GRIGORY GRABOVOY
The Teaching about God
Organization of happiness
04.05.2004

Hello again
the topic of my seminar today
This is my Teaching about God
and the subtopic actually or direction so to speak on management
this is the Organization of happiness

i.e. in this case we mean
what is the Teaching about God and the level of happiness
this is the level of the Teaching as such
i.e. because God is happiness in essence

and when we talk about organizing happiness
then here we should consider this aspect
that for example in the Action of God yes
any action is an action of happiness
i.e. because God acts from the level of happiness
from the happy level for a person
for He is the Creator of man

in this regard when we speak
for example, about the level of management organization
it turns out that the organization of happiness for a person
This is a fairly technological level
when he understands
what does God do at the moment of Action
i.e. for a person the organization of happiness
may actually be a technology

and in this regard, when we talk about technology
it turns out that man's desire for God
this is the organization of technology
the allocation of precisely God's happiness is already

it turns out that God is quite close here
sometimes as close as possible for some people
close to a person
because the selection of a happy action
this is , generally speaking, the allocation of , for example, health
this could be the highlighting of some favorable event, etc.

and when we consider
it is the level of transfer of knowledge data

i.e. dissemination of information
about happy action
or about the action of happiness
then it turns out that here we see
dynamic manifestation of God above all
when we want to show it to others

i.e. in this technology
ability to show others for example
and the ability to spread, for example
This is, first of all, contact with God

i.e. as God gives
as God allows to show for example Own happiness
when God shows His own happiness
a person sees his Soul happy

and at this moment we see
that in order to have, for example, Eternal development
namely the technology of Eternal development
then it turns out that here we must
First of all, keep in mind that in Eternal development
such a technique as the organization of happiness
In general, this technology should be controlled

i.e. a person in conditions of, for example, Infinite development
should be able to
the structure of happiness itself
correlated precisely with the happiness of God
to highlight as a level of one's own

i.e. in Eternal development
a person should feel the same
that God at the moment of creation of this person

and this is what happens: God's Action
Initial Action
for before creation there is the Action of God
and it is initially happy for a person

that a person comes in
beyond the boundaries of its creation
and this light of creation and pre-creation of man
it extends to his future life

i.e. the Light of God Himself

and when he is this Light
begins to somehow spread to itself in the form of technology
then he gets

firstly, then you are already in complete health
at the event level
i.e. in this case the events are illuminated by the Light of God

and it turns out that the event cannot have
for example, some negative configurations
for a person
because a person sees all the time
it already turns out that God's Vision is in fact
just as God sees
sees the Light of his own creation

i.e. he sees that harmony
which exists in all things
together connected and
i.e. he can understand the structure of all things
in the happiness of one's own self-expression it turns out

and when from here it begins to spread
Well as if into my future
then it turns out that the future is for him
it's like a design in optics, so to speak
she is this system of the future man
looks like a level is floating on it
but from God specifically

i.e. to distinguish
Action coming from God
from the action of, for example, going
from well as if the level of knowledge of God is not precise
here we need precisely the criterion of the principle of happiness
recognize first of all

i.e. this advancing so-called plane there
as if external control so to speak
in this case it always has a spheroidal shape
i.e. there are no flat systems and flat figures

i.e. purely criteria-wise, as it were, technologically
everything is very simple
there are no planar phases there

and when you start to recognize in the future system
precisely multidimensional
well, more like a three-dimensional convex phase
in management
then you see yourself means where you are
it is in the happy level of God's knowledge of you

i.e. God always knows about you
according to your lucky level of development

and when He knows it
you are trying to go towards the same thing
i.e. you are already on your way
as if not simply through , for example, spiritual contact with God
or from the level of action of the Soul, for example
but you are already going, generally speaking, technologically
after all, knowledge is a certain technology as a rule

and it turns out all the same
what is there to read some book
at the same time for example with God yes
and try to understand His knowledge about you

here the technological principle is again very simple
any information of creation
for God
this is his personal happiness
reading some book
look how God is reading it right now
or any information at all

this applies to any level
Well, it's easier to work at the level
for example, a flat sheet is translated into multidimensional Thinking
how does it happen yes
flat text it would seem

and so it turns out that there is contact between text and vision
if we talk about the Vision of God
this is the realization of the initial and subsequent events
i.e. this is the happiness of God's self-expression

and when do you start
the depth of the very happy level of God
see

as a personal, well, as if everyday action , yes , including
then you see that everyday life is saturated
precisely by the happy action of God
and there is always a way for every person

i.e. in any seemingly hopeless situations
means or for example when we consider situations
when they are hopeless, for example
from the point of view of human logic, for example

but from God's point of view this does not happen
God can always change the structure of governance.
i.e. for Him, in principle, the concept of "hopelessness"
in essence, as if human should not exist
at the deep level of God
He generally doesn't have such a thing

i.e. it turns out that, for example , a person in this regard
in terms of happiness, there was no difference with God, for example
it must have a happy effect at the same time
i.e. to reveal happiness at the speed of revealing happiness
God in His Self-knowledge
In this case God knows Himself
God knows Himself through happy action

i.e. He considers that the criterion of His knowledge, for example,
the criterion of the Norm and His Action His happiness
or generally speaking development is that
that He considers the opposite but happy impulse

i.e. He, for example, gave a person health
the man had happiness
and that is right

i.e. for God to control
as if exactly sustainability of development favorable development
of some system or the whole society
He has enough
only one criterion of happiness
identify one person
and then it turns out that in general it can be understood
how this system is developing

This is, in general, a fairly powerful diagnostic system.
for global control systems

i.e. if you want to consider social processes
or generally speaking, there is a storm going on somewhere
and consider how it will spread
how to stop it at all
then it is enough to identify the structure of happiness in the future
only one person

It's clear that the storm doesn't affect it
and then the whole picture is already clear, yes
on the Spiritual level it is clear
that nothing negative happened
here the Spirit cognizes the physical Reality as well
how do you know with logic

here is the action of the Spirit and the logic of man
they are perfectly combined

and it turns out
that for example can be done with Spiritual Impulse
understand the situation immediately
but already as he understands the logical level

i.e. you translate
in fact, the level of knowledge is logical
to the level of Spiritual action

God can do the same
He can translate logic to the Spiritual level
or, for example, the work of the Soul at the level of the Spirit, etc.

and it turns out that you are getting closer
in a happy level of self-expression
in discovering a certain level of happiness
in general, even in a certain search action
because for this it is enough at the search level
find lucky level
if for example it is not in the system yes
then you can enter it by means of control

then it turns out that you are due to one impulse of happiness
you align the whole system
i.e. you don't let the hurricane reach there
the boundaries of the territory there of the settlements, let's assume yes
or don't give him the opportunity to go out there
on some people to cause harm, etc.

i.e. a system of control through happiness
This is a fairly powerful control system.
through a single impulse of only a total of

after all, a person cannot be happy
if there is some problem yes around
essentially cannot be happy

that's why it turns out
that the revelation of True happiness
this is still a level of Divine happiness
i.e. when a person wants to reveal happiness
he should still look at God then

because well, a person can make some assumptions
say yes although it's quite bad for example
but he is, for example, logically happy

according to some of his criteria
but God cannot give happiness
except for the happiness of all

and it turns out that it doesn't matter
the way to God
and the path to God is always
this is the attraction of management technologies to creation

i.e. the path is attraction
here in the technologies of happiness the movement is as if from you yes
towards management yes
this is a movement towards you
but already Divine thought Divine Action

and it turns out, for example, especially in complex situations
when a person well for example for a long time
is in a difficult situation
well, for example , with various diseases
for example, when a person has some special problems
then the identification of the structure of precisely the happy action
for this person
but already from God
this is a specific healing mechanism
this particular person

if you need an extreme level
well, like a one-time level of instant action
i.e. let's assume that some kind of catastrophe doesn't happen there

for example, there is a car crash or a plane crash
then you need a level of happiness
i.e. precisely in optical terms
as if a sphere of happiness
take it and make an effort of will better from the heart
display near the object

i.e. there a person no longer differentiates
he just knows what he's doing
introduces a level of happiness
a happy action or a happy outcome yes let's say so
it is the outcome that comes from you and the outcome of the situation itself

i.e. coming from you and the outcome
here are the equalized systems
just as the happiness of man is the happiness of God
these are equalized systems according to Macrosalvation
Well, first of all, let's put it this way

and it turns out that you can see
that by doing so you regulate the situation
i.e. your happy knowledge of the outcome is enough
and knowledge regulates the situation
i.e. again your knowledge yes

and your knowledge is transmitted in this case to people
practically at the level of information of the whole world by the way

i.e. a person who, for example , does not know you at the moment
he is on the plane
he can be saved
because you brought out this sphere

let's assume that the plane arrives
well, having some kind of problems
We need to put more of these spheres near the plane
and that's all
and it will be more like reserved or something
in flight safety

the same systems can also be installed
near a person
for example, happiness can be put there
in the Perception of God
that a person will follow the True path, for example, Eternal development

just highlight this area in the information
and put it somewhere near the person's body
physical body at that
and you will see a lot of technology
which will show
in general, how do you look at a person, for example ?
for example, there with inner vision
or by physical sight

and here you can see
that in the element of True happiness
for a person
you enter almost completely
to the level of very deep unity with the Soul of God in essence
precisely with the Personality of God
where God can be manifested
and Soul
and Spirit
and the Physical Body

i.e. you begin to understand the Action of God
as coming from a person
although you know that He is God, for example

and at the same time you begin to see
that His happy action
this is your own path
for Him this is a happy action
your right own path is Eternal development

and from here it is clear that when a person
for example, based on its Eternal structure of development
i.e. when he knows that he can develop Forever
begins to have knowledge as if coming to him
or knowledge of oneself, so-called knowledge of one's own
and therefore the word "to oneself" is more applicable
i.e. your own knowledge coming from God is true
but they are yours
i.e. he can single out his own individual path
in this case

then you get knowledge coming to you
this is your knowledge initially

i.e. you understand what God gives specifically to you
i.e. what can you do
and for example what can only you do let's assume yes

when you see this level
you see that knowledge is always happy
i.e. God always gives the knowledge that one possesses
precisely as if by the happiness of Eternal development

when you start to enter this knowledge structure
then you see any expression of any thing
in this world
any action of any object
as an action in progress
as if from God
and at the same time
to God

i.e. God actually looks at things including
well, at the optical level it looks like this
as if from the other side

i.e. if there is a certain amount of information yes
for example there is a computer monitor
then you can look at it
with eyes physical vision

but the Vision of God is internal, as it were or what?
space for this level of control
i.e. this is what happens in the computer
generally speaking from God's point of view

i.e. you begin to understand
how does God see this object of information

and as soon as you start with your thought
touch
with the Thought of God
then the actions become clear to you
in relation to the computer

they are basically clear anyway
You can type text there or go online there
to perform any action at all
which allows this computer, yes for example

but when we talk about a person

then man is an infinite quantity
it works the same way
how can God act, for example, in some situations
or he can learn to act as God acts
at least in the structure of Eternal development

and when you start to see it
then you see the differences clearly
why is man for example eternal yes
and let's say there the computer is like a recreated system
to be Eternal in this system
this system should develop in the same way
how does a person develop

i.e. a computer, generally speaking, is any technical system
these systems must evolve
a person is being turned to the side
but under no circumstances violating
level of Infinite human development

i.e. here the level of harmonious development of a person arises
in Infinite Time
i.e., it is precisely in the world of things, so to speak, yes
in the world of some information objects
in the world of action

i.e. in the World there is an Infinite number of actions
and it turns out that in what way

Well, definitely guarantee a person
that he is there in millions of years for example yes
when he reached the full control system
won't get into some kind of story because of external events
well, the same hurricane, etc., yes

then it turns out that a guarantee can only be made in that case
when a person understands the system of interaction
things
information objects
and man first of all

because in principle between people
in fact, there are no problems at all
because created in the Image and Likeness of God
man he can't bring
well, so to speak, conscious harm

or by and large he
from the point of view of happiness it cannot cause harm here

when people understand this they will understand
that man is not dangerous to man
the question is that there are external objects of information
here are some that may pose a problem
until they are controlled
from the point of view of creating precisely the World

because in Infinite development
when people will open their Souls
to the level of Infinite development
and almost many of them already have them open

in fact, in the deep account they are always open for everyone
but not everyone understands this knowledge logically

and if they are not there, then they can in principle be added
due to the technologies of Infinite development
i.e. this is generally not a problem
or they are there, but not very openly disclosed
or they are applied in the wrong direction
or they can be added
just like ordinary knowledge there to count from a book for example

so the problem is not that
Well, in this case the problem is not in the person
how does it happen in general how can it even be unusual sometimes yes
this formulation is perceived

but when we talk about happiness, it is precisely Divine happiness
then the problem is not in the person
because as I already said
this is originally the happiness of God himself
creation of man

and it turns out that the question lies here
it is in management
as if external elements of information
i.e. some things, machines, technologies, etc.

then you need to know the structure of God's access
to this process

here from God's point of view
God is evolving
and for Him there are no problems at all
whatever cars there are
i.e. He knows how to manage the system
from the point of view of His presence or Action yes
i.e. Physical presence or Action for example

and it turns out that for a person
you just need to work it out
the same mechanism of attitude towards things
and to those that he produces himself
for example with your physical hands

and then it turns out that
or even if they produce robots
but that's not the point
but as if in the World of Infinite Matter
physical matter

if we consider that Infinite development leads to that
that an infinite amount of physical matter arises
then, for example, put the question like this
that all outer space
it's some kind of limited quantity
Well, for example, theoretically
extrapolate as if a probability value

and it turns out that the number of things
can be so big in Infinite time
what then where is the place to move around there
To an infinite number of people
well, it's purely a kind of probability problem, let's say yes
conditional enough

then it turns out
what a person needs to develop at this level
he should still have the happiness of interaction
with other elements of the World and with other information

and by the way, when healing from very complex diseases
it is precisely the element of absence, as it were
well let's say the development of the event plan
when there is a kind of compaction of the outer space
that's exactly the skill
the ability to discharge this space

gives life to man

because here the system is basically the same
it's just that in this case the Spirit is at work
when the world of physical things is rarefied

when we talk about True Technologies of Eternal Development
then happiness is an action at the same time
both on the physical and spiritual level
and by the way at the level of happiness of the Soul

here is the concept of "happiness" it is always
is considered first of all
happiness is still the soul of man
well and God at the same time yes
but at that moment God may be there
for example, there in some other place, maybe even somewhere else
but nevertheless when the Souls of God and man are happy
then they are together at this level of happiness
it turns out that this is the main thing here
after all, the action is in the world of things

and then a third level of Reality arises, so to speak
which speaks about that
that things must be inspired by man
i.e. they must have the same level of action

i.e. a person must consider some thing
the same computer monitor
not only there by physical sight
and must still react
With soul
i.e. by Spirit
Consciousness
Well as if by the whole structure of the personality

i.e. it's not just some monitor there
and this is the level of naturally Infinite connections

a person must be able to control
as if from this side

then he sees at the level of God's Action
that the Action of God and man are combined
i.e. acting as if by optics sometimes
well, as a first approximation, let's say at the first level of Perception

on the other side well, from the point of view of all connections, so to speak
to the computer
God naturally understands and distributes control
on this computer
including in relation to Himself by the way

and when it works out
what a person is looking at this computer
he's still at a certain level
aligns with God's Action
does he agree there
or does he want to consider it in some other way?
your actions

then it turns out
that when a person sees all the actions of a person
then the task of a person at work
not only with a computer
and in general with any system
specifically not related to a person, so to speak
this is an action at that level
that on the way to God
man controls things
this is what it looks like well in general, in the first approximation , let's say

and when you consider
already the second there is the next approach to control
it turns out that in the elements
precisely a happy development of events
in the elements of happiness
can we allow such a thing in general, well like growth in management or something
as an element of approximation to accuracy

i.e. in some systems
for example, we cannot allow any inaccuracies
we need it right away
there is definitely

in the management structure
through the organization of happiness

happy action
or the spread of a happy action
or that element how to teach it
you can make an approximation

but in this case any approximation will be an exact action
there is a very peculiar element here
as clearly revealed
human error free system

i.e. essentially in the Image and Likeness of God
a person has the ability not to make mistakes

and if for example he does some action
then it is not necessarily a mistake
this is possibly the action of the structure of external Reality
then he just has to learn
interact with the outside world
as if as an autonomous quantity , let's say
which is in the system of its task
then he should see clearly
border
between the outside world
and it turns out to be in action
not on a physical level in this case
namely on the Spiritual

and when he begins to see it
then it is clear that the physical level of a person is Infinite
here is the endless development of human life
it turns out to guarantee an Infinite level of development
his physical body

moreover
Well, I mean the same body a person has as usual
but at the same time the infinite size of the body
it is like a certain constant, a certain substance in general
which turns out that it is revealed
precisely as Light having an Infinite nature
but coming from the human body

i.e. here it is possible to identify
the structure of the human physical body
where is the Light of God coming to a person for example
from the moment of its creation
and then the body radiates Divine Light
i.e. how it was created by God

and it turns out that the radiation, well, there is the glow , let's say, of such a body
already gives him the opportunity for Eternal development

i.e. it is open before him
practically Eternal space of development

here is such a conditional action
that you can fill everything
some material level
there is no such thing in this action

i.e. as soon as we comprehend a person already at the level
precisely as if fundamental quantities
external Reality
physical world
or there is an internal Reality
it turns out that a person is an Infinite quantity

because Infinity is generally visible
you can even feel it with your physical sight
it's like pressure of light
coming from a person

and the Infinity of his physical body is visible
at the level of interaction with the outside world

i.e. when you enter this position of control
then you can see what happens then
which is naturally possible there
any disease for example to cure yes
overcome any situation
because man has infinite development
in the physical world including

here on the Spiritual level it is very clearly understood
that a person on a physical level
has an Infinite development system
because he is initially happy
for he was created by God
in the happiness of Divine creation

and when you
Well, to such a primordial Truth of man
you start to get closer
then it turns out that you can do it
already having reached, as it were, the everyday level of Perception
of your physical body
very clearly regulate
Well, there are some physiological processes there

i.e. simply restore health
yours or other people's
just ordinary everyday actions

i.e. you start to see
that other elements of Reality
they also have the light of happiness
the truth is already coming first of all from you
i.e. you begin to see where your happiness is
in the subject given there
in this information object

why does it turn out that many people
Well, for example, they are tied
to some specific things
or there to animals
because there is a constant source of this happiness
coming generally from them

again I'm talking about that
that a person in this case is a completely different system
man is the original Infinity
i.e. one person for another
this is already the original and Infinite happiness in essence

but when we start to analyze the structure
well, like an adverse effect
how are they born then
in case of work in this mechanism yes
but in this case I'm talking about the formation of happiness
or about, for example, the system of organizing happiness
as a control element

and when people understand this
and make happy actions as technological
then it turns out that they do not give the opportunity
there to another person
to manifest itself in an unfavorable way
i.e. they are generally committing at this moment
control

and it turns out that when you
for example, you do this control
then you thereby add to the other person
just happiness i.e. events

because happiness is an infinite quantity
for action

and when you act at a happy level
then another person
just like I said
that God is manifested in any level of information
then you can see the action is happy, by the way
Action of God
in relation to this person
i.e. it turns out that you can't bring him anything except happiness
in your management

generally speaking, the whole system of my Teaching
that's how it's built
that by any action
you through Macrosalvation
always bring the level as if the next
in general, it's a factor of his personal happiness
i.e. you give him the next level of knowledge

and when you are already working technologically
just at that level
what do you need to do to be happy there, for example, yes
what to do to make another person happy

because in the technology of Eternal development
this is a fairly necessary value
a person can exhaust, as it were, possible levels
for example, some kind of professional action
i.e. he can study
over a very long period of time there are possible values
which interests him professionally, let's assume
and then he must form happiness technologically

i.e. he may have such a situation
that he will simply be forced to
technologically form
the structure of one's own happiness

at the same time
he must do as God does
because here there is , as it were, one such key link in general
that God who can do everything
and in general any element is under his control
element of happiness

makes the structure of His own Consciousness

there is a certain difference in this
God creates happiness
and a person can
first of all, to form happiness

and when, for example , you set the task of creating
i.e. here you can see how it differs
God and man in action

that's what it would be like at the level of Infinite development
there was no such difference
well at least from the point of view of Eternal development

it turns out that the task of formation
it is the task of creating happiness for others
i.e. a person can
First of all, it turns out to create happiness
for others

and from here it is clear that at the social level
man is socially manifested
as if what is the level of information
where development is first and foremost in society
it is there that other generations develop civilization there
and therefore it is clear that this is why a person lives in society

i.e. his development system is aimed exactly like that
that he should develop in society
because he must create happiness for others
at the same time he can already create
your own happiness
through creating happiness for others

that's if I may say so
that it is possible to create an information object in management yes
then this is the concept of "creating happiness"
this is actually socialized happiness

i.e. it turns out that a person can be happy
from the point of view that he created happiness
only when the other is happy

i.e. it turns out that here too it is revealed
It is precisely this task of universal happiness
there for example there is a general resurrection

general welfare, etc.

i.e. because then he is already close to God
when can create
and in this case, to create
we need to cover the whole world, generally speaking
favorable management

and it turns out that when you
exactly bring together
namely the task of favorable management
then here they are already beginning to take shape
generally clearly visible
very specific technologies

i.e. the concept of , for example, "favorable action"
or there "happy action"
where the happy is higher than just the favorable yes

here the technology is aimed
to actually comprehend God
in His already elementary, as if in a private action

Well, if you ask yourself the question
for example God as a person
this is what interests him in particular

then here you can consider this answer too
i.e. here you can see
what in this particular case
so the personality of God is of interest

Well, that is, God set tasks for example before man
for example, a person understood them
and then He wants to consider
but from the point of view of the Personality in general
what interests does God have here just like a person for example yes

then in the structure of precisely happy interaction
he can know this information

i.e. if there is a person there, let's say a fisherman
then maybe God is also a fisherman there
and he can consider how then
then it turns out like God catches fish, i.e.

what is he doing with her anyway Yes

here is the revelation of God's personal tasks
this is the path to human happiness
i.e. the happy path of man, among other things

but there is such a level
how exactly is the path to true happiness
i.e. as the volume of information

and this volume is often very easily visible
in front of a person

i.e. you know how it unwinds there
There are, for example, tales about a flying carpet
there the carpet unraveled and there this man took off and flew away

It's quite convenient, after all, it's an airplane
not just a carpet i.e. some advantages yes
this is the path with certain advantages
this is the level that is in front of a person
opens very clearly

i.e. these so-called happy yes unfoldings , so to speak yes
or the path to personal happiness
how exactly a specific person
this is something that a person generally speaking always has in essence
especially in childhood

and generally speaking he can choose
what does he want to choose, for example , for himself
and the only question is that not every person
for example, this is the path that goes here
it's his personal choice

that's exactly when a person chooses
level of happiness
then it doesn't exist there at all
there are three or more roads there
there is always only one way

and if a person refuses
he always refuses consciously, practically
at the level of the Spirit consciously

for example, he can choose some path
but he thinks that

and there you can see that it is unfolding
This is exactly what is unraveling this situation
it is precisely happiness that is a certain thread yes
which always leads to a good outcome

but a person, for example, chooses something else
then it turns out that he consciously chose
some other action

This does not mean that this is a wrong action.
from God's point of view
man is completely free
he has the right to choose any action

so here's how to find out
so that at any level of development
your own path was happy
you need to be able to reproduce it yourself
a level similar to what God gives you

i.e. how to turn the track
but already from myself and my own

it turns out that the external path is training, in fact, yes
in this case
you must understand
at what angle does it unscrew
and as if a projection of similarity
how to simply transfer in geometry
into your management system

i.e. this is by the way a very simple action
at the level of physics of perception
some optical elements

there is a twisted level of happiness there
which God unfolds
and these levels, generally speaking, are everywhere
practically, people basically walk along them

so in general it is quite a lot in essence
it still matters
by level of access, for example to information
except for access to information
there he can control exactly in reality, etc.

and it turns out that here
development of your own structure of happiness
as if reproduced in fact and in action
this is a special task
which allows a person to be completely free
and at the same time act happily there
for yourself for others

but this is a special special task
when another person's happiness
it is like an internal task
first of all another person

and understand the task at the level of human perception
this means to understand God's task after all
in relation to this person

the other person is happy
when he performs God's task
and how to get to the bottom of this problem
this is the depth of the Soul

i.e. in essence it turns out
to really help another person
it is necessary at the level of the maximum depth of the Soul
to know
another person's action

and this is peace in relationships
as if it were a calm attitude
i.e. to know the level of True peace
when the other person is calm
i.e. you can't disturb him in any way

and God acts in the same way
He always acts from the point of view of that
that when God approaches man
the person calms down

and then you begin to see the structure in action

i.e. sometimes God of course gives knowledge like this
that a person is on the contrary emotional
for example, initially yes perceives

but nevertheless it is meant
not just some kind of psychological peace
namely, the peace of action
i.e. peace as if it were expanding into Infinity
it constantly increases then in Infinity
light goes to infinity

and then the person sees
how it reproduces the element of happiness
practically from his body
i.e. he sees that his body
this is his own happy action
the body is happiness

when he comes
to such an internal understanding of your body yes
exactly, well , any other person at all
first of all, he understands then
that he can live forever and there are resources for this
in his body

and he already understands with a happy awareness
this is another principle of understanding
this is an understanding of action where the future is secured

here is a happy realization
this is a mandatory security for the future
moreover, in the physical body

this is where the fundamental difference lies
which is absolutely clear
it is the management structure
through means definition of happiness formation of happiness
or for example through the level
for example such a social creation of happiness
this is always a person's secure future

and in fact the situation there is like this
the more people get it
happy level of governance in society
the more stable path of the person himself, generally speaking

i.e. he already receives
Well as if in optics it is expressed like this
that multiple reflected signals
already from these so-called

Well, let's call it some kind of red carpet from God
which are everywhere
exactly the paths to happiness
paths of formation of the human path
Have a nice trip indeed

because in essence God initially gave man
and the path is happy too
and therefore simply due to freedom of action
a person sort of chooses , well, studies, yes
forms its own path
and that's why some inaccuracies occur
that's exactly in development, let's say

and it turns out that besides the fact that these paths
The man also made the management
example, to create happiness for specific people
let's assume there as a technology for healing people for example even yes

that's what healed more
the more he gets accordingly
or it is not even necessary for healing
in general, for any action beneficial to a person

and any act of creation is obtained
very revealed in happiness
as a completely linear element
i.e. complex systems of creation
are very simple in linear expression
it's just a person's level of happiness
just very specific
what can he be like there tall low

and accordingly, we can clearly say
there are a lot of technology houses there
we need to see what the level of happiness is there

if it is identified specifically , for example
in the form of some quantity
there take in the given system
from 0 to 10 for example even or from 0 to 1
and let's see how many positions it takes there, let 's say
for example, there 075 is "good" let's assume

can it be diagnosed like this
any system any building

any future system can be considered
and at the same time the approach is completely universal
you are looking at this so-called happiness bar
i.e. it looks like it's on the optical level
well, as some kind of variant of just a thermometer, so to speak, yes
there is a column and a plank at the same time

i.e. you just need to be able to see
both the vertical column and the horizontal bar
the so-called well closing the bars of happiness

then it turns out you can watch it
if there are any problems
i.e. it is understated and lower than fifty percent
that means there are some problems in the building
maybe there is a crack somewhere

not necessarily a building
this can be a diagnosis of health as well
but here it is necessary to add happiness
i.e. this is what is meant by technology
immediately attract happiness from God

i.e. here is the criterion of another person's happiness
exactly in diagnostic parameters yes
it is always control that comes from you
you always only increase happiness

i.e. they gave control as much as needed
and then there is no need to look at the diagnostics
as long as he is healthy yes
and that's all

but in some technical systems
there you can always identify even specifically
by the level of perception of happiness as a person
identify where the defect is at all
there in any technical system at all
just identifying the criterion for everything
social or something manifestation of human happiness
in this system
i.e. how happy is he

and then it turns out
that in essence wars can then be prevented
if the border of this happiness of human actions
combine

with the border exactly as God gives it

i.e., to put it simply, these rugs are God's
take and combine
with a structure coming from a person

then it turns out
that war cannot happen in this place
i.e. when you start to understand it
i.e. here it is clear what can do this
even one person

why do i say that even one person
it may well save the world , for example
from some possible global catastrophe
because he can
in the necessary, as it were, optical focusing of all actions
take
and your actions
co-direct
with the Action of God
and that's all

then the reflected system
she will not allow a negative development of events

how lines focus into one point
it is enough to simply enhance the optical background
make a reflection and that's it
there will be no negative effect

and the system is very stable
because unlike
from for example some there let's assume a float principle, so to speak
when there are certain masses of information
who have well there for example, action due to that
that a person concentrates
or is there a collective Consciousness at work?

the structure of happiness generally speaking exists throughout the world

i.e. there is no concept of "bottom" here
then there is no limitation
if there is some kind of structure of destructive events
coming in the form of some kind of information
or a certain amount of information

then it turns out that these are the bridges, so to speak, of human happiness
you can lay it all the time
on the way of this structure
then it slowly slows down and dissipates

and it turns out that, moreover, it is converted
in a happy one for her
action
i.e. the other side is obtained
has virtually no problems
this is essentially management at the level of the other party's tasks
from God

i.e. she sees this management as God's task
and just starts to work creatively somewhere

maybe even not in such a distant period
It often happens that right away

and when, for example, there is a task
for example, to make sure that there is no explosion at the nuclear power plant
then it turns out that it is enough
level
in this case here
when we talk about Macrosalvation
there is an instant transition
on any elements of Reality

i.e. the next level
for any information object
there is a certain level
that a person should live creatively
well, i.e. it should not be destroyed

and is defined as a measure
Well, let's say it 's similar to human happiness
but as if the happiness of another object of information
Here
in quotes of course yes it is possible "happiness of another object"

a powerful transition is being made here
into the atomic structure
what is atom when under control
he has a kind of reserve of his own
in relation to as if
to one's own level of development

i.e. for another person who is nearby
well maybe even this won't be some kind of action
i.e. why do you sometimes have to decide
some big tasks or something
although other people in principle they decide
but when can you decide
why should other people, for example, be distracted by this
i.e. why does everyone still have their own task

and when you do management for example
in order to stop yes
possible explosion of a reactor or atomic bomb there
or some chemical reagent yes
or bacteriological weapons it doesn't matter
you can definitely go out
in the structure of the Human Norm
from the point of view of this information object

and when you do that
then another object of information
should perceive a person in the same way
as for example in the action of Eternal Development
A person can, for example, well how to detail
i.e. conditionally assign
that here is one object of information
for example, there is a certain symbol "A"
this is the symbol "B"
i.e. translate into the logic of Thinking

and in the logic of Thinking
you can do such control
that any values are acceptable
It is possible that the reactor will not explode

i.e. you give logic to Thinking
structure of real physical control

and this only happens if
when well in this technology
when you start to see
what is there for another information object
human happiness

i.e. happiness as an unshakable, indestructible boundary, let's say yes to Reality
another object should not or cannot shake happiness
then he
for example, there is no explosion at a nuclear power plant there

or any at all there is supposed to be a tragic event there
or even an unfavorable event

i.e. here we can highlight the structure
when each individual level
reacts very specifically

i.e. a specific cell reacts like this
that you can quite easily determine, for example
the path of this cell of his there in the Infinite development

here is the structure of happiness
it is a very concentrated structure in essence

and any cell, for example, from God's point of view, yes
she shines in a completely individual way in this case
and you can completely heal it as a separate cell here

because in this case
you do not disturb anything in the body at all
moreover, you activate it intensively

because well, at the level of Consciousness
take and examine only a single cell, yes
even if there is a healthy cell there
and consider the whole organism
there is always a synchronization problem
but is the person doing the right thing?
that he is looking at one particular cell
and in general how are the others then ?

but considering that he is watching himself
then he is no longer violating anything

so and secondly
Here we can highlight
the structure of each specific cell
from God's point of view

for God generally speaking
because He can do any action
completely in general, well, let's say in terms of the level of equality of information
exactly the same
what to look at and whose events to see
i.e. one cell or the whole person

but if He sees events
at least one healthy cell
it is clear that the organism exists yes
happy cell action
and the radiation of happiness of this cell

so once you learn
for example to act
it is precisely according to the structure of universal happiness in the first place
then you will see that each cell
it has this vibrational structure
namely universal happiness

when you for example this action
direct
as if inside the system of the Universe
you will see that there is a center
where human happiness is created
where he himself takes part together with God
i.e. it is as if very dense and at the same time
works with God
in this place

then it is clear that working together teaches that
what do you mean in the future
's easier to start acting, it's easier to work
because when you work together with someone
especially with God
naturally you will learn faster

so try to work in a happy action
and initially there is
as if the center of organization of a person's personality yes
while remaining completely intact
as a person
i.e. without highlighting it separately
Soul Spirit Consciousness
precisely as a person
working together with God
you can very quickly pragmatically
precisely in happy action
learn exactly Macromanagement

and here is your personal control
it's just macro control
and personal management

it will be the same and at the same time

doing something for everyone
you immediately do it for yourself
but you do it right

This concludes today's seminar.

Thank you very much for your attention
