

GRIGORY GRABOVOY
The Teaching about God
Control through future time
21.03.2005

Hello again
the topic of my seminar today
This is my Teaching about God
Control through future time

in this topic i show
how to create future time
and then manage through the created structure

in this case, we need to consider the current time
i.e. it is necessary as if in a geometric version
look near the body
glow of current time

and at the same time you need to somehow establish it for yourself personally
what is the current time
the same frontal projection
all external events

i.e. we actually have
kind of management principle here
that considering the current time and as if independently of it
we are already building the time of future events

in this case we always seem to imply
that the current time exists
but we don't necessarily consider
glow level
this optical coming from this time
we already know that time exists yes
we are in this time

and therefore here is the construction of the future time
it's more of a management of a closer level of events

i.e. you can look far ahead
and see everything completely clearly
but when we talk about the time interval
we are constantly connecting the current state
i.e. current time

and some next event

i.e. in fact we are talking about the primary construction
some management process

For example there for some short period of time

although the construction of the future time
often it is also a strategic remote value at once

from the point of view of the technology of Eternal development
this is of course an infinite quantity
but in this case I'm showing
it is precisely the level of a person's personal time
here is the one that exists next to it

and therefore here it is necessary to look at that
that when God is in charge there
He also builds time.
simultaneously through time controls
unpacking the events as it were
we can look at the control mechanism like this

i.e. events are realized from time
as a kind of light that is organized from the primary environment

i.e. if we consider such a generally abstract concept
as "time"
and let's consider the connection of events
then it turns out that inside the structure of time
events have a different connection
than the one we observe, for example

here is a large optical medium
and events are actually projected
or they lie on a plane

and when we consider the reverse process
i.e. when we look at what
how are events in time itself
then we see the maximum compaction of some events there

i.e. what do we mean next?
or than in a denser time
we're leaving
where the concentration is higher than this glow
the events seem to be closer to each other

i.e. in fact, this exists at the level of objective events
there are some kind of substances there at home, for example
and you can see how the matter is compacted
this is how this material world so to speak

if we want to consider
how the material world was formed
from the point of view of the Macrosystem
it turns out that time is compacted
leads to compaction of space
and is formed for example there is dense matter there

the denser the time, the denser the matter
it turns out to be more expressed, as if on a micro level
i.e. the more rigid component of this matter

and it turns out that for that, for example
here to cure the disease
including complex or some kind of difficult
often need segment
maximum time density
just remove it from the structure of the disease

i.e. just highlight it in the glow
maximum density
as a specific even density of time
take and remove from the structure of the disease

it turns out that in this case the disease
is no longer projected onto physical Reality
because the main projection
where there is contact with God
this is the maximum density

more sparse systems
they intersect in optics with other systems
and it turns out that we are creating a model
when specific management is in progress
the model in this case is immediately the control

that we can instantly due to the intersection of optics
with seemingly healthy organs yes
get health
for the underlying disease if such exists

it turns out that if we are at this level of management

let's move on to the events
then in the event system we get to the current time

This is where you need to pay attention
and in principle it exists quite clearly

in the human body time seems to be absent
i.e. the structure of Eternity is more developed there

as soon as we cross over
on the action of the organism in the event
the current time glow begins

i.e. here is a projection of time flowing into the organism
quite weak
because truly man is Eternal
and it is projected
when he projects onto events
then we get a specific event
and then we reveal in the current time

but the current time

example to work with future time

this is so Actually, you can look at it this way
like some kind of dynamic platform yes
from which you can depart as if in control
i.e. to do support management

here the technique is more like this
that a thought form for example or even a Spiritual level
based on current time
and how the launch pad is made management
for example, to construct the future tense

the sooner the start
this means that the future tense is more fixed yes
from the point of view of events

but the current time can
like this axis, it's also generally movable
and has a certain density thickness
it can bend

those. this is where you need to pay attention
that how God for example builds time
He doesn't push off from anywhere.

here too we need to compare
that when the work goes through optics
and what does this curvature lead to ?
to the fact that management processes will slow down in the future

i.e. here you need to see clearly
in general, this structure of time
if earlier, for example, in management
did you look more closely
as if a speculative characteristic of time as such

then here it is already specifically revealed information
which actually exists as information
like ...
you can even say that it is some kind of substance
which exists objectively, so to speak Yes

and now she is also subject to influence there
literally there is mechanical influence
due to the will there you can act for a long time
on the structure of a typical, as it were, current time

and the bending of time begins
i.e. events begin to lengthen
it's mechanically simple

while events unfold
so you remembered the house in time
while you have opened his image, for example , in front of you
for well there are a couple of seconds or maybe milliseconds

if you took this path and bent it
made it longer
well, like a rope pulled on a certain cord
then you are further away, you are three milliseconds there
maybe you'll spend longer

it turns out that you are lengthening the structure of Perception
extend the time structure
due to mechanical action
and the house is still standing as it was For example
if it was already there before

but if the house is built in the future
then this may affect
for specific technological processes

building a house and more significantly
than on the house that is already standing right now yes

there is such a platform
horizontal platform of the material world
which connects the current future

i.e. what is set as a plan by the imagination of a person
his dreams thoughts and current time

Well, if you think about it
how are future events generally constructed
from the point of view of collective Consciousness

where everything is projected there in the future
into physical Reality

similar to how God does it
He builds as if in two positions at the same time.
it's just that the platform moves very quickly

well if you imagine there
like a table tennis ball
and two balls means the racket moves
from one to another very quickly

and it turns out that both objects seem to exist
but one exists in one space
another in another

and it turns out that if we start
already with as if to look closely at these balls
then there is already a different process here
here is already a spiritual volitional construction

from here it is clear that the thought form of the collective Consciousness
basically that's what gives birth to the structure of this ball, let's say yes
building or event there

if at the current time the ball is closer in distance simply
then we kind of control this process more
in the future it may be a little further away

so that the future is absolutely manageable
it turns out that
or at least close to that level

and in the case of Macro Salvation of the World
this should be absolute control of future processes

it turns out that here we must
this ball, conditionally ^{yes}
some information about the future
make it as dense as the current time
i.e. the Spirit must recognize it with the same speed

although geometrically it is further
here in optical terms
but at the same speed

Now imagine what you need in a future event
must consider
level as its own implementation

and you must follow it clearly
all development structures ^{as if} in a future event
i.e. personal development structure

you are actually ^{like well}, like on a crystalline level
like crystals , they ^{kind of} grow in
in the dynamic structure of the liquid ^{for example}

and it turns out that right here there is
a specific level of ingrowth , ^{as it were}
as a simultaneous ^{well some}
^{this means} that such an oscillatory magnitude exists
like in a wave like this in a fairly large wave
with great force
and it ^{seems} to draw the structure into itself
Well, ^{that is}, these are people's thoughts, someone is planning something, etc.

and you in this structure of events
work out ^{well as if} the only correct solution
you need to perform future time management
so that it can be controlled directly, ^{for example}
Well ^{as if} from myself, from the current time ^{yes}
i.e. to build the future time is also management

at the same time it is possible to output to the plane
such a concept as "future time"
and through it project onto the series of events

i.e. due to a multiple increase

time structures of future events
you are compacting the structure of events
until it is completed

and that's how it happened, as soon as you diagnosed it
that the event has been accomplished, i.e. it has happened
then you see
by the way, the primary level of reaction
occurs in bone tissue

here's an example Well, why if we abstract ourselves
because there are some processes
For example there in the world
Well, there are **objective physical ones, gravity** for example
and for example, not to consider any process
which, by the way, basically does not apply to humans in principle
these are the so-called evolutions, etc.

and look at how a person is generally structured
from the point of view of the absolute picture of the World

here is the initially constructed object
when it was fixed and when it will happen
projected onto human bone tissue

and if we consider fixation, for example
what is a locking system

for a person for the human body
this is a tough position, yes
Well in general, it is also comparable in human perception
with bone tissue

and it turns out that when we mean
Well, let's assume we have this problem
what does it mean that a person reacts and accepts information
well, some kind of fabric and some kind of rigid system

then the rigid system is like this
God makes systems like this
in almost all channels of control

it turns out that if we have an already completed event
then we must have some rigidity in ourselves, yes
as if **factual rigidity**

i.e. Consciousness is precisely the mental logical level

it is designed in such a way that it reacts precisely to uniformity

it means that the person has something tough

Well, it 's just logically clear

this is the musculoskeletal system for example Yes

so, but we are through the skin

Well in this case there is no need

look constantly through the skin

and see the musculoskeletal system

it turns out that we see as if well, some kind of intro system

i.e. the reaction of future processes

passes through the skin actually

like a glow from within yes

and we perceive our body

i.e. by and large

if we consider future events

we see our real physical organism

from the point of view of well as if of absolute space

i.e. we look at it like this and it works out

and when, for example , in this case we want

Well there is some process to correlate

there if a person has health problems

means to align

or some complex processes

optimize them somehow

then it turns out that there is something here

especially for complex processes

there is precisely a structure

exactly as if practically in time, so to speak

also developing some solutions

and there are usually a lot of them

Well, usually several at once

i.e. a person always has a path

be in the future element

because there are several trajectories

i.e. a person is not a rigid system

it means it can move

and therefore he has

in the reaction of its environment in the future

there are always several possibilities
a mandatory solution to some situation
i.e. positive for him

the main thing here is to catch it in time
this very reaction
i.e. to see in general where this photon is, as it were yes so called
it generally looks like a photon, like light

they just go very fast
you have to have time to understand on the move
Which

as a rule, it is easy to do this
You just have to see which one gets here
how to look at it from this side yes
enter into strategic Macrotime as if
this is a static so-called time structure
where everything is time so to speak

and from there see how
what hits this plane
and we are immediately behind the, as it were, mechanical element of
Consciousness
you can kind of fix it on this photon
the so-called element of light
and everything and the event happened

in any case, what's the matter

because in the structure of Eternal development
the event must happen in any case
which you need

for example how a person should live forever
he must in any difficult situation
no matter what happens around him
It is imperative to implement your following events

therefore he is obliged here
somehow in the controls
find
this is exactly the most optimal course of action

so in this case this is exactly it
path
which shows what it means

Well as if a flexible dynamic system
although the reflection goes to the structure as if internal yes
and we get the external fact

i.e. all events of the World
God gets into His inner structure of the Soul
and it forms the body and the whole physical Reality yes
including the formation of one's own Soul
he creates it almost simultaneously

and it turns out well God has a process here, that's the difference
what God can mean is increase the structure of the Soul yes For example
A person's Soul is already created

and when we want to do such an action
we should then
a person must then work
through the structure of the Soul
this is where the unification of the temporal context is, as it were
here the only difference is in the time of creation

originally time itself
the original structure was already created by God
as the structure of all future development
i.e. both the future and the present are the same

a person perceives it as something he must have in the future
here is this photon of the future, how to catch it first
output to the current structure
and then through awareness achieve the same thing

How Consciousness leads to this

it turns out that in this case
self-management
the management process itself
this is the level that allows
so there is quite a lot to do here
positions of axioms of peculiarity
which are expressed in the following

there is the first axiom
that future time is the same as present time
but projected as if on the Infinite medium of space

geometrically it looks very simple
we take there a line from the future to the current time

and we get space as if absolute
which exists simply by itself

i.e. how to construct an element of space
just take the temporary lever
but for this we must fix
future time
build a reference point anyway
where does the glow come from

then we must know for sure
this is the future management structure
where at least in a second
so that the future is certain

but a second is not enough in principle
often need to build
so that the space is stable
there far ahead there at least for millions of years
or there on 10 20 35 etc.

and if we are talking about the Infinite level
then in fact we have to build anywhere
i.e. any well as if the action of the Spirit
into the structure of time
should create a current space
then we see our own participation
in any processes including social , political, etc.

here you can see a direct connection by the way
your control
with some event in the World

and see how you participated in the event
there it is either productive
either you didn't have time there or you didn't pay attention

and so if we assume to calculate the control like this
that there was no time for example Yes

but there is another level
The spirit that exists yes
Eternal Spirit
there is always time there
to accomplish any event of yours

if you record that the event is there
for example, a manager who is engaged in management
is engaged in Macrosalvation
and he should teach everyone there, for example Yes

but at this moment he does something specific
and there aren't that many people there, for example
or even let many people do it
but someone doesn't do it
then it turns out that he sees ahead
what can he teach in the future
his knowledge will be passed on there or he will betray himself

as a rule he should see
that he himself will betray in the Eternal development

i.e. in Eternal development every person
I have to pass on all the knowledge, generally speaking, personally it turns out
personality factor

why does a person turn to God personally
personally to God

because here is the factor of personal transmission
exactly as if where the transmission even
not that personal transmission as such
and more contact of this is formed by time
i.e. personal contact
forms time in the absolute sense

and that's when we arrive already
to the concept of "time" in the absolute sense
it's already easier there, a rigid platform is already emerging there
and time actually
God and the time He gives yes
this is an infinite quantity

i.e. God's time is always Infinite
for a person

and it turns out that
so by the way when a person performs a prayer
or does it make control in Infinity
occurs when control
he falls into the Infinite system of action

and here time seems to be absent, yes

at the logical level
that's why time is speculative for people
i.e. they themselves introduced it as if into control
Well for example they said "there is time yes
either there is a table there or there is a building"
but it also has an absolute shade, let's say Yes

there is an absolute value of time after all
it is still a quantity that exists
according to certain independent indicators
for example, from a person's voluntary action

for example we say
that there is a table or that there is a building
well, kind of philosophical
as if an approximate, so to speak, approach
by analogy with this concept

but the table exists in time
as if on a more massive scale, but still
and projection level
or does the building also exist in time

and so if we have these hinges
there we begin to consider temporary connections
we can deduce
one universal axis of time
through which connections are visible
there are buildings somewhere that are in America
or specifically this table
or a specific event
through the very link of time

there have been a lot of events in the world right now
and they can be connected by optical lines
let them all be in the same sphere

we can calculate their optical connections
if we know the emissivity

as if the intensity of time yes
of this event

for God the intensity of time is one
that's why He sees everything at once
, He completely regulates the future
from the point of view of knowledge transfer

and yet He sees the absolute future
because the further He goes, the more He defines
event equality function

the light is the same

and further into Infinity
It defines the light of man
as a level of almost completely stable glow
Infinite glow

i.e. God determines in time
human
how exactly is the level that this light gives
He immediately sees a person by the way
He doesn't need to go anywhere.

but in Infinity
He sees precisely a steady glow.
i.e. He sees the Eternal Life actually realized
and in full in all its manifestations

therefore any element of light
there for God is the level of Eternity
a man radiating Eternal Light

and if we are at least one element of light
let's inject it, for example , into the same bone tissue
and let's look at the path of this projection onto the fabric
then you can see the whole organism
and very clearly regulate the body

i.e. it is possible to output
are some there well, some toxic substances
you can enter the opposite to improve there
without any drugs there, etc.
you can even influence the food there
or exclude food for some period of time, if you want, etc.

i.e. it is a highly regulated environment
it turns out the organism
because in this case you see

as if a projection part
namely the dynamic moving part
and you see the body's metabolic processes
and not often here is a tissue-expressed system

if you want to see the entire tissue system
you will just see yourself
but the control will immediately fall into the cell

and then you start working at the cellular level
almost immediately
i.e. without an informative system of action
here's just an idea
and the cell immediately reacts

but you have to look exactly as I explained
through the projection structure
i.e. statically defined

this is by the way if you learn to work like this
more intensely
not necessarily just bone tissue
possible in fixed organs
which seem to have a more static appearance, etc.

and then move on to the cage
then go outside the cage altogether
and so teach Consciousness
work near a physical body
because it is always desirable to work
near the physical body if possible means

and at the same time maintain the same
as if the management disposition
which is built as if from three angles
entrance
internal level
and external point of view

and that's when we look at the input structure
this is where the fundamental importance lies
as if the structure of the future tense were sticking together
and current

because here is the manifestation of God in Action
in that he conveys specific knowledge

and when do you start
this is the action to consider

in fact, as a structure of already private tasks

then here it is clear that through any particular task
through solving any particular problem
God imparts knowledge to the whole world

why is this decision important
in general, all the tasks of all people
precisely in a creative sense
that here is the tension of one task of one person
there at least he was only born ^{there}
or in a deep level of old age ^{so to speak}
although he may look young

^{it means} that this is still a fundamental task for God
for God does not exist
there is a concept that "a particular problem is less important"

it is in this context that it is very clearly visible
He, through a decision, ^{as it were}
^{well,} the advancement of a person towards his task
He practically realizes the picture of the World
^{as if} stretching out the World
the next time it's sometimes difficult
difficult to access for society ^{in general}
degree ^{yes} it turns out that way

let's even say so
the man took and promoted
the structure of the World in Infinite development
then it turns out ^{it}'s easier to give education there
to everyone else
because one person took and extended ^{yes}

and he can often decide
just my personal tasks
he may not be involved in education at all by the way here

It's quite simple here
the fact that it had a very high concentration there
this person in the Soul
really wants to solve it
^{Well,} it's creative, at least it doesn't harm anyone.
when such conditions exist

and then comes the solution
this is where the refraction of time occurs

How often have you observed

that when you are very concentrated

there are some other situations before the exam

Time seems to lose its usual properties or something

it changes somehow

has a different structure even by ear

here you can take and listen to the time

there when you look at the fine ear, so to speak

how does it look on sound

or how it changes in color

how the color structure changes over time

of the same event

and here you can see that the concentration is strong-willed

affects the structure of time

and you get

the structure of one's own actual body

radiating body

the body radiating this structure

gives the realization of events

i.e. you can even make up

some atlas of radiation from the body

where to consider the radiation of time precisely

management contexts

and then simply changing the light optics

as if even external control

well, without doing anything special

because external control

here much less resources and efforts are needed

often none at all

just look at yourself from the right side

and here if the viewing points

consider

to a greater extent they are in the face

and not from the back from the back there are often very few points

and here then why do I say "often"

depends on the situation

it is necessary to consider the model in each case

i.e. what do you need

there economic tasks are one system

system level

if it's business economics there
even the concept of "business" is no longer economics
already a different management context

i.e. here you just need to
Well, in each case, some kind of control atlas
each person can make up their own mind in this regard
the main thing is just what to do
take the element of Consciousness and bring it forward
and observe yourself

set some personal task there
there is either health or economic
and watch what happens

this could be the situation initially
that the person is completely healthy
he perceives himself
healthy
then what to do next
then we need to think about what task to set next

here is the health element
may arise immediately when viewing the situation
because once you put it in the right spot
somewhere viewing
you fall into the structure of the Norma

this is important not necessarily this
Well, we need to move something here
Well, you're healthy, so look further.
this is exactly the principle of healing
as if it were happening

This technology, by the way, allows
this is precisely the integration of time
flowing into the future
as if they were sticking together
allows you to choose your health position in the future

i.e. you actually step on it with your foot
to the place where you are healthy
i.e. trace
where should you step
this is your health

and it turns out that a person
even if he simply walks through physical Reality
if he steps correctly there a couple of times
this means he gets a health reserve for himself

here too you need to be careful
and by the way this is a specific technology

then you can go, well they say
that you can go to the forest yes indeed you can
who has time there, for example, maybe somewhere in the forest
some energy of the tree there
but the tree is still externally controlled
and you still have to understand
where do you do tree management
anyway, you don't take anything from anywhere

and this one
while you're there, look at the tree's relationships
there with all the Macroreality
where is your level and contour of your Soul
comes out to you
and you get, let's say, the same thing
effect of action yes

and here in this technology
you just saw the structure for example there
and you can learn to see it
just like the glow of this trace goes

the only difference is that
that as a rule the left part is the interval of the current
the right one is the future time

i.e. to be able to distribute combinations
and neutral axis
this is the space of the trace
it appears calmly put your foot down
two three times came and there is a process of precision
i.e. firstly, it is a health-improving procedure, by the way, etc.

i.e. there are many very similar consequences here, as it were
it turns out useful for work
no need to waste time there yeah for example, go to the trees
although it is useful
It's better to grow more trees
but it is not necessary to go there

so it turns out that the situation here is still the same
which by the way this technology allows
how to regenerate oxygen
it is precisely to restore the structure of oxygen
do not produce do not create oxygen yes
and if there is oxygen information there
then it can be restored using the matrix

because the time of the future when sticking together
Well as if there is one mineral and another one is the same
if they were just taken
insert into the diffusion process
then in physics there simply arises the phenomenon of intersection

here is the same thing
if you perceive as if by sight with your eyes
what is oxygen for you
i.e. perceives visual images better
then you can take and make adhesion and oxygen really
and you can measure it with instruments there
increases

at the same time you are just the same
the fact of creation here is such
that you do not create by external impulse
and you just restore it at this point

i.e. he was here once, maybe a million years ago
and you just restored it
and that's all

and when means when you start moving
in this direction
let's assume there in the Infinite Future
then it is clear that through this technology
due to the adhesion elements there, yes
you can move in Infinite time

you don't move anything at all
you even
you don't even really need to create anything
the main thing for you is to create space for action there
where do you even operate?

but it's still easier than creating
not only space here
but also everything in this space

and if there are recovery elements
that is, regeneration of some matrix restorations
for example, how to create the technology of the future, let's say there
what properties should it have
so that it does not destroy a person, etc. yes

so here is the process in principle
in fact it is clearly visible and absolutely clearly

in this technology you can see the intersection
so it's like a rope is woven

i.e. if you take DNA, then there are restrictions
and here is precisely the structure of Eternal development
time of the past is twisted with the future
and a kind of cane appears, so to speak

like a segment inside which there is like a stick
touching a thing for example
you can see the properties of a thing

i.e. you can see a dangerous thing there for a person
in future development
or is it not dangerous
By the way, this is something that everyone can develop for themselves
this is exactly what she looks like
like some kind of glowing stick

if you touch it means
Well as if mentally taking it and touching the thing
then you can see the reaction
Well, a person can diagnose a car like that, for example
before the trip
if the frontal advantage goes as if the past
time past begins to project more
on the back of the car
that means some kind of repair is required
and you can learn to see

because there is a past time
as if some kind of capture of the material structure yes
more rigid quality

for movement this is not a very good characteristic
it's even logically clear

It would be better if there was more of a future time rollover, yes
and the car will always be in the contours of the future
be
then it is clear that she is in a safe zone

and that means here
already regulate the glow
future time
the lighter ones there are like bluish shades
sometimes blue
and the time of the past , well, maybe there is blue color, etc.

and if for example here we have
let's assume this type of control
what do we need well let's say make a structure
after some absolute time
it turns out that here we need to work it out
as if the following control scheme

for example we need to go out
through well as if some structure of absolute time
and therefore being in this structure
how to manage
for example, past time
there in the time of the future

then here you can now here
to do such management together
through the structure of a kind of combined absolute time
see what's going on
with the time of the past and with the time of the future

i.e. we can see it quite well here
like the next angle
I think this is quite clearly visible
what can you see for example
how's it going well as if a peculiar turn
time there past for example Yes
during the future for example
i.e. you can see the intersection lines
and the structure of absolute time

and if we, for example, are in this structure
Well let 's take some kind of null-space
and we will start looking for these transition systems

then it turns out that time, for example
this is it, well as if from the past tense
it is at a very great distance
has
just clearly defined structures of a different glow

i.e. you can say it like that there
example, that there is a golden color there
recognize if at Infinite distance
then when
when approaching this color
you can see that this is the time of the past
it seems to float into the structure of its cell
into a fairly rigid structure

and it can be deciphered in this way
all events of the past
i.e. they can be seen
Well as if controlling clairvoyance so to speak

you can influence there too
then you need to find it
as if the geometric center of this time
and keep this golden glow

because the closer it gets the more it becomes
less intense
and it just turns into a silvery color

and it turns out that based on this
you get well as if in control
from the point of view of the elements of your Consciousness
as a control level
which, when approaching
to the management structure
begins to affect the system itself

and if you hold control
at the level of a kind of volitional plan
then it turns out that here we have
almost like a period like that
what we are recording and there is no flow

from the past element to the future
and then we kind of control the future

by the way, this is also a useful property
this level of management
through future time
because the reflection still comes from the future time

i.e. your signal gets through all the time
into the structure of the future
and due to the reflected level you influence the past
in optics it is very simple to see

Well, if you actually want to get there already
in the future tense
then through the same absolute level
you can get there as if into an infinitely separated even
environment of future events

because in the future any environment
it can be like Infinite
and close

and you have the right to determine yourself
which point in the future represents what time

there is a very good method here
allowing you to always be there
well, actually, like alive and well, so to speak
in any future event

very good control field
where you are not only you at all any level
any control object
has a normal development system

i.e. people are alive and well, events are going well
and it is you who are, as it were, the very composition of events
perceive as speech
they kind of express, well, that is, you feel
you even see, as it were, the speech of events

i.e. you can also speak favorably about them
i.e. they seem to have a positive effect

so it turns out that if you see
changing the outline of the word yes

in Infinity
in the future in Infinity words change

and to say for example
about some event in Infinity
do you need to change the ending?
or increase the speed of pronunciation of the word, etc.
or change the structure of the word arrangement

and here you can see
what well for example, the text that describes
Well as if the events were very distant
and you need the text to be universally understandable
for all times
it will be a different text than the understandable text
for the next hundred years for example

and and when do you start working
that the text is understandable now
and it is understandable there in the Infinite level

then here it is just like that
flow into the past so to speak
hits
into the structure of verbal reflection

what's interesting here is the primary level of the word
visible again
as the level of information over a period of time

i.e. first comes the word level
then come the events of the past

i.e. time is arranged that way
that the word does not fall within the connection contour
it always gets into the very initial structure
root

a sound form containing meaning
throws out all the time as if control
to the level of Infinite magnitude

i.e. any element is the same as Infinite in the World
therefore if we pronounce the word
Here

how does one get such a powerful one out
Well as if the center is so rapid actually level

which throws out
like with this kind of rotating moment
optics there
it's obvious

i.e. you take it and put it into the structure of the future
Well, apparently it can be shown with a beacon
Let's say how a beacon works

the event is simply reflected
throws out somewhere
the lighthouse starts spinning
word _{yes} formulation of the question
the beacon starts to react
or thought is thought form

and it is precisely the emission into the same structure
hits
Well, in some cases it gives the correct diagnosis, _{for example}
who learned to work
that means it basically works correctly

but the lighthouse is a material if
this can be an informative environment even
if already material
translation into material structure
then the lighthouse is always in the structure of past events
then of course the accuracy is reduced _{yes}

work better
as an informative beacon then already
i.e. learn to see the structure of influence
and _{how to} diagnose events
but in principle it is like a practice of observation
Well, for a physical parameter, _{perhaps?}
this optical environment

so this lighthouse itself is of course not needed
all events are still visible
That's how you see everything at once
and the lighthouse is some kind of precise level
another waste of time on asking questions, etc.

i.e. it is necessary
we must try to see the structure without asking questions
how does God do it He must do what
create a question first

then answer yourself
i.e. God in principle He does not create questions
He does it right away

and so if we
how to enter a structure where the question is not created yes
this is such a special state, it is quite pleasant
for humans it is also pleasant
it looks like a management level
where everything happens let's say

then an element arises
and where does the accomplishment come from, for example, God
God
Well, for Him, everything is the same level of control

and that means He takes somewhere in the Infinite distance
what He sees for sure yes For example
here is one of the convenient points of view

Well, that's really how it is
God really does take
in one of the positions in the Infinite level

for a person this is what was understandable
how does a person think, how can he learn to think

and for a person a similar level
this is action
as in Infinity
as well as in local current time

right at this moment

and it turns out that based on this
means for a person control in this case
Well or something like that, with such a status of its state
i.e. to work without creating questions, for example
it's actually a very quick solution
as current issues
and strategic management

i.e. he must at some point
be in such a state
he controls at the level of knowledge
that it solves the current issue
and at least the strategic ones are clear to him

he sees that he is working with them there
that at least he is there

and when you have two such levels of management
you take it as a certain level
well, even if it's a one-time thing
it is not necessary to hold this control constantly
although it's better to always mean
but at least as long as possible

and if such management has happened to you
and you get into the absolute structure of the future
By the way, you can find out here
that it really exists by the way that's for sure
such pretty tough specific information
there is an absolute structure of the future
what is visible will always happen there

and here is when a person moves towards such a future
it is necessary exactly
I mean, of course, something creative will happen
Here
here you need to be able to do this layer or something
move in only one single way
which is originally given by God

Well, it's called fate there, for example. Yes
so it's better when this layer is only good

i.e. it is desirable to have some kind of peripheral vision
look at the state of fate there
and it seems to move in a better direction

by the way, this is really against the background of optics
looks something like this

but there are other states
even well as if they are not even like states
but as a certain element of action, as a certain absolute statics
wherever a person looks, whatever he does
it's still some kind of creative Macro-event
it will happen to him
Well as if an absolute forecast

and if possible, look out for these things

in the management structure
by the time of the future
because if you get there
into this structure and you recognize it
then it will happen one hundred percent
nothing can change this system

although it's logical if you think about it
when a person knows it
other events proceed much more easily
but as if logically often starting things or something
At the moment, few can suspect
that some such event could happen there
specifically with this person
considering that

for example, why exactly at this starting level
something like that happens to him there For example there is a Macro event
Well, let's assume it's positive

it can be different levels
of creative action there
there for a specific person there and so on.
it can be any action
the main thing is that it is an absolute action

and that's when the man looked at it
then in principle there are no problems
It turns out that he sees quite well , so to speak
really, this Macro has its own level really

Here we must clearly identify
that this is the Macro level that will actually be implemented

and in principle, for example, there are strategic forecasts
I do I know for sure there
if it concerns me or other systems in general

where there is precisely a mandatory accomplishment of management

it turns out that it is desirable here
here in my practice
anyway, somehow we find these things
if possible, look for this light
almost like Macro events
which goes towards you

and here you already see
properties of this space
i.e. there is a merging with time, for example, the future
i.e. you see that your current viewing level
this means present tense
merged for example with the future practically
i.e. the structure of the current time is being pulled out
and then we get static control

i.e. it turns out to be space
event space
that's exactly when the current time is
where there is a specific current event
merges with the absolute level of the future
then it turns out that you are sort of implementing
space of current time

i.e. what is the realization of the space of current time

there is some house there
are there any plants there
but the most important thing is there are people
and their tasks need to be implemented

i.e. you participate in the process well
Well, in general, here it is so peculiar
what this process looks like
the fact that you are in general in a large amount of information
you participate at the level of, let's say, specific connections Yes

these connections are very well how much they depend on you
i.e. you feel it
you see all the levels of some contacts there
obvious, not obvious and as if you are moving together
here in this future

and that's when the level
this generalized or joint movement
you realize

Of course, many processes are improving
at least
from the point of view of Macro-security of development
That's for sure

there for some private purposes

you are pulling someone out there
someone there, on the contrary, you somehow direct
so that he, ^{well,} has experience
taught someone ^{there}
^{Well,} somehow you start to regulate over time
this process

but at least if you ask the question
where are all the people moving at the same time
yes they all move at the same time
in general, if you set a direction, ^{yes}
they are moving into the future

what do they do the same
they are moving into the future
at the level of the Spirit
and when ^{to} ask the question
then it means they can unite
and move ^{as if} more synchronously

but the unification is
it is precisely the absence of destruction ^{that creates}
because in the future this is a structure where there is no destruction

if we assume that the unifying element
is destruction
then the future is already
how can it exist
if the element is in the main
^{Well,} the crystal is growing, ^{yes.}

if you lay down the structure of destruction
in his future growth
^{Well there} the glass breaks ^{yes}
then it turns out he can't
there to grow into the Infinite phase

means creation
this turns out to be the only development option
i.e. it's just ^{like a Law} in general

and it turns out that based on this
if we want to comply
^{Well,} the laws are not easy to follow

and generally speaking, implement
i.e. to live freely

it means to know what Laws exist
if possible, a person knows more Laws there
it means he is more free

and this is the level of control that results
such that you begin to differentiate then
there's already more to come
it means space from time
once you saw absolute time
By the way, you get into the current space right away

pay attention here
Consciousness instantly switches
at the current time

and here, as if in the current time
you can see
there a billion years ahead somewhere yes

and as soon as you saw
at least one absolute plane
where there is an element of absolute realization
then you get directly to the current coordinate

what does this mean, well, that's logical
that in any stable system
you are practically
and now yes
and there
logically it is indeed so
so that you are there
you should at least now
I feel more or less good there, for example
and it turns out that this is a logical phase of transition

and this level of instantaneous overlap is like Yes
when Consciousness throws out
in fact, it's not like that at all
as an instant exit of Consciousness
to the current point
it's almost like it's instantaneous, you can't even feel it

but for God it is the same
He is always there
and in Infinity yes
and is located here

and so it turns out that when you are already studying
to act with such super-fast processes
i.e. the ability to instantly be as if
at the level of a kind of organic management plan
i.e. do not make a break
between the current time and the Infinite

all you get into stable really control
it's absolutely clear to you
your next day there
your next years there
at least look into Infinity please
and see yourself there

here it's just purely like the level is more logical
Is it common for everyone to see themselves in Infinity?
that's all
only this parameter is lit
nothing more

if you think that you are used to it
see yourself in Infinity
so you all live infinitely

so here is the element
Well as if more just the same
this is education in the collective Consciousness
how well psychology of perception there is nothing else there

and that's why it turns out that in this control system
try to get out
here in this system of sustainable management
where you don't see the gap
between the current and Infinite time

and that's when you already implement it
All
control through the future tense is implemented
you are definitely already getting yours
and creative to a certain extent
even absolutely creative events

it's very much in this regard
quite a powerful control system
guaranteeing sustainability in obtaining results

This concludes today's seminar.

Thank you very much for your attention
