

GRIGORY GRABOVOY
The Teaching about God
**Method of constructing information space
in the interval between two control pulses**
23.07.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Method of constructing information space
in the interval between two control pulses

we are talking about that
what when management is done for example
and you can consider
two adjacent pulses in control
then between the two impulses there is
some kind of control space
or there is information for example

and in connection with this this method
it allows you to build while managing
this is like an initially undefined space
because when the control impulse is made
usually controlled
the very purpose of management
and optical imaging
of management itself

but what is around is already considered to be a certain area
not always definite

in this case, for example, in resurrection technologies
It is this area that often allows
make instant resurrection
or in the conditions of the systemic level of management
This area allows you to make a balanced
or initially sustainable management

because if we do management
in some space
then logically this space should already be stable

and therefore it turns out that this space

it is somehow created by some structures

for example a person yes

and in connection with this

when we already consider the level

deep or targeted detailed management

detailed control

then this is the structure of space

this is something that is created specifically by human organs

i.e. it can be clearly seen

what is created by the brain for example

what is created by hand there, etc.

i.e. you can watch

how human anatomy works

from the point of view of external and, as it were, internal Perception

external is people for example Yes

well, those who surround a person

and internal

how a person realizes the Perception of himself

i.e. how does a person perceive in general

how they look at him

in this case

and when you start to see it

then you see the holistic structure of human actions

where a person is realized, for example, in a social system

and at the same time the space of external control

here is the space of information creation

implemented precisely in the social system

i.e. in human connections

in his expression

in action

and that's when God created the World exactly like this

that for Him any space

this is the object of creation

then it turns out that for a person it is the same

i.e. he must be able to

besides its control impulse

create everything that surrounds this control

and if we consider two control impulses

then we see it right away

Action of God
and human action

because the second impulse
it's a must

in the conditions of precisely creating space
where does the management take place
it is always the Action of God
this is the management of God

and the management which is practically
no different from human action
just on optics
on information
this control is close to a person

here's how you can highlight it in this case
what is impulse
and the Action of God
this is just an approximate section of the optics

and calmly unpack and examine
what does God say in this case?
or how He works
what does he show

i.e. it is obtained in this technology
the release of God's impulse
it is a very simple technology
she's just different in every way
approaching the optical second pulse as if

in this case, you need to pay attention
that the removal of the impulse at this level of control
this is the pre-organization of the second impulse

i.e. in the same way as it is organized
the control space itself
it kind of suddenly appears yes
near the control pulse

so here we see too
what level is approached
it is given by God
but so a person begins to perceive it later

and well, a little bit later there is a sense of slowing down in time
here you can see how time is born by the way
between God and man

time is linear and when can a person see
such a linear system
in this case it is linear time
then he can unpack time for Infinite life

i.e. this is generally an element of simple unzipping
the same as if you have some knowledge
you can unzip them
for example, just as a layer level yes
i.e. some knowledge contains knowledge
about some more complex system or subsystem

and you can unzip them like this
so that knowledge contains your future information
or is it possible for time to reproduce itself

and then it turns out
that here is the self-reproduction of time
Well, where are your events, in essence?
i.e. you start to enter
as if in the mental in the logical phase of the organization of Thinking

this is when your Thinking is organized
there is a level of personal control
You can organize your Thinking by an effort of will

so it turns out that when you start
build this management space
it turns out that it is built in this way
what is this manifestation
actually the rigid status of your will
and of a balanced status

and when you start to see
Well as if a volitional characteristic of external space
then it is clear that management
i.e. the allocation of optical systems
comes from your own control system
i.e. as if actually from you

you come to that
where in your Perception

control impulse allocation

just like God does
He doesn't take anything extra from outside.
He's just from his own system.
emits a control impulse

i.e. His control is He Himself

and it turns out when you start
come to this on a personal level

you see that God is also like a man
does the same control
the only difference is that
what is the level of ^{some} fact of pre-existence
those. pre-appearance ^{yes}
i.e. you ^{kind of} notice this second impulse later
as if he was on some level
did you perceive it

but when you do the management
only in control action
you start to perceive that he is standing here ^{yes}
exists
God's impulse
the existence of God

and here is the level of existence of this impulse of God
this is what is initially given from birth
here is a space ^{of sorts of} personal happiness
personal level of resilience
personal ^{there} precisely calm happiness
when everything is stable
this is the level that is given to you
but he is yours

to know
what is in your personal space
you need to actually feel this space

and when you start to move on to sensations
Well, this often happens in childhood.
it's ^{like} a calm feeling of well-being
but which is ^{as if} somewhat distant from you in events

i.e. this is the structure that is, by the way, the external World
In general, the Infinite World
or there is a visually perceived world

i.e. where the Action of God exists
for a person
but the person is closer to you

and here at this level
when you start to perceive a person
you are going deeper and deeper into yourself
in this technology

and when you get there
to the level of Self-Perception
you start to see a different person

i.e. you start to see
how god created man
as a level of external control after all
level that exists
generally speaking as a stabilization system for the whole world

i.e. in this case you see
what do you perceive a person as
after you perceive the outside world

and this technology allows us to understand
how god built the system of governance
i.e. He first built the truly external World, yes
it turns out for human perception
although man has always existed initially

just like God
He created at the same time with Himself
The image and level of a person and the physical body in general
for He Himself has the same body
so he naturally has a similar system
even in the pre-action yes

because if a body is created
that means it existed somewhere before that
and this is what we get: a secondary impulse
God created Himself

i.e. for a person the division is only in that
that he has the first impulse
this is a personal impulse
and for God, both impulses are the same

that's why He has
well let's say spiritual action yes
action of Thinking
Action of the Physical Body
often intersect in the same type of management

i.e. God can do remote control
and get it just as if it were done by hand yes For example
And
well with a physical hand

and it turns out that in this case
when we have such technology
here in the knowledge and creation of this space

it turns out that we immediately collide
with the Infinity system in Perception

because if we start to react
to this space
Right
then what's the difference
that it is like a piece of space that is close to us
what is this Infinite space
it's still the same thing
this is outer space
where some kind of control impulse is visualized

and it turns out that based on this
we can very well say
that's the way to a person yes
one person to another
this is the creation again of the structure of the external World
and that means Saving the World
and then he sees the image of a person who is nearby

those. logically physically clear
what he always sees
i.e. always perceives with vision

physical image of a person

but if we want to understand here
how does vision work
human physical vision
then we have to see
that man first builds external Reality
then transforms the light
i.e. he ^{kind of} bends it into the structure
i.e. he begins to bend the light with his Consciousness
with your personality in general ^{and} with your body

this light starts to bend
and there is already the person he perceives

i.e. people exist outside of time
from the point of view of the human Soul
Souls communicate outside of time

and it turns out that we are beginning to see
structure of light
means that it is actually the investigative light ^{in general}
because this is this action ^{yes}
but exists ^{as if} in absolute space
i.e. the light comes to life
he approaches the Soul of man
he becomes Eternal

everything you perceive in this technology
becomes Eternal

and then it turns out that you are very organic
go to level
where the Soul creates
the structure of the future Eternal development

i.e. for the Soul there is no concept ^{there for example} "death"
there is no concept of some kind of "cessation" of something
or even "beginnings" ^{there often}

and so what ^{do} you mean, more precisely, ^{or what} , the deeper
dive in
into the structure of the Soul in action
the more accurately you reach the level

It is precisely that the Soul embraces everything at once
and at the same time, as it were, is realized in action

i.e. that is why there is often no concept as such
Precisely in the logical ^{sense}
"beginnings and actions"
because the Soul perceives everything
in the Action of God

i.e. for the Soul in this technology
God is both
and beginning and action

and it turns out that when you start to see
this is exactly the control angle
then it turns out that you see
that the Soul interacts
Well as if he were actually talking to God
just like a person talks to a person
i.e. in words

and you start to see
structure of word organization

so here is the intermediate system
specifically for the Soul of man
between adjacent pulses
this is the word

if you want to understand
what does your soul say
you can just read it
so you see a specific word

and this is a given word
as required
into some area of space
gives a specific execution of control

i.e. in this case
when you transfer control
to the level of action
it is enough to fix it
two points of control of the Soul
i.e. to highlight the optical phase of the Soul
and just write the word

as a rule, one word is needed

and so, to make control by phrase, let's suppose Yes
it turns out you need to create a word
which contains the following subtext

i.e. in this case if you look
as God says
then it's clear that well He says the same thing
firstly, as a person simply

and here it turns out
that He simply creates in the word
the whole world
the whole Reality
because that's how He perceives it
i.e. His personal Perception is like this
that the external world is being created

therefore the word contains a different subtext
this is management
i.e. it is possible to make liquid control
but to consider that it is water or tea for example Yes
and write the word "liquid" etc.

if you want
but at the same time you see
for example all the water or a cup of tea

this is the creation of an external image
this is a space of sustainable management
which is already being created
In Spirit
With soul
the physical body of a person
i.e. all management functions are manifested there
and what you manage is like a control area , yes
stands out
within the scope of your specific action

and you are very clear in this technology
track your specific action
i.e. you see how your control impulse is organized

i.e. you see where it originates from
why exactly was such an impulse created ?
why is he yours at all

i.e. you can clearly differentiate the information
separate one piece of information from another
look where it came from
well, possible for example there is influence there yes
where did some systemic or one-off connections appear from ?

i.e. this is a very strong level indeed
analysis of the situation
when you highlight the outer space
as a space of action too created
and God
and a person
and the space where the World is realized
fully systematic and sustainable

i.e. in fact this area
in logic this is the area of Perception and the area of events
and one that already exists stably
from God

i.e. in fact it is like God's territory
where you just do management on everything

but logically it is
your control

always happens in space
pre-created by God

but also the management itself
consists of a God-given structure

c.t.e. when you start watching
what is this structure
you see yourself first and foremost
i.e. a person yes

and when you see a person
like a structure, well, a core one there let's say yes specific
then you see
how do you organize yourself in this place

i.e. you see that the information element
that's exactly the optics of the glow
this is you

i.e. you begin to perceive yourself as information

then it turns out that you know and are aware of yourself
then this approach allows us to understand
that any other element can be perceived in the same way

The principle here is very simple :
creation of a similar system
information
Human
but in this case the person is already at a physical level

and Self-perception
i.e. this mechanism is very simple
you know yourself absolutely for sure
and once you find information about yourself
you get
channel of precise information level
accurate transmission of information

it's enough for you ^{to be} under this dome ^{yes}
install any other system
and you get information about it
that's all

i.e. the scheme is ready
and therefore it turns out that this one is like
^{well} the second one

i.e. the initially existing ^{level} of Reality
although in essence he is the first
you look ^{at} information about yourself, ^{yes}

but you've been doing this all this time
and you exist and live
^{there} for example, you live happily
and at the same time
i.e. you are healthy

and at the same time, ^{how} can external information be like this
that there is some action there
^{Well} ^{there} around you

you need, for example, to pay attention to something, etc.

and it turns out that you start creating events
events are created like this
what do you remember about previous events often
but to understand anything at all
well, systems of independent events
for example you went somewhere to meet someone somewhere
let it be for example the city center yes
then it turns out to look at yourself correctly
in the city center
you need to know the entire periphery
how to narrow the signal to the center level
i.e. how to twist the spiral yes

and it turns out you get there
into a stable control field
i.e. you built this structure yourself
and then it's easier for you

as a rule, you can determine very accurately here
positions near you
i.e. when you know the information near you yes
it is very precisely located
all surrounding information

and this is essentially a very strong level
preemptive clairvoyance in essence
because in this case you can see
further close the structure and gain control

for God is around his Person
built the entire control space

the same thing here
you are actually like Well there you knit yes
here is this information in the form of such white ones
you can even visualize it
lines
and these lines show
that as soon as you bring it to yourself
it's absolutely clear to you
that you will be able to identify a specific local target
as a control and as an implemented one

because everything external is like space
is balanced
and you get into the structure
mandatory achievement of one goal

i.e. from the Infinite number of phenomena
if all other phenomena are deduced
into the control space
the phenomenon you need
it is definitely achieved here
this is the principle laid down here

and it turns out that it is precisely the selection
as if an external control system
from the realm of even Thinking
in this case it is already management

i.e. it is enough in this case
in the system of Thinking
create the desired image of management
and output all external event space
precisely into space
on which control takes place
then the control is implemented

firstly because
what is the external mass of information
big enough
i.e. how does the external space help you?

i.e. God is also manifested in that
that the outside world helps you
and when you even know this technology
you see the structure of this World

i.e. if you delve deeper into how this World is structured
i.e. the internal structure of this World
then it turns out that this World is arranged quite logically

in every structure of the World
located
specific well as if by a cellular system
specific information component
which is
as material
and informational at the same time

i.e. the deeper you go
into this structure of a kind of external and stable World
the more you see the connections
matter and information yes
or so to speak, energy, you can say it this way

then you come to the Personality of God
where it all comes together
i.e. you see God
at the level of, as it were, internal intuition
i.e. you recognize him
you are good with God
i.e. you perceive him there as a friend , a loving person
well, in short, you are pleased

i.e. on a personal level you get there
into this structure

and then you already see yourself
this is where you are rationed
you find yourself in a zone of calm level of Perception
where do you perceive yourself as that person
which has stability
because you see and perceive only yourself

with all this
you naturally you see everyone around you
but precisely on the Perception of oneself, as if in the second impulse, yes
coming from you

one thing is just an impulse
and control over external space
and it's another matter when you look
on his own condition actually yes
then you see that this state is correct
and you introduce it as if into the perimeter of calm
because generally speaking, initially there is this calm

why do i keep pointing out
to the level of calmness yes

calm level of management

because often
Well, this is the so-called everyday or ordinary level

this is a level that is generally quite calm
when the external environment, for example, is sufficiently balanced
there are no unusual phenomena, yes
there is for example there Perception of the wind tree
there are some actions
interaction with people, for example, etc.

and that's when a person starts to come out
to the outer level
then he can watch people
he can only see through the Salvation of All

that's why this Macro-creative level
exists only as a level of obligatory good
or promoting the good of all
because it's space
this is the level of action for that type
how does god work

and therefore find yourself there as if in a system of external control
this is of course not really loneliness as such
because you care
People love you and you help in different ways

but in reality you begin to perceive
a unique level
Well, let's say the loneliness of other people

i.e. people often don't know
where to apply control
or as a rule maybe even know
but they don't pay attention
how to make it so that we unite
at the level of for example there are God's views
i.e. how to see Him at the same time
and how to communicate with Him at the same time

and here you can give a very good level
as soon as you warm your heart yes
give another person information
about the fact that you are here at all
the return warmth begins

i.e. it can be seen there

that people can actually self- recreate
self-organize
because they are generally close to each other

i.e. the more people
the more precise the self-organization of any person will be
the longer a person's life will be
in terms of well , exactly a healthy life

because after all it's me
how exactly is the technologist of Eternal life
when a man must live forever
I'm showing it here
what exactly is a healthy and happy life
a person seems to increase well, spontaneously yes
so to speak, even without any concentrated management
if there are more people

i.e. it turns out in Infinite development
when there are a lot of people
many processes are moving to a natural level
where control is no longer used , for example
for some household purposes
or to solve some local problems
and management is used more
for Macro-creation
for Macro level management

when you see that the external ones are there let's say worlds
external systems external some parameters
are beginning to be manageable
because the society that has achieved
for example, target synchronous control
it has already sort of freed up time for itself, yes
to solve external problems

and it turns out that in this case
we have
a fairly specific system of social organization
i.e. again a social plan arises
which constantly intersects
here with this space of sustainability
or, let's say , personal management

i.e. the personality is aware of itself in this place
and this place is a person

i.e. in this case I am talking about
so that the individual can become aware of himself
anyway, a person must somehow perceive himself
in the information space

and you can say, for example :
here is a person, well, describe yourself
perceive yourself by some correct actions yes For example

but from God's point of view
there is a perception of personality as such
God always perceives a person in the same way
regardless of time

and that's when you start to see
such a status of Self-perception
you see as God sees you
and then it becomes clear to you
why are you initially and always harmonious

after all, God is harmonious from the beginning
and He gave the level of universal control
then when you perceive yourself the same way
you see that you are in harmony with yourself
well let's say in some kind of balance with ourselves
you don't need to take any emergency action
everything is balanced and good with you

Well, in a word, it's not ordinary
there is simply no peace level
and this is the control level that is located
firstly, at the level of maximum control
i.e. the area of maximum control over the situation
consists of
what is this space
this is already the maximum level
expressed control already as if accomplished

i.e. you are calm because you don't care no need , yes
let's say some quick actions to take
you are in this space

I'm showing more and more now
it is through the state that this space is given

and when you find your personality there
where do you look at the world around you
then you again act as God acts

because God created, for example there is another person there

and when you perceive your personality there too yes
near another person
or as a rule it is helping another person

but it's one thing to just help
it's another matter to perceive your personality there
in a physical location near a specific person
these are different processes

because you can, for example, do something good
really there for example, to cure, to help, etc.
but this is your action, it is not specifically you yourself, yes
this is an investigative action
for example a ray of light
going from one level to another
from one object to another
there's a ray of light falling somewhere
but this is only a consequence of light

but the light source is in another place

in this case i am talking
about your personality
in this place

because God perceives personality everywhere
exclusively His own
i.e. He knows that He personally
personally here
His Personality is revealed here
in a specific place
where is he looking
God's vision coincides with that
that His Person is present
in His physical vision
Spiritual
spatial, etc.

i.e. God has no division

between space and personality

and considering that in this case
I'm talking about the diversity of phenomena yes
Well, God succeeds in this case
as if In fact, it's easier to say this

because He is calm
perceives anywhere
precisely the harmonious level
Yes to your own Reality
Of your own expression

for Him there is no division
between external
i.e. He also created external information objects
and His Personality is here too , i.e. there are no problems

and when we talk about a person
then it turns out that a person must
to know God
perceive oneself periodically
also in this place yes

and then it will work out
that he acts just like God
i.e. he actually holds it on himself
well, let's say at one stable level of information
West Outer World
only because he perceived himself as an individual
in a specific place
like in the place where he does the management yes
or in the place where he wants to help

assistance is provided by his own personality
as if it were his control space
but at the same time it may not make any special control impulses at all

i.e. help is available
like a second object and a glow near the information
i.e. you want to cure a person yes
you do the management
you put the glow as if in the structure of its future
but at the same time on the control on optics
approach it in the current time as if to it

and here is the approach of your segment of Consciousness
to a person

at the level of the second

Well like this one, it's more like an ellipsoid

a type of glow occurs

which begins to envelop a person in light

so more towards vertical

later in a few seconds

this is the light

it creates precisely space

where you actually generated momentum

in the current tense

but they brought the management into the future yes

i.e. you connected two identical impulses

and as God does

you have defined sustainable management

both in the future and in the present tense

but they did it on their own, only on just one topic

that you have become aware of the action of your own personality

in that you brought the control closer

Well, to a specific person, yes For example

and when you got closer

you've already seen it as if this action was originally yes

For example there

With soul

In Spirit

Consciousness

but even then you already know

that the action in the future has been completed

this is a fine line, yes

where do you know the future is done

i.e. you provided assistance yes For example

they cured him there

improved a person's fate or helped in some way

this is the person's own awareness

of this action

and that's when the person himself realizes it

that he received help from you

he may not even know you

you just see somewhere at the bus stop yes for example him

then it turns out that this is exactly how God creates
people saving the active
i.e. the creation of man is a personal factor

and when you see this for example
then it turns out that you have mastered the technology of such Salvation
when a person's personality is yes or his free choice
not controlled in any way from the point of view of that
that well there is a concept of "impact" of a certain etc.

in this case it is management
where the level is just not the impact

and the level of personal choice of this person

in this case you can see it quite clearly
that the management position is such
that you determine his future status
because you're just getting closer to it
with your Consciousness yes

and that's when he sees your Consciousness
simply differentiates
that your personality on the information is approaching him
and sees that from this impulse
there is the light of future salvation
he accepts this light but he may not accept it

i.e. he is completely free to choose
and like this level of reaction
when he finally accepts yes
i.e. you want to save but he, for example, after some time
accepts and he is saved

then this is teamwork
and God and man
and for example there are all the personalities

this is how God created the world
that the direction of action is to another person
this is absolutely not in essence affecting interests
this person
free choice of another person

and it turns out that here we see
the status of God

i.e. the personality is correct
when she chooses absolutely freely
your next next action

and here in between
between optical as if glowing
this person yes
and we will say by the Action of God
by your action
you see absolutely clearly how the light of life
i.e. living light, so to speak, light that has
signs of Infinite life
in every element of your action
creates this person
or let's even say this person

where you can see it like this
well transitions in this light
they are very clearly manifested
and you can see how the neighboring element contributes
or interacts there
often cooperates with neighboring
and it just happens that it interacts with something
there too, a neighboring element

but in case of assistance it is an approximate system
i.e. this is the organization of the body and the physical body of a person

and in case of interaction there may be a remote system

and it turns out that it is precisely the remote system
or it often happens that a very distant system
this is what creates the Spiritual sphere
sphere of external action yes
the sphere of the Soul
the sphere of action of the Soul

it turns out that the external action
in this case
this is what creates the control space
i.e. the space for the life of the human body is actually

i.e. the Soul Spirit creates space
The soul creates space

and it turns out that the person is there all the time

in the system of action of the Soul

i.e. the external air is also the action of the Soul
so it turns out that a person is capable of creating
in any place there is a structure suitable for habitation
the same air and soil, etc.

and it turns out that based on this
this is the state I am talking about
the state of the space of the personality is actually yes
this is also a state of the Soul

and that's when we move on
we see that in fact the Soul is space
as if it archives, accumulates

those. Soul actually
she can bring out this space
as if Well maybe to a more concentrated level
i.e. in this case we can quite see
what space well as if a concentration of events
this is the action of the Soul
where, for example, a person perceives himself
precisely as a person

i.e. when a person perceives himself as an individual
it turns out that it is precisely this concentration of information
this is the creation of events but already by the Soul

and here is the concept of "perceived as a person"
Well, it seems like it's a simple concept
i.e. you can always perceive yourself as a person
a person always perceives himself as an individual

but the difference here is that
Well, in this technology it is possible
as if by a two-pulse or ten-pulse system
highlight adjacent glow areas
and such where you can see for example
interaction for example light yes

i.e. you can see
as one section of light
interacts with another
and see that your personality is quite huge
i.e. God's great work

i.e. how God is manifested in your personality

and at the same time God gives you absolute independence
those. this is the gradation of God's light

i.e. as if the imposition of the waves of God on your personality
where is your individuality exactly

i.e. where are you absolutely not in general so to speak, peculiar
where exactly are you
this is where exactly you are

i.e. it is logically clear that it is very easy to designate this system
but on the other hand, to highlight the structure
it is the presence of only your personality
similar to that level
how God created the entire external world

i.e. God He is clear that it is He ^{yes}
and He created the entire external world
i.e. it is actually colossal
volitional concentrated control

this is actually
to a certain angle of its information ^{yes}
^{means} or to a certain sphere
put the pressure of the entire outside world

then you clearly highlight
your own personality structure

but it turns out that it is just that
she most clearly perceives the structure of God ^{yes}
because it turns out like this
monopersonality
perceives precisely God's information

and then the introduction of some problem
into your personal plan
this is the solution to the problem as God does
it's elementary logically clear

it is enough to create this control optics
then introduce some light optics here
already in the form of a problem
it is decided within your personality

but it turns out that you learn exactly that
to be able to
due to one's own knowledge of one's own capabilities
do that management when you decide
it turns out that all the tasks are all the questions
or at least those questions
which are needed from the point of view of an urgent solution
and those that are, for example, strategically important issues
they should already be decided

i.e. so that the next action is carried out in life
necessary that the main mass of information exists

so here it turns out that it is just that
this is the principle of creating a control space
from the point of view of, for example, that
that this space
this is a more massive system than the impulse itself
then by analogy it is with that
that all outer space practically exists

and considering that all external space
it exists well as if by itself

then it turns out to be using this
Well, there is still quite a large amount of information
such that you can do it already based on one impulse
regulate all external space
because you can follow
absolutely clear connections
between one impulse and all space

i.e. here it is precisely that they are very clearly revealed
those systems that are more related
specifically to the predictive phases of management

i.e. the impulse is as if given by you
for management
allocation of external space

then it turns out that it is very clearly visible in the future
what's going on around you
or around a given impulse

to see what's around you

it is enough to consider
as a control impulse
just yourself
it's clear what's around you

i.e. from the point of view of constructing the future
there are very rigid structures, so to speak Yes
uniquely constructed
according to the system of sustainable development

and it's enough to just put it there
problem luminescence
and it is very clear that there are problems around
generally appears in the World
not specifically there even along the way
some local narrow events yes
well which ones would you like to highlight

you can even watch it
what appears in the world at all
i.e., for example, the implementation of each problem
so yeah as if highlighted in this way
that you can consider the impact
for example light of this problem
for a specific local action

i.e. if it is some organ for healing
can be seen
what are the connections of this organ to some systems there
you can see in general, in principle, learn
see human organs
from the point of view of existing anatomy, for example Yes

you can see the organs
in terms of the type of energies there
you can see the internal system of a person
from the point of view of its Infinite development

here in the case of Infinite development
in general what do human organs look like yes
to ask such a question
and look very clearly
in this rather rigid scheme
see

what is actually the first task
this is the immutability of organs
i.e. they were and are

and the second level is that they still look like
more focused on information
and more specifically , as it were
i.e. they look Eternal

and this is when you begin to perceive
the structure of one's own Eternity
literally there at any level ^{yes}
right down to the cells of the organs ^{there} in the whole body
then you can see your Eternal physical body

but once you start to see it
then it turns out that further I already said it quite simply
you select from the area of Thinking
this ^{is like a fragment} ^{yes}
and move
into the management structure again

i.e. you make all the external control space
also Eternal
and then it is clear that the Eternal body lives in the Eternal World

and then you will see that right here
This is often perceived
as some kind of colossal level
is ^{no energy} ^{there}

let's say positive material for action ^{yes}
but this material can be ^{further} developed
i.e. to give the desired shape

i.e. where the event has not yet occurred
but obviously if you do something here
the event will be favorable

this is a very important level of information
that you can ^{kind of} put any event
and the event becomes favorable

the only question is that this zone
^{as if what is} the control system
she doesn't stay in control for very long

just because we work
in general as if in a timeless aspect
and at the level of collective Consciousness there is time
that's why the collective Consciousness brings us again
as if yes, into the system of ordinary Reality
And
but if you start working
and here you try to do it in a system outside of time
select control and perform action

then it turns out that the collective Reality
reacts to this very clearly right away

i.e. God created man in one impulse
created all external and internal Reality
but at the same time
He did it all in one go after all
and the next Reality has already developed and is developing
but He knows about this too
i.e. He is present there too

i.e. He has such an entry element
that from one impulse
It works on any system.
and in general knows how to hold on
as if a prolonged system of action yes

i.e. for a person this means
that he perceives logically, as if abstractly
any system as a system of actions
as an existing system

in from why abstract logic of man
abstract as if Thinking allows you to create
very stable structures
It can be seen very clearly here

and when we consider
what is this for
then for example, when treating often with resurrection systems
when you need to hold on to the image of someone already resurrected
and then when you meet him he will never go away
i.e. how to retain in Perception

and then the meeting takes place
and here, as it were, Well the main thing is not to look away yes
this exists in principle

and when you start like
Well, this focus, perhaps?
keep in mind actually yes

but here you still need to be able to hold on
at the moment of the beginning of the action

i.e. of course you can see it with clairvoyance
level let's say yes
with the development of clairvoyance in this direction
where is this resurrected man
come up
form a system of actions in advance
but it will be a long process

and of course you can do that
but technologically it requires a lot of work

but it is precisely the ability to retain
at the moment of the first impulse
that the impulse comes from the resurrected
it is precisely this control static, so to speak

and the same thing when treating a disease
to know clearly, for example
what is achieved systematically
success at the right time and
it is precisely in the structure of a kind of static management
we need to make it so that the process is dynamic
in this person
he would have come

precisely to the process of actual statics
but from the point of view of recovery

i.e. here in this case
statics already has a logical form
i.e. you have a structure of sorts of external management like this
use to fix your thought form in general
or as if Well, imagine the information for statics
i.e. your desire is static, yes

but it's really like that
because your physical body is static
made a wish come true
this static implemented control

it turns out that the creation of a physical body
for God it is a necessity
to create static controlled structures yes
in the existing so that the World as if
Well, it didn't fall apart there, it didn't fall apart

and so it turns out that based on this
Well for example, why is a person given dynamics in movement
Well, it's just an abstract question, yes

Well, it's clear that the person is moving.
but here's why

from God's point of view
why was it necessary to do this
so that a person moves simply physically

i.e. he could be smart there
but there are a lot of natural phenomena
where are static positions

then here it turns out
that this movement is a likeness to God
because God is also movement

i.e. precisely for similarity in this system
God created man to be mobile
it becomes clear why
well, it's already like a primary impulse, yes
God
and already a man
as a system for developing this impulse
create any spaces between themselves

as personal
between for example God and man
as informational
as spaces of action

i.e. as soon as we want to understand
there what will happen in the future around this person

or there in general, like, near let 's say any person

you can view this design
just take the image of any person
better than real yes For example
look
his system of interaction with God
i.e. there is God
and there is a man

and considering that God
He is always Eternal
then man also becomes Eternal
at the moment of such action yes on your part

and here along the lines of human development
Eternal
all events are defined very clearly
not only a specific person
the whole world in general

it is a very strong predictive system in essence
designed for that
that when you look at two elements of the World
from your level of perception

i.e. God and man

and you see it absolutely clearly
what's going on around them
because space is created around them

Well, you can take a look right away
God and you
it doesn't have to be a stranger yes

and then you will see that God and you
the design is immediately clear to you
that's why in a person's Soul
there is always knowledge about everything

when God and you are all clear
but the Soul of man is created by God
that's why the Soul understands everything from the start

you feel like
this is precisely the logical status of understanding
why does this happen in life at all
why some phenomena
how are they called exactly by those words
which they are called

in this case it is clear that the concept of "Soul"
this is the real Soul
i.e. the concept is defined with the real Soul

you can clearly realize
that in order for a person to live forever
it's often enough for him to just take a look
on the status of your Soul Eternal Soul

as soon as he can do it
it creates firstly the Eternal space
he can see the structure
the future, so to speak, of Eternal development

and it turns out that here
it is precisely in the structure of the status of your Soul
one can say with complete confidence
that no matter what combination of events there are for a person
he always has a way
own internal development
completely favorable

i.e. in essence a person has nothing to fear
when he knows
it is the status, so to speak, of the Eternity of one's Soul
the status that is extended to the surrounding world

i.e. where the Soul touches
with the outside world
and makes the outer world eternal

and it turns out that here we have quite
very accessible in general
either a system of understanding or actions yes
from the point of view of the Soul
that it is enough to see

as an impulse of your Eternal Soul

it works
on some element of information
and makes the element of information Eternal
then you
first of all, become Eternal too
really at this moment
and you can extend it to Infinity
this system

but you also actually kind of form
make the outer world eternal
i.e. it is a mutual work coming from your Soul

and then the space of this external control
it merges with the Action of God

those. God and your action
it's practically the same level of management
i.e. your actions are no different from God's actions

i.e. the Light of God
control light
and space in general is all external
this is one impulse

then you achieve control
at any distance
at any level, generally speaking
there is a fast reaction, a slow reaction, etc.

i.e. you achieve effective management
it turns out in almost any case

This concludes today's seminar.

thank you for your attention
