

GRIGORY GRABOVOY
The Teaching about God
Proof of the Existence of God
The teachings of Grigori Grabovoi
20.01.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Proof of the existence of God
The teachings of Grigori Grabovoi

in this structure of my Teaching
I show the Essence and being of the presence of God
in a specific place

and also show that the proof of Existence
this is a place that you can approach
and accordingly, turn, *for example* , to God directly
knowing that God exists in this place

i.e. the technology here also has an applied character
although it also has a fundamental character
related specifically to the proofs of the existence of God

in this regard, I would like to consider
position of a person's personality
and what about such a position?
which is associated with the action of the individual
in relation to God
and in relation to its development

here first of all we need to consider
personality formation status
how *so let's say* the systems of reaction to the outside world
and also systems *mean relationships for example Yes*
to the inner world

Here you can consider such a status
that when a person is born
he goes through various natural levels of development

but when he begins to look into the outside world
then it's just his physical vision *in general*

this is directional vision
on the Perception of that physical Reality in general
which he perceives as a person

but if he considers the status of the original
then he sees God in his Perception

here you can see that the Essence of God
this is the finding of a person
in a specific place of his own Perception

when he begins to understand this he sees
that God is that level, so to speak, of Reality
which is inside it
and also around it
i.e. he is actually in God

and the status of human existence
in relation to God, for example
this is the status of his generally personal motive for behavior
i.e. he can motivate his actions by the fact
that he wants to prove, for example, the existence of God

so here is my Teaching
the status of existence is the external status

i.e. if a person wants to prove , for example
that some action is happening
then he must somehow motivate this action
for example, by the purpose of the action
and at the same time say
what are the parameters of this action for example
well, they are concluded
into some, for example, objectified specific environment

so when a person begins, for example, to diagnose Reality
Well for example, I took it and started diagnosing airplanes
or some technical systems

then it turns out that the status of an external object
he is close to me as well
as if, for example, a technical object
was located well let's assume so close
that I could examine it there with a magnifying glass, let's say Yes
find some crack in the plane, etc.

here it turns out

that the status of approximation without intermediate systems
this is the manifestation of God to man

i.e. God shows that the external element of Reality
he is exactly the same as, for example, the person himself

i.e. man created it, among other things
and this element of Reality

it is clear that when he created it, for example, with his hands
there is the same plane or any technical device
This is generally quite clear
and relates to the system in general well, logical control

but from a management point of view
as in any structure of my Teaching
evidence of the existence of God
this is evidence of that
that the person who proved this Existence for himself
he acts the same way as God acts

he can do it
because then he received this evidence
already has a faith structure

so faith is a fairly unconditional characteristic
which connects God and man directly
i.e. faith is the approach of God to man

and when a person believes in God
that's how he sees the world
that the World begins to acquire its natural properties
such well in general, the properties that God originally laid down

therefore in my Teaching
practical meaning of evidence for example
when a person well something is being diagnosed there
or makes remote control
i.e. it works as if outside of itself
from the point of view of the physical body

i.e. "I" as, for example, including the physical body
when outside of oneself, such as the physical body
work is in progress
then this is a fairly rigorous proof
aimed at that
that the creativity of aspects of management

For example there is **Macrosalvation**
or the level of concrete, even personal assistance
to each specific person
this is a manifestation of God
in the action of a person's will

and when a person acts like this, for example
then the level of his own evidence
Well let's assume evidence of that
that a person acts personally yes
regardless of anyone's will
maybe even independent of will
at this moment and in this place for example
some other governing aspect

here shows
that all outer space
which a person creates in front of him
including the space of Thinking
and the space, for example, is diagnostic
let's say he diagnoses the equipment
or diagnoses another person
all space is that
what is identified by God in relation to man
i.e. God is manifested in this way before man

therefore God is revealed before man
somehow shows Himself personally
in front of a person
and the person sees that he is at least
sees the structure of God that teaches creation

but when he starts to develop at this level
then he sees that creation is directed
first of all, for example, so that people can live there, yes
i.e. they had some kind of problem-free development system

then it turns out that the person comes back to himself

considering
The existence of God in a given place
i.e. proving to oneself that God exists
he sees the prosperous development of people

thus built
it is precisely the mental, in general, logical status
justifications of God in a specific place

justifications for His existence

after all, it is known a priori before experience
that God exists everywhere and everywhere
therefore the proof of His existence
this is what a person seeks to exist
in a given place in some capacity

if for example I am considering
diagnostic control system yes
then it turns out that the quality of God here is such
what do you see practically Universal World
but manifested in some local systems

but it does seem to perceive
that God gave this system
i.e. He perceives from the human point of view

and when a person diagnoses
then it turns out that the entire outside world
in relation to, for example, the environment being diagnosed
well, some light streams, some information
is transformed again into the Image of a person

i.e. if we begin to understand
the deep meaning of these transformations
then all the Information of God is transformed
into the human body
including into the human body

and from here it is clear that the Image and Likeness of a person, for example
This is also the Image of God as such
i.e. we see the Existence of God
in the form of a human body

because any other level
it does not provide a structure for precise knowledge
i.e. in this case, another characteristic of the World
becomes unknown
if we are kind of moving on
beyond the human form

and when we start to reason in this way
then, having put, in general, a fairly human question, yes, let's say
for example what was before the beginning of for example the organization of God
example, God recreated himself
and this is what happened before God's self-recreation

here it turns out that this question
Only a human can put it
and therefore the answer to this question
is the man himself

i.e. we came to the conclusion that
that God who allows this question to be asked
shows that such a question
which can be either reproduced or created
only in human perception and imagination

he gives the answer that the person really gets there
into this outer space
in relation to God as if
and comes back to himself again
because in this case God sees only him
he asked this question

hence to the element of self-recreation
man existed
he was always there then
and this is the Image of God

i.e. we came to the conclusion that
that likeness and form are in the Image and Likeness
this is a person
because only in a person can it mature
such a stereotype , such a level of thinking

in this case I certainly show more
logical phase of control
but when we start to reason on the Spiritual status
then everything that is around
and at the same time includes
this management structure
this is the Soul
and God and man

here I showed where the Soul of God and man is
these are inseparable systems
i.e. it's the same thing

and when for example in general, you can say that here
what if we consider the time of Jesus
when he said that "I am in everyone"
then He meant that His Soul is indivisible

i.e. His Soul can reproduce
and other physical bodies as well

therefore for Him, for example, the process of resurrection
it's the same natural process
how is the process of life activity of His organism

and when do you cross over
for example to the healing process in this case
that is the proof of the existence of God
according to my Teaching
in this place
and for example in a specific manifestation
this is proof of that
what you can practically get
the same result
how does God receive in relation to man

i.e. completely for example recover there
regenerate tissue that can generally be
does not regenerate normally
get the optimal level of events

and at the same time the evidence practically comes from the fact that
that the action is outside of man
this is the action of God

for all external Reality
this is God

then it turns out that it is a mental action
is clairvoyant action there
this is the action of God
aimed, of course, at creation

and from here when you see
the creative aspect of this action
you see God as a structure of Macro-creation

those. principle of Macro Salvation
here is translated
into the structure of the practical co-Action of God
to the level of Macrosalvation

then you can get the result, for example
you can only do it on just one topic
that's enough well how to look at other people

hopes and thoughts they have ^{there}
and try to get these thoughts out
for the creation of God

i.e. God seeing people as such, i.e. creative
gives them an even higher level of creativity

i.e. He gives them God's next level
i.e. The existence of God for man next time
this is his next step

for God arranges the following ^{as if soil} ^{yes}
so that a person can step on this soil

it turns out that when we speak
^{for example} ^{about} ^{for example} healing from diseases
or we think that we need to do it this way
so that macrodiagnostics is carried out correctly
i.e. no global catastrophe occurred

we must see God in a specific place
and see Him in the form of a man

then we can get it almost immediately
all information
and for ^{example} , the nuclear power plant won't explode because of this
because God cannot be destroyed
if we learn to see Him as a man
and we will prove the fact of His Existence in the form of a man
then it turns out that ^{there is a nuclear power plant or a nuclear bomb}
can't explode
because human flesh
she ^{well} ^{let's say} this bomb can hit
and the Flesh of God, although it is human
the bomb can't hit

therefore having proved
the fact of the Existence of God according to my Teaching
we prove the structure of human indestructibility

essentially because in the end
development of a man who proved the existence of God
at a specific level ^{yes} in a specific place
acquires precisely Divine meaning
i.e. a person ceases to be destructible

then it turns out that we have

generally speaking, a fairly specific management technology
quite a serious technology
from the point of view of knowledge
serious I mean
at the level of a serious entry plan
as if in Macro management
when we are in unity with God
just by proving the existence
in this place
we can act

there is also a technological meaning here
of this approach
because having proven
Existence, for example , in a specific place
we can prove it quite well
that God is manifested by concrete Actions
and then learning to act is actually quite simple

i.e. to do for example Yes well, about the same
or exactly the same
or the same but in a different time

and it turns out
what is the proof of the Existence of God according to my Teaching
has as a fundamental
i.e. exceptional or absolute character
and also of a purely technological applied nature

when we these two phenomena
What Well, from the point of view of evidence, we combine
then we get that in principle
management in progress
from God to man
this is management
coming from man to God
but through external Reality

i.e. we see that the person
practically controls Reality
when he strives towards God
and in your thoughts and, for example, in movement

and that's when we start thinking
and what about the movement of the physical body, for example?
strive towards God yes
while increasing the structure of the Eternity of its development

then it turns out that this movement
this is, for example, the whole Earth, the whole surrounding world
i.e. the main thing is that a person must understand
that his movements are the whole Macrocosm

i.e. when he begins to understand it
as if its inseparable connection
with all external Reality
he understands that God is nearby
and works with Him

i.e. he sees how God creates this entire Universe

when it goes into this
Well as if in general more
Well like some kind of trajectory of knowledge
that's exactly the logical meaning
or maybe even an optical control beam

then it turns out that the beam itself
who knows it in himself
cognitive optics
this is also, in general, a level of management
coming from God

and when you start seeing this control
is the management as if of living Light
i.e. something that moves in relation to you
then we see
that any phenomenon of Reality
this is still a rational phenomenon

i.e. we are from the point of view of well as if Reason and Macrodevelopment
for example, we abstract from some elements of Reality
and we believe that there is some kind of Reason
let's assume which one, well let it look like the Supreme Intelligence
or the Mind of Macrodevelopment

and in relation to this Reason
we start adding up
let's assume there is some kind of system control there

it turns out that this is Macromind
it defines rationality
Well, from a human point of view, maybe
this is the level of simple understanding

every phenomenon of Reality

if we see the Light coming

for example from one level to another

then this Light may well be the Light of Reason

or maybe just a reasonable level

local

i.e. Light as Reason

Light as a form of existence and matter

then it turns out that this Light

can be transmitted to humans

that information

which is not, for example, direct information

i.e. if Light itself is an element of knowledge

just like a person yes

like any element of Reality

then it turns out that Light is transmitting

information to a person

this is basically transformed information

because from the point of view

Well as if this third-party objective Reason

here we have basically equal rights

what a person has

what is the element of Light

well, which a person perceives

it turns out to be a True Vision of God

this is generally speaking Light in general and everywhere

i.e. Light that has the properties of God

i.e. it is God Himself

but manifested in the action and Perception of man

and when a person begins to approach this concept

then he sees that, for example, if you look at

the structure of my Teaching

in terms of for example there is no treatment or diagnosis

treatment of a person for example

then here is the Light coming

from one person to another

this is the Light

which is transformed by human Thinking
and at the same time there are elements
where man creates Reality
and, for example, directs it in the form of a volitional impulse
Well there is a desire to , let's say, restore another person
to heal or resurrect him
or, for example, make it so that another person
there were optimal events

so acting in this way
a person accumulates his own experience
and this is another factor of the Existence of God
generally speaking in a specific place
and in the general understanding
and in the human sense in the form of the human body

because that's how God works
creating any structure of Reality

i.e. proof of the existence of God
in this case it is expressed in a fundamental way
in the fact that God is present
as an element of teaching the World in general
as an element that has
general characteristics of development
as a person and humanity
and the whole world at once

i.e. God acts as a man
well which one for example there everyone knows at the moment
i.e. he can say about some phenomenon precisely
and it turns out that this man personifies God Himself
i.e. at this moment he is God
or is he the only God
i.e. he has it
the only one, for example, the Physical Body of the One God

and this omniscience
this is a characteristic of this person

i.e. as soon as people learn to have
well at least if not all the knowledge
but at least to be able means to manage knowledge
or purchase them to solve
for example, distant tasks of Reality

then it turns out they are getting closer to God

including Spiritual parameters
because physical as I said
defined initially by Similarity

but when we speak according to the way of Thinking
then we see that the factor of human existence
for God
is its manifestation in Divine thoughts

i.e. after all, when God thinks about man
At His Divine level
He thinks specifically about man.

and His thoughts are man
and beyond thoughts about man
there is no human being at all
there is a different environment there

so this is the Divine intention
in relation to a person
to His Image and Likeness
this is a reflection of the Reality of man
on God
i.e. God actually sees Himself
but manifested as if
in the remote action of His Consciousness

then it turns out that it is enough for Him
just watch all the people
and correlate people's lives
because He sees Himself
but as if multi-manifested and multi-level

i.e. we get that management structure
which is practically similar, perhaps
with the management structure of some people
when they, for example, are solving some problems
can be complicated sometimes not complicated
try to understand all phenomena at once and simultaneously

and now the same feeling arises in a person
it means it's like God when He looks at people

i.e. for a person it is a complex of problems that he solves
it's somewhere around here on the right
in relation to the body

i.e. it is exactly what is called "in the right place"
i.e. you can say "from the outside" and from the inside ^{yes}
in relation to the body

if you look exactly ^{from} God's side
from the side of another person, ^{for example}
standing or behind a person
or ^{for example} in front of a person
but with his back to him

pay attention here
that is of great importance here
mutual orientation of people
i.e. why do people somehow
^{well} often ^{means} they are oriented
in some control systems ^{yes}

they sit in the same row on airplanes
or dance some specific dances
if these dances are aimed
to bring a certain meaning

here is mutual orientation even physical ^{yes}
gives birth to the entire external World of Reality

if you consider
your Thinking Process
then you can pay attention
that when you think
certain levels of Thinking
somehow mutually oriented

and here is the process of mutual orientation
this is a process
in fact, as the most powerful restoration
because if you learn
orient images during sleep
then you can recover very quickly

^{for example,} if you put it in front ^{of} you
green image of a green meadow
and behind there is a blue sky , ^{for example}
this is a very strong level of regeneration

and having learned to vary the image in a dream
you can only regenerate by doing so
that you have predetermined the location of the image

and you only need to see it in your dreams
and you will recover

so this mechanism is close to that
that God is simultaneously self-restoring
and at the same time His Thinking
this is the management level
and therefore orientation for Him
this is external Reality

i.e. orientation of Your Image
in relation to another person
this is external Reality

that's why people are born like this
because the external Reality is evolving
into the Infinite System

image of a person
image for example Well there is a child of any age
even when it has not yet formed
there in the first days after conception
in the first days after the start
his life in the physical body of his mother
this is the level of Infinity

next growing man
gives the structure of Infinity

and it turns out that all final phenomena
which are around a person
these are the Infinite phenomena
this is the proof of the existence of God
here now

then it turns out that we already see in general
in the frank Spiritual level of Perception
all phenomena
as phenomena of the human plane of Infinity

when a person sees some object
can say that he is Infinite
because he can take for example
and in Thinking to bring out this subject
to the Infinitely Remote System of a Galaxy of Some
just into space for example yes cosmic

then it turns out
what when can you do it
you become similar in fact in action
To God
and then your action differs only in that
what for God
The reality of that order
when He, by Thinking, brings out some element into Infinity
this is Reality close to Him
it is He Himself in fact

and for a person this is Reality
which is transformed as if
in the mental plane of his Perception

it turns out that in order for a person , for example ,
I am completely cured
or got an element of self-regeneration there
in terms of event optimization
achieved some action

here it is necessary that his impulse
directed away from him
I would come to him myself
but under conditions of an optimal level of development

for this he must know
in fact the essence of being
any other element of the World
because this element is seen by God

true, only on its own trajectory
as if an optical vision of this situation
i.e. along the trajectory of their goals
while God sees everything at once

then it turns out
to understand the essence of being
here we need to perceive
in fact, through the eyes of another level

Well let's assume if we consider
how does a dog perceive
human
from God's point of view
then we can consider such a process here
what the dog perceives as if in a discrete version

i.e. image
for a dog it looks like this
what a person well in general it is manifested
not in the form of something like that
in which a person perceives a person
and in the form of small ones
like squares, parallelepipeds, parallelograms, for example

and then it turns out that we have control
associated with this Perception in that
what is enough for a dog
just enter
in this structure in general there are corners yes
such rigid values are limited
and understand the structure of human Thinking
in terms of action towards the dog

i.e. the dog understands why and quite often
at the level there is impulsive
because for her
man in physical perception
often does not have a fully finished form

dog perceives human
in general, more like an information structure
i.e. getting closer to a person increasingly objectifies him
for a dog
physical approximation

the same can be said about that process
that when in relation to a person for example
we want to consider
how does the tree perceive da
let's assume there is a birch tree
how does he perceive a person
which is located near the birch tree
at a distance of five meters

that means the birch tree perceives it as
just basically an ellipse in essence
if a person moves away
at a distance of more than five meters
well, let's say from a twenty-five meter birch tree
then it turns into a sphere, as it were
into the structure of the future
the future where there is the next level of development

the whole future is perceived spheroidally

then it turns out that the system is spheroidal

Well in general, as a control system

from God's point of view

this is the structure of information transfer

it turns out that the existence of God

for another element of Reality

connected again

with the level of Human Perception

i.e. when a person can perceive, for example

Well as if a different management structure

it turns out that we can convey

information to God

and God sees how we perceive Reality

By the way, it's quite powerful

element of human healing

i.e. it is only worth considering

For example yes any disease

from the point of view of another system

and you can be completely cured

after all, there are treatment technologies

when a person is

near trees or near rocks

and is cured

in this case we simply come to the conclusion that

that the other system begins to perceive

The image of a person is more informative

and normalizes it

that's all

that's the answer, yes so let's say this position

and when we want to see the Existence of God

Here

then according to my Teaching

the proof of the existence of God is that

that we see the interconnection of all phenomena

as if in a weighted system

in a suspended medium

i.e. not because there is some kind of gravity there

or does air exist

and because the phenomena are connected
into the structure of the unification of the future development

i.e. everything is located, well, actually
Well as if in some kind of weightless state
and somehow gravity is introduced
if we are talking about Earth

then it turns out that when we say
about the Reality of the World
and how to influence objects or phenomena
it is possible to enter such a state on a logical level
and get control related to that
that you can sort of transform
one item
actually in another
in your Perception

but then you can influence the subject by means of
that you are standardizing the subject
let's assume how to do it like this
so that the stone does not crack further
convert his image into a birch tree
and the birch tree should, in general, continue to grow , yes
safely

then we translate the information to the stone
and the stone does not crack

you can also treat diseases
or you can resurrect in the same way
by converting images

image of the resurrected
is introduced
in the structure of for example compliance
structures of birch specifically
in relation to God
and God restores man

i.e. in this case we came to the conclusion that
that God resurrects then

and when we see this action
then we can come to action
there for example God heals

if we consider
from the point of view of behavioral structures
why do some animals behave like this

Well for example somehow yes

then we see that the structure of animal behavior
This is , generally speaking, a system of approximation
to a person
to the Human Mind

or any material world
for example the plant world
this is the structure of the development of this world
in relation to a person

i.e. let's say it this way
in the Infinite or there in the distant future
all phenomena of Reality
will have the same level of intelligence, so to speak
but from the point of view of communication contact

i.e. to enter into telepathy, for example
from the point of view of telepathy there are trees
or go into telepathy
in terms of , for example, any structures of stones or animals
it means to get to the level
when we see how they communicate
we understand them
and we can communicate not only by telepathy

pay attention here
that when communication goes through the physical body
i.e. the movements of the physical body are communication
this is the level when we understand
the structure of another World
and then it means we can't destroy it

i.e. the structure of mutual understanding
when the body
this is also an action
this is also communication
this is and understanding
this is the level when the surrounding world is developing

then it turns out
that it is enough for God to have such a Physical Body
basically just like a human

but but which moves correctly yes
which behaves correctly
and the whole external world arises
because of the relationship between the elements of Reality

i.e. God finds his exact position
in relation to the whole world

and then it is clear that for Him
concept for example yes "past tense" "future"
this is a concept that is located
generally speaking outside of His Physical Body
because this concept is also regulated by His Body
which for example moves correctly

hence
God exists everywhere
because He influences everything

and then we begin to proceed from that
that when for example we consider
management processes
let's assume well, with their levels of Reality
and we want to achieve fast control
then we must understand
how do we relate to god
where we proved His Existence
in a specific place
or at a specific time

when we have proven for ourselves, for example
at this time
then we become like yes , essentially
part in Action
and then it turns out that we have everything
what is sent down by God
i.e. full health and event optimization

and here is the evidence of the existence of God
according to my Teaching
it is also a system of knowledge transfer
about this evidence

i.e. when you understand correctly
you see God
and communication happens simply through the body
i.e. you don't need to enter into some kind of trance states

you don't need to go out
in some elements of telepathic contacts

you are already in a state of contact with God
and then you know for yourself
you are a free person

i.e. you don't need to choose in this case
to pay attention to something, to abstract oneself
you have already reached the maximum of harmony with God

this is that state
which determines
namely Eternal Infinite development
where there is no example there are wars, destruction, etc.

because in this case it means
if for example there were some imbalances there
in the form of wars of the future generation
then the light is distorted from these systems
I wouldn't let you in anymore
as if in this state as if one hundred percent yes
and then not all of God's thoughts would be fulfilled
for example in your action

and here it turns out
that you should definitely strive for that
that all thoughts are fulfillable

therefore you get
control in this way
that you have complete freedom
because you yourself prevent these wars
i.e. when you are in this state of war, no wars occur

so God created Reality
all Reality is between you and God
This is a harmonious Reality
and which does not collapse on its own

i.e. some inaccurate or incorrect actions of people
they can lead
for example to the structure of the organization of events
when destruction occurs

hence
a person is very closely dependent on another

in terms of position

and here

The existence of God is expressed in that
that God exists in the essence of every phenomenon

i.e. when you want to consider , for example
position of faith
in their actions
then faith is an unconditional level of Perception
which God Himself gives birth to for that
so that you can see God
in itself i.e. faith in you

For example, you can just believe in God
and then something happens in you
Well, global normalization
in terms of the strategic level
remote level events

to get the Event Norm here
faith in God ^{means} simply that
that the event is already happening then, ^{yes}
but ^{for example} the time element can be different

but when you come from faith in Action
i.e. you want to see God's Action
and see how it works
prove that His Action
It was His Action that helped you
and from here you cultivate faith, that very faith
which is transmitted to others

i.e. others can see it too
namely the Action of God
then they must determine
that it is God

one thing is clear that everything is God
and here ^{it seems like} there is nothing to look for
but on the other hand how to determine that
what are you doing as God showed you
in terms of your future events

then it turns out
that this action is determined by that
what you should essentially

to consider precisely the essence of God

The essence of God in this phenomenon
this is where His Essence is manifested
in the form of, for example, the Physical Body of the One God

here it turns out that the definition
Entities of the Being of God
namely Creatures
from the point of view of the universality of events
well since He has a human Physical Body
then we can say
that God is specifically like a man
manifested in some action, for example
well only if we have defined Him
from the point of view of a human being again

i.e. when we see
that in this particular local action
we prove
that this action is the Action of God
having, for example, a Physical Body of a person
then we can clearly say
that by acting similarly we are doing the right thing
and what's more, we do the same as there for example God showed

because if God showed
if He acts like that
then it is generally clear that this is correct
but He also showed

therefore proof of the existence of God
in this place
this is the right path of development

and the level of evidence itself is obtained
I am already saying this again on purpose
consists in the fact that
what you are practically showing in general
that development system
to other people
when they can also be convinced
what is God
and this is Divine Action
and precisely from the One God

so it turns out that when you build

such a system of evidence
you should use it first of all
precisely at the mental level

because according to my Teaching
the person works at the level
Perception and Thinking
at the level of the Soul
Spirit
Consciousness
where are the attributes of the data, so to speak, values for a person
these are levels of Perception first and foremost
then already Thinking
then already in general the level of processing of this information

and that's when we talk about the level of Perception
then here it appears
that Perception is formed by God Himself initially

i.e. if you find the boundary of Perception
where do you perceive
then God naturally puts it
the most economic positions in your Perception

i.e. God wants it right away
so that everything works out for you and everything is fine

and when do you start
for example, consider the data of the control system
as systems for example are already applied
then it is clear what is most important to you
convey
signal of primary Perception to oneself
i.e. to your physical body

but you can convey this message very simply
if you know how it works
for example the Physical Body of the One God

i.e. for God any signal
it is both outgoing and final
i.e. He is both a source and, in general, a receiver
any signal yes
in Reality
nothing else exists for Him

so when you start analyzing

how to convey the signal to yourself
then it turns out you need to
make a body
similar to the Body of God

i.e. you need to arrange it like this
their receptors practically control
i.e. receivers
so that you can see the act at the same time
and the outgoing signal
and when the signal is received

then it turns out that you
you can very well say, for example
that your Perception is absolutely pure
in understanding precisely the Divine thought

and at the same time your Perception
was not changed under any circumstances
by the way that while you have brought this signal
he somehow either dissipated or transformed there

then it turns out that you need as I said
just see the roots of the phenomenon
after all, it is precisely as if the semantic root yes
essence of the phenomenon
it is
and the beginning and the end of this phenomenon
but the end from the point of view of the Infinite level
leads to man again

i.e. you see a specific person
and then you can help another person
because God showed to help him
since He gave him the fate
and then you see how best to help him

then it turns out that you
through this one
internal structure of the management entity
you can very well help other people
knowing that the Essence of any phenomenon of any object
this is God

then you see
at the mental level of Perception
on the Spiritual

that the Essence is the Essence of God
and so when you enter into the Essence or the Being of God

you see that the elements of development are as follows
that the World essentially depends on you so much
how dependent do you want him to be on you

i.e. you can allow in this World
some elements of Reality for example
well, for example, maybe you don't like them

but at the same time the main status
status internal
when you as an individual perceive
what's happening
this status is primarily aimed at that
what do you show other people
how to live from God's point of view

i.e. any person pay attention
tries to show
and many show it quite openly
how to live as God shows

and this is another proof of the existence of God
in any Reality
including in the Reality of human action
precisely applied proof
that Existence is determined precisely by that
what a person essentially singles out
what exactly is God doing

because the very fact of Existence
he often doesn't need proof
well, except maybe some atheistic movements
which, in general, immediately
if for example you encounter even
with remote diagnostics of equipment
can no longer answer the question

and we can we speak
that this is the manifestation of God
and then it turns out that this is the Action of God
for example, remote diagnostics
an atheist does not answer this question
this is for example one of the answers yes

from the point of view of existence
namely Existence in the plan
here as a management level
as a generally knowledgeable person, so to speak
who transmits knowledge

that's what I mean first of all
this is the meaning of God's Existence
in a specific place

and when you see the concept of Existence
i.e. we are basically considering
concept by essence by substance

then it turns out
that the construction of sounds for example
construction of elements of Reality
this is something you can vary
in the control system

i.e. you can, for example, through some sound forms
transmit a raster of information
i.e. a fairly large amount of information
For example well, which is not just in words

let's assume if we modify
sound form of the word
or move the words around
we can get
in general, a different control angle

Well let's say we take "cherry" there, yes
and we say, for example, "cherry is red"

if we consider "red cherry"
then we are after the word "red"
right away, in general, if a person does not have clairvoyance
can't say
what does the other person want to say next
cherry it is
or maybe some other red environment and Reality

so here is the concept of separation
for example in the word "red" yes
this is an element of external control, so to speak

Now if you look at the colors

seems to strictly separate the red color
and as if obscures the next concept
blue color on the contrary attracts i.e. brings closer yes
the next element of Reality, etc.

i.e. the world is arranged like this
that the composition of the systems of Reality
this is exactly the composition
this is how you would manage
or which you perceive
these are systems given by God for that
so that you understand the Essence of God
in His Action towards you

i.e. you saw that God is always with you
or for example He is here and helping you
or you should consider
what is the element of the World for example
here is the one in front of you now
this is a manifestation of God for that
so that you understand
how is it anyway For example there forever live yes

how to get your problems solved
i.e. the element of Reality always carries the answer

For example there solving a math problem
always had an answer in a specific place
and now I always have

i.e. it turns out that if we have
such elements are sent by God
i.e. this is basically it as if future development yes
i.e. the answer must be in the future
after solving the problem
then this mechanism can be used for that
so that you can master the technology of approximation
optimal future events

i.e. you need the answer that interests you
then you can consider this answer
in the Action of God
i.e. to consider what is in God, so to speak Yes
in His Essence
that you are still able to change Reality

i.e. you agree to that answer

which you actually need

after all, it's the same treatment process
or there is event optimization
it is a process of sorts of agreement
between you and God
you must in the Essence of God
see the structure of Reality in general
in which you can change the system

then it turns out that you are getting closer to yourself
the future is so much that you are in it
so you have the functions well in general like this
which God possesses
changing the future Reality

and it turns out to change the future system
you must be at the same time
as in the control position yes for example in the current time
and in the future tense
but already a form of Consciousness
for example, the physical body

and please note that based on this
you can do management of future events
in simple terms, it's a very good sign

having examined the control area
for example, there is some kind of disease there
or some area
where some event is supposed to happen
so that it is positive
just mentally put yourself
at some point in the area
put it correctly
and everything will happen as you want

this is the proof of that
that God is present
at the level of even your Thinking
in the form of your image
gives control through your own image

you get control
through the structure of knowledge
it's just that the main thing here is to see the connections in general
you need to understand where to put it

mentally yourself for example
or you can just put a figure of even a person

and here you can practice and see
what if you put yourself for example
well, near the person you are healing
at a very remote distance yes
and find a connection between yourself and this person
then you can cure it much faster
than if you put it there mentally
this person

let's assume that we are near ourselves Yes

and here, in general, the level is this
that approaching the structure of knowledge
exactly this kind of knowledge
which heals the given person
this is the level that gives
first of all, it allows a person to know God
in His development of this man

i.e. a person approaching your image
gaining knowledge
logically clear
the further you put yourself from a person
the more effect you get

but in this case it turns out
the control element is still contained in that
that you still have to orient yourself somehow

i.e. you must simultaneously put yourself
and very far away
and then you basically turn into
in a small image it can even be precise
but a person cannot be only a point image
he is always a human being even at the point
it doesn't change size

in the Perception of God
a person never changes size

and when do you start
to represent oneself at the same time
standing next to a person

well in some position

for example face to face or somewhere to the right
if liver disease
need the right shoulder in relation to for example
in relation to the patient's right shoulder

and at the same time yes to myself
introduce
very distant from the person in question
then you come what well to that
what in general you will need to consider
your own body

i.e. you come to such a level
what you should consider the body
as a transmission link
i.e. you see that your body
this is the source of health level
for example, yes to another person
the level of its optimal events

and you see that the position of your body
your own body position
in relation to another person, for example
this is his health

i.e. in this case you learn and know how
further determine
coordinates of own body
in relation to God
to the Existence of God in this place

when will you learn
determine the coordinates of one's own body
you are quite capable of controlling your own body
from the point of view of Macrosalvation

from the point of view of the Existence of God
for example in another place yes
in the form of a Physical Body
and see His Existence unconditionally

i.e. you can understand
that God always helps you just because
that He does even some specific thing
one

and when you realize this

then you see that when you do even often
some one thing
you can help everyone at once
the main thing is to understand how and where this happens
in your Consciousness

and it's very easy to understand
you just need to move the action
on Macromanifestation
i.e. to work in general on specific tasks
but meaning so
that for example on Spirit you work for everyone yes

i.e. often distinguish between simple management
and that's all
directing the Spiritual light to the Salvation of all

then it turns out that the situation is yours
i.e. the coordinate system of your body
this is the way to solve the issues of Salvation in essence
and in Eternal life

as soon as you find
coordinate system of your body
you end up in a system that is basically like this
that God always sees you
from your point of view

i.e. you constantly understand Him
it's easy for you, you understand everything
in this situation
then what's the problem
everything will work out well for you

you know this because you clearly feel it
body coordinate
and because you have proven the existence of God
firstly, in general, from the point of view of, for example, my Teaching
secondly, in a specific place
i.e. you saw Him in a specific place

but when you see it in a specific place
pay attention
what is desirable to see
with your physical body

let your physical body watch and understand

where is the Physical Body of God

then you are not really getting closer yes
Why do you need to get very close there?
you can get all the control
at any distance

but of course the closer gives more
i.e. when you approach
you are moving
towards the Physical Body of the One God
you get more
because the body receives
as if a direct control signal
i.e. a signal going from one body to another
a person understands faster
when he sees another person

and based on this
you can quite see
your own Essence
i.e. its own Eternal development
only just having determined everything
Here are the coordinates of your body
in relation to God
having previously proven His Existence in this way

once you determine the coordinates
for you
all external and internal Reality
becomes harmonious

you will remember this state
and from this state do
beneficial for all
and for myself as well, naturally
control

where there is no global destruction
even local ones don't happen
no problems or disasters

the more you will be
to be in this state
the better it will be for all the people around

I'm finishing the seminar for today

thank you for your attention

If possible, use this seminar
in the practical sense of management
as often as possible

Thank you
