GRIGORY GRABOVOY
The Teaching about God
Peace Organization
16.06.2005

Hello again
the topic of my seminar today
This is my Teaching about God
Peace Organization

in this topic i show
how can a person who does management
when he collides
with information from external Reality
organize the structure of the World

besides the fact that the structure of the World already exists, yes
as if it is considered by itself
but nevertheless in control
there is always a task after all
management of any information
including information from the World

so from God's point of view
when control occurs
well, like the structure of a distant forecast
for example in Infinity yes the World of Infinity

for God he is the same as in the present time
i.e. for Him, generally speaking, there is no difference
and one level of His Spiritual state is enough
to understand the development of the World

i.e. God perceives the World as he sees it , so to speak Yes

for a person the world should be like this
that he must actually see the gaze of God
and then understand the World in a deeper structure

i.e. you need to try to understand
that the outer world is that level
which God reproduces as if at any point in time

i.e. He makes this structure of the World
like from the past yes

both from the current and from the past
Well, logically it's completely clear

God is everywhere
therefore this point of the World
this is its total Action

if we begin the World perceived
how to break down into levels of representation of simple actions
i.e. we begin to consider the World
as if actually sliding apart
from the current time level
to different points of God's Action

it turns out that we find a very simple criterion
in general in the constancy of the World
that the World is generally at this level
knowing God and seeing His Action
you can't move it apart

if we try to put it in a logical model , then
to divorce
in different directions by different sources of action
in one point
well, that is, these are like three light projections
since last time
from the current time
and from the future

and it would seem that you can just take
and walk through three projections
look
where is the starting point of this projection action?

it turns out that the World cannot be broken
even in management
i.e. it cannot be moved apart
it can't be done for example so is it logical to look at it

and that's where it comes from
the status of direct vision arises
that's what direct vision is for, yes
real event management

and in order to have a different level of outlook
another level of perception
where your personal gaze is also a simultaneous gaze

i.e. you look at it in fact the same way
i.e. from any point of view
i.e. from the past, from the present and from the future

and that's when you learn you start to look the same way
then you start organizing the world like this
how God organizes it initially

i.e. not essentially temporary there
not in essence of what needs to be detailed, for example, yes
or something like even systematize

maybe there is no need to do anything about it
but just the systematization itself
in this case she is in control
looks like a system more of a cumulative effect
i.e. the system of action of your Soul initially

if we consider this position
here is the World for example Yes
the whole outside world
and there is your Soul
that is, before the World began to exist, so to speak
what was the state of your Soul for example

The soul is originally Eternal after all.
that means she existed somewhere in time

but before the organization of the World
what was it like for example the action of the Soul

and when you start doing this type of management
then it turns out that you can consider
for example, the management structure
as the structure of the original level of action of the Soul

those. action of such a plan
that man actually organizes the World
i.e. well what is the difference in the concept
"organization" and "existence" of the World

in that he gets there
to the starting point of the Soul's action
and considers the external World as an Infinite action
i.e. local actions are still an Infinite action

then it turns out that we are considering more
not on well in general, at the structural level
as if local manifestations of the World
and we look more at the work of the Soul

i.e. we begin to look into the work of the Soul of God
because when you look

just like God does at the same time
from different points of view
then it becomes more clearly evident
it is the work of the Soul of God

and when we begin to understand this work
then basically that's it
here is the first level of organization of the World
it just shows up
as a level of Infinite Action
in a single action of your Soul

i.e. a one-time action of the Soul
not only affects the surrounding world
but can also create some new structures there

i.e. not only as if it corrects and supports yes
the system of existing connections in this World
but at the same time it can create
some other even completely structural connections

i.e. it turns out that the perceived World
it's not a rigid structure after all
i.e. it is quite possible, for example , using
Well for example some sound control systems yes
verbal control systems

try to do it this way, let's say
so that the external structure of the World is controllable
and you would understand how the management works

i.e. for example, you are managing
by changing the sound control level yes
or there verbal
i.e. you can make the voice louder or quieter
you can work for example without speaking
some kind of sound control levels yes
i.e. without making a sound, for example

but depending on this
you can see
what happens as if at the next point
after you have perceived some structure of the World

for example, to cure some disease
according to this technology
it is necessary that at the next point, as if behind the structure of the World
there was practically the same world
where a person is simply healthy

i.e. we need to have time to see the next signal
as a signal of controlled action

that is why in technology it is precisely the organization of the World
we are looking at the structure of the organization
as well as an element of creating the path of this organization

i.e. we can consider
the interval there is some kind of information object
there is some kind of glow there, like an element of the World

and we look at the next element
as a system actually such
which controls the previous state

i.e. we can understand very clearly
what if we assume we are considering a system
which kind of controls the state
then we actually have to create it
somewhere well not very far away
but they should create it anyway
there's more in the system as if personal perception yes

it turns out we can create Peace in the Soul
there in your Soul for example
and you will see the Infinite reflection of Infinite time

i.e. it turns out in the system of the organization of the World
we can first of all consider
action of your Soul
but reflected, for example, in some Infinite time
means reflected in the Soul of another person

from this point of view
why did it turn out like this, for example?

that from the point of view of logic, for example, even yes
God created the Soul of man

so that I can count from this position
see the reflection of your own Soul
but in the Infinite level
The soul of another person is an infinite quantity

so you can act in exactly the same way
and act the same way
it means to transfer knowledge to another person

then the next element of the organization of the World
this is the transfer of knowledge

and not some kind of general transmission option
and the transfer of knowledge to another person

and it turns out that when we begin to consider
that's exactly the transmission system
then it is clear that another person is also organizing the World
but somehow in its own way yes

i.e. we can consider its level of action
in the Peace Organization
for example in the Macro-creative plan
and it is precisely in the Macro-creative plan to consider
these are the trajectories

it is permissible to do this
i.e. if these are some private tasks
This is generally a person's personal business
and it is precisely in Macro-creation
as a rule, systems are completely open

so it turns out that we can see
where is there some kind of element of the World
it is the specific person that influences
well, i.e. where is his niche of influence

and by the way, here is an example of systemic treatment
i.e. cure in mandatory case yes
from some kind of a number of diseases
or from a specific disease
if some person is sick
often consists of
what is in a systemic organization

we can simply see the difference in perspective
a person who is healthy , for example
and a person who is concerned about some diagnosis

just seeing the difference
in relation to different people, perhaps?
you can simply cure the disease
just fixing the point of view of health on everything
and that's all

i.e. one point of view of one person is enough
who thinks that well the other person is healthy
or he doesn't know about the disease at all
just a healthy person

then it turns out
that we instantly display information about diseases
from the structure of the World
i.e. it is enough to strengthen the opinion of one person

here is another aspect of faith and management
after all, the man is a believer
for example there in Eternal development Eternal life
it actually fixes this status

and now just one person is enough
for example, strictly believes there one hundred percent
it is precisely in this ideology of development
for example, its development
or he decided so and thinks that it should be so

then a lot of processes in the World can change
and from the point of view of the organization of the World
here in the direction of Eternal development
and even the local level of information presentation

and at the local level, the presentation of information
this is already a detailing
this is an important point for those
who practices right now yes

i.e. it turns out to be detailed
when we start to see management this way
that each particular case
this is also, for example, your personal action

it turns out that we can do it

Well, to make things simpler, I guess
system of action system of perception
or transfer of information
consider what to do then
each specific person
this is what a specific person should do
for example, along its line of development

It's good when a person knows his prognosis
and there it moves in the direction
some specific phases of the forecast yes
i.e. a forecast expressed in social phenomena

and if he is in the system
well, just some action
Well, let's say some event happened to a person
and he can well how to use words here
there are some initial word systems there

or, for example, sound combinations

tries to understand consider the information in such a way
what should he do next anyway
i.e. what is his next move let's say yes
in the information system in this World

then here it turns out I think
what exactly can be seen with this technology
how to solve your own problems
simply by frequently organizing information from all over the world

for this it is enough to consider
what is the whole world for a person
i.e. where information about it is contained
What is this

as a rule, this is a common element of some kind of glow
and in principle it is no different
from any other information

i.e. all the information looks
in the form of some optical manifestations often
and therefore we can say that the information of the World
there is a glow at this point
and that's all

and what does this information of the World represent?

Of course, you can go into further detail

Well, it's clear that this is the whole world
so, but this information can be accessed
to any local event
through her yes Means

and then you can see there, for example, a private event
your own
there are other people there
but that's not the point in principle
to get into the event there through the Macro level
but to be able to manage the system
actually having its own goal
there expressed as a goal

those. not a substructure of action yes
inside a certain Macrocosm
and a personal goal

i.e. a person moves, but he does not always perceive
that it moves through the Macrosystem
and he just works, moves, does something, etc.

so it turns out we need to be able to
your personal actions
means to express in the structure of the Macrocosm

because today we are talking about organizing the World
where we both organize and do
what has already been done in principle is what is happening

i.e. if there are any roads, forests, spaces there
they already exist
there is no point in repeating yes in management

and here the next level arises
what exactly for a person for example
repetition generally speaking never happens
if you work for another person

but if you work on other systems
just physical there Reality
some kind of informative Reality
to avoid repetition
you always need to do the following action
as if in a new space

i.e. to see the difference
current space
current world so to speak
from what exists in the information space at all
and organize actions
in that space where there are no events yet
this is the easiest way to organize the world in a sustainable way

and that's when you start organizing
there is a system where there is nothing yet
this often happens, for example, in childhood, yes

that a person sees something completely new
starts to build some elements of Reality there
well, which are understandable to him

and when you start to see
this control system as a system of action
then it turns out that this space is organized
by the way, you can only do it first
based on the human physical body

i.e. this space exists
done in a very strict connection, as it were
specifically with the physical body of a person

because it is the physical body
is a carrier
first of all, information yes
all of Reality is also in man

and here the factor is well as if there was some novelty
in management

what is the physical body of one particular person
This is completely new information, generally speaking.

if you look at what exists in the world
well, as a systemic constant action
and what is unique and completely new

this is also and first of all by the way
this is the physical body of a person

from God's point of view, when did He create
Your Physical Body

what should be new for Him next for example

here He can say
what is new is only what was originally created yes
logical postulate

first there was His Physical Body
so it's the newest, so to speak, the very first
this is His Physical Body
and everything connected with Him

so according to this scheme
the physical body of a person
can be generally called
as the level of primary novelty

means building something new
we can in relation to the physical body
all other information is not well as if primary
this is what is special about this management

and so it turns out that here we are
we still find a more logical model, right?
but in fact this is not quite logic again
this is a review of the situation
from the point of view of more, so to speak, controlling clairvoyance
visualization of the real world

This is what I'm telling you now

it's more about managing physical Reality
Well for example , there is control over the aircraft board, etc.
this is exactly the level of management

and logic is just like a system
defining the contours of this control

and when you work at different levels of management
or it's logic
or this is for example reproduction
any systemic actions of a different plan

for example, I am looking at an airplane or a nuclear power plant
or I'm just diagnosing some system there
information object
then what do i do
every what a person does

he can think through the situation logically there
or maybe just look at the situation

what is the difference between view and logic

in that views determine
current primary state of the system
but to diagnose the system
you just need to get in the mood
to the primary state of the system
at the moment and that's it
there are basically no difficulties there at all

i.e. the concept of "forecast" is the concept of "management" or something
this is just the primary state of the system
Now
the main thing is to find this level yes

and here are the technologies that I am giving today
namely the World Organizations
as God does

so we are organizing exactly that
control system

and if we talk about the system of creation of the World
i.e. the element of which is
original creation
then the organization actually implies
some kind of systemic structuring
systemic organization

both your actions and the actions of those known there
i.e. we work in a known field of information
which exists to a greater extent

if it is possible to create
so we create yes

so we work all the time after all
in this control system
as if in a new field of information
and all the time we work in relation to our own system, so to speak
i.e. in relation to oneself actually

because the element of novelty

or as if Well, let's call it some kind of fluid and novelty
light of novelty
can essentially only emit the human body

so we can build
only at this level of control
everything else no longer carries information for a person

well from the point of view of another creature there
there may be other connections
but there it is still the primary level
is the glow of man

i.e. the glow of God is coming
then the person
Going further is management in Reality

and when we start to consider
Well, it's a simple process
and how is it anyway for example from this point of view
for example , there the dog reacts to God
such a simple question

so if from the point of view of a person there
yes, well, it's clear what the reaction is
a person just sees God and that's it For example

and what does it mean like a dog?
this dog gives the opportunity to understand
where novelty seems to spread in this World
among there biological level of life

and it turns out that if you think about it deeper
the dog transmits a certain system of knowledge

i.e. if you think about this level

then it is like a sincere system of knowledge transfer
from dog to god
this is the dog's perception
i.e. animal yes let's say

here is something he wants to convey to God
i.e. there is a difference in the transmission channel here

from a logical point of view
the dog asks the person
and she passes on knowledge to God

i.e. an extra link appears, and so on.

and it turns out that if a person has the right to ask God for yes
well, i.e. to gain knowledge
in terms of requests and questions there
then the dog kind of lacks this right
at the level of, well, a collective one , so to speak what kind of plan is it?

but the transfer of knowledge exists
but the program also expresses hope
as if for the next action

this is the difference in the organization of the world
between man
and other systems
including biological systems
i.e. it is possible to immediately clearly determine
where is the niche of other biological systems
and where is the human niche?

and this is very important to determine
because when you do
such management in the organization of the World
then you need, for example, the same dog there, right
the whole world
to bring about equality in management

i.e. well for example there in telepathy
at the level of exchange of thoughts, etc.
what looks like a thought there in other creatures
it should be the same

i.e. any element of Reality
must have an equal sign
from a human point of view

that's what I'm saying
this is from the point of view of man in the Action of God yes For example

but for God all elements are equal

i.e. God himself does not do it
well, except that he created man
in His Image and Likeness
but for other creatures he makes no difference

i.e. at the level of a distant plane of Consciousness

for God everything is the same
all is one

and it turns out that the task of a person
bring closer to unity
all other beings there are elements of the World
at least there are atoms there
and then introduce them
into a system of a controlled, as it were, collective plan
where is the atom, well, some ordinary atom
non-nuclear some kind of atomic variant
and a regular molecule there, for example Yes

that everything is happening
at the level of well in general, complete freedom of this system

why is the molecule in this place yes

because if you enter the internal structure
of this molecule
Well as if into the inner essence
then the molecule itself chooses this point in space
and she herself seems to be moving somehow there

i.e. if, for example, you enter this system more deeply
what is the internal structure of a molecule anyway

Well, a person has a Soul, everything is simple there
well, although the Soul is the most complex construction Infinite
but from a human point of view everything is simple
i.e. the person is completely understandable yes
there is absolutely pure information of God from the beginning

and here is a molecule for example
to understand a molecule you need to remove it, for example
to the level of sameness of action
i.e. that the molecule
that there are ten molecules
or there is some unknown substance there
it's all the same thing
it should be the same in understanding

because God understands everything equally

when you align it
at the optical level of expression
then by the way you can get

very powerful mechanism for treating diseases
based on only one level of molecular state
one single molecule

you just need to enter the structure
well, the one that corresponds, for example there is the Soul of man
comparable
with the level of the internal essence of the system yes

and then you fix this optics
literally by milliseconds
i.e. if you begin to perceive
stabilization of the molecule
from the point of view of the outside world
the disease can generally be cured instantly
for a specific individual person

in principle it is possible to spread light
for all people
if there are any infectious diseases there
and be able to align it too
by fixing only one molecule
only the main thing
to see the inner essence of a system, as it were

why is the system of molecules for example located here

and when you start to see the inner structure
then it is enough to just slightly adjust the system
well, bring it a little closer to you in optics
or somewhere not very far away, usually

This can only be perceived at the level of the Soul
these are often some micro levels
which are on the physical plane
are not even captured as movement systems
there is a glow, it is located approximately there

and if you start measuring there with photons of the Soul, for example Yes
if I may say so, well, with some light of the Soul
then some micro-movements occur there

and it turns out that these micro-movements
this is a change in the paradigm of the World

from the point of view of the Soul

i.e. this means we find
same system as if independent
completely independent well molecule yes

we find some kind of stability structure
not only a molecule is possible
just take some information

and we look at why this system is there
Why did she choose to be in this place anyway?
by free will, by and large

and when we find
it is precisely the structure of the World that is stable
i.e. it gives the Norm of the state there yes
The norm, for example there is Eternal development
for example , when everyone is resurrected

why is there a resurrection system by the way
provides for the obligation of a general resurrection
although up until that moment there will still be resurrections
some one-time, even systemic

and because this translation option is like
well, such a discrete exit to another system of the World
it is the instantaneousness of action on a universal scale

here is the system of universality
it is a system that very clearly defines
postulate in the organization of the World
when you are in control

because when you manage your event
you still need to know what's going on around you
in this world
and that's why I'm saying this now
this is the action of what is happening around yes as if
as if it were independent, but in fact, as I showed
there are very clear control systems
as if by this Macroreality

and a small shift in Macrorelief
solves problems

and by the way, this mechanism is very powerful
through the organization of the World, yes
in treatment for example there are some complex diseases there

in malignant processes
especially if it is the fourth stage, etc.

there is precisely the structure of the actual variation
and bringing it to the norm
the entire structure of the World
usually leads to quick results

and here you have to see
what is by the way type of diseases some of them are not so many means well, including some malignant processes
as a rule, this is when there are complex malignant processes

what is absolutely necessary
here, as it were, the structure of the whole World needs to be changed

otherwise, you can of course do the treatment
some universal systems
a person can completely recover
but for it to be faster or at the right time, yes, preferably
then we still have to consider it
namely the fundamental system of the whole World

and watch literally observe
where does this jump occur in the information
where the whole world changed so that one person could live

and it turns out that not only
well, that is, the one who was sick and recovered
provided of course that all the others live then

and when we consider
Well, it's like an absolute value
that everything else naturally becomes normal

then here is the transition
specifically in the structure of knowledge transfer
from the fact that you received Norma
it is also universal after all

i.e. if you have cured someone
especially if it is some kind of complex disease
then it only makes others feel better
because they gain experience
although your experience is also kind of personal
but this is how this clicking looks like

well, on such a hidden sound
as an element of well increasing hum
then, like, a small click in the distance

i.e. the transition took place, as if the transition of the World
into the structure of a more stable state
thanks to the fact that you have some experience
handed over to this world

so it turns out that there are some concepts there
that there is some tension there
because there is a person saving someone there
in fact, by and large, this does not exist

because on the contrary you are simply gaining experience
and in fact you become more resilient
to some problems
possible yours as well

and therefore it is possible by the way then
to have a better influence in a management status
take into account possible problems

you can even reach the management level
when problems are not created
this is so as if someone is not lazy and for example is not bored
he can enter into such a level of management
that there are simply no problems

and then it turns out that a person
can maintain such management status for some time
but as a rule why doesn't he keep it there , for example , let's say
long time

although in the system of Eternal development
It is very useful to keep the control level
when there are no problems at all everything goes very well yes

and because when other people
after all, again, this very strict postulate of work
in the Peace Organization

when other people can't
he is still forced to , well, sort of curtail control
not to mention organizing some kind of complex things
well, some of those problems that it solves
as if at the same time as others

Here, pay attention to what happens
typical problems people have
because the decision is made simultaneously with others
i.e. his Soul begins to empathize
he still starts solving their problems

and so that a person doesn't have any radical problems
so that there would be some kind of situations
which need to be resolved, even urgently
but so that they wouldn't be fatal there , etc.
and in management there is nothing fatal in general, then

i.e. it is always possible to overcome the situation
even if you have milliseconds of time
as a postulate
in the Peace Organization

and it turns out that you can, by the way, still create this time
i.e. it is not even necessary to grasp the element of time as

here, after all, is a system of empathy
i.e. the assistance system yes this is the main system
in the dissemination of knowledge
as if in a system of knowledge intensity

that's why in the first aspect
all Spiritual systems of governance and religions
consider the work of the human Soul
Where exactly does knowledge transfer take place?

and when you start to analyze
this side in the organization of the World
then it is precisely the system that arises
where the individual organizes the World

i.e. the world enclosed in the personality of a person

then already the organization of the World
it's basically just some kind of self-organization

at the information level
it just looks like a personality
some levels of information
takes there brings to himself takes control

and here it is taking shape

first circuit in the organization of the World
where is the outside world
and the inner world as if yes the world of personality
starts well how to dock
in the level of development of some information
some kind of wave of information
which is Reality

i.e. Reality
it's like a simple strip of information
which is revealed as physical Reality
there is informative Reality

and here there is a space of personality
and there is actually a space of God
at a certain distance yes

when God gives it to you personally
then you see Him directly
then Reality becomes manageable

i.e. the conclusion is this
the more accurately you see God
the more controlled Reality

Means Well, you can see God
there with eyes
With soul
vision
but if you also see with action
i.e. act like Him
then it turns out to be Reality
becomes completely manageable

and here an integrated World emerges

i.e. where is the collective action of people
guided by God
creates very flexible there
spatially flexible even in time flexible World
which quite clearly as a system of Infinite development organizes the environment of human life development
quite accurately and without any catastrophes, excesses, etc.
where there is definitely no global catastrophe

and this integrated one is like this
Well, it looks like a flexible system, let's call it that Yes
system well in quotes maybe

in fact, it is in time and space
it looks exactly like a very dynamic system
very flexible plastic
Well, let's say plastic light, yes
if you can call it that

and so that the light is stable
you need to have very high speeds

so this is this super-fast level
this is again the physical body of a person

i.e. only the physical body
due to the fact that the body holds all the time
optical some kind of voltage
there is the optical light of external Reality
only the body is capable of reflecting at the required speed
all Infinite processes

and it turns out that well, of course, you can work with your Soul
but then you will have to maintain the concentration of the Soul all the time
at a high level

and in an extremely high concentration of the Soul
this is the physical body again

i.e. it turns out that all the Infinite processes in the World
these are very high speeds

after all, any process
it can be considered as Infinite
and when there is still an infinite number of them

i.e. it turns out to be a light that is under control
gets on the body
this is light at a huge speed

and it is enough to just reflect this speed
it turns out to be super fast control
where we have exactly stability
because the reflection is constant

and it turns out that we create

in fact the light of life yes
logically the human body is life
and in information it is also the light of life

i.e. the body as a generator of actually some kind of Reality
which is called life

so it turns out that based on this
organization of the World in this aspect
it is also a collective organization of life

after all, people still participate in a collective process
it's not just that there's one living person walking around somewhere
For example there on a desert island
and yet he still somehow participates in the life of the island

and there are other continents, etc.

and it turns out that we can view
this is precisely a collective contribution
into life as such
and as one individual person
it affects well for example, there on the lives of all others

then it becomes completely clear
what is the level of maximum responsibility
which one person has
he still won't allow the button there to be pressed
and there definitely won't be a nuclear war there, for example , a global one Yes

because how does God solve his problems anyway
His level of responsibility is the maximum, yes.
He will not allow global destruction.

but here, for a person to understand the situation
he must learn to live forever
i.e. he must not only learn, he must actually be Eternal already
at the first levels even of the ideological plan
must quickly acquire knowledge

therefore in the system of the organization of the World
there is another task that is very well like, fast or something
ideological plan of action
because for a person to mean he
Well as if I didn't think about it for a long time or something
in terms of him living there forever
for example , he wants to work on this analytically some more

then here is the easiest option
give action first
which is connected with his internal state yes

those. in the Peace organization
here we need to set the task on logic
if a person is in principle in the Eternal World in essence
but he still does something in this direction
he still lives in the Eternal World

i.e. if he wants to say for example
what a person there, for example, wants to think about
but as for Eternity, yes
then the idea is very simple he is already in the Eternal World
he is already interacting with the structure of Eternity

i.e. formally this means that he is Eternal
he is also in this element

and in fact if you understand this with your Soul, for example Yes

so this is the structure of faith
which cultivates precisely the understanding of the Soul
creates exactly that harmony
which already organizes the human world
but Eternal

this is where it's important to see
the transition to Eternal Peace
Well there among people for example Yes
where people are Eternal because they realize
Well as if it were a doctrine of its own
in the structure of development of universal Peace there

i.e. they see their applied part
in this world
that they are Eternal
in the structure there is firstly the universal Eternity

i.e. they allocate well like a habitat, yes or what?
in the system of Eternal development

and here it is very clearly visible
what if the whole outside world

it can be changed quite quickly
i.e. turn there well there back in time there etc. yes

it turns out that it is possible to touch the human level
without well there are permissions from each individual member
practically impossible at the level of external influence

that's where the aura of human habitation is
in information
this is the level that controls
or let's say it provides for development
exclusively only God

and we can see here
that yes, there are some planets there, earth, trees, etc.
but in essence, if we start from this postulate
what is now seen in the World and in the organization of the World

then it is absolutely clear why this land
i.e. you can find the coordinate of any other system

and for this you need, first of all, a very simple action
I'm actually learning now
namely, management forecasting

where man is creative
he must be absolutely free first of all
to sustain the structure of freedom

and based on the structure of freedom of all people
in Macro-creation
find the coordinate of any other system

for something
we need to find some molecule there
some simple object even
no need for this
Well as if to consider some space
because the whole space is built around people

and it's quite easy to find
this is precisely the level of Macro -freedom
each individual person
Well, in fact, this is Macro-creation

By the way, it's not hard to find

there is a certain space around each person
and sufficiently on the basis of identity
find in two three levels

by the way, it is not even necessary to consider specific people
it is enough to set such a task
then it is immediately determined where the object is located

i.e. any material characteristic
relative to a person
logically it's also very simple again

still in relation
to the Physical Body of God
under construction

then it is enough for us to consider the action of a person
and we find any system

but why did we take the image of another person?
because we need to transfer knowledge
these could be specific people
it means you transfer knowledge to them faster

or they may just be image systems
i.e. just people as such

hence
another aspect of information transfer yes
in the Peace Organization
in general, as such, the organization of the World

this is the transfer of knowledge
or simply through the image of a person
to the image of man yes

in conditions when a person is completely free
any moreover
the image is the whole point
that this is the systemic level of human expression

i.e. we are looking at that layer
where every person is free
i.e. he is healthy and lives there forever, etc.
on the principles of complete freedom

and then we find any coordinate yes

and it turns out that as soon as we start
find such coordinates
we see that the outside world
in fact, he is very active

that's exactly why a person is a static system
in this regard
there is one God but He is located in one place
and everything, everything seems to be spinning around

and it turns out that man is in the Image and Likeness
should also have the same function

here in this coordinate system
in the Peace Organization
he has this control

because as soon as you look
to the external system to the external World
and the World is Macrostatic, so to speak
he seems to be moving somewhere
but it is so big that the movement is often unnoticeable

and in the World everything is arranged according to the principle of similarity too
this means that a person must also be stable and static somewhere

and this staticity, well, not in the direct sense
i.e. it is not some kind of rigid staticity
but simply as a definition of the place of human statics
this is precisely interaction
man and the world
from the point of view that God is looking
on the World and on man
as a person
i.e. human vision

and here he begins to understand
Human
that God can see him like that
This means that He can, generally speaking, convey all knowledge
for Eternal development

i.e. the next level of organization of the World
this is a person's understanding of that

what God is able to convey to him
all the necessary knowledge is there for Eternal development for example

but generally speaking, by and large
not just there for Eternal development
and for the construction of the Eternal Peace

i.e. the ability to manage the system
there Infinitely distant there
or some kind of approximate system at all
at some period of time
there is a need to see
absolutely clear well there personally yourself yes or what you do
in terms of helping this person
that he very stably controls the whole world

There are no contradictions here by the way
because God gives him complete free will
and through Macro-creation
he has the right to control the entire system

the difference is that God created the whole world
there is a point, so let's say, before the creation of the World
reflected in the Physical Body of the One God

but in principle any person can
to know this point
i.e. the difference is that with God
this is a static value initially
and in humans
this is a value that needs to be studied there

maybe it won't be long there, two or three days
to find out where it is
not every person there understands something for a long time

and therefore it turns out that based on this system of action
that's exactly how to create an Infinite World
for every person
even external control
even if a person is not very active in this
it's still possible

i.e. it turns out that it is enough to have
the first level there are managers
who understand the task
and spread this information

all other people
not because they study for a long time
there are some thick books there for example Yes

and maybe even because
that they basically have this first wave of knowledge
kind of covers them
as a level of just the system of organizing the World
those. influence on the world

structure of influence on the World through personal will
which concerns their Eternal development

then they begin to live forever
well at least they even gain status of this level
for starters
already because they are involved in a collective process
which is happening now yes
for example, there in a group of other people
who do this by concentrating there
consciously

and it turns out
what does the level of information transfer to other worlds mean
yes, definitely
to some Infinite level of control
this is often an easy level
it is often just a technology of action of individuals

and it turns out that if you
for example, you don't get this information
as projective information
already at such a time

from the Infinite level of your action

i.e. you decided there
make some element of information Eternal
you can find it simply as some information
you don't even have to search in the Infinite level
just pass to Infinity
that you want to make the World Eternal

then it turns out to be there to find something in Infinity
nothing is needed
People are already Eternal, but in essence they will learn anyway

and let's assume in general if we talk about the World as such
what's in the Infinite level of information
well, some new plant species
or some other properties of matter

in principle they may not be needed now for analysis
because if you give control
to some specific element
then it will be necessary to study the properties of this element
i.e. to get involved in some kind of information red tape

It's easier to transfer control to Infinity
with the aim of the Infinite Development of the World
and get a return signal
that yes the signals have arrived
and the World develops endlessly

where he went there can be traced later

so at the same level
your Soul is working
in the structure of the primary organization

i.e. it constantly transmits
into the structure of the external world
well, in fact, knowledge and the task of Infinite development

and back gets a completely clear level
that yes, the information reached somewhere specifically
and in all Reality

and this is the point of connection with the whole Reality
this is a fundamental point
this is actually a place
where the human physical body is organized
in information

therefore in the organization of the World
you need to try this point at least once there
well, over some long period of time
control i.e. perceive

and you need to know her place
here's how to say it
that the human physical body will be healthy
there is even infinite time yes

you need to know the place where this information is organized

I just showed you such a place
this is interaction
with all external Reality
The souls of man are obtained
point of interaction

and well, you can look at it in more detail
if you look at this control area two or three times
which I just said
and see your personal status
your location

then you can
through the projective systems of one's place
find this point constantly
By the way, it hardly changes

Well, it happens with age
what does it mean for a person not to have any problems
are real ones there
he just has to constantly move this point
in, let's say, in your physical body

here it is also important to do the management as often as possible
so that there is no gap
between the state of the body at this point
i.e. information actually yes
and your body really

i.e. this point is at the level of logic or something
this is your physical body
but at the level of information it is a point in information

and for God too
body
information is basically the same thing

it just looks like that to a person
in the form of some speed of movement there

i.e. a person should sort of count
that here he is
or in some place

for God there are simply no questions
in His Perception everything is the same

but we need this point of view of God
implement
therefore, there is a mutual effect

from that point of view
the control moves towards you
and from you there in that direction

and it turns out to be like real movement
by the way of the physical body
real movement
which allows to overcome
there are some problems in the information space

Well for example, a person walks somewhere on the street and solves some problems
and here in the outside world
if you move
into the structure of your body's organization
on information
you overcome some events

i.e. it turns out that these events are normalized
because you are moving
not because you are going
there to some specific store
or to some place
or do something

and because you understand
that you have already organized your body
and you won't have any problems

and so in the organization it means Mira
from the point of view of Eternal development
because it is an aspect of any management
after all, there really is Eternal Development

where is Macro creation for all knowledge
for everyone

this is a very strong and often primary criterion of action

this is what the Eternal God is for
and to make knowledge Eternal for everyone
i.e. to convey to everyone the knowledge of Eternity

if this task well it is quite simple
then the person who is engaged in organizing the World
he sets the task of transferring knowledge

then it turns out that it is kind of necessary yes
his action in the organization of the World
there is that he must pass on knowledge Infinitely
which he receives
then he must be healthy must live forever
as if one follows from the other

therefore in the system of the organization of the World
A person's personal status is very important
as a level that transmits knowledge to all others
it is the knowledge of Eternal development

why do i say try to work
with the structure of Eternal Development

and the transfer of knowledge of the Eternal development
creates a fairly progressive one for you
in general, even often such a well , quite good
initially in terms of events
management level
because you are just ideologically correct
set a task

and that's when from this point of view the organization of the World
already in a personal context
you have mastered
then the World begins to organize itself in such a way
that you take it naturally

i.e. it kind of exists on its own, sort of
you influence very naturally
and large processes can be changed
simply because you perceive and change

i.e. Perception is a change of the entire paradigm of the World
for the better

your perception is control yes
the whole Reality

and the whole world

This is where I end today's seminar.

Thank you very much for your attention
