

GRIGORY GRABOVOY
The Teaching about God
Targeted Management of the Soul
24.12.2004

The topic of my seminar today
this is my Teaching about God
Targeted Management of the Soul

in this topic i show
in what way if we are considering
it is precisely the applied aspect of Soul management

i.e. the Soul can exercise control
in principle, as if in general terms
acting on the substance of information so to speak
completely arbitrarily yes
i.e. the generalized level of Soul management

in this case it makes sense to consider
it is precisely the applied aspect of the Soul's connections
namely, firstly, with the level of implementation of management
i.e. the Soul can control, for example
from the point of view of the biological aspect of control

let's assume if we are considering management
which is carried out by the personality
from the point of view of how a person perceives himself
then it turns out that it is precisely the target
i.e. applied management of the Soul
in this case it is realized
as a system of some kind of identification of the Soul
from the point of view of the binding, let's say, of the Soul
to the personality of a person

i.e. well, it's quite a fine line
Soul for some reason
so to speak, it is attached to a person's personality
sometimes on very subtle levels, so to speak as if internal

i.e. inside the Soul
has its own level of personal recognition
or the physical body of a person

i.e. so that man would be Eternal

The soul should not get to
how to lose sight of or not recognize there
human physical body
because the Eternal Soul then
in constant time it merges
as if with the physical body of a person
real with all Reality
and with a person
and it turns out to be the Eternal Man

so here is the identification system
personal decision making system
at this level this is still the system
that when we talk about target management
we mean that here
a fairly multifactorial level of connections

for example if you ask a question
how does God combine possibilities in himself
Souls
Bodies for example yes
and how does He even imagine this?
perceives internally, well, let's say with the Soul

i.e. if the Soul is an external structure
from the point of view of analysis
then He perceives it all the same with His Soul somewhere too
God

it turns out that's what's going on here
very rapid compression of information

here is a person, this is the maximum level in time it turns out
compression of information so to speak
because one segment of the Soul of God
when He strives for another
then the speed must be very high

i.e. to mentally imagine yourself, for example
Thus
what do you want to see as yourself
from your own physical body yes
then you have to imagine that you are very fast
moved to the neighboring area
and looked at themselves as if
what can be done only mentally

and for the body we will say this movement
theoretically possible
if the speed there is ten times the speed of light
that body as if from the observer's point of view
it could be like this

somewhat as if Well, this is the tracing view

i.e. the body is in many places at the same time yes
the light just goes faster

and then it turns out that a person can
in principle, physically obtain this information
but for God
if there is a possibility of Thinking
for God it can be done

it turns out that in the space of Thinking
there is a fairly subtle control system
in which you can do like this in general, make management
target

what if Thinking is possible in a creative way yes
in any direction
then this action is possible

i.e. the possibility of action
is carried out only
Possibility of Thinking

if thought exists
i.e. a person has thought of some action
then to implement means it is possible

because when God thinks
And he implements it immediately
i.e. God's Thinking is practically
that's the difference
that God, so to speak, some abstract models of Thinking
forced to create as if specially creating artificially the space of Thinking
which does not seem to affect Reality
in all other cases He always influences Reality

and so let's suppose to compensate
i.e. to bring oneself into the structure of a person yes as if finally
from the point of view of Thinking, here is what does not affect

Not all human Thinking can influence Reality
sometimes he can just think or dream yes
there is a concept of "dreams"

i.e. God's dream, for example, "not to influence" can be realized
He dreams of not having influence
It doesn't affect
He can do it

a person's dream of "influencing" can be like this
that it will come true
i.e. how can a dream become Reality yes

it turns out to be at the level of dreams, so let's say yes
God and man fully recognize the object of action
how for example can this object appear in a dream

i.e. what is a dream and a dream of God and man
God as a Person
and a person who, well, strives to do something, yes
but this is not a realized Reality, it seems, yes
but on the other hand
why are the signs of recognition of Reality
in a dream, accurate prognostication can be precise, etc.

because in some places a person can see
that Reality is beginning to form
from the dream of God and the dream of man

and it turns out that this is how he gets into this Reality
those. sleep as a transformer of action
where do you mean systems that are not implemented
by management objective
i.e. God specifically brings to the level
Myself
dreams
so as not to have an immediate effect
He artificially creates such a field yes

and man, on the contrary, strives for this
but can't achieve it right away, for example
and the effect of real action is created

i.e. unrealistic from the point of view of management, yes
i.e. non-target systems
which must be realized in the management goals
The action of God and man
lead to real action

a person sees some kind of plot in a dream
but sometimes it happens
if the predictive plot starts to develop the situation like this

so from the point of view of human sleep
exist
and in the Soul of man there are such systems
which
in this case, you need to pay attention

that I show a person
from the point of view of a human being again

that such systems exist
which allow, so to speak, the systems of Perception yes
for example, a person looks at his Soul
and wonders
and where is the Soul at the moment?

Well, who is prognostically developed?
or who has developed, as it were, the influence of management
he sees where the Soul is
can see contours there, outlines there, etc. yes

the simplest technique
The soul corresponds to the physical body of a person
it's like it's inside, but everything is clear
optical glow is visible, etc.

but in reality the Soul is projected
and can manifest itself in different systems
i.e. vision is needed here

and it turns out that based on this
if a question is asked by a person
which one well for example, he doesn't do anything there how long would it be
that he develops controlling clairvoyance
for example, he simply asked a question
where is the Soul
then what should he do for example
how should he even define this concept ?
from the point of view that the Soul exists
it could just be a person's faith
No problem

but if, for example , a person simply asked a question logically

then it turns out that he gets into space
where the target is, as it were, the control of the Soul
not developed in this space
i.e. the Soul does not act in this space

then he begins to perceive it
as a speculative structure
for myself

but the conceptual structure begins to collide
with the real Soul system
then that external Reality arises
which goes precisely into the logic of Reality

i.e. there is a Reality as if it were ordinary
and there is the logic of Reality

if you ask yourself the question
how did God build the world?
from the point of view of where the logic came from

then logic was taken generally speaking
from a kind of logical phase of Reality
i.e. it exists in Reality
a certain target construction
or area, so to speak, a certain field
Well, where can I, for example, consider the concept
"logic of the development of Reality"

i.e. "logic" is an abstract, separate concept
if we introduce such logic then it will be so

i.e. we can, for example, introduce a different logic
then you can breathe in water, for example
there are even some such mechanisms there

it turns out that
i.e. there is a system there for example deep sea
which allows you to breathe through the liquid
it doesn't have to be water

well, that is, we can create
any system in principle of Reality
if we want to somehow modify
i.e. logic is not always linear
what we assign can be logic

and the same target management of the Soul or even the Soul
this is the level that takes into account
after all, individual qualities of a person

this is when the goal comes from the Soul
and target management which is linked for example yes
to the Soul
then there may be control characteristics like this
which well, maybe they are not familiar
i.e. they can be completely new
because the goal changes
the novelty of the design changes as it were

and at the same time this function of target management
this is the level that allows
create new management systems

because if the goal of the Soul is one, then
well, in terms of even some ordinary events
then one management goal
if we change the goal
then through the level of Macrosalvation
which is constantly preserved
but the subgoal may change
the goal is different
this is how we create novelty

this is how to create novelty
in the target management of the Soul, novelty can be created
by management

i.e. from the point of view of God, for example, everything is clear to Him
for Him, nothing new exists at all
this is a rather unusual situation
but it's really like that

it turns out that in order to create something new
here we need to create a kind of space
behind the structure of the goal
as if to draw something new
just mechanically

i.e. if we have several goals
then these goals are still somewhere
in some space

but between space

one goal
another purpose
optics as if expressed by optics
one goal to another
something does exist

we can take and attract it towards the Soul
but very quickly
if we attract very quickly
then the novelty is more complete

i.e. if the novelty begins to become obsolete more slowly
and we become familiar with this concept

by the way one of the ways to get answers
it means just taking some new information
and gradually pull her towards you

then it is already overgrown with answers
and in principle it becomes clear

but in order to get something new
we have to do this at super speed

for example, here is the horizon in front of you
you can look at it
then you can see how
think about it first
then, for example , think that the horizon will be such and such
and there such and such action is possible

and then look and everything is already familiar to you, yes
as if it weren't interesting
or can you just go and go like this on purpose
and suddenly turn your head sharply
and see something completely new

same here
ability to obtain new information
this means to attract information as deeply as possible
into the inner level of your Soul at super speed

i.e. the Soul must open up to something new for you
then you will see something new

i.e. instantaneous action external to itself
implies at the same time
practically gaining access
to yourself
to the level of novelty of the Soul so to speak yes
in your Perception

i.e. you see something new in your Soul
and it turns out you are looking with your Soul
on this new one
i.e. you fall into the vision of the Soul

and then it turns out that the goal of management
which exists in the Soul
just like you see with your physical sight
the structure changes in front of you
i.e. as if the goal even changes yes
another subject or some object of information

the same thing when the Soul looks
the goals in front of her change almost instantly

because she is looking at the Infinite World after all
there are even more events there, naturally incomparable
than just a person sees with physical sight

although of course from the point of view of information
this segment he is looking at
touches the Infinite level
then yes to external information

and here this logic arises
so the person has
then this field is a logical field
that a lot of information is external
the Soul has it real

then if you ask a question for example
and where does God live
such a simple question to ask
where does he live, for example, physically

then it turns out that here is the answer to this question
from a human point of view
this design is quite simple

The soul sees Reality
i.e. for her the universal is the universal
i.e. it directly influences the whole world, so to speak

and the logic of the connections of physical vision
that's how I said it
as if a speculative system of connections
that all elements are connected to each other

it means the horizon that you see
that segment
connected as if with Infinite information

and that's when you start to fail
the structure of the vision of the Soul
i.e. the goal of management where
The soul by the way creates an infinite number of goals
i.e. the space of novelty
and the space is as if old
where information is known or absolutely known
cease to be different

and as soon as you start to bring this structure
to the structure of the action of the Soul

it turns out that this is the platform for all of that
what you perceive means that it is again the Soul
because it immediately connects with the whole of Reality
and do you see that segment
which is actually being organized
including the Soul
but as if from the Infinite often coordinates

and then it turns out that this World is physical
it is inside the Soul

i.e. I showed the mechanism as in the Soul circuit
you can find the concept
i.e. to introduce the concept into the Soul
how to understand and how to accept at all

then it turns out that God has
first coordinate of definition
where does god live
is located inside the Soul of a person

it's a very simple design
I showed how it develops
it means once inside the Soul of a person
then there is a completely precise coordinate

it's quite realistic to consider
for example the movement of the Soul
this very structure
where the Soul looks at all Reality
i.e. and therefore interacts yes
creating an infinite number of goals

so it turns out that based on this
if we for example Well as if we were looking
already from the point of view of physical Reality
we have very precise coordinates
where is God in the Physical Body

and we see that all this information
perceives the physical body

then we clearly understand what exists
coordinate there of the physical body of a person
which always knows
where is god

then the coordinates of the Soul, i.e. the vision of the Soul

where knowledge is the dynamics of development
towards God

why does the Soul develop towards God yes
because this is the vision of the Soul
precisely directed towards God in dynamics

this is how the Spirit is born
striving for knowledge of God
and to God in general

that's why it turns out
that as soon as the Spirit connects with God
at the level of common goals and objectives
it transmits very important knowledge to the body
For example there according to Eternal development

i.e. creativity is always in accordance with Eternity

creative processes the opportunity to realize something new yes
This is also the structure of Eternal Development

because from the point of view of Eternity
for example, the novelty, in fact, the novelty of the situation itself
it is such that if for example **YOU** say so
you see the novelty itself as a system of development
so that a person can live forever
he needs something new after all
was a characteristic of its development

in principle he can of course
a person constantly perceives the same thing
or some kind of cyclic systems
there for example, they can change once in a million years, yes
but there must be something new

and it turns out that here is the creation of novelty
because God makes it interesting for example his own development
It creates a new structure.
this is still information that is completely new

therefore here is the vision of the Soul
where management goals are created
on a very large scale and in large orders
and in principle, novelty ceases to differ from the known concept

because there are known concepts and new ones
achieve this due to speed
what do you see practically
Well in general, an infinite level of information development

here is what you start to see
what is new that comes into contact with the already known
vision of the soul
it becomes absolutely clear to the Soul
i.e. the Soul moves to the same position of Perception
now it's closer to my inner level
how does it happen with God

i.e. the concept of "new" and "old"
as if any concepts at all
after all, they all create interest in development

here is a very subtle transition that even well-known concepts
create interest in development and aspirations for Eternal development

so as soon as we cross this line
we bring to control
then a person develops forever, that's for sure
when from any concept
even from the well-known old former etc.
he sees an incentive for Eternal development

and then we get the construction of new knowledge
this is a purely speculative level, ^{so} where
let's say why a person needs it
so that some avalanches would come down
so that some problems would be created, etc.
why does he need any new situations
which ^{in general} can even be problematic ^{yes}

and ^{therefore} from the point of view of logic
exists in every element of Reality
the system of action of any person
i.e. in the collective Consciousness
the will of any person is manifested
She's basically pretty tough
i.e. if the will is strengthened then, ^{for example}, an avalanche will not come down

and it turns out that a person can be manifested
just like God does
in the area of absolute control level

and therefore here are the control systems that are effective
they can hold back up to ^{earthquakes} and avalanches
because really
or ^{are there} some emergency situations ^{yes}
do not allow them

because this rigid structure ^{is like} a human line
where is the man in the Infinite level
still corresponds to the level of ^{the} Actions of God
they are manifested quite specifically

and in the prince one person can stop
quite technologically feasible
^{for example}, a nuclear power plant explosion
or prevent a nuclear bomb from exploding ^{there}, etc.
to prevent some kind of ^{catastrophic} event
because his line of behavior is ^{generally} quite tough

and from the point of view of the Soul or the action of the Soul
in the Infinite Goal of Management
in Infinite Goals of Management it is clear
because the Soul has the ability to act
In an infinite number of ways
so she has it

Well For example there is a method there to find some way
or gain high information activity
to obtain, as it were, a total high effect, etc.

i.e. the Eternal construction has
and the principles of action that are Eternal
or correspond, for example, to Eternal Development

if you take it bit by bit and collect the necessary information
there is an Eternal number of years
of course the control will happen
somewhere there, even further away, in the future

but if we put the following logical point
so after a million years the Soul created a control element
which happened yes

but since she is Eternal, it means she has designs
take the result move here
mechanically simply by control

and it turns out that then we take
the next segment of Eternity
and little by little this or there quickly
move the segment here

so as such
for the Soul there are elements that are unrealizable
does not really exist
i.e. it is enough to just set the control position correctly and

another question is what to move towards yourself
absolutely [...]
the more creative the control element
for everyone
the faster the part being executed moves here, yes
there naturally remains some kind of matrix, some kind of experience

i.e. the more you work
from the point of view of predictive systems

the easier it is for your next event
the more prepared you are for the next event

and here in the target level of Soul management
there is always this connection

The soul always rules with a purpose
gain experience for the person himself
i.e. a person's knowledge should not be chaotic
and firstly, concerning him personally, firstly, yes

i.e. why does a person go to school
when knowledge is individual
all the same, individual knowledge helps a person
like in a general school
i.e. it exists well some kind of intersection
with the collective level of Consciousness

and also the Souls of people means they do things there let's say so
carry out some of their own personal action programs
there in a team environment
i.e. in the Souls of people or there in the Soul of a person
there is a certain level
where is the level of collective action

i.e. look, when God gives
Well, life is a man
and for example there is Eternal development
He sees the collective action of this person.
He sees where a person is, etc.

the same thing when you give control
that means in the goal of development there of your Soul
then you see how Souls actually work
in general as if in a collective , i.e. collective action of the Soul

i.e. it is possible to control the body in this way
what you see means action what you can create
for example, some sound forms and actions

let's assume it is possible to create sound over a large distance
because the Soul is like that
what if you for example create an action at a great distance
then you can spread, for example, sound vibration
what a difference you can make
sound vibration wherever you want
i.e. it turns out that you can create matter wherever you want

and when you do this action as if of the Soul
consider it as an action going, for example, to Infinity
then target management for example of undefined areas
where the action itself is not actually conditioned
as if Well can we really say that?
level well let's say further management
or the level of, as it were, previous management

we can see that here is the novelty of the information yes
which exists means from the point of view of that
that novelty can be created
it contains a control method
as if an external control element of the light optics of the Soul

i.e. new information is still external control
i.e. here, if we look at the information
as if chaotically distributed in the control space
and we will try to describe it
from the point of view of the properties of the Soul to create sound forms
at any distance, anywhere
from the point of view, well, not only sound
there is no material form

but why exactly sound
through sound vibration you can create the word yes there
and other control systems

and it turns out that based on this
we are gradually coming to that
that this is a collective action of the Soul
this is what I described in general as a system of external information

i.e. it turns out that the collective action of the Soul
actually creates the following structure in management

that when the Soul begins to approach that
that's where the Souls act collectively
The soul begins to see
how from the Soul actually arises the human body

i.e., in fact, at this moment the body arises

therefore you can see
how god creates the human body
through the Soul, as it were, yes there is the first created man for example

or through there for example your own Soul

and then it's clear
that when a person helps another
why you need to help
because you were involved in the creation process
and it turns out that you are already responsible for him there
and you can see directly how your segment works
of your Soul

the purpose of your Soul's management
this is Eternal life Eternal development
so you still create life somewhere

and by the level of communication
any aspect of information with any other
It is clear that your body and your Soul
naturally they participate in the process of creation
physical body of a person
other

so it turns out there are no problems
you know the body of any other person
then mine too

and based on this, based on the goal of managing the Soul
you can come to yourself here yes
and the path to yourself should be very simple

here you are alive you will never die
and it turns out that by analogy it is natural
anyone else must be alive

striving for oneself is the path of another person
after all, God showed the same level
i.e. striving for Him is the path of all people

and in this case, for example there is resurrection technology
this is precisely the technology of reaching out to yourself
constantly seeing my own life

and knowing at the level of current time
that you are an eternally living person yes

and then it turns out
that is the purpose of Soul management in this case

it is revealed in what the Soul must show
that all external desire for you
this is universal life
and your aspiration is your Eternal life
and there too is universal but also Eternal life yes

i.e. the Soul is still beginning in the goal of management
how to reduce constructions in a logical way
i.e. the Soul has a logic of a certain Thinking

in fact the Soul naturally possesses
not just the logic of thinking but also, as it were, super-logic yes
the logical process in the Soul is much faster
than for example there in the system of Perception

but it means it works out nonetheless
that based on this we have such a design
in management
when does it mean if we want to understand
for example how the Soul creates
Well there let's assume the sound form of control yes
and how does the sound form transform into a word
i.e. we want to listen , let's say, to such a level of action
what does it mean the creation of a sound gives birth to a word
and the word gives birth to action
we get, for example, a counter Reality
the Eternal Reality coming to itself there

then the Soul begins to work logically
then we begin to see that the purpose of Soul management
The soul controls the logic of its Thinking
transfer to logic, for example , human consciousness

and it turns out as soon as a person begins to think
in sync with the Soul
By the way, he can, for example, instantly recover

i.e. it is enough to take a simple thing as an aspect
Thinking of the Soul
see where it is near you
By the way, I'm showing this right here with my hand
where can the structure of Thinking be located
in optics right here

Well, basically the main amount
well, sort of quantitative, yes , such
Basic control systems

they are often very clearly manifested
i.e. they are visible in the form of ^{specific} systems of action

and it turns out that when you start to see
this is the goal of the development of the Soul, ^{yes}
movement of the Soul towards Eternal development
then you see how the Soul organizes itself
in Eternity of one's own development

if you ask yourself this question
^{well, some kind of} trivial question
and how does the Soul organize its own Eternity?

yes, I understand, she is Eternal, we know that
but let's look at this process
where in what mechanism does it realize this Eternity
at least there are some mechanisms to look at

so the mechanism is very simple
she organizes Eternity
when does it start to sync
that which corresponds to a person as a reflection ^{of} a person

i.e. a person has Thinking
the Soul too
it means that a person has ^a dynamic physical body
the Soul of man has it too

It is clear that the body is inextricably linked with the Soul
but we are considering in this case
deep i.e. universal universal
or ^{is there} a fundamental meaning of the Soul

and it turns out that, ^{as if} acting by analogy with a person
i.e. if we consider such a design
that God created man in the Image and Likeness
and so it is indeed
that means God has a design
which ^{is well} similar to human action

because man is still like God
so of course a person does something
and God acts like it naturally

the same thing works, then, the human body
it means the Soul acts somewhere similarly

and it turns out that this is what is happening here
intersection of the following control structure
as if well, with such a universal, divine meaning
universal development of Macrosalvation

that there is constant mutual self-learning going on there
physical body yes
logics
Consciousness
Spirit
and the Soul of man

and that is why the purpose of management is the Soul of man
so often it is precisely synchronization
or is there an increase in this process
mutual self- education , mutual self-development, etc.

and therefore it is clear why one person is Infinite
that the whole world is there
because this development is infinite

and this is the status of the Eternity of the Soul of man
where the action of the Soul is no different from the action of the body

and as soon as there is no difference, yes
all man already connects with God
in fact, in terms of Eternity there
and he becomes Eternal

it means that the Soul becomes Eternal here
technologically Eternal
because it is constantly improving
as if from the point of view of an external observer
that she constantly directs a person well as if on the way
so exactly the exact development of True development
from the point of view of the Soul itself

but then the question of knowledge of the Soul arises
and does the Soul perceive correctly?
and why does one person reach one level of development
goes one way
another to another

so from the point of view of the levels there
any
from God's point of view he is actually equal

and that's exactly why the paths are different, yes

so this is exactly the level of action

so when there is some kind of novelty there yes

For example there is some secret there

Well let's assume there is a concept there, let's say something like this
like "The Last Supper"

why does the concept of "secret" exist, why is it needed

and because there is a level here

here are the branches and factions of the unknown

in general the concept of "mystery" is that there is something unknown and as
if

as soon as we focus on that

what is the concept of "something unknown"

we begin to understand everything that was there, but already with the Soul
already with Soul

but in principle it's not that anymore

where the Soul is in proximity to the Souls of others

sees the body

and in the fact that people's bodies transmit knowledge to the Soul

i.e. it is clear that if something happened somewhere yes

so, well, there is some secret somewhere unknown

then the answer always comes from the human body

and this answer is transmitted to the Soul of another person

and that's why this is this secret

this is actually the complete answer

and therefore, as if any secret has

namely the structure of the complete answer

and in principle, why do people

right there for example, they like some of them

some well often correspond to secrets there

because a person always, well at least he hopes

for a complete answer

i.e. a secret as a kind of key

which hides the full answer there

and therefore in the World in principle

nothing is being done to hide anything

God made everything so that everything would be revealed

another one of the principles of the functioning of Eternity

i.e. in this way the Soul gains the potential of Eternity , so to speak
although she is originally Eternal
but if we think that she is there
decided to build herself Eternal
herself
then it means there seems to be potential in that
that there is nothing unknown

then it must evolve forever
to prove it to myself

and by analogy
i.e. she must set a goal to prove

by the way, a powerful self-healing mechanism

so there is some problem to prove
what the Soul is capable of accomplishing
let the Soul work itself
by the way, you can see it clearly
that only the Soul itself works
in this case, you can choose this mechanism , for example
in management

you can see how only the Spirit works, for example, yes
or specifically the faction of Consciousness
this is quite easy to see in this technology
exactly where the purpose of the Soul is manifested
target management for example Soul is manifested
where it talks about what your Soul means
does target management
then we can say targeted management of the Soul

but we can say that the target management of the Soul itself
God carries out
because the Soul is there for example another person
no other person
in principle, it is precisely "to control the Soul"
This is a concept that basically does not exist
"The soul of another person"

The soul is an absolutely inviolable level
created only by God
The soul can only accept and unfold itself yes
and therefore complete free will is needed

there during the transfer of knowledge , technologies, etc.

and it turns out that based on this level

it means actions and movements

we have a very simple factor, actually speaking

so let's say the endless development of the human body

what if for example in the target functions of the Soul yes

where the goal is also some kind of development of the system itself
Soul-World

i.e. some kind of logical action of the Soul

there are some specific mechanisms

so it turns out that the body also has them and these

these mechanisms are they identical at all

basically what I said is the body's task

she can be like that too

there is Eternal development

and as if the universal connection implies Eternal development

i.e. if, for example , we take and ask a question

some one separate cell of your body

so does this cell want to develop, for example ? Forever yes

but first of all there is a neighboring cell

and so if you ask her a question

Well then it turns out we'll have to ask a question

as if in general to myself completely and to the whole body

there Well, one hundred percent yes

but then where should we ask the question from?

from which cell

we always leave some kind of cage after all

which is , as it were, the source of the question

from the body's point of view

and it turns out that in this way

there is always one cell left unqueried

and if one cell remains unqueried

then God's opinion comes into play

and God naturally speaks

We must live forever

way and time and time again

Well , we're starting to look at the information.

it turns out that the body has only

a completely unambiguous task level
also live forever

This is how I came to this conclusion
generally speaking, it's just logically elementary now
as if using some elementary
's not even any math ^{there}
by displacing multiple concepts ^{there}

and it turns out that since we can simply
come to such an opinion, ^{for example}
it turns out that accordingly in a person's life
in a person's life
quite a lot of elementary opinions ^{yes}

by analogy, since the Soul has such a mechanism
the body has a very simple mechanism
this means that the outside world also has a mechanism
which promotes
it's not exactly what contributes
and in general the only way of development in this World
this is the Eternal development of the physical body ^{and} the Soul

it turns out that if we
^{for example,} we have some kind of contact level
are bodies ^{there yes}
and at the same time we ^{will say so,} we consider, ^{let's assume,} the body
as an element of interaction with external Reality
that means in external Reality
there are similar laws
i.e. there is also an image of likeness there
in every element of Reality
the same control mechanisms exist

thus we come
to your own Soul
but which knew the World
i.e. the Soul is ⁱⁿ some area of control
because you
she understands and knows what is happening there

i.e. understanding that knows
all systems
all reasons for development
this event this area of information

and that's when you start to realize this aspect

, well, a kind of energy, so to speak, arises
in fact, by the way, this is really energy as such , so to speak
and this energy begins to be with you constantly

i.e. you see at any point in Reality
so this is this aspect of powerful energy
which constantly bothers you as if it were nourishing
feeds so you can call it
and you are generally inseparable from this energy

i.e. it is generally impossible to divert you from your goal

then it turns out that the goal is achieved in any case
physical body
The soul of man
and even events
start synchronizing
in terms of development and implementation of the goal, moreover
mandatory implementation of the goal

and you begin to see that even the most difficult
there are your personal designs there
there are some problems there yes
maybe it means some earlier diseases
all this is practically just nonsense
compared to the power you are starting to see

as soon as you begin to perceive it
this power
all no problems
all your earlier systems
begin to recover quickly
you come to Norma
from the point of view of the physical norm of a person

i.e. so that a person can live forever
he should come periodically
into a completely normal physical condition

Well, first of all, it's best for him to be like this all the time.
but as a rule, those who practice well
he always remains like that
and who has already reached a more or less long-term state
by management
have there for example, physical normal conditions, so to speak

to be practically healthy
then it can be like this forever

i.e. the main thing here is actually experience
the more experience the less "chances" as if in quotes
that there will be some problems

and it turns out that when you start
thus synchronize
with Peace yes
then you can see that well, take some kind of insect
so which one is there, let's assume, a dragonfly
it means an insect that let's say lives
according to some internal laws

and it becomes clear to us
where will this insect fly then
i.e. some phenomena of the World become clear to us
Well, it's elementary what will happen there with some blade of grass, etc.

once you enter into such an understanding
you begin to see that the world is transparent
i.e. you begin to see future events
but then
then exactly that arises
which is what arose in this World
a person becomes autonomous
i.e. it exists independently
he walks in this world
regardless of other phenomena of objects yes
as if in connection with a certain information system

and that is how man was created
in terms of the Soul's target tasks

that the development of the Soul of the body of external objects of
information
and already, as it were, a certain level of prognostic yes
even here is the level of predictive thinking
and then again, as if a separation, yes

i.e. the person organized himself
I myself entered, as it were, into a matrix in a certain womb
and it turns out he himself lived and was born
so i.e. received autonomy

but unlike God

God simply has external space, He created it Himself
With you
and in this case man already had what God had created

but nevertheless the mechanism of self-organization
he is one and the same

and from the point of view of Eternal development it means
the following element can be considered
well, some element of self-birth

here the Soul always revives itself
in terms of Perception from God
i.e. God gave her this mechanism for self-rebirth

the same thing happens with the physical body

and therefore, for example,
By the way, this is a powerful rejuvenation mechanism
It is related to the fact that
for example, to do rejuvenation
to fix the rhythm of self-rebirth a little bit

and when this rhythm begins to change
i.e. a person is self-reborn, self - reborn
like a level, well, maybe perceived , yes

somewhere he even expresses himself in a certain way yes
in the form of a sensory plane there
interactions with the external environment

then this system of self-rebirth is like this
that it is possible, as it were, to reduce the speed
so this is the optics
and then a very powerful healing

because firstly it is also about rejuvenation
but here this one is actually some kind of ball
which seems to twist time
in the mechanism so to speak means interactions of organisms
in space, etc.
this ball starts to slow down in rotation
i.e. time seems to be suspended

and we need to slow it down a little bit

so that a powerful impulse would throw a person back
as if back in time

then it turns out that well , this one is exactly it
from a physiological point of view this means
all events are of course saved
external and internal

it turns out that when a person gets into
as if to a younger state or something
then we see one very interesting one
by the way, it's not simple, it seems
but a very quickly knowable thing

that there is a certain top, a certain center
around which the time of man revolves , so to speak
and these are his connections
when there is a goal of control from the Soul
so, let's assume that it is going to the level of Infinite development

so here are all these internal connections
this is, in fact, the very Soul of man
which is perceived as if by the Soul itself
but located, for example , in the human body

i.e. we begin to see
how the Soul itself analyzes itself
i.e. to see yourself from the outside but without losing connections

i.e. it is quite amazing
in fact, in general, the feeling
i.e. it seems like there is no gap
but on the other hand it is completely visible
the entire system of your Soul

the human body is structured in the same way
a cell can analyze a neighboring cell
but there is no gap

and now if this mechanism is transferred
at the cell level for example
then you can improve the health of your entire body
if there is at least one healthy cell
and you can always come up with one healthy cell there

and it turns out that based on this
we have such a powerful mechanism of interconnection

as if different segments of the human body
and yet with all this we have
what the body is essentially
it's quite powerful initially
level well as if Reality, let's say so

why is there so much equipment there
various unstable processes in this World
however, basically well how can I say it
not so often of course it would be better if there were no disasters there at all yes
but nevertheless they don't happen that often

because the human body actually has
colossal level of counteraction
impact on him
on the one hand it seems like
as if from a mechanical point of view yes
has a certain density

but from the point of view of interaction
these are the goals of the Soul's actions
in relation to the body
it has superpower this body
i.e. the purpose of the Soul's action
in relation to the body
this is Eternal development

the body must be there
Well, they became stronger, if you say so, etc., etc.
according to the specifics of development
steel, after all, wears out in the same way in Infinity
and the body should not wear out

therefore it turns out that we are in this position
precisely the goals of the Soul's action
means directed at the physical body of a person
and aimed at Infinite development
we see that the body becomes like this

i.e. the goal determines the properties
so that the properties are appropriate
the Soul just has to supply it there in a timely manner
information about future events

those. predictive properties of the Soul

but the Soul already has all the future information
i.e. this issue is also resolved

therefore the question here is only
in the task
and in the personality structure
when a person defines his actions in this way
when the actions of the individual
match
for the purpose of the Soul
precisely in the Infinite development
then the personality is carried out
here is practically any creative management
and it is carried out without fail

including task-oriented management
namely Eternal life
in the physical body of a specific person

not to mention that it can of course be cured
any disease then, etc.

This concludes today's seminar.

Thank you very much for your attention
