

GRIGORY GRABOVOY  
The Teaching about God  
**Methods of Eternal Life**  
04.06.2005

Hello again  
the topic of my seminar today  
this is my Teaching about God  
Methods of Eternal Life

in this topic i show  
how technologically simple as it were  
take an objective approach to that  
that the person who put it  
the task of precisely Eternal development  
what should he do  
as if at the level of pragmatic technologies

and in this regard the task here is quite simple  
we need to break down the algorithm of actions  
to the level of existing tasks  
to the basic level

i.e. where the action takes place

and create accordingly  
predictive management phase  
i.e. try to do more than what you have  
some phases there for example, absolute forecast  
be able to dynamically create your own future  
based on ideological goals  
For example there is Macrosalvation  
and accordingly solving specific problems

therefore, in this case it is the methodological base  
it often has such a significant meaning  
when we have to do something specific  
precisely from the point of view of this very action yes  
provision  
systemic support for the Eternal development of man

so first of all  
It is necessary to consider here that  
that the very systematicity of Eternal development  
this is a fundamental law of nature so to speak Yes

from God's point of view  
any systemic structure in nature  
it practically has the status of Eternal Life  
at a certain level of human perception, perhaps

and that's why we talk more about that  
that the structure of Eternal development  
is revealed in any external management environment

i.e. not only in the form of a task, for example Yes  
and we are considering such an action  
as an action of what we recognize, including  
the system of Eternal development  
in any information object  
i.e. in any information environment in general

in connection with this it turns out  
that the main element is, as it were, the concentration of action  
i.e. this is the management method here will be the following

what is in this so to speak in the first method of management  
according to this technology  
specifically related to methodology  
with the methods of Eternal development of Eternal life  
needs to be considered  
First of all, concentration  
as coming from your control  
some kind of control impulse or control environment

and some kind of systemic control systems, so to speak  
where is Eternity  
touches  
with the level of your actions

i.e. you are actually considering yourself  
at a distance of some kind of geometric body

and here you are considering  
what are your personal tasks?  
as a system of some external actions, for example  
i.e. the actions of other people  
and the external one is this Eternal Glow

this is how, for example, God determines or creates

Eternity of Its Development  
this is from a logical point of view  
He is still Eternal  
i.e. He succeeds  
and in essence He is Eternal

He just needs to create that  
what is considered development <sup>yes</sup>  
create dynamics of action

so the first method of control  
this is the creation of dynamics in action

and for this we need to create such dynamics  
which would identify firstly  
surrounding control systems  
very rigid linear <sup>in fact</sup>  
structure of future development

i.e. conceptually, <sup>so to speak</sup>, in the form of ideology  
Eternal Development System  
this should be a fairly standard procedure

she is  
at the level of some kind of automatism of the human body's actions  
a person has a level of Eternal development  
he just doesn't always come into contact with it  
or he <sup>for example</sup> there is no constant perception  
or maybe he often doesn't remember it  
this knowledge structure

but generally speaking  
a person periodically passes  
through this development system  
where is his physical body  
acquires the status of Eternity

well in this mode  
or even cellular development  
and at the level of these microprocesses  
which occur in humans  
visible  
where is this <sup>kind of</sup> intercellular level  
implements the structure of Eternal Development

Well for example if you take a spark  
between two hard stones , <sup>yes</sup>

organize from friction of stones  
or take two crystals  
and just organize the light  
some spark of light

it turns out that rigid systems  
which, well, are not in this regard, so to speak, a spark  
in terms of even the Perception of these systems

because the nature is different on the physical level

then this spark is actually  
the information is quite dynamic and fast  
but which contains information  
or about crystals  
or about stones  
from which a spark is struck there

i.e. it turns out if we take about stones  
this information  
through such a seemingly fleeting phenomenon  
like a spark yes there is fire there for example

then it turns out  
that we can take information  
or by considering this process  
stone hitting stone  
or by entering the past  
and this dynamic is pulled out in the form of static action  
i.e. this claim  
and further as a consequence  
see about the existence of stones

i.e. in control technology  
by the method of precisely Eternal life of Eternal development  
where you create dynamics  
that's exactly the selection there, let's say  
quite fast part in management  
not even very fast there  
and a fairly fast part in the management

so this is basically a special technology  
which is designed for you to understand  
what's going on with the dynamics

i.e. these two stones are static  
spark is for example dynamics

you have to actually see it  
static area  
i.e. it is easiest to understand  
that the spark is struck from stone  
that even if the stones are already separated  
then see the stones themselves  
or if light passes through crystals  
see the crystals themselves

and know that the transformation has taken place

through these crystals we see light  
already changed yes through the crystal

it turns out  
the next method of Eternal development of Eternal life  
this means well, the acquisition of some kind of static Perception

i.e. to perceive the fundamental structure  
behind some dynamic action

and the next control method  
this is perceived locally  
these structures are static

i.e. crystals for example  
these crystals are local  
i.e. not some kind of universal Infinite environment  
namely, there should be a form of management  
i.e. translation into form

this is where it follows from  
a certain axiom in these actions  
what exactly is shape selection  
this is the first sign of stability

and shape extraction technology  
has the character as I showed  
your personal actions  
so you see  
what is then projected from the outside

for example why if we consider it like this  
from the point of view of the question  
why did God create a body for man there For example

but it is precisely the external projection  
to a fixed system  
such as the body  
allows you to know the investigative part

i.e. the development of knowledge consists precisely in that  
what external information  
hits the physical body  
to the stationary part static  
from the point of view of all processes in information  
which are like Macrodynamics yes let's say so

and from here a person can know everything  
as a consequence of his, well, work or something

according to these impulses of external information  
but kind of the other way around

he can follow  
what information impulse falls on it  
and work accordingly

here it turns out  
what's in this management model  
It is precisely this axiomatic level that appears  
what we must definitely see  
some fixed systems

and that's when we look at  
then here it is just the first level  
at the management level  
according to the plan as God does  
it is precisely what arises  
this is precisely the creation of the human body

i.e. why did He create the human body like this, for example Yes

because in principle  
yes, well as if a general system of Perception  
or actions

that the body is most optimal  
reflects harmony in the World  
as if internal and external processes  
Well that's why it's in this form

i.e. the form arises

from task from information  
i.e. it turns out that she is the only one

basically this is the form of a person  
she really is the only one  
in terms of precisely a harmonious combination  
from the point of view of Eternal development

but if you think about the technology  
that's when a person makes some technology  
he may not always be able to predict  
control all macro processes  
which concern Infinite Development  
there was created some kind of information object there  
and often it is not necessary but considered

here to pass on knowledge  
God had to do something like this  
actually possessing almost all knowledge

i.e. He must be able to perceive  
your own knowledge as  
like new

and that's when, for example, He begins to perceive  
knowledge as new  
It creates a novelty factor.

i.e. the following axiom of development  
in the technologies of Eternal development  
and at the same time, as if outgrowing this technology  
exactly in the method  
that the creation of novelty of Perception

here you can see the same picture  
well, in the usual way  
and can it be perceived as a new picture yes  
i.e. precisely through the wave of novelty

although the landscape may be the same  
for example, a natural landscape  
here is a street you've known for a long time  
You've been walking on it for 10 years, for example.  
but at some point you can create something new

and by the way, at the moment of creation of novelty  
the body's structures are being renewed  
i.e. the body actually returns  
here is the information  
to the level of earlier Perception

means in the technologies of Eternal life  
it is necessary to rejuvenate often actually <sup>yes</sup>  
or something <sup>like that</sup> Well, you could even call it that  
How do I <sup>adjust</sup> it?  
from the point of view of what is happening in complex systems  
it is precisely the orientation towards a stable state  
this is Norma

How can a person know?  
that he is constantly developing there

he must understand very clearly  
that it can enter its original state  
Norma there, <sup>for example</sup>

many people have Norma all the time <sup>for example</sup> Yes  
then we get a selection here  
just some areas <sup>as if</sup> on purpose

i.e. a person is an elementary action  
a person takes a photograph or remembers there  
when was Norma  
and he <sup>kind of</sup> enters this state and takes this wave

but here is precisely the attraction of the novelty of Perception  
This is a special technology  
especially when working with photosystems

because the photographic image is different in that  
that as soon as there is a photograph  
events of external Reality accumulate  
<sup>as if</sup> as an external layer of information  
and now you still need to go <sup>into</sup> a subsystem  
<sup>as if</sup> to the physical environment itself  
"photograph" which is called

it turns out that when the photo is approached by management  
then it turns out that the novelty is a rather <sup>complex</sup> system  
for such a simple thing as a photograph

It is better to work through thought forms

and Perception of some plots  
there is <sup>no</sup> natural environment of static plots  
there is a forest, there is some kind of road, <sup>for example</sup>, etc.

and when you start to move on  
<sup>Well for example,</sup> you have a technology of some conceptual <sup>actions</sup>  
in the form of, in principle, methods of action  
and you need to provide yourself with Infinite Development right away

i.e. after all, in Eternal development  
the task of the Eternal in the direct sense  
there in the years there in space  
development  
this task is a factual task

and you are forced <sup>to actually</sup>  
pay attention to it periodically

i.e. you do some action  
and at the same time with all this  
if you set the task of Eternal development  
<sup>For example,</sup> at some point you remembered about <sup>her</sup>  
then the next different task arises

i.e. for the system <sup>of some</sup> kind of everyday actions  
or even control actions

after all, often everyday life is not separated in any way  
from a system of some even super-strong control

because from God's point of view all processes are equal

and control of the <sup>physical</sup> body, <sup>for example</sup>  
i.e. what you do even with the orientation of the body there by movement  
this is also management

so if you think about it  
into the inner meaning of any action  
then all actions are equal  
according to the account of Infinite development

that's when it doesn't matter <sup>anyway</sup>  
precisely "equal" in terms of equality  
and not, <sup>for example</sup>, "it doesn't matter" as such

it turns out that it is precisely when we have  
Infinite action

The endless environment makes everything equal

and it turns out that the level, for example, of God's Action  
when there is a single one-time impulse of God  
this is the Infinite Impulse

so it is clear that before God everyone is equal  
even the logical level of optical systems there <sup>yes</sup>  
Perceptions  
or model systems of the optical plan

and it turns out that when we proceed from the action of such  
that we are leveling the system  
we can look further now  
how to regulate the external there infinite environment

i.e. the following method of work  
in the technologies of Eternal development  
this is the regulation of the Eternal Environment  
due to instant Perception  
any segment of the external environment

that's what the method is called and that's how it's done

so you take it <sup>as if</sup> you direct your gaze  
in any system there in the Macrosystem  
even there in the starry sky  
the very first impulse that you <sup>seem to</sup> receive from here  
<sup>as if</sup> sometimes even some kind of gap exists  
even the sound in a thin, <sup>as it were,</sup> hearing  
<sup>as if</sup> "tearing out" the environment  
or there is a concomitant speed <sup>of</sup> some wind

this is a sufficient method  
you only need to perceive the first impulse  
and that's all

because from the point of view of Infinity  
existence of the physical body  
this is also a certain element of light  
<sup>Well</sup> there is no powerful light <sup>there</sup>  
at some point, yes, <sup>like</sup> a one-time level  
but he comes from Infinity  
so this level is Infinite

here is the combination  
discrete one- <sup>time</sup> action

and B infinite  
in terms of Spiritual development

The spirit perceives  
and as the action of the light coming to you  
and how is your long-term development in the physical body, for example?

and here the following method of Eternal life arises  
what you need to be able to create  
the structure of Spiritual development  
based on previous action

i.e. to create interest in Spiritual development  
from the point of view of the physical body, for example

The spirit can develop in this way too  
for example interesting yes or Infinitely  
one can perceive the Infinite development of the Spirit

but from the point of view of the physical body  
how the Spirit should develop  
how should human consciousness develop

i.e. the method consists of  
what do you take and kind of combine  
development factors for the tasks of the physical body

The spirit is realized  
it is precisely the task of the physical body

first it is implemented  
the structure of information in your Perception  
for example your physical body

by the way, you can also work naturally like this  
with the physical body of any other person

and then comes the level of Spiritual sending  
i.e. you see how your Spirit works  
see how the Soul works  
and here an element of volitional control arises

here is the will, i.e. the formed impulse  
through your will  
he starts to take control  
well into the ever more distant horizon

and at some level you understand  
what is the impulse that comes from you  
either you create it or you just perceive it  
you can call it "you understand" yes

although at a more precise level  
this is to be perceived, it is necessary to perceive  
it is Perception  
this is, in principle, a sufficient condition

and that's when you start to perceive the impulse  
coming from this superconcentration  
around the physical body  
then in principle you create Reality for yourself  
which is definitely stable

and then the question often arises  
or consider this Reality  
then we need to go into more detail  
output the following pulses

but how can you still know  
your forecast there in the Infinite Future  
and you might not be interested in it at all  
there is some single impulse  
or should we act anyway?  
by simply following the next step

here is the method of action by the following action  
this is that level of management  
which arises next  
just for the following information

by the way this is a powerful level of the healing type  
because the following information  
it is precisely this discrete transition

not by means of cause-and-effect systems  
and you just enter the following information

it allows a person to have a chance, as if an opportunity, yes  
to be healthy in the next level

i.e. the process of treatment itself, yes  
does not consist in that  
that you are literally treating something there  
or find the reason there

or there is some kind of consequence of the disease

and you just enter the waiting system  
that the person is already healthy  
and well, you observe with some kind of third vision, so to speak  
at the level of remote areas of Consciousness  
as a projective phase

how does a person move towards this

in fact, you speed up time somewhere and slow it down somewhere else  
as if you coordinate the entire system of space  
not necessarily perceiving all signals

just at a certain level  
well, you perceive it  
how a person moves towards recovery

that's when he appears in this phase  
you take and implement the novelty factor  
and fix it in this phase  
here is everything  
you accepted the new information that he is healthy  
you didn't do anything else

and by the way, this is an element of often instant recovery  
this technology is convenient in this

and here is the next method  
naturally applies  
to the system of human healing and of oneself  
others including

because often it is a simultaneous process  
and even people don't distinguish

if they work with someone  
of course a positive level of skill  
comes to them  
or vice versa, working with your information  
they gain experience to work with others

and this level for example  
exactly, well, some kind of such , often instantaneous action  
i.e. the wave that goes  
from the level of seemingly Infinite development  
and goes through the structure of all previous knowledge

realizes what it <sup>means</sup> for the movement

Well let's say in a healthy physical body  
a person needs to work  
for my health, among other things

and work with all people at the same time  
i.e. instant system  
allowing in the following information  
perceive  
own healthy physical body

and by the way this is a pretty good control system  
in difficult situations

for example, a person needs to do something  
Well for example he needs to go through  
Well, that's the everyday situation there  
some part of the route there seem to be no problems  
but there are some darkened entrances, sidewalks, etc.  
and he thinks "well this could be" <sup>yes</sup> For example  
how can he get through this section normally, let's say

like a regular manager  
he should know best accordingly  
what will be ahead <sup>means</sup>

but in principle in any case  
he must provide himself with the structure of the Norm

so if he doesn't have time to look at himself there  
he should at least provide himself with the structure of the Norm

then you get this output level  
in the following information  
where you are just in the norm <sup>as a whole</sup> <sup>yes</sup>  
you perceive it  
allows you to walk anywhere with ease  
i.e. to pass some section

and this is the structure of the Norm, i.e. work with health  
Well, often this level is realized  
just like a controlling clairvoyance

i.e. you see the situation and work at the same time  
just with some of your affairs with any others  
in management or is it real there  
in terms of <sup>physical</sup> Reality

and here the structure is exactly like this  
that at a certain level  
that working with physical Reality yes  
what about informative Reality  
it is indicated as if by one word  
as if well "reality of action" yes  
"reality of the action performed"

because in an informational sense  
the management is still standing  
to the level of expressed Reality

i.e. the management is often more powerful, stronger there  
rather than work there  
at the level of some others  
there Well for example, physical systems in terms of some action  
what exactly through physical systems  
the action is taking place

Well there For example there is a phone call to be made  
to make something happen  
but it is often better to enter into management  
more basic  
than any Reality of action  
receive from management status

after all, the root is the governing status  
and the main meaning of Reality  
this is a synchronous development with God

i.e. when you start to see  
interaction with God  
at the level of unity, for example  
there is a sensory level of control of all people, moreover  
is some level of intellectual development there

and when we consider  
it is intellectual development  
let's assume at the level of well as if the following system

i.e. the intelligence of the system increases from that  
what you yourself can bring into the system  
some actions expressed by your goal

then the following control method arises

that the set of methods themselves, for example, yes different  
in the structure of Eternal development  
must come to that anyway  
what is the most important thing you should develop  
Spiritual own possibilities  
there are the possibilities of the Soul  
well and naturally there is a physical body of course yes  
in terms of Eternal development

then the main factor  
as if such a methodological base  
is still a cumulative harmonious development  
structures there situations

that's how I said it  
if a person passes through some area  
and he needs to work at the same time as himself

then it often matters more  
work on the Spiritual level  
i.e. working with information on the current task

because in this case it solves the problem  
which often relates to the task of the future  
as a rule  
it means He is solving the problem of tomorrow

if at this moment he is solving tomorrow's problem  
then he will naturally pass this section

because the light of the problem being solved  
it turns out you illuminate it  
and you create a kind of favorable future for him

i.e. it is not necessary to study all the time  
some kind of detailed control  
only if there is some special situation  
it makes sense to watch physical events there  
or informative around you yes

but in principle it is quite often necessary to solve some problem  
i.e. to work simply at the level of elements of Consciousness

and the more intensively you solve this problem, the more often  
the more favorable the events

naturally the one who solves the problem of Macrosalvation  
that means it has the highest concentration  
so he shouldn't , as often as possible  
there, pay close attention to some nuances

because he understands clearly  
what's in the Infinite Future  
it is developing calmly

such Consciousness is realized in people  
who are often simply familiar with the information

i.e. they are not necessarily presupposed as if  
to experience this , well , in some kind of practice  
they just understand that since such information exists  
so it's true  
and at the level of logic  
and at the level there is a desire to develop infinitely  
and as if on a fundamental level of the World in general

because in the World  
it is precisely the element of Eternal development  
gives the opportunity to fully open up there  
to all systems that are embedded in the structure of the World

For example there a man wanted to know  
The endless development of vacuum  
how can he know  
it must mean to be Infinite  
even if he observes in an oxygen environment

i.e. in principle the structure is like this  
what he is forced to watch  
in an oxygen environment he must breathe

and this means that it is logically simple  
there is a model that the problem arises  
so how can he get an answer to all the questions  
only if he lives forever

and it turns out that based on this factor  
humans have  
well, some Spiritual systems of a logical type  
which extend its action to Infinity

it's enough to say this phrase  
that for the knowledge of the Truth there

even just one environment  
need Infinite development  
man begins to develop into Infinity

i.e. it turns out that he forms Infinity from himself  
in this case

but the task, as I said, is just knowledge  
I just took a vacuum, it's like emptiness

and for example wanted to know  
how a piece of vacuum develops there  
somewhere near the moon

Well, at the same time I wanted to know it thoroughly  
just in general with all the consequences there

or vacuum in general  
let there be a piece of vacuum galaxy there  
how is he at all what will happen to him there in billions of years

the task in general, well maybe it's not that interesting  
there from the point of view of logic  
but for some people it is interesting

for example, you can generate interest  
How does anything stay in a vacuum anyway ?  
some planets, etc.  
what is this anyway and what does it mean in principle

and start researching this process  
and the first element immediately appears  
that you can really find all the answers  
provided there is Eternal life there  
the research object itself  
i.e. a person  
who is doing the research

then it works out  
so that I can find at least one fundamental answer  
Well, the simplest task is just emptiness, vacuum  
then Infinite development is already required

and so I start to build, for example  
positions for further management  
i.e. I have logically established the necessity of yes

tasks of their development  
I'm starting to watch already  
what if suddenly i want to go there

cell to study some human

then it's not just Infinity there  
and sometimes some kind of intense Infinity  
should be

and it turns out that this transition means something in knowledge  
from one element to another

and God created everyone equal and gave them equal opportunities  
in the study of any process

i.e. it cannot be said that it exists  
is the person there stupid or not stupid  
from God's point of view  
everyone has the same research tool

everyone is capable of knowing  
what God shows there, for example, yes  
in terms of a single Action

i.e. each has an element of Infinite development  
generally speaking, they are equally developed  
i.e. either someone wants to do it or someone doesn't want to

and therefore here is the formation  
that's exactly the formation of interest <sup>yes</sup>  
this is the next method of Eternal life

this is the formation of interest in the action or <sup>there</sup> significance  
necessity of action  
from the point of view of Infinite development  
and obtaining precisely the Infinite substrate of knowledge  
for each information object

that's all when the objects are different  
and we need to do it  
so that the information for each object is the same

so we have to make a simple technique to apply  
as God does  
He takes it and applies it to each element.  
The Infinite Element of Knowledge

i.e. we again get Infinity and that's it  
Infinite knowledge  
this also includes one's own Infinite Life

so it turns out we are in information  
we find ourselves , so to speak  
here in all this information  
where are we in Infinite Development  
i.e. in the dynamic phase we mean the information phase

as I said by Law  
precisely by the method of Eternal development  
is precisely the dynamics  
creating dynamics

and in dynamics these are some kind of movements  
there in the information  
and now we still need to find  
where is our information segment  
where our life is, there is a person's personal life

and right here  
it is precisely in the combination of completely different factors  
where a person's life determines the external system  
we find, let 's say, elements or an essence  
or even precise enough confidence  
precisely from the point of view of Eternal development  
in their actions

and this action means human life  
exactly as if in an informative way or something  
space-time there Infinite manifestation

the current life right now

if it means Well, let's ask ourselves a question  
what does she look like anyway  
from a logical point of view  
on information about what a person's life looks like in general

well, just information about a person's life  
how can it be visualized for example Yes

the picture of events is clear

what is it  
the question is this  
that we create Infinity for each element  
from the point of view of technology as God shows means

therefore the element of Infinity can be anything  
so they took three objects of any information there  
and added some Infinite elements  
there were three Infinite elements

and for example there in the form of spheres yes there  
by the way, also of the Infinite type

i.e. we can visualize the sphere  
and then she has an Infinite status  
as if it begins to increase into Infinity  
as soon as we try to go around it

well, i.e. they took and came up with a technology, for example, of this type  
by the way in Reality  
at the level of the first control plan  
as the first impulse  
as a rule, this is how information objects behave

and the first impulse  
this is the first Perception  
and we can see  
what will be behind this Perception for example  
i.e. what will be the next one

then we can understand  
that the object seems to develop itself  
the sphere goes into Infinite development

and then Reality itself arises  
those. the sphere itself is not visualized

and here is the concept of "life itself"  
which is what can be added  
because I set the task  
to find life in information

so we must see in the structure of life  
and this is an infinite number of elements  
but the most important thing is that the person himself is there

here it's not even the information that has any meaning

the essence of a person matters  
and generally speaking, how does she look then again  
for the person himself it means

and it turns out that the person comes  
to the awareness of one's personality but already in oneself, as if inside

first impulse  
he gets quite a unique one in this case  
he gets the impulse of precise knowledge about himself  
precisely from the point of view of such  
Well it means natural, so to speak, Eternal development

and at the same time it hits the physical body

as soon as it hits the physical body  
an element of that is already emerging  
what exactly is knowledge  
must be transmitted to the physical body  
to his own

because in the information life looks like this  
this is a natural endless development  
of a person's own life

and here's how to get knowledge from here  
I took this from some element and got it

and here is the first element from this system of Eternal development  
this is the method of management in the technologies of Eternal development

that once you identify  
the first impulse the first there information system  
about one's own Eternal Life  
or just about life as such  
where she is already Eternal naturally  
in the correct sense

and then this generally applies to all people  
here is the first impulse you get  
coming towards you  
including your physical body  
shows that the impulse still needs to be delivered correctly  
so that the body can perceive the information  
well, it was like educated , yes or what?  
from the point of view of Eternal development

because information is everywhere  
just <sup>some</sup> information and that's all

physical matter is also certain information  
at the level of human life information

and physical matter can somehow accept  
external information  
or not to accept there  
or create some systems of knowledge of information

so it turns out that as a rule  
here is the absence <sup>of</sup> access elements  
<sup>as if</sup> this knowledge  
and it is precisely this that leads the body to that

physical  
that people there, <sup>for example</sup> , begin to age  
or they have some problems there, <sup>for example</sup> with health

so if a person  
positionally holds himself correctly in management  
then he may not have any health problems

i.e. he is on information  
maybe I'm just really healthy all the time  
and everything that happens around him  
at the level of problems there, some symptoms there  
it's just information  
it is enough to understand that this is just information

and then it's clear  
that in fact he always maintains the status of Eternity

then as soon as he understands  
he also physically becomes an ordinary healthy person there

i.e. he doesn't make it there <sup>for example</sup>, let's say, get sick Yes  
and <sup>therefore</sup> external information  
or something negative is not happening to him  
because he seems to perceive information <sup>in a timely manner</sup>  
and either he reacts or he doesn't  
at his request

but if he has time there  
he reacts  
if he is there <sup>for example</sup> there Well let's say some kind of hard worker

who constantly reacts to information  
then, by the way, things often turn out more favorably for him

but there is a nuance here  
after all, all individuals are equal  
again from God's point of view

so it turns out that God must provide the technologist  
such a high level  
somewhere there are equal conditions after all

here a person develops forever  
he lives there for billions of years for example  
and a man appeared there was born billions of years later  
but the conditions must be different  
Well as if initially yes to divide space - time there

but at the same time they must be equal

from the point of view of Eternal development

i.e. technologists at some point  
must be technologically equal to those  
who is just starting to manage

and it turns out that the technologist guarantees himself  
Eternal development  
when he can instantly almost  
transfer the entire resource of knowledge  
to the new element of Consciousness yes  
for a newborn, for example

i.e. in fact this means  
create in front of him  
the entire structure of favorable development  
Well, that 's what we do in management  
we create a favorable level of management according to the Macro-meaning  
just for everyone at once  
and that's all

and then it becomes clear  
that equalization occurs already because  
that the person himself transmits knowledge

i.e. if a person, for example , does not transmit knowledge  
either he forgot there or he considered it unimportant  
or he just doesn't want to be there, for example

here is where the nuance arises  
If he doesn't want to, that's already a problem  
it is still a deterrent factor  
if a person tries to hide effective technologies there, for example there or in general  
any there exactly Eternal development

i.e. the following method is not hidden  
effective or any at all even  
which can somehow help the Eternal development  
these systems in particular

i.e. to be open to people  
and in general for any systems of the World  
from the point of view of their also Eternal development

as I have just shown, this is a logical Law  
it's not even a task of Spiritual development there  
which itself implies  
there is a quick transfer of all creative knowledge  
and this is just logic

and by the way it is visualized  
at the level of even ordinary development detailing, here

and it turns out that as soon as you  
the knowledge has already been passed on there, yes For example  
further on you may not pay attention there yes  
or consider that it is not that significant  
to be sure to convey it there

so it turns out that you should see clearly  
a certain status of one's personality

at a certain level your personality  
it still transmits everything almost instantly  
creative  
to all people  
not only there current time  
the future even there is often the past

but the truth in this case  
the transmission goes through the future tense  
i.e. you change the structure of the future  
passing on  
into the structure of a seemingly almost current time  
it instantly becomes the past

such a close section to the current time

well, there are milliseconds for example Yes

this fragment of the past is what is floating around

that means literally milliseconds ago

here between this fragment

and the distant future

there is always a niche of Infinite development

Eternal sustainable harmonious development

because it is embedded in human logic

what is Norma

and this Norma

between milliseconds

and the current time

always saved

i.e. so that you can live forever

it is enough to detail this small border

like a very small one

milliseconds

and closer to your body yes

or to the body of any other person

this is where the transmission takes place

at the joint

i.e. in understanding

that's when you understand

you pass on knowledge to everyone at once

then the following is the Law of Eternal Life

as much as possible as possible

to understand the process of action more broadly and deeply

i.e. what you do

Well, I'm not saying that it's necessary to do this

there, well, somehow, for example, it's one hundred percent accurate there, or what

because there is precision here

this is also not such a definite value

what do you need to understand in this process

the main thing is to understand the essence

from the point of view of your personality

and when you start into this "subtle" understanding

enter

this is a certain harmony of the Eternity of your personality

i.e. you are calm there

Well as if concentrated as if natural

it's not that you're stressing out

but there is a certain level of understanding

what do you understand

Well , you're driving somewhere down the street, there are some houses and trees.

you understand what it is

so naturally you can understand everything else

all phenomena are equal in this World

if a person understood at least one thing

he will understand everything then

logical conclusion

and by the way, the conclusion from the point of view of the Spirit

namely the development of even the Spirit of God

from a human point of view

if a person sets a task

how does the Spirit of God develop in general

although it is clear that He is infinitely developed there

that's exactly what development is

this is the understanding of the next element

in general, based on some kind of similarity or something

after all, all phenomena are similar

if a person understood something

then he will understand everything else

from this point of view by the way

any personality can always

bring yourself to a level that is simply sufficient

from a management point of view

there is any Reality in principle

you can't say that a person can't do something

it's quite clear from this technology

by the way, it will be visible

in the processes of implementation into practice  
when people begin to learn  
they understand many things quite quickly, right off the bat

but in general, for example, I often give lectures  
at the level of just well that  
that's what I would like to see in the management  
and for example technology  
who often spend a very long time working on my technologies  
they know very deep aspects of controls  
and I go on and say even more

i.e. at the speed of, as it were, deep understanding  
from the point of view of well maybe there are the following thoughts  
or there are current thoughts

you can vary your thoughts  
by level of depth of understanding  
there is simplicity of action

but I still try to maintain depth whenever possible  
because I really see it  
that for example people who don't understand  
it means precisely in Infinite development  
there are none there at all

there in Infinite Development everyone understands everything anyway  
as if in some kind of average form  
remaining, of course, completely independent individuals  
i.e. there is a level of personal Perception

but it is precisely my own understanding  
it reflects  
and the overall picture at the same time  
and at the same time allows you to manage everything in an average way

and so in order to preserve, as it were, individuality  
which is, as it were, a certain guarantee of Eternal development

it is precisely the individually developed person  
creates an Infinite World of development

i.e., it is impossible, for example, to define everyone  
to the same type of Thinking  
to the systematicity of some one  
it's still impossible to do

the thought will develop differently

by the method of precisely developing the Eternal  
in this case

is a collectively oriented action

Well for example there is Salvation of all

when everyone is already saved

i.e. well, it is known for sure that there can't be a catastrophe

for example such an element

by the way, such an element is achievable

for a not very long time in civilization in modern

so when we already implement such a system

then it turns out that it saves, but it would seem so

then we are already talking about that

what we don't say is the word "save"

for example we do not use

from the point of view of a possible man-made disaster there

they won't be there

and we use the word just there well "Eternal development"

or ensuring, for example, Eternal development

now it is already provided

since there are no disasters and people have learned

For example yes, that means bringing yourself into control like that

that they live forever

then what is the collective goal anyway

i.e. a collective goal

at this point it is then simply

the current life itself

she is already Eternal

and here is the universal life manifested

this is the collective goal

i.e. present tense of the future yes

That's what we do all the time now by the way

i.e. the current life is the collective goal

if I can put it that way

Well, this might be an unusual trip.

to take what exists naturally to make a goal means

but nevertheless, if we, for example, make this a goal  
then we are approaching the future, it turns out

then the next method of control  
in Eternal development  
this is to set the goal of managing a collective goal  
namely the current life

because firstly  
say that life is not Eternal  
it is obviously impossible

as I have already said before, generally speaking, often quite  
at the logical level  
among a large number of people  
It can't be said that all people get there  
at the level of biological destruction there

because we can't even here  
experiment how to observe exactly  
i.e. a person can change his passport details there, etc., etc.  
and say that he does not live forever  
also not allowed for example

and if there is at least one loophole  
say that there is no such thing  
so we can count  
that there really are people who live permanently  
Well for example, they change their coordinates there

some exist  
well by the way, objectified cases  
according to the isotope analysis determined there  
people who even declare there  
that they live there for 1000 years  
they really did have nails, so to speak, of this type  
which, upon certain analysis,

showed  
that yes they correspond to a long age

i.e. such historical factual cases  
exist

but I don't mean specifically even the facts  
but generally speaking I mean  
what if for example we approach it scientifically

take a cut from your nails there  
and they mean, for example, by the half-life of some elements  
that a person lived there for 500 or 700 years

this is so for example, you can say that this is  
you can always say  
that this is some kind of mistake there, yes, scientifically, then

but if there are several cases systematically  
it's impossible to say anymore  
there are quite a lot of such cases

They exist as special materials  
in some systems of governance in countries, etc.

it turns out that this is what is guaranteed  
that all go through biological decay is impossible  
as if mechanically, yes, let's say

but again, the point is not just this  
namely, that it is logically impossible to guarantee  
precisely logically

i.e. logic allows us to live here. It turns out forever.  
because to keep track of all people  
maybe they are somewhere  
they live on some island  
and that's all

It is also impossible to say that he does not live forever  
i.e. I gave this as an example

next method  
the use of logical factors of probability even  
to ensure Eternal Life

i.e. well, there must be some problem there  
Well, there is some kind of storm at sea, yes  
it is known that firstly, basically everything is fine  
with modern transport there are ships

nothing happens to people

but always use a probabilistic model  
that everything will be fine  
i.e. it is like a management method  
and everything really becomes normal

i.e. use any resource  
just to provide  
namely the Eternal life of man

and the main element of overcoming  
this is, as it were, a factor of collective Consciousness

elderly people  
overcoming the factor of Eternal development  
for them

in the tasks of civilization very fast development  
and the transfer is actually  
rapid transfer of technologies including Eternal Development  
for people who are already elderly

and that's exactly what they mean Well of course all levels of the population  
any age can be realized here

but to overcome  
this is the border in the collective Consciousness  
that people live forever  
and this is the beginning of a certain developing Law  
development of civilization

just be able to quickly transfer knowledge  
those categories of people, so to speak yes, who can show this

why them  
because that means they need it more  
first of all, in help

if there is some kind of critical situation there  
then we quickly transmit knowledge about Eternal development  
So the person should get better, yes for example if he is sick  
or should he just normalize the situation

i.e., in principle, this is a kind of general management practice  
that's what we do in general  
according to my Teaching  
from the point of view of Macrosalvation, for example

but here I would like to go into detail  
what do we mean  
that we should always be at speed

to overcome a certain threshold  
in the collective Consciousness  
which would be well basically that 's what I meant  
that Eternal life is the normal standard of living

i.e. it is natural, it is everyday life  
this threshold must be provable

i.e. people should be able to rejuvenate themselves  
in no case of course nothing should happen  
there with children, etc.  
all age categories should be within the norm

and it turns out there is only one criterion  
everyone just lives  
that's all

i.e. we are making one collective management  
that's not the only place where everyone lives now  
and in general in the future  
here in this future that you see before you

and here is the imposition of this future  
to their personal events there  
i.e. universal and constant life

this is the level of constancy of life  
It's not even about the detailing  
it's just life and that's it

i.e. there is nothing there except life  
this is exactly what creates  
already like this  
a fairly concentrated method of management  
when you are at the level of this Perception  
You just really live there forever  
you have no problems  
and you just need to apply this methodology periodically

It is quite good as an applied methodology  
to naturally solve any of your issues there

because it is precisely the emphasis on necessity  
live forever  
gives a certain specificity to management  
but it makes management more fundamental

This is where I end today's seminar.

Thank you very much for your attention
