

GRIGORY GRABOVOY
The Teaching about God
**Realization of Eternal Life
by controlling numbers**
12.08.2005

The topic of today's seminar
this is my Teaching about God
Realization of Eternal Life
by controlling numbers

and in this topic I would like to show
number control structure
where the implementation of your management is related to that
that your presence, for example, in management
this is still management where you start working
developing independently
status as if personal control
seeing events
i.e., in fact, this is the ability to see and predict events
and exactly

and here the main context is still management
should be in that
that just as God is realized in any system

then the need to implement
own system own information
from the point of view of the technology of Eternal Development
it is right here in today's seminar
This is the main context of management

i.e. see your information in action
consider the action of the word
because the spoken word is in the future
these are future events

and therefore at this level of management
the word is related to a person
and the number is like an external system

I'm just going to show the technology
in a somewhat practical aspect
in accordance with what the stickers themselves consist of

from fourteen numbers or from fifteen

and at previous levels of management

you can watch it

there are a number of seminars where I give specific instructions on how to work

and why so many numbers

but briefly if I say it here

control cycle for example

must be highlighted in the collective Consciousness

as a management segment

we need to be able to highlight the management structure in such a way so that the structure is Eternal

i.e. in any finite system

highlight the Eternal structure

so there are for example fourteen or fifteen numbers

and in this regard I would like to show here

what exactly is implementation

as if external development in number management

this is an opportunity

by means of, as it were, indication of certain objects of information

in management

see your own system

i.e. consider how you see yourself

i.e. self-control

principle of self-recreation

just like God does

He can recreate himself

in any system of Reality

and the ability to receive information from external systems

in general, if we start working with the verbal principle

then words here begin to have no meaning

at a deeper level of system organization

i.e. any spoken word

if we start to implement this word

as a system of action

then you can use for example

sound forms for transmitting information

Thus

so that we have let's assume a signal from the control object

such that we perceive the signal

but for example we immediately make control

without expressing a signal in the form of, for example, a verbal phase

i.e. you can actually do the management like this

what is the beginning of any word

this is universal management

the beginning of any sound

this is management

the beginning of any Perception

this is also management

and in terms of management if you for example pay attention

that even in lecture materials

I sometimes do some quick ones

discrete control systems

means either later expressing as if the main status

either starting in verbal terms

and ending with an explanation of the beginning of the word

then here the main level is like this

what is desirable as if in integration

in general with the achievements that exist, for example Yes

in science, in technology, there is knowledge of the Universe

be able to highlight

namely the Spiritual status of the Eternal life of man

because Eternal life in this case

it is still a system in Consciousness

this is a system of development of the human Soul

a system of some generally stable management

therefore the ability to highlight in any signal

the technology of Eternal Life

and the ability to perceive the system

in the form of such a category

for example, as an interaction with a number
or work in the structure of the number

this is, in general, the development of spiritual possibilities
development of the ^{actually} real expression of the human Soul
when a person can calmly at the expense of his own Soul
anticipate events

and here we need to highlight such a spectrum

what is Soul management
i.e. to consider events ^{for example} with the Soul
this is still a certain level of control of the Spirit

this is ^{generally} often a different technology

sometimes they look alike
but we need to allocate control
in terms of structure, there are ^{actually} no ratios
Souls
Spirit
there is a physical body of a person

therefore external self-control
this is control over the entire personality system
expressed in such ^{categories}
like Soul
Spirit
human body
man in general
and generally speaking the social system

because after all we are engaged in social policy
you could say that

so it turns out that when you work
in the control system
consider yourself
both from the point of view of self-recreation

this is how god does it
He can consider
Your management system like this
that He recreated Himself there by perceiving a series of signals ^{yes}
or by forming signals around yourself

and also He always exists

in the system of future events
i.e. He doesn't disappear anywhere

and in this regard considering
as a system of action from the initial principle
as well as the system of existence in the Infinite level

we can fully cover
as if all categories of Reality

after all, in modern science, well, that led to this
that there is, for example, nuclear weapons, yes

there is a world
which, for example, is there at some probabilistic level
can be destroyed
which we naturally will not allow

and so here we need to take into account
that control comes from man
it is still a system of such actions
that we must necessarily express actions in that
what we guarantee for example let's put it this way
For example there is execution
if from the point of view of the party level of management
or from an ideological point of view

the fulfillment of the Eternal development there
Eternal life of man
exactly in one physical body

so this is still a specific technology
technology is often special
although in many ways it is not complicated
but nevertheless, from the point of view of science, for example about society, yes
in the modern conditions of science as such

I think it is advisable to engage in science
together with the political system
along with religion
simultaneously deal with the system
as if there was still a real adequate existence
in this world

and therefore this management should be taken into account
and a certain spectrum of knowledge as scientific knowledge

because when we do management
well, such a forecast plan for example
what shall we say I diagnose the plane
there is a coincidence on some issues

on the plane
from a scientific point of view
Well , this is the field of statistics
or the field of detector research, for example, yes
it turns out that this is also a scientific discipline

we must cover all management systems
structures of Consciousness
whatever they may be there scientific political social

and the ability to cover all systems
due to the system of personal Consciousness
this is one generally often the main aspect of management
like a super fast type

enter into any social scientific or political system
and get from these systems
namely the management level

because here is precisely the connection that exists as follows
a person has
level of some social processes
between its management level for example
where it can recreate itself
and its future system of Eternal development
which should now be real

in God every element is organized
in the system of action of man and God

and it turns out if we start setting the task
let's assume exactly the system of Eternal development

i.e. there are a number of some random phenomena
and you need to make the control this way
that we implement management
from the point of view of the tasks of a specific person

then it turns out
what exactly is receiving the primary signal

as if the first act of clairvoyance let's say yes
in fact, we need to develop spiritual vision
to the viewing level

I show that no aspect can be missed
whatever it is and whatever it is called

and here is the primary level of signal perception
this is the level that in the first position is associated with that
that we should get as a collection of information

here we see the first structure of the number
i.e. any number
but the number still needs to be named yes For example

and if we perceive the signal
then at the level of Soul Perception
we can see a kind of primary signal

and in connection with this it turns out
that at the level of Soul Perception
we must differentiate
how is this signal
generally speaking, it would be possible to correlate
with the system of future developments
i.e. we need to make the implementation by the Soul
so that the Soul can perceive the signal

then it turns out that the number is out of control

although we can say
that we perceived some two objects yes
for example the first signal and the second one there

we got, for example, some level of management
we need to highlight the level without naming the number
and gain control over future events

therefore it turns out that in this control system
It is advisable to consider it very precisely
what's going on in this world anyway
at some point in time

it is very important to highlight here
time detection for example
i.e. why is this happening right now
some such moment in this world

and here is the selection, i.e. the correct time perception , so to speak
correct time perception
this is a guarantee that you will do it accurately
next action

and that's when we start into the structure of time
introduce the concept of number without declaring the number
then all these digital series
are part of the contact interaction system

i.e. we can act on the control system
any at all on Reality
directly
when there are some numbers nearby

i.e. we don't use numbers
we may not use them
just look at it
as a system well as if of a reflective type

and that's when we start
we assume this system of interaction with the number
implement as a system well like super long range yes

we need to ensure Eternal development

then any current moment in time
why does this happen in Reality yes

it should be such that the next moment in time
this is an improvement on the current one
or even a future moment in time
from the point of view of the technology of Eternal development

i.e. accounting for the accumulation of the control system
and implementation at the next level

i.e. getting the next number next to it

i.e. if there is a number series
consisting there, for example, of fourteen numbers
it turns out that we can take into account
that there are fourteen numbers there
this is 1 and 4 added together to get five

this is the third act yes

then we can consider further
initial number of the series
and the second adjacent number of the series
and get a general boost

i.e. universal control
where the number does not actually form Reality
the number exists in Reality

i.e. we ourselves introduce the system of existence of numbers
we control the number
and not the number, for example, somehow influences us

then it turns out that if there is an event, for example
well, maybe some kind of negative connotation
we can count
that we exclude the signal of this event
from Reality
i.e. we exclude, as it were, the numerical layer of the event

in Human Perception
a number is still a certain element of Reality

where, in general, some factual systems are reflected
that the event happened

if we exclude the number
the event does not occur

and at the same time we may not consider the event

because the main principle of management
do not record negative events

therefore we must
in this way, as if to cut out the number system
i.e. for example, there are some sound forms and controls
let's say one sound after five minutes another sound yes
in Reality

we start comparing
why are sound forms different
i.e. in one case the event means a sound form
otherwise no

but also where there is no sound
this is also some kind of form and some kind of number
simply a deeper level location often

because the sound level is the level of occurrence yes

for example, in what cases is a person there
disposed to consider some silence

in those cases when he wants to know often
deeper level
as if more internal control

and the expressed system is associated with sound
she is like that
that you can take the sound form
and enter the management structure of future events
of this system

i.e. the identified form is more manageable
there is a sound form we manage easier

there is no sound form we need
or form
or enter into the system management structure yes
Well, basically that applies
and by the way

and for example to any action

so if we need to do management
especially in the context of counter- terrorism
when terrorists can put up some resistance

although considering that the party is DRUGG
distributes, for example, a mass version of these stickers

mass control technologies

at the expense of one's own Consciousness
located on all people
by prime numbers
and by way of, as it were, deepening the fundamental
related to the analytics of this number
how does it work anyway

it turns out that this is precisely the system management

it is the ability to take control to a certain level \
for example to the sound level
without pronouncing the entire word or number system there

i.e. some systems can be spoken
or do things faster
how they are perceived by ear

i.e. to replace the sound structure
management structure

and it turns out that if we, for example,
Well, let's put the question , well, let's put it this way
instant healing of a person or super fast
in some difficult emergency situations
prevent, for example, a terrorist attack
in conditions when the whole world is tense
and the collective phase of Consciousness
starts well as if to admit the possibility
sudden terrorist attack and sudden action

because in fact, according to the technologies of my Teaching
it's about what we are displacing
from the structure of collective Consciousness
the concept of "death" as such

terrorist attack is one of the systems
which is simply completely unpredictable
and is distinguished by the fact that it is a system
which requires an immediate reaction from a person

in all other cases it is considered in principle
what is time
well, to the concept of some other superfast reaction systems
it refers to the fact that there is some kind of problem
emergency well this type is not necessarily a terrorist attack

i.e. we are talking about what we need to be able to do
at some point

consider specific future events
and be able to influence events
preserving , first of all, life and health, yes
to all participants
and the following persons
which generally speaking will interact
with the system of this event

then this is the next lecture
next information system
it's the whole world again
it's any person again

that's why I'm bringing out the system of Macrosalvation
the system of Eternal development

if for example we consider let's assume there
theological level of governance
where is god
and the Word
and the Action of the Word
this is the primary level of God

where we consider God's desire for that
that man lives forever in the Image and Likeness
and its implementation yes
aspiration and realization are one action

it turns out that in the control system
well, which a person does
the task is simply to understand and perceive in general
what is really happening in this world

how to turn the tide
from the point of view of the previous
namely the previous systems
without naming the system there in full

Again, pay attention
there is a mechanism for using abbreviations of the word

and revealing the structure of the number

initial level
primary action of the word
identification of the number
as a symbolic example of a control series

then it turns out that we can receive
universal control

if we have basically two rules

Element of Perception

first of all yourself and God
this is one parameter

and the second parameter is any action
but the primary action is the action of the word

and then we bring out the number control
already in the center of the number series
i.e. if we analyze in this way
we have the first ^{yes}
second number
then the central number of any row

then we can highlight
central management structure
in some one number
i.e. for example in one

if we act by analogy
after all, God created the world like this
that we can precisely create a level of analogy
in any type of management

it turns out that by highlighting such a control system
and ^{as if} entering into the number
we need to be independent of the number
we control the number

so we need it in one unit, for example
highlight the structure
the internal contents of this number

i.e. to control the system
do you even need to know?
what is the system as such
in this world at all

It is clear that the number there was assigned by people
there it was invented as a system of Perception

well okay then let's enter the Perception system
at least on this aspect of management

and then we will enter at that level
How did God accept what people came up with ? For example

here is a fine gradation

God gave people the opportunity to realize themselves
and what does it mean , generally speaking, that people reproduced themselves

and it turns out that from the point of view of logic
after all, God naturally participated
in the reproduction of any action emanating from people

then this is precisely the connection of these concepts
this is what happens in God's Soul

and that's when we start to consider
what is happening in God's Soul
so that a person can live forever

then it turns out we need a similar impulse
the one that exists at all with God
as a Soul Action
by the analytics of His actions His responsibility
transfer to the structure of your future events

i.e. the internal content of the number
where there is yes God
where there is Reality
this is what exists behind the number
in the form of for example there is physical Reality as well

by the way, it is a fairly powerful technology for treating people
consists in the fact that
well, even if we consider
structure of political governance
and the task of the party is DRUGG
This is also a task of improving the health of the population

it turns out that every person
which will be restored to health
it is also in the universal system
and a single action
should lead to his recovery

i.e. skill through a single impulse
receive general control

i.e. the next existing after the number
it is precisely the following that means
still a universal action

just like God
i.e. God sees the first impulse

how does the impulse turn out to be local , well, it's even logical
and the next impulse is already a universal action

i.e. we should be able to learn
every impulse
realize
as an impulse which then becomes universal

and now if we start analyzing from here
and come to the level of a kind of internal action

i.e. to consider
what do we have in our Soul then?
after all, this is a projection onto the Soul of a person

i.e. a person comes to his Soul
when he sees the path of the Soul of God in fact
Action of the Soul of God

as I explained we are considering
what does god do next
for the first impulse, for example, for the number

i.e. in fact, at the management level it looks like this
that we have a unit
we enter into the structure of this number
and we look
what's on the other hand
Consciousness

it's just a technological trick, generally speaking

and that's when I translate it into the structure of the explanation
what from the point of view of fundamental management
means for example entry through a number

then it turns out that the next event is controlled
because at the moment of passage
through the structure of some kind of barrier, yes

number for example
some signal about the presence of some information

we get controlled management

because at the moment of passage of some value
we are like well, maybe by a volitional level of Consciousness
we control
what's behind the number
what's behind it

then it turns out that the following exists
what is internal action
this looks like this
how exactly is your element of Consciousness
passes through the number structure
literally at the level of simply Perception of the number as such

Well for example, there is a unit written there
take the element of Consciousness and pass it through
and at the same time control what is behind it

and it turns out that when you pass through
you see what's happening
some kind of spontaneous measurement of the World
the structure of the World changes discretely and instantly

here is a system of instant change of the World
for the sake of achievement
For example there are elements of Eternal development
and truly Eternal development for all people

after all, in order to turn the situation around and prevent terrorist attacks
we need to be able to deduce the system
for the structures of some real actions
it is precisely the system of possible terrorist attacks

and at the same time be based
only on the action of the personal Soul

we can of course say yes
that due to our technologies
in fact, collective Consciousness
becomes more manageable
that there are fewer opportunities in general for carrying out terrorist attacks

but the personality, as it were, refracts the World
towards the favorable Eternal development
as a person one

and therefore just as God does

you need to be able to do it and learn to do it; generally speaking, many people can do it
they just often don't pay attention
such may be the properties of the Soul

the ability is precisely with your Soul personally
overcome a possible problem

and then the number
this is already the final number, this is the end of the series

i.e. in this way I come to the end of the numerical series
where there is a series of some numbers, so

and when we start working already at the end of the row
it turns out that we can clearly define
what is the position of this row in space
it's just a physical situation
determines the structure of the action then

because it depends on how we spend it
it is precisely the control impulse

and here you can see further that if, for example, a row is located
just horizontally

For example Well it's written there by hand or on a sticker

it turns out that we see a reflection of the signal
as at the same time to yourself
to its own kind of control system

and at the same time
behind the row comes the structure of universal recovery
in management
you can enter such a structure
Eternal development as the next structure
which contains an element of health

favorable events that are like a carrier
because events must be like this
that would not cause damage
there is human health

then it turns out that control is happening
from the impulse coming from the row
i.e. we do not allow the impulse to reach us
at the signal pass level

we fix the control and control

i.e. technologically the row is located horizontally
so we have control near the row
some dynamic quantity
an element of light that moves in your direction

we are fixing it
and if we fix it quickly and at the right point
control is carried out behind this row
in relation to the control object

and the object can be any house for example yes and so on.

a car is basically any object

in relation to a person the row is not written out
then comes the form management
i.e. external boundaries of the system

i.e. even if you write a series
on some paper at some level
just there on the house yes For example

then we are talking about that
what is connected to a row is control
in relation to a person

i.e. from the properties of universality
you can manage and give health
to any person
if you just have some kind of stability contour

as a point of stability you choose some row
and this is a fixed value located in some place

the signal that comes from here
gives control, for example, over human health

and by the way, then the entry point to management is this
that a person can perceive the signal completely naturally
as from any element of the World
there will just be a special signal

as for example God sends in all elements of the World
just for you

the control that, for example , can save a person there

you choose exactly the same way yourself
and accept this signal
or you can not accept it there

This is the personal will of each person

and that's why it turns out
that we practically have to here
consider management in this way
so that your management is similar

so the control is out of order
this is the formation of an external signal
as if even a random natural
which a person has the right to accept
has the right not to accept

and the only question is how we bring it to fruition
this signal
to this specific person that you need

and the signal's argument is that
that you just interact with information
actually on a physical level

i.e. there is your physical body
and there is the physical body of another person
even if it is located at any distance from you

then you get the Perception of your own body
and reflection of a signal about a person
i.e. as if the memory of your body of your physical body
about another person
this is a specific coordinate of another person

it's done very simply you pay attention
where does your body remember another person anyway

as a rule this is the level generally speaking
closer to the heart, so to speak, by the fabric
it is located not always on the physical body
sometimes near

therefore, concentration at this level
just by paying attention

you start to see the signal transmission

then you put a row
perform control
and you reach a person as if outside the row

therefore the transfer of information to a person
this is of course where the row does not exist

in the space near the row

for a sticker if it is a sticker
there is a specific outline there
then it's just for the whole
it turns out that the upper limit
and perpendicular and all

and concentration on two systems
i.e. a system that is Infinite is not closed
this is the transfer of information to a person
from the point of view of, for example, the system of collective Consciousness
where are the technologies of Eternal development
and that's all
bring this system out
just focusing on the form

and generally speaking there is a type of such stickers
where there is no number
there is just a form

form management is just that - management
which refers to a person
straight away

in case of a series
we work with some adjacent areas
and in the case of just a sticker without a shape
with the form itself

i.e. where the number form is not contained, so to speak Yes
well let's call it "a sticker that does not contain a number shape"

and then we can see
what if for example we place the number
here's an example there is an A4 sheet
or the same sticker turned this way
what is the number from the bottom left corner

the number series is spreading
exactly in the upper right corner

then we see that control is carried out
as follows
By the way, you can just see and study the movement
of this ^{well} row
and see where the impulse comes from

I just give some systems as an example
which are in principle visible

due to the system of simple control even actions
it is possible to correlate the action by the movement of this series
or even mental movement not necessarily physical

here is the first control with such a number arrangement
this is control coming from the Infinite magnitude
i.e. as if from the Infinite future actually
and in many ways of the past at the same time

^{well}, some kind of total infinite mass
walking towards you
and control over which you exercise
simply by the essence of its creation

i.e. actually at the level
which existed
to the level of creation of your Soul

because there is a change in form associated with that
that you, ^{for example}, considered the first option
horizontally
just shifted the system
you have moved to some other system

just imagine the connection
First there is the Soul
if you do some action
then we can come to action
which existed before the creation of the Soul

just by analogy
as God does
He always goes into the structure
precisely ^{as if} external and internal Reality ^{yes}
in management

it turns out
what if some random events happen
then naturally they happen there for a reason
and there is a level of external control
which someone needs ^{yes}
we need a realization that is, ^{for example,} super valuable
for a specific person

at this moment
implementation for another
maybe she is absolutely indifferent
he either already has it or he works
^{for example,} just in a different spectrum of control

he already knew it, he doesn't need it

if a person does not receive knowledge
this means that it works in some other spectrum
but still in the structure of Eternal development

and the ability to convey this knowledge
This is one of the control systems

that's why the signal that goes after such a row
i.e. the row is arranged in this way
^{for example} in front of me
any
then I have to correlate that the series does not correlate

well, actually, like an address system
with a person

then I consider
that any impulse coming from this series
just beyond the line
i.e. a row is like a certain line ^{yes}
We need to smooth out this line so that there is no gap
in fact, the task of management
make it so there is no gap

although we see the number
but we see only the realization of Eternal life here

i.e. it turns out that we need to be able to get that impulse
to receive here as a ^{kind of} phase of absence of number actually

after all, man perceives the World
writing out some numbers for himself .

and it turns out that we need to see this system
or there might even be some kind of terrorist attack
then this absence of a terrorist attack is not a number
this is generally speaking a person's life for example

this means and therefore in principle it is possible to defend
and from some terrorist attacks
buildings
but in general, what we get here is protection of the building
this is the third level there or even the millionth level there

if there is a building something happens to it
but the person does not suffer
Well, what are the problems anyway ?

We don't really need a building in principle

the main thing is that the person does not suffer

and it turns out that here is the selection in the information system
control objects
where are we well as if we were protecting the object, of course, some stickers
We guarantee it, and at the digital level
at the level of Spiritual systems
that nothing happens to him

the stickers themselves allow for a forecast for one month
control the situation
however, we are naturally not interested in the building, yes
we are interested in people's lives

so it turns out that we highlight in the control system
what concerns human life in general

and here is this element
where it concerns with the purpose of Eternal development

this is the unification of momentum
which is behind the row and in front of the row

i.e. the series is forced out of control
what arises here
Eternal life of man and nothing more

element of Eternal life everything
and all people

then it turns out that here well there is no row , yes
here is Eternal Life
i.e. we derive the control system
to the point where we want

I just showed one of the elements
which is related precisely to the series

and generally speaking, you can do the same for management
in relation to any other system, generally speaking

well if we see
any element of information is simply perceived
we can introduce the element of Eternal life at this point
well, for example, by a similar principle

because I'm saying that we are introducing

element of Eternal development
by means of his own volitional control

here God, the Eternal, initially introduces a system of governance
He still self-organizes anyway

and it turns out that He has Self-Organization
in any case Eternal
i.e. God is not in any danger
He is Eternal in any case
It seems like He doesn't have any problems there at all

then a person should have the same thing
and similarly

so it turns out that a person must exist

some action
which is similar to the human cognitive system

and this is analytics, this is action for Rescue
the actions are generally quite elementary
on Eternal development including
as systems of elementary actions in principle

but at a more primary elemental level

is precisely the element of Eternal development
for God is Eternal

everything that follows is already a more complex system
it turns out that way, even logically

and if we now consider
management for example going in this way
what I take is the same sheet of paper for example
any system at all
and I make a row like this
that we are in the upper left corner
we arrange the first digits of the series
and in the lower right is the end of the row

then from the point of view of logic we get something like
not quite the opposite but something close
it may even lead to the opposite effect
system yes

i.e. in one case the vector goes in one direction
in other cases, generally speaking, in the other direction
i.e. up or down

and we begin to use that concept
what can we enter
the system of counter- as if control consciously

then we can calculate
psychology of a possible terrorist
or any event in general that is possibly negative

and take control
at the level of reducing this negativity

for example, in the treatment of a disease it is easier to put rows
even those that are published for example
as a structure for the restoration of the body
by numbers according to my control system

then if you put them in different ways
then the interaction of the series
produces more as if Well, global action

it turns out that we are constantly cutting off the opportunity
the onset of the disease itself
the fact that we are in any area

we enter well like counter control yes
the possibility of some disease being realized

it turns out that well if you do it for a long time there
For example there for several days
then formally, with the correct action
or there instantly a few seconds
not necessarily several days

then it turns out that we can
at the level of instant action
i.e. they did it and then transferred it during the time
get something that ceases to exist
in the system of collective Consciousness
specific disease
in relation to a specific person

then you can naturally push out this element
from the collective Consciousness in general
so that such a disease does not exist

view principle
it operates at the level of geometry
very simple
extend to all diseases
so that such diseases do not exist at all

if there are no diseases
introduce an event control structure
eliminate the randomness vector in events

and the exclusion of the random vector
just like I said
orientation of the system simply on everything in space
i.e. due to the fact that we can orient the system
we can exclude the vector of random events

and then it turns out that
well just like God did
why did he create for example there is some kind of multidimensional world there,
yes
well at least three-dimensional or four-dimensional
if we consider that time
how some dimension is considered
then it turns out that the World as a whole was created like this
what if even we are in a two-dimensional level
there we can exclude the random element

then into three dimensions
he is in the system
where the element of chance is deliberately excluded

and this is our task
or we perceive it
or well, a person is free and can not perceive then

but then the problem turns out to be a set of knowledge
this is actually a management of this type
what is the value of this series which is located
where is the beginning in the upper left corner of the sheet

we see that the vector exclusion
occurs in the system of intersection of these two rows

two rows crossed
randomness vector is excluded
although they may be on different sheets, but nevertheless

why is he excluded
because we took a specific action

we come to ourselves
so we can do it
controlled action is basically any
you can do it at this level
at the level of a kind of information cognition system

not even myself in this case

you can take control of this yourself
I practically don't pay attention
and control your actions

here's how to understand
how does god work for example Yes

It is enough to look at His Actions
then you accept Him

if you look at your actions
you can understand yourself

and here is the level of understanding
as such a quintessence of action
that you are inside the event

and here the universality begins
your actions are universal

as soon as you received
the first element of Reality control
then your actions are universal

means controllability of the system
this is the universality of actions

Well, logically it is
the more we humans control the system
the more universal actions he performs

and it turns out that we need it
for example, to prevent a terrorist attack
or exclude some negative event
basically any by the way

here we can already go into detail
here we can control events like this
so that a negative event is excluded
well, even some kind of rarefied sense , so to speak
in management
i.e. completely background , literally random

and you can practice a lot
looking at management in this way
that you are first of all solving some problem there
at the level of the Macrosystem

for example , in the program of the DRUGG party

there is the launch of all weapons of mass destruction into orbit
in case of orientation this is a restructuring of this weapon
in case of orientation to the Earth

and here, by the way, in regional branches
Signature collection is already underway in the federal subjects
I also suggest taking part in this
in any region

and here it turns out that in the system of collective Consciousness
when a control system of this type is introduced
People took and signed that they don't need weapons
then what are we even talking about

who can even go against this ?
there are already signatures, everything is done

i.e. nothing more can be done

all that remains is to withdraw the weapon
it's outside of politics, outside of everything
i.e. the person makes the decision himself and implements it

and it turns out that in this control system
we can see
that as soon as we enter the system of collective action
For example there a person does not need a weapon
in the future, none at all

then we introduce such control
well, for the purpose of protection there from some probabilistic values
there is outer space

we develop Consciousness to the level of control
due to example there are optical systems
or we prove that there is nothing from space there
nothing negative will come

although in reality we are still talking about
about managing any system through Consciousness
or due to systems there that are not harmful to humans
at the level of optical systems
which can move even massive bodies
but not harmful to humans

and it turns out if we start
get technology from here
then the main aspect
technological knowledge of this World
is an accurate vision of the systems of the future

so , you can and should consider it here
control in this way
what exactly to see future events
you can when you see what's really going on there

i.e. what technological systems
what information systems
will be implemented in the future

and thus the interaction of these two series

this is a kind of selection of information
it means where the information contains precise knowledge about that
what will happen in the future
at the level of specific quantities

i.e. at the level that we will have to allocate
in these control systems

vision of future events

and then yes then it can be guaranteed
that a person who has such technology
he definitely doesn't fit into the problematic system

if they listen to him in some way or react to his words
This means he can convey it to others in words, for example Yes

for this you need personal experience and testing as a rule
well, some kind of several actions confirming
that you see and manage correctly

and you can of course also directly influence events
then it turns out that there is a complex
which allows a person to work calmly

so behind all these rows
there is a level that is expressed precisely in calm action

i.e. you are at the point of control of future events
who are calm
because you see the following events
you see exactly

and here is the situation
to develop management
For example there through Spiritual vision
or which relates to the concept of "clairvoyance"
so that you
completely healthy

and the sublevel of such action
that you are in control of the situation
you are in the system of future events

then here you can consider the management
as follows
that you perceive any signal

which is behind the numbers
in general, behind all the phenomena of the World
perceive accurately
as you perceive in a normal state
Well For example there with physical sight
or Thinking even Perception of Thinking

and now make such control
go to the point of future events
so that there are no possible terrorist attacks

look at what's going on
go out into some elements of your personal events
if they are very complicated there
first by its events
and then be sure to go to the office ^{there}
where you need to stand and watch so that there is no terrorist attack

and a simple principle if someone is watching
Well, imagine a man standing on the street and looking
on some object ^{yes}
then as a rule if someone sees that the object is being watched
in relation to the object
try not to produce negative actions

when a lot of people are watching
actions are disbanded negative

and now go out to this office and look at the events
so that they are reliable and accurate

I will work with you
and try to solve all your problems
before reaching this control point

i.e. super-fast solution of all problems
and then control by concentration
this is exactly the plan so that there is no terrorist attack
I will work with you

in management according to my technologies
we need to consider another aspect

purely practical applied existing in Reality

the thing is that a lot of experience has been gained in management, for example
Well like comparatively or something so let's say a lot

but at least it's enough
so that there would be something to rely on
what is a direct control element

you can often rely on three cases there
and when there are thousands of them including thousands of students
then the system level arises
when a person reacts to Reality
and controls Reality

in this regard it is necessary
so that the refraction of terrorist attacks yes For example
towards their non-implementation
that's what I'll call this control system

for it to be a valid action
not only in a specific control system
not only in relation to any one level

because there is a possibility of a terrorist attack
this is also an opportunity to start there
some kind of nuclear global war, etc.

and at the same time reduce it to management
that for example in the Infinite Development of Political Systems
are societies there
so that this doesn't happen either
that some kind of mass destruction might begin there
because there is some kind of conflict yes
or because the equipment there didn't work or
or something else

i.e. it is still a vector of universality
you need to be able to position it correctly
in this control system

and here is the next level of control nearby
this skill is due to simply Thinking
how to bend a row into a spheroidal shape
which is located horizontally

and here the element of "bending a row" consists of the fact
that one row is vertical
and the other one instantly positions itself horizontally

at the same time, at the level of Thinking, you can do the opposite

the main thing is to observe the principle of instantaneity

and where the rows were ^{located}

for example from the point of view of left to right

or there For example there from right to left it doesn't matter anymore

then here is vertical and horizontal action

shows that you are already there

in the instant control center

i.e. this kind of sticking together of rows occurs

where instantaneity is expressed

in the system of universal action

i.e. we are moving to ^{a kind of} vector

vector control type

and not again not on the rows themselves

why do i keep talking

that management through the ranks is an achievement after all

here we need to be able to tear off the control impulse

^{as if} it looks like some kind of breakaway

from the number itself

because the number itself is just a number

it's ^{basically} nothing

in the grand scheme of things, ^{yes} management

and the ability ^{means} somehow bringing these systems together

to get exactly the control impulse

and in this action

achievement must be based on that

what is ^{yes} control system

in the history of civilization is laid down

there are many cases of control due to human Consciousness

if you think about the system of development of civilization

then generally speaking, human consciousness is that aspect

which allows us to develop the system of the future

Well, in the future, ^{well let's say} such an element is embedded

which we will call what it is

development of the future at the expense of human Consciousness

it's elementary, of course, it's obvious

that civilization is developing

depending on the development of some technologies

in this case the element of Consciousness always remains constant

after all, God originally created Reality
and I haven't improved anything for myself yet
God
He did it and that's it

so there is a control somewhere
which means that to a person
that he always well there For example he knows everything there
he always knows how to do everything
he has some element
which corresponds to what God has

and this element is located there if by analogy
let's say some analysis of the situation
maybe sometimes people there think
that somewhere deep in the Soul of man yes For example

but if very deep in the Soul
then the element of Consciousness is just beginning to appear
The soul is direct action
The soul is also actually a form of Consciousness.
this is, moreover, an absolute form of Consciousness

and it turns out that if we start looking
where is the universal one anyway?
some kind of human module
which generally exists and nothing needs to be added

then it turns out that this is exactly the level
where is the soul of man
and God
intersect
again in action, precisely after all, of Eternal Life

because what does it have to do with the physical body
because it affects
and the physical body of a person

intersection in action
and why is it in action there in the first level

because the action is very fast
what else can you add there ? Yes

logical principle of control

and it turns out
and the fast action contains all the accumulation

as if preparatory systems and backup systems, etc.

and now enter the management structure
if there is a possible terrorist there who is going to do something

then you just need to define the action yes
create a system of dynamic quantities
that allow you to take action
where you are specifically there is some level of Reality
take and translate
into the system of actual actions

i.e. you take and anticipate the action

and it turns out that you start
transfer control in this way
that this is like a piece of Reality
This looks like what you're taking by the way
and some actually as a piece of Reality

cut it out so that there is no terrorist attack in this piece

By the way, it doesn't look like some movie
or a video film
namely the mass of real Reality

here we need to identify
what is real
for example, I diagnose airplanes.
or I do it so that there is no terrorist attack
in control systems yes

it turns out that if the remote system
where the collective Consciousness inclines towards the control system
then it turns out that this is what is happening here
well, some kind of procedure of action
when the collective Consciousness has common rights, as it were Yes

if he allows any thought
then it turns out that this idea is being realized, perhaps somewhere

for example, I literally had it on Monday this week

there were representatives from the Committee of Mothers of Victims of Beslan
and when analyzing this process of the terrorist attack
there is precisely the permissibility of the action, it is like that
that as a form of management some
after all, the system here is greater than the sacrifice of these people
who took control
show how terrible terrorism is

because they gave an example
that there was one participant in the Battle of Stalingrad
he said that there was nothing like that
in terms of cruelty and the overall level of tragedy there
he didn't even see
although he won that battle of Stalingrad there
Well, because after all, there really are just defenseless children there

and by the way, by the way
they were also quite indignant
and they are ready, as they told me, to file a lawsuit
that this information is used
so that it is precisely against the Teaching
although it has been proven by everyone
moreover, no one there, naturally, has no money there
never asked for resurrection

I have several thousand contracts there
gratuitous management

and it's all so clear, like witness testimony
naturally no one could even hint at such a thing

however, the press uses this system for that
to sort of disavow technologies
which really save
By the way, they noted that it was with these very same stickers
the following schools can be saved

and this level of management is developing
from the counter-managers from the press
what about these Beslan options
that supposedly someone there is not clear who by name
came there and negotiated some money

and so we asked everyone including
They questioned everyone there in Beslan
after all, we are not on the moon

and still representatives of the press
if they did some kind of incriminating evidence
they should have at least thought it through or staged something
for starters

but there was no talk about it there

and it turns out that tragedy is used
quite a deep tragedy of people
so that the following schools are not protected

which by the way they are against now
begin to express collective protest
namely mothers Committee of mothers of victims in Beslan

and from the point of view of this management
if we consider , for example,
why is this what should break
because now September 1st is approaching again
i.e. what is here

and one of the mothers told this story
just practical
what when her daughter who died
she asked her
so , well , what would she do, for example?
if there was such a choice
either she dies or her mother dies, for example

then she said of course she would choose herself
left mother alive

so it turns out that this is the sacrifice of this child
Well, this girl, she died.
it turns out that here the choice is precisely the sacrificial plan

well in Christianity and in the world system in general
system of action for the sake of Salvation
implies that a person puts the interests of society above yes
in front of their own for example

but in this case, so that society is not destroyed
the next element of control in Christianity
I think it is
not only in Christianity in society
the ability to keep society real

now for the sake of the interests of society
a person must live, it turns out

and because of this I am spreading this management system
where I show what we need to show
what exactly life in the physical body should be

and so the choice showed that the thought was admitted here yes For example
a man made a sacrifice to save civilization there
show how dangerous this phenomenon is there
terrorist attack

and in order to break the system we need to introduce

I immediately said by the way that my point of view
under no circumstances should a person die
first
I am always against it

and all my followers are also against it
we will not let people die
we will simply ban death

and it turns out that based on this
control systems
including, for example, the same resurrection systems
for example, a full recovery system
any creative level of management
this is a return to the system of life

i.e. no matter how events unfold
this is a return to the system of life

and therefore the control system that goes further is like
for well level there is following

that's what's in the way there, right?
some there let's assume Well, let's assume that this is my Teaching
then some actions in the media

although for example there already is well like a lawsuit to the prosecutor's office
that they are canceling the decision

i.e., after all, this is also useful for the Teaching
property
there was some decision by the Basmanny prosecutor's office

The Central Office cancelled it, etc.

i.e. it turns out that there really is a system for saving people
i.e. Basmannoye was like near some negative meaning
some warning
and the central one cancelled it

it turns out that there is a control system here
which speaks about that
that we are simply regaining control

i.e. I take some real things too
which are connected with the Teaching
I show yes

i.e. we must in any case
prove and give an example

that the technologies of Eternal development are as if often by themselves
as if they win by themselves
and therefore increase in pace
well, there is even growth in management
from the point of view of creative Eternal development

and here is where we need to overcome the systems
I specifically brought up some things related to the action
who were there, for example, in terrorist attacks

what must not be allowed must not be allowed under any circumstances
so that someone would be destroyed

if a person doesn't know this yes
then he can of course go for it there
doesn't know such information for example
Well, few people think about it often
and thoughts happen
Well as if in accordance with the Soul of a simple person

and when we talk about what we know
that man should not perish

shouldn't die there, etc.
he must live forever

then we must not allow such a system of Thinking
i.e. to prevent the system from thinking that a terrorist attack is possible at all
this is a fairly serious management context

often it is the main one

It's just that in my practice I have never met a person
who, for example, would not agree to die
and that something similar would happen to him

there are still a lot of systems
I also work in the Ministry of Emergency Situations in aviation
when he holds a person in his head
what well what do I call thoughts in my head
that he will not die under any circumstances
he is not dying

and at the viewing level in management
I found it too
just look at the information
that generally speaking there is not a single such case
if he does not allow agreement on something
Human

and is obtained as the main control context
in this system as I said
We are still engaged in both science and political science, yes
in fact, everything in the compartment is in one place
and religion
we integrate management like this
so that people can just live forever

in the end it doesn't matter
what is the name of some discipline or management

we need to prove
that Eternal life is already realized
many who follow technological management

maybe it's already time
this information is being disseminated quite widely
and I see that quite a lot of people already have this
the system is implemented

the only question is to prove it
it can only be proven by this
what to spread and teach others

because the system of Eternal development
implies

that well , it goes on there for, for example, some billion years
and what next yes

further confidence can only be
again technology
and controllability of the entire system

and it turns out that based on this
we must see clearly here
so that the terrorist attack does not take place

we need to go in
and this is the main task of the political party DRUGG
Generally speaking, I consider any person on the planet

so that death does not happen
Login to the control system
eliminate the concept of "death" altogether
that this does not happen there
at this control point

i.e. selection of the control point
consider as examples in general

what well how can analytics lead to a certain process
and control of specific coordinates
specific coordinates

and in this regard, when we consider
management is related to that
well, there are some obstacles going on
or they are going there again
me for example I can give you an example there
technologies for disseminating my Teachings

you can't just stop some devices there, for example
there by mechanical destruction yes or there technology

the easiest option is to use it again
system of collective Consciousness
The media is here

and basically just when we were talking
precisely with the mothers who suffered in Beslan
They also had one of the versions
which may simply be financed by terrorists

and then it turns out that it is the simplest option

means to take and introduce into the system of collective management
as if counter control

and it turns out that then there are no questions

that the collective Consciousness is beginning to be realized
as an independent variable

and so in the control system, well there

Well let's assume there are these versions of Kruglyakov
that Kruglyakov is sitting, calling somewhere and asking
Is there a doctorate there?

Well, and generally speaking there is VMAK
which has the same registration with the Ministry of Justice

Yes, there is a doctorate, but you need to call the VMAK
or should I call the European University then?
where is my doctoral dissertation too
why does he only call one place

and it turns out that based on this
he presents the fact as if it were an absolute fact yes
the ability to somehow use information
as if variation of collective management there by Thinking

I think we need to do counter-control.
must show
that none of my students
is no wrong doing there

we win either way
we will save everyone anyway
we will teach everyone
i.e. we can't afford it there
so that someone there who does not agree with this point of view
so that he wins

i.e. I don't agree, this means it's death, actually, yes
i.e. we can't allow this to happen
that's why we practically introduce
control system
where we will naturally defeat death

so it turns out that based on this
i.e. a sufficiently criterial system yes

in our society

Our task is simple
we do not allow

and on a general scale we must prevent death
i.e. nowhere at all in the ideal perspective
and by the way, there is not much time left until then

what happens next
that when we system of collective Consciousness
we enter
into this control system
Reality is translated into a system of concrete actions

i.e. well for example, there is a unification of church and state
through the principle "Thou shalt not kill"
Divine Law "Thou shalt not kill"

withdrawal of weapons there

for example, in the dissemination of my Teachings
there is such a point in the party program voluntary
where it is necessary to explain clearly
that everything the students do is right
because they do it for a person's life
i.e. they do it for living
and there are no other criteria at all

and it turns out that when we start to analyze in general
can we even have any opponents?

well, they are real , I guess

in the social system it turns out that they can't at all
Well, this was confirmed by long-term checks there.
First the Prosecutor General's Office
about all sorts of regional and local prosecutor's offices

Naturally they didn't find anything
which, for example, does not comply with the Law

i.e. the conclusion is simple
Grigori Grabovoi's disciples do not violate the Law

a good position of the Teaching itself is obtained
by the way, a good starting level

because I am the President of Russia in any case
in 2008

since I am not breaking the Law
This is still a positive characteristic

then it turns out we start
build management next

and by the way, a positive characteristic
developed by the media themselves

if someone from some followers would publish
that wouldn't be very well It's not very clear
and it was the counter-managers who actually published this

and it turns out that if we start
do management this way
that we are from the whole management
we're taking it out as if the next status

what is the next status again
the next element of Eternal life
this is again a victory for life

then it turns out that we have
in fact, there are no minor details at all
i.e. we are forced to move to the level
when any particular task
This is our global task, among other things

and that's why I'm showing it here

that based on the level of management that exists now
we need our own private tasks
to solve systemically ideologically even

It's one thing for a person to just live there for a long time, yes For example
if any
and another thing is that he really is there, living forever

then it turns out
that he must raise the question of Eternal development
as a task of system management
he should at least do it logically sometimes

and when he does some actions

from the point of view of logical solution
it turns out that he is the one who decides
precisely on a global scale
some level of management yes For example

and that's when he decides
the task of Eternal development for oneself
and he spreads information everywhere

i.e. any elementary action
he thinks it through first
because he is the Eternal Living

what should he do then towards himself

i.e. what
often it comes down to
to some two or three additional actions
that simply increases the resource in management

i.e. you are not like on the edge all the time, yes
and just enter the resource
these are two or three extra control actions
elementary nothing more

and then when you start to see
this is the management resource
what starts to work

on a global scale
your information is being distributed
it turns out that a person who lives forever
he does not allow a terrorist attack
this level of management is a kind of light, so to speak

he gets to this point
and allows you to see what is not happening there
because his information element is there

and this person cannot be destroyed in any way

and it turns out that the information is not destroyed
it starts to increase yes
the more such people there are
the less chance of occurrence
in general this situation is really negative

because there are no roots
there are no social roots later on

propaganda just ^{yes}
Well for example political propaganda
political seminar, ^{yes}, today, etc. and

and here, based on this type of management
we can see very clearly
that the more people develop
by technologies of Eternal development

and we need to get it done before September
the number of such people there should be sharply increased

then naturally ^{we will say it more precisely}

and we cannot, generally speaking, allow ourselves to do so there
there is a phrase ^{like} "even more precisely"
we must act absolutely precisely

and then we can definitely do it this way
that after all the terrorist attacks did not take place

we must be able to shift events
and we naturally have to do this ^{yes}
Not only do we have to be able to do it, we have to do it
even if we are just starting to study there, etc.

here is the simplest element
own Eternal life
development of technologies of one's own Eternal life

by the way, it doesn't always come down to that
that a person there is sure to be rejuvenated
I saw academics
who were nearly eighty years old, they say
Then another ten will start to rejuvenate

They like this sedate look better

but this is a personal matter
the only question is that they should live forever

and these are, by the way, orthodox academicians
there are RAS levels Russian Academy of Sciences

and I saw someone growing it at home
there are organs there, some bone tissue literally

and at the same time, for example, the task of Eternal development
They had this as a goal, just a target
not even age related
target

and if they are almost ninety or almost a hundred there
please they will take it and start rejuvenating

here it is still a question of ideology, yes
although I recommend
precisely often according to clinical indications
there is still time for a person to rejuvenate

and it turns out that if we start doing management
from the point of view of solving systemic problems

here is the identification of systemic development

everywhere at the entry level where
well there is a level of recognition of people

and the conclusion of this control on a general scale
i.e. transfer of experience

for example, there in the program of the party DRUGG
here is a transmission on a global scale
knowledge about the Salvation of Eternal Life

here I think every person
living a generally normal life
the only difference is that he lives there forever
then he actually helps others more
and somehow more likely more naturally more optimally or something controls
apparently its events

here the situation is such that he is more free
then this person
or there is often absolutely free

he does creative things
he has nothing to fear there
he lives happily it turns out

i.e. the happiness system

this is a target system again in management

and if we have already united in this
let's unite more
and we start making the next fragment
for Infinite Future Development
where the terrorist attack has already been excluded from control

then the realization of real Eternal life
this is the collective action of people
where are the Eternal Living already
they just transmit information very quickly
and do not give others the opportunity to leave there and die, etc.

i.e. they just give information
so prompt and fast
that it is being brought to people at the right speed

and here in the regional offices
parties DRUGG by the way
how are there emergency response phones
to questions from the population
so that technologies are transferred urgently
which are quite simple, universal , etc.

That's it for today's seminar
political seminar by the way
I'm finishing

Thank you very much for your attention
