

GRIGORY GRABOVOY
The Teaching about God
Realization of human action
17.12.2003

Hello
the topic of today's seminar
is my Teaching about God
Realization of human action

In this topic, first of all, it is necessary to consider that
what is God's action towards man
it is always creative

so when we talk
about movement for example Actions of God
in relation to a person
we must consider first of all
The True Creative Status of God
manifested in relation to a person

so when we look at it from this point of view
as a human action
so is the Action of God
then first of all we consider the natural
i.e. that action of a person
which follows from the freedom of the individual himself

so in this case in this context
the process of action itself is quite a multifaceted level
where there is the presence of both God and man

and from God's point of view
Its creation i.e. man
acts of his own free will

that is why it is expressed first of all here
human soul factor
in which his Soul is free
selects some mechanism of action, for example
containing
as your own free level
and the level of freedom of God's manifestation

i.e. what actually happens here is
that two systems are absolutely free
implement a certain range of events

and in this connection in this control structure
should first of all be considered
period of Action of God for example
and the period of human action

let's assume if we start to consider
time period of validity
associated with human life, for example
then it's clear here
for example, what about the human regeneration system?
the system of his Eternal development
this is primarily a human level
but at the same time there is a period of God's Action

for God
a period is a one-time action
where the concept of "time" is already excluded
from the level of God's reaction
and at the same time God perceives time in that context
what is he
He also creates the Reality of management.

i.e. He creates time
He creates all Reality.
then for Him the action in the period
this is an event-driven action after all

and therefore in this case
man is manifested in this action
as a man revealed by God

so it is clear that the person
valid at any time
he acts from constructive motives
as a man acting from God

and from here, for example, if we consider
let's assume the period of human action
in relation to, for example, one's own event
but outside the period of validity
it turns out that we come to the concept
prognostic function in the Soul of man

a person perceives the future in this way
what can you get
context of managed future
all it means is doing the following action

i.e. having singled out a certain period
which is outside of the management structure for example
and having received an action similar to that
how does god work
It operates outside of time.

so when we
for example, we want to make predictive management
related, for example, to upcoming events
we can in principle choose any time interval
and perform the action after that interval
which, for example, let's assume, is closest to the period
but you can also take a time interval
which, for example, is very far away

then it turns out that we can do it
create an action that is aimed at that
to implement the action
was as if controlled in two aspects

Well, let's assume we've allocated two time intervals
the task is to allocate so many time intervals
so that the context of time would basically disappear

let's assume we are considering
some very ancient structure
and in this case we are considering
points of view of all people
in relation to this structure

when we start collecting points of view
for example in your memory
or perceive them through guided clairvoyance
then the context of time is gradually, as it were, derived
in general, into one minimal structure of this building
and we see the structure itself as such in its entirety
i.e. a structure located as if
in absolute connection with God
realizing, for example, a person's action

this management context is quite complex
because the structure itself is ancient

it's already becoming practically moving
as if dynamic in human perception

and when you start to analyze
why is this happening
then it is clear that the Soul of a person at the moment
at the moment of Perception
at the moment of action
also perceives and organizes
this building

i.e. the process of Perception
this is the process of organization

if for example we want to restore
there is the function of your body
Well, for a number of reasons
we need to make management
in relation to one's own body
then we can fully consider
next process

imparting dynamic properties
any external design
best of all designs
or ancient or distant
let's assume a remote design
this is outer space
ancient construction is any ancient building

and received a return but very fast signal
we will get the recovery function
in relation to the organism
because your actions coincide
with the Action of God
in relation to
to your event in this place

here you need to be especially careful in that regard
that this management structure
it is still complex
as if to the level of verbal perception
but it is quite easy to perceive
The spiritual aspect of management

if we consider Spiritual action
in relation to, for example, a physical event

it is clear that it is a spiritual action
has the potential for a longer level of development

and therefore the action
in relation to, for example, an event
i.e. the implementation of human action
in relation to
for example to some of your events
if we consider precisely the Spiritual aspect of realization
then the implementation can be
or very, for example, some kind of extended
the implementation of this action may be long-term

and when we look at it in general
the process of precisely implementing an action
then you can have an impulse of action
bring
at the right time of action, for example

let's assume we are considering
how to create predictive management
in relation to a person, for example

and if we consider
How God Creates a Predictive Control System
in relation to a person
then we can consider it again
principle of freedom of will
in general, any object of information in the future

for example, let's look at it by month
next year 2004
from the point of view of human control
in the implementation of human actions
and at the same time we consider this period
as a directed action
to man from God

then you can consider it here
in general, the fundamental Law of Human Perception
in relation to its future events

when a person perceives
for example the following event structure
then first of all he perceives it as a whole
period of events
aimed at implementing its action

even if it's local

for example, a specific action next year
and generally speaking in this case
we may not necessarily consider next year
and in general, as if working with future events

but in this case
I am specifically looking at the next year 2004

and for example we are considering
January 2004
then, for example, considering the position of France, Spain, Italy
in relation to, for example, environmental safety issues
we can see
that a person in this structure is manifested
as a structure, well, in general, it's completely standardized or something
this can be said based on the level of future events

i.e. a person sees himself as completely healthy
for example, throughout 2004
if he works on management in these countries

those. creates a creative structure for the development of countries
in the field of environmental safety
and it would seem through a one-time action
in relation to these countries
creates the level of his health for January 2004

in local events this results in that
that in general prevention is happening
some environmental problems in these countries
but we can see it right away here
that the Action of God
in relation to a person, for example
located outside this country
this action is already non-event

essentially the Action of God
in relation to a person
in relation to what is being implemented
some human events
at the same time positive events
from the point of view of God and man himself
these are actions directed generally towards a person
as to the structure means relating to God
in general, at the level of one's own realization

i.e. when it comes to the Action of God and man
then God gives man His Own Action
however, outside of these levels of implementation
no other events occur

i.e. God acts through the Soul
in relation to a person

i.e. when a person perceives
for example the Soul of God
then he does not consider any other events
except for the events of the Action of the Soul of God

By the way, this is a powerful recovery mechanism
in conditions when a person acts, i.e. works
if you, for example, are in exactly this state
then you are in Norm

and having considered this level, let's assume
Well, let's assume outside the state
and for example in the level of human realization
then we can fully influence
in any implementation system
for example in January 2004

to your own events
through seemingly distant actions
directed
to normalize the environmental situation
in these countries

having reviewed February 2004
you can see that if we look at
the structure of a country like Israel, *for example*
in terms of implementing their own political events there

it is clear that with the normalization of political events
in relation to Muslim countries, *for example*
in this country
we can already observe more generalized actions
in relation to a specific person
let it be a Muslim *yes*
or it doesn't matter who by faith - in general confession

we can quite see
the next control option is aimed at that

that when we do management
in relation to the political system of governance
then the action of man is all-manifested
as a directed action
through the system, after all, above the political

in this regard, one can see first of all that
that when you see control coming from you
in relation to what you do, *for example*
then the control can be located
out of the zone of action, so to speak
beyond the level of applied meaning of the action

and here first of all it is necessary to consider
the aspect is the same as that of the Action of God
God acting on some object of information
simultaneously creates the given information object

and that's why it turns out
that when you do management *for example* creation
i.e. a person creates this information object
acting *for example* in relation to another object
then the intermediate system
this is also a level of creation

and when you do the management
let's say you choose a specific action
directed
for the implementation of the control object

then it turns out that the path *means* actions
what did you do
this is also a certain path of development of your management

and in this case we can quite well consider
level of Spiritual action
when a person is on the Spiritual level
creates its own management structure

and at the same time when you are on the Spiritual level
you create a kind of platform for your action
then the Spirit is ahead

in this case, the Action of God, *for example*
towards you
this is your Spiritual development
but from God's point of view

In this context, considering March 2004
we can see what is on the territory of Russia
to prevent environmental disasters from occurring
it is necessary to establish the Spiritual Administration
in relation to the center of Russia

for this we can say
what is your Spirit for example
which you see in general from this time
but as of March 2004
your Spirit is manifested in the form of a certain
special optical system
where the first level is
for example, the fact that the plane does not crash

and at the same time we can say
that this plane will definitely not crash
if we illuminate the structure of our Spirit
exactly in the center, i.e. in the geometric location

for example, we consider the territory of Russia
as a certain area
and approximately in the center we place a vertical optical column
of his own Spiritual Administration

and at the same time we do this
so that the plane doesn't crash during this period
then we can see
that all the people around are rationed
does not happen
for example, there is a global ecological catastrophe

i.e. if we consider
level of control thus
what we want to see
how does God act in this case
then we can see
that the Action of God is manifested
in the Physical Body of the One God

i.e. the Physical Body of the One God
creates the structure of the Own Soul for that
so that this Action would be the same
as coming from a person

further considering the management process

from for example Actions of God already in April 2004

Be careful here though
because I give specific characteristics of events
often simply generalizing the management structure

but at the same time we are talking about specific events
which need to be standardized next year
and get from this
The norm of one's own health, for example
The norm of own events

and therefore the work must be carried out now, among other things
in the context of both these specific actions
and in that context
what do you get anyway
universal control system

i.e. you get a system
which, in general, in essence, often does not depend
from the temporary management there

what you are learning to do now
and learn how to do it
for example in relation to next year
in relation to any event
this is basically it
your universal control system

so from this point of view
Consider the Action of God
where is your action
this is the realization of God's Action

i.e. after all, thanks to you, for example
God is realizing specific events of 2004

in this case it is necessary
consider the political climate of Russia
in the context of other countries

where Russia prevails
in terms of developing environmentally friendly technologies
for the whole world

then we can fully count on that
so that certain technological systems

including Spiritual control systems
from a person
were sent to various countries of the world

and at the same time the easiest way
here in this structure of my Teaching
show that the implementation of human action
from God's point of view
this is first of all
the implementation of the action of the person himself, generally speaking

and when you see it
then the status of creativity of human actions
it's primarily that status
which a person showed towards himself

i.e. for example, now I can make control
let's say for the health of those in the hall
due to the fact that the glow of God from April to 2004
show here
and man is standardized

a person can also consider
this glow coming from God
generally speaking, at any point of God's manifestation
and in general it can be seen
just by asking the question
see this

and immediately you see the glow of your Soul
where the Soul and Spirit meet
in terms of action
then you get
spectrum of health restoration

and it turns out to be logical to direct
technology of this type
to any structure
to any control point
in fact, in essence, it does not present any special problems
if you just set the goal of management exactly like this

therefore there is a certain level of control
where you can do the management
simply by setting the goal of management on everything
knowing in general how and where to put it

from this point of view, considering May 2004
we can see
what does the situation related to the solution of issues mean
including environmental safety

and first of all
namely the political level of governance
creative processes in the World
in this month this is the level
where it is necessary to lay it down now
in general, this is the concept
as we say the concept of a joint decision of all countries
the main ones may be including countries first of all

that all processes that relate
to the problems of human creation
precisely of the creative type
they should be resolved in this way
so that there would be a fairly wide implementation
opportunities for disseminating creative information
to all countries of the world at once

i.e. we can quite well consider here
such a level of management
when considering
the action of, as it were, investigative systems
in May 2004
we can see
that through the dissemination of information
already of positive quality
we get the effect
as in the distant future
so we can see the result of the action
now for myself

i.e. what I am showing now
I definitely show it
the action of light information that
where did you do positive management
action directed at you
and you can do the management quite well
how exactly is the management that is already being achieved now

i.e. working with future events
Be sure to get control for yourself
Now

this Law of Control is universal

and it turns out that God's Action
for a person
this is an action that is again outside of time

i.e. you can very well consider this Law
making management
well, let's assume such generally distant constructions
so, for example, it was May 2005

i.e. if we immediately move to 2005
then it is clear that the context of the actions
basically it's one and the same

having made a management structure
in relation to May, for example
you see that the following structure of action
let's assume a vertical time structure
these are the same type of actions

i.e. if you have learned, for example, how to do control
in relation to one month as such
here is some information , let's assume that's all
any year

it turns out that having defined the contours
of this administration for this month
you can this universal system
apply generally constantly
or in advance
if you are considering
some kind of negative event is possible, for example
or as if already being in this time ^{yes}
in May itself

and from this point of view the technology of the next type
as of June 2004
this is attracting information to oneself
i.e. control from the current time
where you decide for yourself
position of the following events

i.e. you don't consider
the structure of the following events as such
and at the same time, look
what is the realization of Action for God?

This is, first of all, His internal status
God organizes events
based on a certain state from the status

and when do you start
this context of action to analyze
it turns out that the events that you can consider
in 2004
for you, first of all, your personal events coming from here

then the question arises
how to know what needs to be done
if for example not to apply
let's assume the clairvoyance manager
but just act
based on the structure of the given moment

the context is Macro Salvation
instantaneous dissemination of knowledge, we assume
on Macro-creation
this context helps
and generally speaking it implements
your correct actions are already now

solving current events
you set the Event Norm
next year June 2004

then it turns out that if you want , for example,
so that Moscow's environmental safety is normal
for example, yes, for this period
or St. Petersburg, let's say
then you can simply determine this by control
from here
and at the same time, as if without having considered it beforehand
impulse of future events
and just knowing that this control
this is your desire

i.e. you can make any control
based on your inner desire
the main thing is that you should get it
what is your Spirit
your Soul
and the Soul of God
they are defined in one action
and implement the same thing

in relation to your physical body

as of July 2004
you can consider
the next context of Spiritual knowledge
for example we are looking at Spain
where work on environmental safety has already been carried out

then the context of the whole world
let's say we want to consider
the whole globe
so that there are no cracks somewhere
in the Mariana Trench let's assume
or where it is not known yes

so from the point of view of the current moment
so that there are no catastrophic earthquakes
we need to consider first of all
how the planet is structured
towards you
Now

because you are in control now
therefore you should be able to
very clearly and quickly examine
the communication system actually

here is God who builds the World
and built it originally
It has an initial construction point.
where for Him everything is one
what is the future tense
what is current or past

the same is true at the present time
He takes action to develop people

therefore the implementation of human actions
this is first of all the Action of God for the development of people
and a person must be able to see his connections
just like God does
in relation to the same information object

i.e. God considers
seemingly external position
Man and the Earth
in fact God is the Creator of man

He sees this position too.
naturally, it seems to show a person
his own position to God
i.e. he shows it himself
and God sees it too

when you move to this level of Perception
then he becomes
Well, it might be a bit more complicated
for those around
to control even
here from the people around

but you are part of the structure
as if for greater security of one's own development
when you understand the concept of "security"
it means that security
let's assume a future interval of civilization development

let's assume Eternal time of development of civilization
and not only there, for example, personal security
or the security of some country

when you consider
this context in this aspect
then it is clear that you can co-organize
together with the Soul of God the events thus
for example in North America
didn't happen
let's assume there's some big one there
if you look at the events from above, as it were
then it looks like an earthquake

but in essence we can look
as if some major incident
associated, among other things, with the active activities of people

i.e. this is like an external option, it could be like this
that it is visible as for example a tornado yes
i.e. some large level of liquid
moving, for example, towards the shores
if you look from above
then this is the coast of New York in general, it turns out

i.e. we can see events
as if abstracting in this way
that we look at the Earth as if from above

well, as if from a spacecraft

and then it turns out that if we
for example, we see a multi-angle event
I specifically touched on this here
the structure of the Spiritual Movement
that the Spirit determines events
which are still not fixed

i.e. I say look from above
without recording events on the territory itself
for example, well, where can this happen ?

let's say we want
so that there are no macro disasters in New York
what can cause local war to start again
then there will be a global war

and if we want in 2005
this war did not happen
we need the event not to be recorded
that's why i'm showing
the point of view is still from above

i.e. I show that we can get closer
and how not to record the event
on the Earth itself

and at the same time this technology shows
that your Spirit which is Infinite
has the property of control
even before the events were organized

i.e. you can on the Spiritual aspect
perceive information
but already on the structure of the Soul
where the Soul is realized in the physical body
make sure that an event does not happen
i.e. in this case what happens
still the level of work
and Soul
and Spirit

and at the same time we must make such a management here
so that the investigative causes
and in general the original root causes
why could a nuclear explosion happen there, for example ?

in this territory

because well there are a number of certain conflicts
which can lead to some macro disasters
and the task is to restructure these systems in general

at the same time the bearer of this ideology
maybe there's just one person there
or there are several people there
who are hatching plans, let's say, for macro-wars there

if we start browsing
the actions of these people
i.e. we begin to identify their actions
in the structure of events for example

then it is quite possible in telepathy even yes
as if having a spiritual conversation
having spoken with the Soul to these people
we are quite capable of realizing events this way
so that they don't happen

i.e. they would not always happen
at the same time we see
that they never happen
if we do it right

i.e. there is a method, for example, for such a restructuring of events
when we can get management absolutely right

the question is what in such a seemingly intense action
how to get your own body recovery yes
i.e. how else should a person recover?

but by analogy with God
God always has a Norm of Health, a Norm of Control
although when He works as a man
He tries to show it accordingly.
it is precisely the human status of work

i.e. how can a person feel here
and how it should work
so that he could actually do it
the man himself
if even one person can do it
then such an event will not happen

and when we consider this development status
then first of all it is necessary to direct ^{yes}
my own spiritual conversation is happening
for management
so that there are no such initiating actions

moving on to August 2004
we see that again by analogy with 2005

this is a structure in general, it would seem that it is similar
i.e. the vertical column of time ^{yes}
if we stretch it upwards
it concerns 2005
but 2005 is different in that it can be much better
i.e. it can be much more stable
and much more formed in general positively
i.e. for the better for all people

in this way it is possible to form
stepwise construction of time
where is your every action
to control the next element
the following events
leads to an increasingly stable structure
for your own events

i.e. you are actually moving forward
on a certain ladder
built, let's assume, in golden color
where is the construction of the next level of the event
this is a multi-reserve level
which leads to that
that this ladder becomes more stable , so to speak
and less susceptible to any external influences

so when you start working
for example, already from myself for August 2004
then consider first of all distant events
let's say this concerns August 2005 ^{for example}

but at the same time you can see it quite well
what you don't have to watch 2005
possible in August 2004
go to any design for the month of August
for any time interval
generally speaking, any time
next or even last

then it turns out that you are quite
Login to Time Management
in relation to the event

i.e. in the eighth month of management
you get a structure of sustainability
in the control phase from God
and that's why people are born in the ninth month

i.e. when we consider
the question of human conception for example
from the point of view of that
why is a person born
for example, yes, when nine months pass
we may well consider
level coming from the structure of the World device
in relation to that
how is human event structured

after nine months it becomes stable
in the system of physical Reality

when we start to suppose to do management
from the eighth month
then here first of all we need to consider
structure of internal events
related to you personally
and in general with each person individually

i.e. this level
well definitely high intelligence
where people work very focused
over your future events

if you consider
current time position now
it is clear that the further time goes by
for example, we, well, sort of do management
at a more distant time
and the further we start working
the more intellectual the work becomes
in that sense at least
what is needed is more number of events
take into account from the current time
until, for example, August 2004

so having looked at it
means South America and the center of Russia
as two levels of control
and asking the question of the absence of a macro-catastrophe
that means on the territory of South America
in this way
that the work is carried out according to standards
in what would seem to be a prosperous territory of Russia
at that moment it will be a prosperous territory

we can from the safe zone
do the management again
through South America to North America
but already in June or July 2004

i.e. we can quite easily work through specific events
but let's assume that when we return back
and creating a reserve in management

then it turns out that we get here
already a specific level of recovery

i.e. when we have
level of own recovery
then we can do it like this
that at Infinite level of work
we can create multi-redundant systems
planning future events

in this case I showed it specifically
for work
through the so-called
reflected systems of future events
where laying down and having a standardized system
we are back again
to earlier events
and we correct them again

based on September 2004
it is possible to make this type of control
which you may well consider
what is your own intellectual level
where you personally managed
i.e. the level of , so to speak, high intelligence of the Soul

there is such a concept as "intellect, for example, of the Soul"
we can consider the concept of "high"

in the geometric sense, including

i.e. Soul in the optics of viewing future events
visible as a structure already higher
i.e. the Soul grows, it increases as if
in the amount of Spiritual Perception
you increase it
by the number of events
and including you on the Spiritual level
and in the Spirit itself
you already perceive it as if it were in a higher status

i.e. the Soul that has overcome the control system
associated with , for example, nine months of management

when you see this structure
as a structure of its own events
then you can quite easily from there from this nodal point
where they are already focused and formed
events of the past ^{yes}
compared to September 2004
you can easily take control over it yourself
i.e. to restore oneself
from the stable phase of events
and at the same time restore it from that very angle
where you consider necessary
make a recovery

and that means even if it is necessary
make recovery fast
Well, sometimes I try to speak quickly
for example, discretely, as if overcoming
some external control systems
to show in words the next status of an event

so here you can do the same thing too
by words or by spiritual action
on the contrary, the words are directed ^{well}
in such a quick manner directed at himself
i.e. making a quick proposal for management
to yourself
what do you need now
recorded in September 2004

get control now

and then do the next control

on specific events of this September
i.e. September 2004

so now make such control
just move with the structure of Consciousness
in September 2004 as a reference plane
formulate it as a sentence
what do you need now

and let the light of this proposal
you can even perceive it visually
so that this light would warm you now
i.e. I did the management for you now
because you have already walked this path before September

do this management
I will do it together with you

in this management structure
what matters is that you act with your word
The word is originally
there is a Word that comes from God as well
The Word of God is also a management

so when you hear the Word of God
then you see how to manage
for you, management becomes more transparent

notice that when you hear the Word of God
you see that this is really it
The Word of God

for example people who turn to prayers
going directly to God
or someone who has been working under the management system for a long
time
often even by numerical series

Here, for example, is some data
what does working by the book ^{mean}
"Restoration of the human body by concentrating on numbers"
can quite clearly see the action of a specific organ ^{yes}
or some of several organs
in relation to God

i.e. the action is direct
a number or a word

this is an ongoing action
as a management action

therefore, having formed its own specific management
once again already on the Spiritual level
go through and fix it ^{yes}
Strengthen your own management

for example the task Save everyone
To do this, you need to select this task again
and recorded again in September 2004

when did you do this action
then you see that it is September 2004
pretty normal overall
quite a simple time to manage
because there are no such things there initially
as if the events were difficult to manage

i.e. time which can be quite possibly attributed
to the concept of "simple", i.e. calm time

and based on this it is advisable not to fix
some additional control systems
except maybe performing personal tasks

i.e. you can quite easily decide, ^{for example}
some tasks are already like that
which are happening ^{now}

but you can look
what tasks will you have there

for this, make it simple in general
Well, it's closer to training, ^{I guess}
level of action
look at the light
coming from your right palm for example
and the light coming at you, going for example into your eyes
and look at this
as God sees it

i.e. look so to speak
with his sight
i.e. look, ^{well}, you can put it this way
from His level of realization of your events

and make the light pass through you
would have hit the left palm and reflected

and here between actually two palms
Well, you can even do it non-physically
i.e. it is not necessarily a physical action
as an act of penetration
into your own Soul
the action of your Spirit

look
what are you doing at that time
i.e. what is in front of you now
let's say it's September 15, 2004

everyone looked in front of them and saw
what are you in
on a structure actually created by God
you are in the future
in the structure that will be created
and for God it already exists

you are actually looking through the eyes of God
there
but the accuracy of viewing
this is the accuracy of a future event

so you try to standardize
still the structure of, for example, some environmental events
in those levels where you are
it's clear what will happen then Norma yes

but look
do the standardization again
let's say there in Moscow in Paris in London
in some central areas
and make this Norm universal
i.e. for any region, for any point on the planet

then it is clear that in August 2004
The earth will not split there
for some, let's say, external reasons

i.e. being there you can do the standardization

but the concept "will not split"
this does not mean that there is a precedent

I mean
that there won't be, for example, even macro cracks, etc.
it's not about that
what she suppose there
somehow it might even split radically
I'm talking about the crack

so when we ^{suppose} we do specific management
September 2004
it is clear that through your own Spirit there
but which you see here
i.e. the Spirit is present there
he is actually here
this is basically just an intellectual level of development of the Spirit

i.e. "intellect of the Spirit" is the concept I introduce here
where is the Spirit intellectual
as if extrapolating its property
property of penetration
sees future events
as of October 2004

i.e. you can do it this way here
to see with spiritual vision
October 2003 for example, even now you can see
from this point of view
and look at 2004 by analogy
i.e. there is just the month of October and that's it

try to work universally
let it be 2006 or 2010

In general, there is October
let's see
how to work in october in principle

in the collective Consciousness
this is a highlighted phase of events
such a phase as a month
and naturally there is
universal access and control methods

so try to work simultaneously
in general, in general
i.e. considering
the structure of one's own Spiritual development

and for this you need to work more
with specific people
i.e. to help specific people more
I can communicate more and give opportunities
to pass on one's own knowledge personally

or at the same time
and try to work at the same time
still specifically on the events

Well, for example, I diagnose an airplane.
I can of course apply the general scheme
or a nuclear power plant or the Earth or civilization in general, yes
or you can say outer space
in essence it makes no difference
what to diagnose
the main thing is to highlight the control object

and yet I still watch
for specific events
i.e. I find the point somewhere
where do i combine
level of generalization
and level
specific individual systems of manifestation of events

in this case
this is the physical body of a person

i.e. if we by analogy
with the Physical Body of the One God
let's consider
that from the Physical Body of the One God
all events happen
then the level of unification of different positions
in management
this is the physical body of a person

then it turns out that having considered
your own movement
for example in September 2004
you can see it from there
with your own eyesight
Events as of October 2004

be more careful here
because here you need to try not to force it

i.e. the volume of events that I have already laid down
and you looked at them
and you have your own events
which you generally bring to the management level

these are events that are universal after all
you must watch through Macrosalvation

so you have to be more careful here
in terms of it being a real job
and work related to that
that you help others
and do your job
i.e. work for yourself

so October 2004 first of all
the status needs to be reviewed again
in relation to August
This is security on US territory
then consider including
security system in Mexico

because it is clear that the nearest country
if the problems are on US territory
then there may be environmental problems
in Mexico

and make the management from Mexico
that for example you have a Norm of events
US Environmental Safety Standards
in October 2004 and simultaneously in August

i.e. try to combine concepts and generalize
here is Norma and that's it
it's a territory and that's it
exit the time level

you need to have Norma
at least there in 2010 and in the USA
or whenever and not only in the USA
and work with the territory already
in a timeless aspect after all

when did you work out this management
then take a look
how do you personally regenerate?
i.e. how your structure is restored

during these months for example
i.e. how do you restore yourself
if you need it for example yes

but in principle if you take
at the level of conscious control
some elements of the body
then you can do the management
for development
systems of control from personal Consciousness

for example, you want to increase the management structure
when Consciousness is your own
restores you
and at the same time you control this process

i.e. you see how your body is structured
from the point of view of the development of Consciousness
from the point of view of all external and internal processes

and then you translate
well, more automated systems, I guess
that exist in the body
on control systems from Consciousness

so here are these actions
you can learn to manage it practically
through one's own Consciousness
simply highlighting fractions of Consciousness such
so that in October 2004 there would be a norm
for some local structure of your Consciousness

i.e. by selecting one local structure
just as the One God does
where is His fraction meaning Norma
at some level of His Perception
This is the norm, generally speaking, universal
for example, for the context of spatial events

therefore, having selected any fraction
for example, your level of Consciousness in October 2004
try to see
how does this Norm
influences all surrounding events
including for example October 2022

for example, take a straight line

look at that from this point of view
October 2022
this is a fairly close value
if you are here

if you are already approaching
and already being in October 2004
look what happened there
still an element of removal of those events
because you get it
that working for example at this time
as if to reduce the control space
in order to work here

Well, we are working with the future tense after all.
and we are working now
we kind of compressed the space
in relation to oneself
brought closer to their physical body
management level

and it turns out that by analogy
i.e. God does the same
when He begins to work with future events

Here is the process of organizing all the events
immediately by God
this is a process of very close rapprochement
almost all events

and for God there is one event
first of all, it is He Himself

and secondly, and at the same time, it turns out
as if in relation to God after all
firstly in relation to the following events
this is all the following events

and it turns out that this is the approximation
this is the level of training
where the Spirit interacts with the Soul
and you get your own healthy body

and at the same time the bodies of other people
become healthy as well
because their Soul develops proportionally

well, that is, an element of spatial training
The soul developed in space
The soul developed in space
and in event management
then it turns out that the Soul is giving birth and forming
time

when do you come to this concept
you see that events are quite dynamic
and nodal systems of their formation
it's not a complicated thing

i.e. it is enough just
similar to how God does it
impose a matrix of events, as it were
to the structure already known to the Soul
and it turns out that this is the matrix form of the Soul
when the structures match
gives the Norm of Events

and if somewhere it doesn't match
it's very easy to adjust
and you can immediately see what the problems are

i.e. the difference is visible
between the Norm laid down by God
for you
and what, for example, can happen

then you can do it
according to a kind of matrix-like and original principle
having distributed the concept of "month"
how are fixed event systems anyway
and not time
events exactly

we displace time
by bringing events closer to oneself

example, we took time and displaced it
let's assume there is some kind of flask there
where there is a vacuum, for example
and we need to do it like this
whatever happens
some kind of, well, let's say, non-natural environment

let's say if time is a vacuum

it is enough to let oxygen air in there
and we get a natural level
oxygen event level
but there is no vacuum anymore

i.e. it turns out
that one environment
can be very quickly displaced
another environment
in general it's enough to make a small hole there
in a flask

it turns out that we have, generally speaking
in this case, approximately the same position
in management
we can basically replace
time structure
event structure

I'm saying this specifically
I repeat this many times
this means that we need to be able to displace the structure
as if of a temporal aspect
in Perception of Management
in this technology
because the Physical Body of the One God
considers these events exactly this way

as for God
after all, there is no time initially
He himself created events and time
this is an external process

the management process is actually ^{yes}
coming from people and from God of course too
but in this case we can say
that from God among other things

and so when we look at
aspect of time
as an aspect of human governance status
we can quite easily single out
time structure
in your own Soul

i.e. how does ^{it mean} to determine the time of the Soul
i.e. how old is the Soul, for example

if we consider the management position
from a person
and combine
that so much so for example as much as the body yes

then in general, in fact, it turns out that way
what we are dealing with in essence after all
initially
with level
when there is a question generally speaking

here is the Soul that enters the physical body
then there is time to organize it
some time for the physical body of a person

and from the point of view
for example, structures mean in Buddhist philosophy
so for example reincarnation of a person
we can say that the time of the Soul is completely different
if we consider this particular structure

if we consider the structure
that the Soul coming into the body
there is still a time difference

then this difference is God
i.e. this is what we perceive
as God coming to us

and when we look at this process
then logically it is understandable
God organizing the Soul
originally organized the Soul
then, for example, the body was formed

but the Soul
this is basically the same level of co-organization of the body

and it turns out that in the Soul there is God's time
i.e. time is initially common to all

primary organization level
it's just logically clear

and when we start to proceed from this
it is clear that any event is controllable

in a creative way
it is clear that Macrosalvation can be achieved
in general it's not even difficult
having understood only the structure of the exact future
structure of general management
where everyone participates in management

i.e. having understood the structure of the device
or world order
Souls
God
Peace to you

and that's when you start to consider
then the future tense for example October 2004
it's quite visible here
what can be considered
any structure
in the same complex relationship
how do you look at the current time now

i.e. at the level of the Spirit
and including at the level of the physical body
you can quite see it
that there are practically no differences for you

then you see
that you got into a level, as it were
into the area of the controlled ^{level}
of its own realization

i.e. you are healthy there
Things are going well for you there
and this knowledge you more than that
You can safely pass it on to others
all the time that has passed
for example from January 2004 to October 2004

but then it turns out that knowledge can be transferred
all other aspects can be done just as easily
i.e. at any other time
being now

only by showing off the level of your own knowledge
Now

i.e. just show off your knowledge

shine with knowledge
the knowledge that you have, it shines
and you can convey them generally speaking
anytime then

and it turns out that your knowledge begins to influence
on the management structure already for example November 2004
although in reality your knowledge begins to influence
almost all systems of the Universe
and by November 2004
you already need to come with knowledge
with knowledge that influences

and let your knowledge from October for example 2004
this is the level where they grow on their own, so to speak
i.e. your Soul gives them to the level of growth

i.e. well let's say there are seedlings yes
the knowledge you have now and there
and these seedlings begin to grow

and that's when you're on your knowledge
you start building the future structure
then you no longer hold control as if on yourself

i.e. your physical body in this case
already engaged in management at the Macro level
and you can do the management quite well
basically from myself
on any other aspects
not necessarily related
for example there with October or November 2004

but at the same time you see
what knowledge you have passed on now
at that time
they have a beneficial effect on your events now

here you have it
implementation of their own events
now anyway
although they were constantly building future events

that's how you fixed it
line of stability
November 2004
then you see that transferring knowledge on this technology

this is to transmit knowledge of constructing future events
where future events would necessarily take place constructively

it's best if they happen at that time
that means exactly the one you put them in
This is especially important
for some type of processes, for example

so it turns out that you can quite easily have
normal health and full control
based on future management practices
much earlier than you even plan for example

i.e. you can have it instantly, for example
normal health
you just have to want it
then you see the Gaze of God
i.e. you see how healthy God is

you see
how does His Physical Body function
and then you understand and simply identify yourself
with Him

then you already get the Norm
from his vision
and from here you can transfer this health
to all

that's when you start transmitting
you see that your health is getting better
i.e. the reserve capacity becomes higher
event control becomes
more expanded or more controlled

when you level of control
for Macroevents there must be something like this
which is what he is by the way
what is essential in Macro Management
you implement something that does not exist, for example , macro-catastrophes

when you realize it
you see that God has given you knowledge
here you have received the knowledge of God
from that time and now at the same time

after all, God always passes this knowledge on to you

and rising along two or more trajectories
up or in general in phase optical systems ^{yes}
going to God
you can see quite well
what is the level of your own management
has already grown to that point
that any local event
becomes controllable
at the Spiritual level of Perception
even if you don't record the event
in Perception

i.e. your Spirit is at rest
and then everything is fine

i.e. here's the output
such a management structure
for example, in November 2004
you can clearly see that on the Spiritual diagnostics
you can get Norma
by the action of the Spirit
without recording the event

this is the main level of management after all
be able to receive the Norm
without fixing
some level of events for example
which would not be desirable

and then it turns out
what if the signal is received after all
look specifically
territory for example Russia USA England
and for example there specifically Paris of this city

and look
what unites all these systems
from the point of view of the implementation of international processes

and try to give these processes
status that would be necessary
first of all, it's you
as well as a resident of the planet Mira
where people need to live forever
in environmental safety

and their events were constructive

i.e. people should be happy

i.e. try to do this in relation to yourself

when will you do this
then you will see
what have you done the most for others
the more you pass on this knowledge
the better it will be

when i said about specific countries
and cited Paris as an example, for example
this is actually specific information
and try to work it out and see
why Paris
but I started with Russia

so when we start talking
about future events of the next year
it turns out that right now, being here, yes
in December 2003
we are already quite close to the next year's cycle
here in the same position
and we see that everything is fine there in December too
i.e. December of next year
these are normal events for everyone

and by the way they are really normal
there for civilization
i.e. there are no outbreaks of any environmental problems, etc.

From this we can draw a conclusion
that the whole future of civilization is completely normal

if we learn through cyclical forms
come to the Norm of the current state

i.e. now we are, for example , in the practical Norm
there are no macro wars now
there aren't even any local wars, so to speak
well, on a large scale

of course the task is to do it this way
so that there are no conflicts there at all
and people wouldn't die

and this problem must be solved

therefore taking it beyond the control spectrum
these systems
to the level of implementation of precisely such tasks
Eternal development of humanity
we can see it quite well
what is sustainable management
it is first of all our own will
aimed at understanding aspects of management

how can we create governance
in conditions when, in general, the processes
for example there is macro destruction
they exist, they are more than something
at the level of, for example, macro-weapon technologies
even develop, etc.

i.e. how to influence this system
from the point of view of the current state
there is one way now
develop your own Spiritual Management
having oriented his own Soul in this way
so that you can still cope with this situation
until it is regulated, for example politically, ^{yes}
there is no disarmament yet
i.e. we have to hold it
at the expense of our own management

but when we can, for example, take control out
to the level of systematicity
i.e. we understand what we are achieving
systematic management
due to the fact that we can
for example, view the future tense

and the future tense will indeed correspond
from the point of view of that
what needs to be managed first
that this is how it will happen
and we cope with it

Over time we accumulate our own practice
which speaks about that
that we can do management quite well
in this way
that our own strengths are affected by this

increase even more

logically and practically it is clear
that the more you engage in management
the easier it is for you and you are more technologically advanced
i.e. skill simply increases on everything
and it turns out that you can see events
in a more controlled manner

but there is of course another aspect here
that the more you do
the more you are given to do
the next level seems to increase
and you end up entering the solution system
the following possibly more complex sometimes tasks

so it turns out that here
to achieve control stability
you need to be able to create in general
prognostic systems
where would you be able to prepare
to the next events

where do you have support for example structure now
you can already solve more complex problems

because God gives only those tasks
which you can solve

and when you solve them, for example
it is quite clear that the management system
it is controllable yes
from the point of view of the prognostic phase
this is controllability, including of past events
towards you
in the current tense

i.e. often past events have the status
for example, current ones or those that really influence
for future events

so when you work for example
with the events of the past
try to see
dynamic phase of identity
as if the internal structure of past events
in relation to God

and in relation to you
then they become manageable

i.e. as soon as past events
become as if unified
or universal in their actions
in relation to your future events
you get control over these events
i.e. events of the past
They won't harm you there, for example.

and when do you start to withdraw
this universal status on itself
By the way, this is one of the technologies for solving problems
let's assume with health

i.e. having given
for example, past information on the disease
not a status, well, let's say there's some specific disease
and simply giving universal status to everything
which is perceived only by the Spirit
or even better Soul
you can first do it with the Spirit
then by Soul
as information

and giving it a neutral, i.e. universal, status
you immediately leave the problem as if it were in the past
i.e. your health is restored

and when you come
to this level of problem solving
then in the next time for example
for example you work with March 2004
or from March 2022
then you see that the work is there
this is a mandatory connection
with past events

i.e. your faction of Consciousness
your Spirit
works there meaning
that for example future events have not yet happened

i.e. the load on the Spiritual phase of management
she is taller after all
than just working with past events

then there is a normal level of adaptation, so to speak

past events they may not press too much
i.e. they passed and that's it

exit to the current time structure
and leave
as far back into the past as possible
for example, the structure of the initial level of the organization of the World

and from there it turns out to be quite easy to control
because as soon as the world began to organize itself
the number of events was initially not large yes
as if this optical glow of events
it wasn't like that, like , oppressive

God acts in the same way
God who is
and in the beginning
and in Infinity
It turns out that he is in absolute Norm
because His own Consciousness
formed him into an absolutely normal status
and by health and by levels of Infinite development
because it doesn't have any load as such
due to proper operation

i.e. the load from the human point of view
she is
but from God's point of view, for Him it is happiness, yes
creation
happiness of creation

i.e. this is the concept of God's happiness
this is something that we can understand in the same way as a task
when god is happy
and for example it gives the level of development
it means the person understands
what He does right and should do the same

then it turns out that based on this
there is such a level as the human concept of happiness
but for God

when we work with future events
and we try to vary the controls even more

through , for example, the context of the past
we get the human concept
God's happiness

then from a human point of view
this process by the way
a very powerful restorative process
For example, a person only needs to enter
to this level of information
he can fully recover

and moreover this level of information
it moves quite well in space
for God is happy where space is realized
where there is a timeless aspect
i.e. there is Eternal development
or at least laid down
mechanisms of Eternal development

i.e. if a person begins to manifest that structure
its protein level of development
where is he Eternal
then God is happy there
i.e. He is expressed and self-expressed there

and it turns out
that as soon as a person understands this
he gets there
at the level of, for example , complete self-regeneration
here, by the way, you can work it out quite well
organ growing technology
i.e. regeneration of restoration of organs
even those that were deleted, for example
where there were some partial resections, for example, even

so that's why I said that this is a partial resection
it's a slightly different process in management
rather than complete restoration of the organ
full is another aspect too

here you need to be a little more careful
because when you start
restore, for example, the body
look at the management structure
what is more difficult

it could be easier

if there is a partial, for example, some kind of organ resection
It's easier to restore this partial resection
through simply as if the management of the replacement of the organ of the whole

i.e. creation of an organ
and you start to see
how to create a human body then

after all, the realization of human events
This includes the creation of the human body
for God

when you start to see structure in creation
as the structure of God's manifestation
in the aspect of Eternal development
then you can influence
example, at your own level
it means it is physiological

i.e. to see how the protein develops
see how others are developing
namely the structures of your body
and specifically at the level
namely substances of matter
human matter human physical matter

when you start to enter
into the essence of these events
then you see that initially the organization of the whole World
occurred in the same way as the physical matter of man
began to organize

here we see
what is the time of the Soul
and body time
this is the time where organization begins
physical matter of man
for example for the Soul of this person

but for the Soul of another person
the time is completely different
i.e. it's as if it's not there at all in principle
because the Soul is Eternal
and aspects of time
The soul perceives aspects as conditional
i.e. as aspects of the same action

therefore the realization of God's Action
for a person
this is the realization of the Action of God after all
in relation to all people

a person can learn something here
a very serious mechanism of social development
how to do it like this
to develop another person
towards you
it was as God wanted it to be

quite a complex task by the way
because the main thing here is not to impose ^{yes}
your own will
which is possible for another person
she has, ^{well,} a different criterion of perception

and it turns out that there is such an aspect here
what if you see for example this action
then you can just like
well, at a recommendatory level or something
do management

and then a person must perceive something else
myself
he is either taking control or accepting it
or he looks directly at it
how does god do it
but that's already good too

when he starts looking
you can show him further
next way
and then it turns out that you work
it turns out as if together

i.e. God acts
you are helping another person
and the status begins
here is the transfer of knowledge through action

when you see this process in general
as a process of event formation
then event management consists of
to transfer that action to another person

exactly that which would be right away
perceived by that person
as an Action coming from God

i.e. you must show the Action of God in fact

i.e. to teach in management
that means, in general, another person
so that he would perceive the Action of God
so that the Action of God would be open to him

and when you start doing this
then you see that there is an internal
very specific in general
at the level of perception in that sense
that is quite a personal moment
for every person

there is a level where a person is perceived as another
as a person who can do
in general, any creative management

i.e. that's when you go out
to such a status of Perception
then you see that the other person
quite capable of doing management
any creative property of quality
i.e. he is quite capable of learning to do this, for example
so that there are no macro-disasters
he can very well restore himself

you just have to show him
some specific aspect of management

so when you enter into such
In general, I called it a personal factor
and in essence it is personal
and at the same time it is still universal
i.e. a factor given by God
factor coming from God

when do you start showing this level
then show it like this

technology
so it's exactly this kind of show yes

take the next any aspect of time
let's assume the same year next
and take this well, kind of a ring, like yes
squeeze into one point
and show that all events
these are events that are formed simultaneously
and God
i.e. Light going up yes
and to the general level

and the light coming from you
you are in the center of events
and around you arises
a kind of golden level of your glow
level where the action of generating events is visible
where you personally shape the event

when you start to see this level
you see that besides the controllability of events
in the real factor of their formation
you are actually doing it quite realistically
management for all

i.e. you at this moment
you are carrying out the process of Macrosalvation
unity with the Action of God
human action
where all aspects of the man of God are united

Now you work
I will work with you
according to your events

when you make the control come from you
try to work on the next element

when working with words, try to pronounce them
well, sort of inside myself
i.e. it is meant
within your personal information so let's say yes
within the level where you perceive yourself
pronounce words as quickly as possible

i.e. if it is transferred to speech
then try to control your speech, let's say
it's still faster to pronounce some statuses

i.e. as a training
take the next level
for example your personal tasks
and pronounce them at the speed of the Spirit
i.e. as your Spirit speaks

and look at how for example
your Soul speaks
and what does your Soul say?

when you see this situation
then you can see
that the Soul can speak
By the Word of God
while for example the Spirit
can perceive the Word of God

but when you say let's say very quickly yes
at the level of the Spirit
The so-called spiritual utterance
then it turns out that you have
status of general development
where the Word of God coincides
with your word coming from the Spirit

i.e. it is a system of equilibrium
your own management position

The word originally coming from God
i.e. the Soul can speak this Word
if the Soul perceives this Word

and that's when you perceive, for example
and you speak by the Spirit
well, it's kind of the same thing, yeah
management objective
then your physical body enters the phase of harmony
in relation to
to external and internal events

i.e. internal events
that which gives birth to the physical body
as own events and bodies

but there is also a level, naturally, you all know it
what the body gives birth to
and internal events

as if informational
i.e. this is a sensory level
level of application of intelligence
the level of your body's reaction, for example

and it turns out that this is the birth of the sensory level
your physical level
this is the clear presence of God here nearby
or do you see God at this moment

because your physical body
giving birth for example yes
it is precisely the internal level of feeling
this is a level that is practically given by God
and you can differentiate it
as the structure of God's presence

I specifically highlighted this point here
so that it can be seen
that the body creates
acts by analogy
with the Physical Body of the One God
but at the same time you can see
the structure of another person

i.e. the universal principle
given to any physical body
where the body is capable of not being destroyed, for example
let's assume there's a nuclear war
i.e. then there shouldn't be a nuclear war

the function of the body is
that there are lines that as I said
at the beginning of today's seminar
for example, going from man to the planet
there are also lines that protect people from nuclear war
if you activate them
there is no nuclear war happening
influence on events

these lines coming from the body
they are lines leading to the Action of God

when you start to see already
precisely the level of God's Action
in relation to the whole world
then it's only worth strengthening

optics of the connecting lines
with this level of information in general
and you get
a completely controlled process
towards you

i.e. it means it's definitely near you
Let's assume the nuclear power plant there won't explode
that is, they won't happen near you, in general they won't happen
processes that would concern specifically macrodestruction

the next level arises
so that there is no local destruction of any kind
relating to you yes

then you just spend
from this, as it were, external sphere
the line is already towards you
i.e. the sphere is already more general
and this line goes to your body into the physical body
where the physical body is, there is your Soul

when you come here
then it doesn't concern you anymore
and any local in general
some kind of problematic event
it is not necessarily a catastrophic event

i.e. we need to try to highlight even that level
he is a very fast level
we need to have time to somehow fix it

when you start to fix it
then you will be able to create a certain policy around yourself
well, like even security
from some trivial problematic events

and it follows that in order to convey
this information to everyone
you need to be able to bring it to the level of space
control

then here is the control level
for example, as of December 2004, it is as follows
so that there are no macro-disasters on the entire planet
in all future levels of development
planets

civilizations
and you personally too

take this one in general
Macro is actually a level
it even looks more like an ideological level
but I showed it just now on purpose
as the level of your personal management
because then everything is definitely fine with you
when you get over it

and when do you start working
in relation to this event
then we'll see what happens next
what in general are the technologies that you mastered
for example over the course of months
or including at an earlier time
these technologies are essentially what they are
level of comprehension
level of preparation for that
so that, for example, in December 2004 you could cope
with the task of precisely the Eternal development of man
including naturally you consider yourself

that's when you build this technology
in relation to oneself
it is clear that in Eternal development
here it's even logically clear
a person must be able to control himself ^{yes}
with your physical body
external events

because internal events can be yours
and no one in principle can touch them at all
because your personal level is sensual, etc.
it's your own level
which one is yours personally

so God also forms
own level of events
to which there is no access, as it were, from the outside

and that's your personal factor
which cannot be touched
for example, by some external influence
this is still the level of control stability
in Infinite Time

i.e. formation of a personal level
of his own personality
their own tasks
this is essentially sustainability
recruited mechanism of action
i.e. the level gained , so to speak
in the form of, for example, some kind of management technologies

and it turns out that when you start
this level to form
as a level that has
light of external action
i.e. you gain experience from some external events
then this light comes out
firstly in the form of light, for example
light in general of your specific experience

i.e. you can differentiate very clearly
what is your personal experience

because when it comes to Macro Management
your personal experience is concrete information
what do you need in your personal experience
now to use or apply
or what experience is there any point in gaining at all
there for example in 2005

i.e. this is specific information
which is located
in the form of the following aspect of management

here are all the external events
there is a certain line yes
the edge of God's presence here now with you
and you see that through this line
passing by
your personal experience in your management
it leads to that
what are you starting to form
your inner world
where is the inner world
stability of the inner world
i.e. its calm or the development you need
this is practically the case in general
well, it's like a natural choice for the maximum level of experience

i.e. a state of rest
when you have
maximum effective management status

after all, management is often one of them
and a state of rest
when you are in a completely calm state
you can know for sure that you are managing effectively
control in Infinite Time

and from this point of view
it turns out that the Spiritual state
where is the Spirit
and the physical body
this is one
this is the level when you start
this level of management

when you see
what is the Spirit and the physical body
in general it's the same level
as the Physical Body of the One God
because the Physical Body of the One God
for a person
contains the structure of His Spirit

and it turns out that when you switch
to such a point of view of a person
you will be able to do it quite harmoniously
manage ^{without} actually getting tired
i.e. it means with Infinite time of development
you can quite easily enter into a certain state

for example, one of the states is the one I just showed
in the implementation of human action
this is a state when a person
perceives his physical body and Spirit
as a structure located
basically in one place actually

and at the same time when you start to differentiate
then there is no difference
i.e. the harmony is so great
that your physical body and Spirit are one

although it is clear that the physical body is part of the Soul
but it is precisely the concept of harmony

when the Infinite system
and the local system of the physical body
and the Infinite Spirit System
manifested in the form of harmony of action
harmony of events implementation
how are yours
and God too

God in the Infinite status of the manifestation of God
i.e. this is the level of universal harmony

try to work
with such conditions

then it will be clear
that even in some, well, for example , complex states
when it seems like there are a lot of decisions to make
or for example there are so many situations
what is necessary to achieve action
and this is the only option
that it must be achieved

you can just log in
in this state of harmony of Spirit and body it turns out yes
in relation to God's events
and therefore yours too
the most constructive events for you
it turns out logically
and informational ones as well
and from God as well
it's clear

and you get specific control
due to a simply harmonious state

in the future
technology of transition for example in management
from the optics of the Soul yes or for example at the level of the Soul
to the levels of the physical body and Spirit
try to apply it whenever possible
as a control system
including long-term events

and look at such a rather important aspect
for example information management
there March 2004
this is the management of the Spirit

from December, let's say 2003

i.e. try to browse here in general
what is most effective
and try to look
initially based on the current time
which control element is most pronounced
for you at that time
i.e. what to control here

revealing the optics of the Spirit's control
it is clear that for example the Spirit is controlled
from December to March is more optimal

it turns out that if you
you will form this mechanism for yourself
from which month is it better to manage
then it is quite possible to create
some kind of own management directory
where you can very well future events
regulate very effectively

for this you just need to identify
structure of maximum management status
here is one of the statuses that is quite effective
this is when you are in control
in the system of precisely harmonious management

but the status that I have given now
where Spirit and body are one level yes
one level located in the same place
i.e. in fact they are as if united

but at the level of the Spirit
there is a very clear gradation there
boundary in relation to the physical body

then the structure of Thinking arises
coming from the physical body
the acting body
the body that gives birth to thought

and here you can see what can be considered
root systems of one's own Thinking
Why did the idea form like that in general?
do you have
what external events affected your body

or to external events
why exactly this thought
and why do you do this particular action, for example?

i.e. consider everywhere from the very beginning
in general, the primary meaning of the action
the primary meaning of Thinking
then you can go further
Well, it 's enough to be prepared
to some events
well, which may need it
so that we can manage them in advance

and that's when you, for example, start to highlight
management structure
as a structure, for example, of the Spiritual Administration
at some specific time
then it is clear that the Spirit as an Infinite quantity
participates in all control elements
from the point of view of space

and then you can very well receive
after all, universal systems
the most necessary for you

and as if to lay it into your inner world
as a systematic approach to management

and when you start to see
it is precisely the universality of control
based on specific practice
i.e. having gained experience now
and having received it in specific situations, for example, yes

still try to translate whenever possible
precisely in the systemic management experience
i.e. at the system level
well, which would be understandable to you
and most likely more manifested
as a necessity for the next action

after all, God who created the whole world
He understands that the World has already been created.
I have to do it
system of further corrections of events
and yet He acts right here
as a person

why is it that the One God is expressed in particular
and as a person acting
from the Physical Body of the One God
because that is the task of correction
task of further management
it comes from the task of man himself
i.e. precisely from the status of a person
you can do this

and when do you start
this is exactly how the spectrum of events should be understood
then it is clear that the World is in its depths
in the Macro creative sense
he is completely controllable

i.e. it is controlled to the same extent
what if for example you want to compare
there next time you need to
for example, to step and take a step
then the next management on Macro is precisely creation
that all are saved
and moreover
in the distant structure of Consciousness itself
there is Eternal development
these are the same type of actions
i.e. the same level of awareness

so when i talk about that
that you need to create a system
this is first of all to work out
This is exactly the attitude of the Spirit
in relation to events, for example
and this relationship is the formation of the Norm

i.e. distant Norm
when you are in the Infinite in the very distant future
and best of all right away in the Infinite
see Norma
and the light of this Norm of events
there is the light of your personal happiness, for example
shines from there on you

then it's clear that the next level
it is quite favorable
and you can
not only for example there to consider next year

how year where is the absolute norm

but you can consider
there the next, let's say, 10 years, etc.

i.e. you can work
even in general with Infinite time
It's just more appropriate to consider it often, of course
some specific temporary values

thus as a concrete practice
you do the management
for starters, for example, yes, next year

try to get
in general, personal practice
where do you know exactly
that this management
from your point of view this is the main parameter
what do you personally think?
happened

and try to work it out
exactly that mechanism
when you know for sure
that in the future you have absolute Norm
because you perceive it
for example at the same time
in the Spirit
to your Soul
and at the same time perceive
physical body

then it turns out that you have
effective level of management
as if from all aspects of those
where there is a realization of human action
and the implementation is like this
where there is, in general, a must
level of God's Action

i.e. human action
and the Action of God
in the event coincide

This concludes today's seminar.

Thank you very much for your attention
