
all phenomena of the World become transparent
completely harmonious
in terms of Eternal development

you can any phenomenon
to give a certain level of knowledge actually
you can basically know for sure
what needs to be done
for any value of the given World

and then it becomes absolutely clear, well, understandable
why the action of Eternity should be studied
well deep enough yes
at the natural level of control

what happens in nature as such
ability to see interaction
elements of Eternity with each other so to speak
or with Infinite level of other elements

and see how matter is organized in general
in this system

after all, it's not just matter as information
In principle, it is not difficult to see this

you can look at the information
and see how any substance grows

and what is meant is
as in the dynamics of interaction
these basically complex systems
the area of matter is emerging
which is cultivated by other systems

because if you take this point of view
go to
Generally speaking, consider yes
this Reality of the World is simply

then you can see
as from a large number
various information objects
various systems
any other system grows

and this is already Eternity in dynamics

i.e. it can always be proven
what if we have there
comparable number of elements of Reality
well at least visible in the first impulse of control
then you can always have a whole there in a favorable development
physical body
Spiritual level of management
level of development of the Soul, etc.

i.e. it turns out that with an infinite number of events
a person already lives forever
because there are many events, i.e. the opposite level

action of Eternity
leads to what we see
that the growth of matter is unlimited
while maintaining the primary status

this is how god controls all matter
He has His only status
and that's all

i.e. maintaining a single status
allows you to control all matter
This is by the way the Law of growth and organization of this substance
due to the interaction of neighboring areas
which are precisely the structures of the action of Eternity

it's like some kind of construction mechanism
well, that is, such a variant of a completely distant analogy
what if there is some kind of electromagnetic field there
that is, the generation of current and electricity
as a result the same thing
elements of the action of Eternity have a certain result

for example human tissue yes
or generally speaking any fabric can be identified
in management

but what is important here can be seen here
whole person context

i.e. management
future systems of any person
from the point of view of its Eternal development

i.e. it is always very clearly visible
what in the future a person needs to improve there
so that there would be a more favorable development , or something like that

and from the point of view of systemic action
often this is a unique opportunity
to be able to from the elements of the action of Eternity
get a completely systemic future
development of any person

for example for people who need health improvement
this is a specific, absolutely clear and unambiguous path
achieving results in management

Well, whoever is healthy has the opportunity to receive this
more events
i.e. due to the fact that health allows it
have a certain stable phase
in management, etc.

and it turns out that if in an inseparable version
i.e. to provide a person with what is needed
and Eternal health
and the Eternal Event
it is precisely the comparison of the elements of the action of Eternity
when a person is found
on the real platform of Eternity

i.e. a person feels it
and as a technologist who works
with the structures of Eternity
he is already in this management

then we close the complete control system

i.e. as God does
He also has Eternal control.
and also interacts with investigative systems
which give Him the structure of Eternal development

then in this system
having a whole physical body
that's exactly where it is
An infinitely developed information system
can you please as if developed on an informational level, so to speak

it is possible while being in the structure of Eternal development
have from any systems
which do not belong to the system of Eternal Development
and are considered as an action of Eternity
get absolutely clear
coordinate system of Eternal development

i.e. any element in this system
and in information management
gives you absolute accuracy
and a perfect identity, as it were , to that
that being in the system of Eternal development
with any element
you also get Eternal Development

and that means you are no longer wrong, yes
you can't go wrong

i.e. whatever you do
you are still in Eternal development

This is where I end today's seminar.

Thank you very much for your attention
