

GRIGORY GRABOVOY
The Teaching about God
Mind Level Management
02.06.2004

Hello again
The topic of my seminar today
This is my Teaching about God
Mind Level Management

This topic is about
that the mind of a person, for example
or the mind that perceives Consciousness, for example, of a person
this is a certain area of information

and when we speak
about a specific level of mental activity
then first of all we mean
what is this action well let's say some information

in this regard, when it comes to the action of the mind
then first of all it is a certain highlighted, let's say, information
region

in general, you can still see this here
that given that this area let's say Yes
it is in, well, practical application, so to speak
somewhere in the first level in a very approximate phase
for the Perception of Consciousness

i.e. Human consciousness is divided
to the level of Perception of the mind
those. action of the mind

and Consciousness
which perceives as the first fraction

i.e. the concept of "mind" is constantly increasing
the area of information is actually

and it turns out that when you want to consider
it is precisely the action of the mind
then here first of all you are considering
the work of all systems of the human body

well, i.e. the instinct of self-preservation
element of self-preservation

self-preservation action according to logic
or health improvement, etc.
i.e. elements that provide
for example, the vital activity of the organism

and considering that this is an action
this is still a more general action
where there is action of the Spirit and Soul and Consciousness
and the presence of God
in each element of the action

then it turns out that it's the mind
this is the expression of God in human action
but precisely in relation to the Infinite development
where human development is ensured

for example in the system when a person is resurrected
then here the action is precisely at the level of the mind
first of all it is his own way
i.e. his path is his action of the mind

i.e. the mind as an element of action and as a platform of action

and it turns out that this is the concept of "mind"
as a field of information
it is still an action of the body, yes for example a person
or the action of any physical object
but it is also an action, as it were, in essence
the mind itself as such

i.e. in this seminar
It is necessary to highlight, strictly speaking,
information of the mind as such
there is some information and it should be highlighted

i.e. I can say what is there
the action of the tree it grows yes
there is a level of tree information dissemination
in general information
this is a certain level, just specific
in optics this is expressed as glow

here is the level of the mind, this is the allocation of this sphere
i.e. the sphere of the mind

and when we talk about the development of the mind
for action, for example, according to Macrosave
then we can talk about development
in the formal sense

i.e. about development as such
this area of information

for this this sphere must first be
generally speaking how to close
because the sphere of the mind is the Infinite sphere
and as a rule it is at a dynamic level
defines
the structure of its external and internal connections

i.e. the sphere of the mind is an autonomous sphere of control

and in order to apply this control technology
precisely by the sphere of the mind or by the action of the mind
it turns out that well, such a concept
as we suppose "action coming from the level of the mind"
this is an action where the sphere is selected
this is also a special job
and the work of the individual

selecting a sphere is an action
which ensures endless development
provided that a person, for example, can not get tired

well, that is, he is like this let's say it can build
structure your mind in this way
that the mind determines the structure
it means solving some problems
in conditions when it is ensured
let's assume the next level

for example, you can solve at the same time
Infinite number of tasks
but in this particular case
track each specific

i.e. this is the task of the mind to be able to
in this technology
in my Teaching about God
and it is precisely the actions of the mind or actions through the level of the
mind

we can see every task here
in intellectual manifestation
or like this let's say in an intellectual way or something incarnate
through the structure of the dynamic system of Consciousness

this is when we work with the information of the mind
then here is Perception for example of Consciousness
this is the level that is generally speaking valid
i.e., as a rule, there are no static systems of Consciousness here

and if you want to see
how does Consciousness work in general
then you must work with the information of the mind as such

it is not necessarily only the human mind, for example Yes
it could be some smart action
or information of the mind as such generally speaking

what is there in this understanding then
in the fundamental sense of "mind" we say Yes
this is the action of Infinite development
one of the properties of the mind
what other properties are there in this understanding

this is an elementary human action
in conditions of its safe development
also generally speaking a function of the mind and so on.

i.e. we can highlight
many human functions
but from God's point of view
the mind is an action in relation to God too

and generally speaking initially
autonomous property of the mind
this is the contemplation of God as if within oneself

i.e. as soon as you see
that it is still an autonomous sphere
let it be as if close to the system of Consciousness yes
the first wave can only grab a segment of the sphere
the second wave seems to round out the sphere yes
close by force of will

then you see that the mind is the information of a person
but at the same time contemplating God in her understanding as if

i.e. here is a distant property of the mind, as it were
Well, what information is outside the body?
this is the Perception of God
but an element of one's own Consciousness

i.e. it turns out that the concept of "mind"
this is actually an element of work
your own information
but at the same time so that your information
is not separate from your personality

and it turns out the mind allows it
close the system of external connections
with the system, for example, of development of the physical body
or physical Reality in general

i.e. in this case you may not feel the gap
between the physical body
and for example information as such

then it turns out that well let's put it this way
you could say "smart perception of any system"
so this is the ability to manage in an inseparable connection
and one of the functions of the mind
it is an unbreakable connection throughout the entire management

i.e. when you focus on the mind system
or on the task of developing the mind
in terms of achieving some action
then it turns out you can
First of all, work continuously
only on this property

and in the treatment of very complex diseases, for example
or some achievements of goals
very prolonged remote or there complex
constant action is necessary

and here is the information of the mind if it is placed correctly
it works constantly as if by itself
because
that you set a task for example on cells
Well, if you set a task, it means you already have it, right?
at the cellular level

further information of the mind
starts working and acts as if by itself
in this case
even when you're doing anything there at all
other, it would seem, tasks

although in the information of the mind
there is a substructure of your action
when you are doing other tasks
for everything is also an action of the mind

i.e. the action of the human mind
comparable to the Action of God in Infinite development
God is in control of everything too yes

it turns out that the mind is in human perception
this is a manifestation of God

most means smart
Well, in some pragmatic sense, I guess
in some situation, yes, the one who showed more intelligence , let's say
you can't say that he, for example

it's not about that
there anyway let's assume there is some smart guy in action
it is not necessarily about a person in this case
well, some object of information

and then it turns out that he is showing intelligent action
when it acts completely comparable
with God
i.e. he understands God in real time

and it turns out that his actions are identified
with what God wants
then he acts as smart as possible let's say Yes

and therefore if from this point of view
lay down the control object well let's say in Infinite Time
then in smart action it can be achieved

here's how to achieve some control object
it is really true when it comes to Infinite development
and we want to align in Infinite time
let it be there billions of years ahead
some elementary action

i.e. consider a comparable action
with what we do now
there is a hand movement or there we drink a glass of water, let's say Yes

then it turns out that you can see clearly
identical action
possible from comparable systems
and the mind is a system of constant comparisons
this is also a system of permanent solutions yes

and it turns out that interaction occurs in the mind
with a colossal amount of external information
any element
and therefore it is debugged there
comparative action technology

if you have for example there is some action there

Now
then you are completely due to the fact that through the structure of the mind
make gradations based on comparability criteria
i.e. some large optical element
this is for example there is a big universe there, yes, of course

elementary action is another sign
information element

and you immediately find yourself
in the structure of the actions of the human mind

i.e. you don't need to suppose how to do it
some special control
in order for the action to be controlled, for example Yes
and highlighted very clearly
i.e. absolutely identical to how you are now

i.e. the mind is always aware of itself
in any situation
the mind is aware of the structure of the physical body

and therefore one can always say
that a person perceives any information
because it is necessary for God

and from this point of view
a man always has a way

get God's help at any time
because smart action is comparable action
This is an action related to the development of the mind
towards the knowledge of God

and when here we, for example , highlight
from the Infinite Control Faction
that we can influence the situation
for example in Infinite Development
then we get the property of Infinity
here it turns out to be a kind of a short circuit
Infinity closes in on you

to understand Infinity
we need to round out the structure of the mind
i.e. to direct to yourself

because as I said
in information
the development of physical space is like this
that when you work with the mind system

you may not have
at the level of the first wave of Perception
the gap is precisely between matter and information
physical matter and information

and therefore the structure of the mind can be achieved
actually Infinite status of the development of the World

and if you look at it like this
then the whole physical body of a person yes
is located , as it were, beyond the level of achievement of the person himself

i.e. after all, God originally created man
completely free
and generally speaking, unattainable for destruction

and so if you want
restore health in this way
it turns out that you need to develop the structure of your mind
mechanically and optically
optical wave
into the structure of Infinity

see the structure of a person
This is a powerful restorative mechanism

because one touch is enough
waves of the mind structure to a person
and you act the same way as God acts

i.e. you take it to a zone where there is no structure
as if external information of this person
i.e. it is restored because
that it is in the optimal control system

so in the system it means well, get healthy
associated with the restoration there
under some supercritical conditions
it is enough to simply take the area of the mind on information
and spread as if from above to close this information
this structure
powerful regeneration begins

here is the most intense regeneration
maybe when you are dealing
with super fast action of your mind anyway
i.e. then you comprehend the technology almost instantly

and when exactly do you work
here is my Teaching about God

where it comes to control through the structure of the mind
then here knowledge is an element
as current action
and the element of action from the following system of knowledge

i.e. at the level of the mind
it is possible to have a prolonged system of knowledge
receive as a stable system

i.e. it means that you can always
know the next action
in a calm, as if analytical, version of reasoning

and if we are talking about management
as about the Infinite system of events yes
which need to be managed
that is, direct control
there is technological management

and so that analytics does not hinder management
i.e. the analytical control by speed was the same yes
like direct for example

in one impulse ^{yes} control

then you get the structure of the mind
must have the same properties
as a structure of one control impulse

and it turns out that this is ^{generally speaking} a technology
which needs to be implemented

i.e. it turns out that you should be able to
concentrate
around one task
performing all the tasks you have at the same time

i.e. actually compression
into this ^{super} -intense sphere of glow
this is actually a task for your development ^{in general}
where all tasks are concentrated on one

and it turns out that by solving one you solve everything

i.e. then it is enough for you to choose
the most optimal task, ^{perhaps}
which now requires a solution
why exactly optimal
because often due to solving one problem
others are being decided

May be
^{Well,} as a rule, a person chooses
the most difficult tasks

God equalizes ^{all} tasks at once
and solves them simultaneously
due to the fact that he only needs
solve one
everything is solved at once

and it turns out that here we are already approaching that
that this super concentrated light
which ^{means} it arises
when concentrating, it is precisely the will that is obtained
This is the light that a person creates himself

This is where I came to the conclusion
what is the fundamental point in today's lecture
consists of

what we will say during the seminar action
when you simultaneously perform control
according to their tasks
you create an element of light
i.e. the light created by you is new light yes
light having other qualities
depending on your Consciousness
from your statement of the problem

and when you start moving this light towards yourself
then it turns out that you create
own structure of mind
i.e. you will be able to create that mind
which acts, so to speak, in a prolonged manner
how much time is needed
in the canonical system of action
i.e. what you know yes

he can master
if you track its development on optics
any external information system
Well as if a self-developing system
and at the same time adapt yes
the form of adaptation will be the same
it doesn't change it spreads
in your own image and likeness

and when you start watching
that form is originally God's form
it means that a person is always absolutely sane

he can always perceive accurate information
can always find the right way
from smart action
because it is an action
is built into its development system

if for example he knows it
then any system including some diseases
he always has time to even it out
Always

because the mind is the prolongation of time into the future
the mind is always a directed action
still on solving future problems

because if we determine

the most basic properties of the mind
it turns out that the mind is constantly forced
solve some problems mainly in the future tense

every second that follows is already the future
i.e. this it turns out it exists
all the time in the future yes element

why did i highlight it right away
as a future management system
and as a stimulus that is as if close to you
and as an external system

because the future
it is always some external system
which needs to be dealt with

and when do you start tracking from here
here's just my personal characteristic or something
in the action of the mind
here is what your own mind is for example yes
how to develop it at all

but there are elements of direct vision, yes
what is it
what a person sees directly
this is also mind naturally
information processing element
i.e. direct vision too
as an element of action, precisely at the level of the mind

I'm talking about the level of intelligence now
where control takes place

sampling of this information level

we can in principle choose
for example the level of Consciousness yes
the level of , say, the action of the Soul
but in this case we are talking about
what is for example and the action of for example the mind of the Soul

i.e. the Soul has the same function
like the physical body , yes
in the Image and Likeness again

i.e. the Divine principle extends to the level of that

that the Soul is generally absolutely smart in essence
but it can highlight in external information
the same faction

at the same time the Soul is always in you
but you see its development in Infinity
where it is clearly indestructible

you see that the Soul is indestructible
because her mind is so developed
that she has a Divine factor of origin

and then you can consider
at the dialogue system level
there is the mind perceived by Consciousness yes
and the mind that comes from the Soul
but as if a prolonged feeling
which arises similar to well for example, it may be like this
that a person experiences some feeling of melancholy yes
by some element of information there by event

but melancholy can be beneficial
he takes it and comes
or in general solves this issue in some way
or calls somewhere
or is it something else
related to some objects of information yes
in the form of, let's say, some action

then here is an element as if let's say melancholy or an element of joy
melancholy as a more distant information system
where there is a sign of the mind's action
those. analytics yes shown
joy is an open property of the mind

if we are talking about a person wanting to drink
it's like a physiological reaction

then when we look
on the structure of the Soul
then we see that the Soul is constantly moving away
from the level of melancholy
let's say it is not natural for the Soul to receive from God
as if Well, some of them can't even be said to be negative
these properties yes

there "to yearn" cannot be said to be negative
but nevertheless it still doesn't ^{seem to} correspond to that
that the Soul should rejoice more
from God ^{yes}

so it turns out like this on the one hand
when we analyze
well, at the logical level of a person
which ^{is not so much that can be said} in general
that this concept is not scary at all
just a person, ^{for example,} can get sad there , ^{yes}
afford yourself

but nevertheless we can find
what does the Soul ^{mean} in the development of this sphere
starts moving in the other direction
i.e. to move away from this sphere into the system in the control system

and here it is
she shows the properties of her mind, i.e. intelligent action
i.e. the Soul is meant as an independent level
building your own personality

then you see that the construction of your physical body
absolutely clear smart i.e. specific work
where is the expression of the mind of the Soul

and when you start to see it
do you see a connection between, ^{for example,} such a concept
as "Soul Consciousness" although this Consciousness is simultaneously yours
and then you select inside the object
intrinsic property
i.e. you actually allocate the system
on which you build a management position

i.e. it turns out that way
and the control system and at the same time you build it
this is precisely the light that does not contain ^{any} burdensome events
i.e. light where there are no problems ^{at all}

Light of Infinite Development

i.e. you have now come to the conclusion on a logical level
well , and also on a spiritual level
what can you build
light of Infinite development independently
by personal action

acting as God does

and when you start thinking from here
that everything you built
this is the Action of God

Well, from analytics, yes, this really does exist
one of the Actions of God aimed at that
so that a person understands the structure of the interaction of the mind
for example, a person and a mind of the Soul let's say
in relation to man
in Perception of the mind
and he can see that it is always possible to develop the mind
to the level of mandatory action

i.e. it turns out that we can quite see
that the mind always decides the question

i.e. we can always develop it
to the level of any action, generally speaking
and any level of development
you just have to look at it
this is precisely the structure of its development
well at least on the optical level of perception

i.e. actually identify
its local there regional position
in information
at the level of glow

so it turns out that as soon as we highlight
it is a property of the mind
skill, well, like the ability to manifest in the optical phase
and tune in yourself yes
we are already approaching the structure of the development of the mind
as a general mechanical control model
normal light pulses yes

and then we don't need to think any further
it means the way we built it
it is the light coming from a person
Light of Infinite Development

we don't really need any more
it's like constantly thinking about some problem
it is enough for us to see this light
development of the management structure is obtained

from the level of mind

and then we see
that this is a connection with the Action of God
and we begin to solve the next problem
because God decides all the time
increasing number of tasks

and to solve them you need to constantly think about them
the management structure is obtained

and that means a person should do the same
be able to handle an ever-increasing number of tasks
as the number of events in the World grows
he must be able to do it in analogy with how God does it
consider the structure of the mind but already God
in relation to a person

i.e. what is the mind of God from the point of view of man yes For example

how does a man see the mind of God when he has known
some development properties, for example, of one's mind
from the management point of view, it is

in this case we are talking about
what we can control
level of development of the mind
to the extent that, for example, it is necessary, yes
for the sake of universal salvation, let us assume

or in order to understand
that universal Salvation
it will definitely happen in any case
this knowledge already exists in the structure of the mind
because in this case the words are realized
and future designs are being implemented
the mind contains
the whole structure of future situations

i.e. it turns out to be a reflection of your Soul
who knows everything
in the event system
the mind intersects with events specifically
and it is enough to work from this level
and you will see the action

as I said

intelligence is a general concept, among other things
and not only there is the highlighted geometric
it is
and action
and events
and external actions
i.e. it still exists as a certain
generalized-average frequent phenomenon

and here we understand
that here is the mind of God, it is precisely manifested in that
so that you can see your specific road
and you saw which path was implemented specifically for you yes

i.e. it turns out that the mind of God is that
what is directed at you initially

and God is always absolutely smart
from the point of view of any person, for example
and from God's point of view He raises the question of
how to develop well let's say it's a smart move yes
so that a person can understand it

it turns out that God creates the mind
and the mind is a manifestation of Reality too

i.e., for example, there is the concept of "smart reality"
Well let's say the structure of the machines is related to that
which can be attributed to some smart actions yes
some kind of robots, machines, etc.

but it turns out that it is primarily a smart action
this is the whole universe
to create , for example, a machine that does not destroy a person
this means that all elements of Reality need to be created
put into the structure of the machine
i.e. somehow yes Well For example there are microboards, etc.

and then it turns out that when we talk about that
that when the whole civilization developed
Well for example, according to the technocratic principle
and some machines were created there
This is of course still a benefit in essence for civilization
until the moment when the system of destruction begins yes
specifically aimed at a person

then it turns out to overcome the system

already in post factum that there is such a civilization

we must be able to somehow decipher all systems
preceding well let's say there are no smart actions of technology
conditionally "smart" if we are talking about destruction
if it helps a person, then it helps a smart person

i.e. smart technology that helps people
which does not correspond to this property
then it seems to be aimed at destruction yes
differentiation is very simple

the mind gives qualities that are nevertheless personified
external system
intelligence as a characteristic is still personal
mainly acts yes for a person

it turns out that the properties of the system are immediately clear
by one sign
smart action that creates yes
with a person or helps
and some other yes let's say

Well let's assume here rather
it is better to make such a definition
as an action
which does not correspond to the concept of "smart technology", so to speak Yes

and then we see that technology can develop in the same way
in information practically
as an action, for example, of the level of a person's mind
but aimed at for example there is knowledge of nature
i.e. technology can also develop according to its own laws

and therefore it is possible to control the equipment
break
between the action of the mind
space
No
there is the same optical expression of smart technology
and the management goes well there actually
how does the light channel arise
all technology is a light channel
connection to the channel is in progress control of equipment
All

so that some fee means for example it worked somewhere

output the connection specifically to the smart channel
i.e. assistive technology
and that's all

if some technique

Well For example there he behaves aggressively
then it turns out that in this system
she can't reach you
because the properties of the mind
these are properties identical to the Action of God
in a person
in the Image again and Likeness in action

and it turns out that the action of the mind
this is still a generalized action
and God and man
and then the person is protected
because he, for example, is at the expense of there
some kind of intellectual reproduction
makes some kind of equipment

i.e. any type of equipment
it still won't be able to destroy a person
Well, this is the Law that was derived from here now

and it turns out that the management of the external system
this is a guaranteed task for Infinite development

it's not just about technology
and about any systems of intellectual reproduction

i.e. mind and let's say an intellectual system
find another system based on certain characteristics
which correspond to the development of life in Infinity

and it turns out that any system that does not correspond
it is outside the scope of further development

and here is a person who, for example, has a task
well, there is someone to cure or do
some let's assume necessary action important yes For example
then it turns out that he
or it could even be some kind of information object yes
not necessarily only a person

i.e. but in the particular case when it comes to

about a person
it turns out that he immediately sets the task
assemble a level of intelligent systems
which work in terms of creation
let it be technical systems
let it be an event
or is it an expression of other people's personality

that's when it comes to other people
it's a whole individual world

and here is the management through the structure
let's say when another structure yes
how a completely unique world is created
does the same as any other person
so that, for example, there would be no global catastrophe
This is where the simplest principle emerges
that the management is going
from the Soul of man
and from the Soul of God at the same time

i.e. in this case a person sees
where very close yes
or literally touching his Soul
the light of the Soul of God comes
i.e. he already sees the True Light which is Eternal

but at the same time until that moment
he also created such an element of light
and he can compare it

and when he starts to compare it
he can improve it to the properties of the Light of God

and then there is a merging with the structure of the Light of God
and man sees God directly
and then he no longer sees the difference
i.e. for him any matter becomes controllable

i.e. it is not just Perception anymore
where there are signs associated with matter
physical and informational
they basically level out, yes
and this is already the Reality on which he is already located

when he is already in this Reality
i.e. in fact, God's ray and stream

he is so, in general, you can say that
where did it originally come from
this is a close place, a place exactly to this

i.e. when it was already created
and that's how the Soul of God platform actually is

and when he sees it
it is almost completely protected
already in Infinite Time

because that's how it was originally created

only when he had already begun his further movement
he started getting into some kind of eventful situations

so here it is very easy to control the past
you can always structure your own development
look at how the structure is very well like fast

why is there a very simple element here
what can be considered without frequent and long-term consideration
the structure of some previous actions
always align future actions to Norm

because once you actually come
to your own platform
i.e. where were you from ? well, actually, or something
sent by God to solve their problems
then here is the level of a person's mind
it is precisely in the level of management from the level of the mind
you can always highlight
well, this is like a launch pad
i.e. the border

Well, if you tell a person
that he was created by God, for example
at some specific point in time
then here is the platform allocation
where was it created anyway
where is this specific construction in the information yes

that's what I'm talking about in this case
what is the Soul of God manifested in the mind of man
i.e. the huge Soul of God
manifested in the structure of the local da
in the autonomous structure of the human mind

and the mind itself
he actually localizes his place in general
i.e. he finds a place for himself

It is achieved through one's own mind
man finds the place of his creation on his own

Moreover, he can appoint
at a certain level of development
he can assign this place as if after the fact

therefore its place in the current Reality

a person can always redefine for the better

because in the geometry of optical systems everything is very simple
starting point leverage principle yes in management
the initial glow determines the following
if you want to move the event around you
to the side
change your place of origin

and then it turns out that you can
on geometry just move
docking axis yes
Well, that's how spaceships dock
at one point
you take the docking and transfer it
and that's all

but this is already an action from you
this is actually a request to God yes
to reorient your management system
Well, let's say for a change of events for the better

it turns out to be a smart and intelligent action
you create a system for yourself in management
completely under your control
i.e. you carry the glow of the Soul of God
it is precisely knowledge given precisely by God
personally to myself already in the Soul
and you start working autonomously

just like God does
He works alone, yes, from the very beginning.
but He also gives it to collective management

He teaches everyone

and it turns out that when you
for example, you make the control come from you
you must know
how God wants to impart knowledge to you
then you understand
that He gives complete freedom in knowledge

why does god set the task
absolutely complete knowledge
because there is here
namely the level of the next character
that without the possibility of complete knowledge
knowledge still can't be final, yes
Well, I mean final

so that the Eternal development will always be like this let's say Yes

and Eternal development is still Eternal knowledge
this means absolute knowledge after all
according to the ideology of the current time

You should already know almost everything
to ensure
from the point of view of Eternal development
your next level of action

i.e. in fact we are talking about
that due to the allocation
as if such an active selection
fractions of your mind

i.e. you take
at the same time, of course, you don't touch anything mechanically
the mind develops into the future
the Infinite Development faction stands out
the entire concentration of all events is taken

the mind can work
as an element of the volitional aspect of the action
like some well what is a lever ?
as a certain element aimed at that
what if, for example, you look at the action of the hand
this could also be a comparable level
i.e. the mind can act everywhere yes
just as God acts everywhere too

and when you start moving towards yourself
faction of all Infinite events
you can bring the knowledge that is there closer
by sheer intellectual action
i.e. to decipher as if by a smart action
or just consider
Here unpack even closer for many people
the term will be "unpack"
because they are just a condensed system of knowledge
and that's all

and you are developing normally
because you know for sure
that the future is almost completely controllable

and when you come
to the system of control of the future
it turns out that the task of control is initially

not only your personal task
but the task is generally speaking for everyone

i.e. everyone should be able to control the future situation
then there will be a more balanced development
and ideally then everyone becomes absolutely free
when he knows the future, for example, his own
helps others
and others know too yes

then it turns out that there are people there
for example, they cannot collide on the sidewalk
the reason there is some kind of trauma yes
this means the cars won't collide, etc.

i.e. such a situation arises
that with the Infinite development of the World
for the Soul of God already shines directly into the Soul of man
i.e. it practically already has the same light
man yes
already coming from him
but which comes to him from God

i.e. here is an element of light coming from a person
and the light coming to man
it turns out that it is comparable in external observation
as if a continuous stream

i.e. people communicate directly with God
in real time
in this case, communication occurs in their own action
simply in the manifestation of the mind
or in the realization of the level of mind so let's say Yes

manifest property of the mind
how information is meant
this is an action aimed at that
which, unlike for example,
Well let's say some kind of ordinary intellectual action yes
I'm telling you in this case about the structure of the mind
which is distinguished by the Consciousness faction
as an element of information a certain glow

i.e. in today's lecture
try to highlight
it is the mind as an object of information
again, that's what I'm talking about

and when you start to highlight it
then you see the properties of its development

it turns out that the glow goes to God
and the glow coming to you from God
from an outside observer
this is what you always act in sync with God

and then he can quickly learn
and act in the same way, for example
just by lighting everything correctly
a channel of sorts of contact with God
in any action, moreover

and it turns out that the mind is transmitted yes let's say from God
this is a collective mind after all
because the general radiance of God
God as an inseparable unity of virtually the entire World
although the One Body of the Physical God
can be located in one place
but in reality all the rays go to Him
and His Action is directed to everyone at once

but since God created everything

so here is the maximum level of intelligence, ^{yes} it turns out

and people then already go to the level of smart action
in Infinite Development
because they are connected and focused
at the highest level of intelligence
where there are no mistakes at all, ^{so to speak}

and when they already start to approach
to this information object ^{yes as if} externally
Macroum which is, ^{for example,} a manifestation of the mind of God
and then they get special technology
are part of the collective management system
i.e. well let's say collective mind

but ^{in general} the properties of the collective mind are very simple
by primary signs
what is ^{this} concept of "a level of common sense and intelligence"
it is the absence of destruction in the first place
absence ^{means} movement towards a global catastrophe, etc.

these signs are also highlighted very specifically
and here is the intellectual phase of the mind
which is ^{sort of} engaged in this process
it is very clearly visible in the information

and getting closer to this information
it's a process similar to that
what a person when he approaches
to the level of its primary creation
he can influence
he can mean to influence
to the level of collective intelligence
because from here you can see
all platforms of creation of all people

i.e. here you can give ^{well what kind of} recommendation to people
engage in Macrosalvation immediately
from the level of its creation

i.e. give ^{well should} we say that knowledge is given to people
so that they would initially reorient themselves ^{or something}
who wants to do this
development system specifically its own
that they are so mobile
that they can ^{actually} even choose
point of your organization in the current time

and it turns out that then they can very well get it

Well let's say collective management

because you can them

to show at the level of the collective mind

how did you do it personally

i.e. you saved someone there, cured them there, yes

specifically a specific person or people there

or for example resurrected

just saved by some action

and this information comes to that

that people start at a collective level

understand in general how this mechanism works

but for this you need to get closer

to the properties of the mind

i.e. what is meant is the collective mind

where is the level of intelligence

this is a collective universal action

for example, this is often the case with Orthodox saints, for example

actions were shown, even seemingly simply social ones

but they are interpreted as acts of miracles

because social action

can also be manifested at the level of the universal mind

i.e. you can, for example, draw a picture

and it will be very good

but access for example for example local yes

if we bring it to the level of collective intelligence

and draw it there actually yes

then it acts as a general control system

if it's a beautiful landscape there

All the time people are resting or improving their health, etc.

i.e. it turns out that we can

at the level of intellectual action

derive the management structure

directly into the structure of the collective mind let's put it this way

and personal

and if you look where they work

Well let's say, we can say that they are enlightened

or the most progressive people of different levels
not necessarily even from any

let's say so some kind of confessions yes
here there may be a leader, a public figure, etc.

then here we see
that they are usually focused
at the level of knowledge transfer
for the collective plan of mind

i.e. well, the famous enlighteners
or which ones, for example, gave a lot to humanity
or maybe even often a person can give
one person is so much
that he is also an educator
but it may not have been historically identified there, yes

these are the people in question
which could provide generalized knowledge

then it turns out that it doesn't matter
he who gave one correctly
it will be revealed
in the operation of the overall management plan

so it turns out that when you look at the position
according to the structure of development of this area of the mind
collective mind
it turns out that you can act right there

i.e. you can learn , for example
for example, it's good to drive there by car and drive locally, yes
somehow sometimes someone sees you
but you can drive demonstratively
and show that a person can do this
or does the car behave like that in principle ?

then it turns out that the person knows in principle
and can learn
or you can sing well
and sing immediately in the management structure for everyone yes
or draw or write the necessary phrases and words there

it turns out that this is the reproduction of the word
in the structure of the human mind

well or action

this is an action that is always universal

when it comes to that

what are you reproducing at the level of your mind?

namely information of the mind

reproduce some word

then it immediately has the Infinite property

firstly, at the same level

i.e. people understand it

i.e. to teach people

For example there is a remote control

according to my technologies

it is enough to identify

information about the structure of the mind

i.e. just take and reach the level

there is a level of Consciousness

the level of intelligence there, etc.

they came out and did, for example, they laid out a lecture course

they somehow took it themselves and told ^{yes}

through the structure of permanent residence

fractions of your Consciousness

it is in this area

other people understand right away

because they are smart too, they understand too

what ^{does it mean} that this is exactly how the management happens

and the transmission is not only verbal

but also the structure of control accuracy ^{yes}

correct position in the control system

and if you go to the management level

For example Well let's say more pronounced

as a simple control system

coming from your Soul

then it's still the level of intelligence

just in a generalized action ^{yes}

i.e. the mind also has the property

be in any system

and therefore when we talk about the signs of creativity

this is a sign comparable to the Action of God

the creative mind is the Action of God in essence

and when do you start
this control system
output

at the level of let's assume as if personal characteristics
then it is clear that the organization of personality
it is primarily the attraction of certain factions of the mind
as if from the outside but for the individual
information

i.e. the personality can distinguish
its own structure, as if boundaries and some
current even in information
when she is from the level of manifestation of the external mind
makes some kind of selection

i.e. some information is needed, some is not needed
then the boundaries of one's own personality
in this action I am not talking in general of course
but simply in some given specific action
where personality is manifested

a person can distinguish from that
what does he highlight anyway
fraction of any element of the manifestation of the mind
namely the areas

and when he sees a fraction of the living mind
i.e. it is precisely the mind of life that is so let's say yes living mind
where is life
life is an absolute property of the mind
in this case

well, like in a crystal
the central focus of the glow is there
this is in this case also the allocation of a fraction of life

i.e. the living mind the life-giving mind

then it turns out that according to this sign
by glow structure
a person can clearly determine
what's going on around him
This is a powerful diagnostic system

means to deduce the structure of life

it means precisely to single out in the entire system of external
in relation to the individual
mind
structure of life

and it is clear that the words that pass
or are there some control systems there?
or some information
what are they

moreover, if a person doesn't like something
on the border of joining with one's own personality
he can convert the control
i.e. he can make it positive for himself
and absolutely harmless there or better even for others yes

i.e. it turns out that he can then overcome the system
well, some negative levels of control
due to the fact that he uses
namely the fraction of life allocation
where life is this, as the highest category of the mind
from God's point of view
in Human Perception
and in human action

i.e. a person striving for Eternal life
It should be like seeing a lighthouse all the time
exclusively only life

and it turns out that based on this
if this fragment is of absolute life
or Eternal life
in the structure of the mind, collective or private
it's not the point that matters anymore
highlight
and for example like light
place over a person
even in a serious condition yes
or even for resurrection
then what happens is a rapid recovery

and quick often resurrection

in general, resurrection is a rule in fact
it happens very quickly
so the main thing here is just right
convey the structure of knowledge

To the soul of man

and when you here this faction
you are already starting to highlight
in the structure as if well, prolonged further management
then you can see why the mind is everything
as a rule it is always perceived
how to work with the future
because it is something that always comes from the future
i.e. a certain system coming from God, from the Creator
and convertible on the interaction structure
personality
And
World
where the individual and the World are also again an inseparable whole

i.e. here we begin to understand
why for example in this control system
visible
What personality is also inextricably linked
with the whole outside world

because we just have to set the task
well, some kind of circle of external control, yes
with your personality
from the point of view of information
well, some kind of pole there

it turns out that we see instantly
expansion of personality
i.e. it begins to develop

and from this it turns out that this is what
personality as a structure means expressions
namely the Actions of the Mind of God
this is a constant development

You just have to look at the personality
some element of external action of the mind
let it be exactly constantly from life yes
development begins

personality is always evolving

i.e. that is why it has precisely Infinite development
even in the structure of one's own Perception
i.e., as if the final format

that a person can take and limit
some information
here it is no longer possible to identify this specifically

so it turns out that personality
we can only from one level or another
watch ^{yes}
just as we perceive the Action of God
or God himself

and although we can look and see
all of God

it turns out that this is exactly it
the allocation of life ^{and} Infinite life
this is the main property of the mind in all its manifestations
namely, the Infinite Life

this is the Light of Infinite Life

creation of the Light of Infinite Life
for each individual
a person can organize such a life himself

when do you know it
are surmountable for you
almost all control systems
you will always make precise control
and at the right time
keep in mind

you just have to apply some
often a little effort

This concludes today's seminar.

thank you for your attention
