

GRIGORY GRABOVOY
The Teaching about God
Realization of the Eternity factor
23.03.2005

Hello again
the topic of my seminar today
this is my Teaching about God
Realization of the Eternity factor

In this topic I consider the factology itself
so let's say the factorization of such an event as Eternity
in terms of logical understanding of this phenomenon, let's say so

for example, a person looks at some Infinite environment
and believes that there is a structure of Eternity there
Well as if there is some factor of Eternity
and how this structure of Perception
to implement precisely in the structure of Eternal development

in this case we are talking about that
that as an axiom of action
is that in human perception
there are such objects, so to speak, Realities

for example, one could assume
from God's point of view
He could create a structure
where exactly the World would be perceived, for example
in a limited version

but then it turns out that the thought would still exist
that there is something behind this restriction
those. factor realized
it is precisely in the product of Thinking as if a person

and when we consider
this kind of border part
then, for example, let's consider this principle

there is a cell in a person
and information from this cell
it develops in any direction , yes
For example there is a cage of legs
and information somehow

radiates towards the brain

it turns out that there is a cellular level around
then if from the point of view of Perception of the cell
examine the human body
then the cell is still somehow
perceives the external environment
due to the immune exchange processes there
some development processes
intercellular space

and it turns out that this is like the vision of a cell
this is what is in its most intense form
as if it passes into the human body

i.e. it turns out that way
that actually well For example there is a food structure
structure of some exchange processes

and it turns out that this is what
well if "vision" in quotes cells
consider
as an intermediate structure
meanwhile, as God does, creating a cell
and how a person perceives his cell

then we get that it is precisely the factor of Eternity
for the cell is implemented in that
what does it mean that there is some dynamics of processes
near her

i.e. when there are some movements
there are changes in events as if yes intercellular
exchange processes are taking place and are ongoing
then there is an external environment for the cell
i.e. the dynamics of adjacent processes

and now if we move on to a person
so let's say in general
from the point of view of interaction with Eternity
it turns out that there are
also elements of such control
what a person perceives
as if in the structure of Eternity
some movement

Well for example, there is a control level like this
what if we consider
the realm of Eternity as a certain substance
then it is precisely the allocation of this phase of matter
it is like an action of space more yes

i.e. a person perceives the action
as a spatial action

and that's when we start to create further, for example
like a cellular type
there is not necessarily a cellular one there
like any other phenomenon
where there is recognition of action
expand, well, well as if human consciousness yes
towards Eternity
then we see that the Consciousness of God is
the very state of this substance

i.e. God's Consciousness includes
this is the factor of Eternity
includes the structure of a certain Eternity
which is perceived by a person

and it turns out that there is a docking
on distant, as it were, lines of Consciousness
where is Eternity well as if it is not differentiated
i.e. a person believes that there is an Eternal structure ahead
this is exactly the docking that it actually is
structure of such management
that the Consciousness of God and man
realize Eternity as such

i.e., as if the actual plan, so to speak yes factual
that Eternity can simply exist
from the point of view of the logic of Perception
goes into the structure of real action
creation of the structure of Eternity
creations of a kind of substance of Eternity
or technologies of Eternal development

here we see that it is precisely human development
within this system
i.e. a person must acquire
some properties of Eternity
i.e. Live forever Develop forever

this is action

God

human

and generally speaking of the space itself, so to speak, Eternity yes
the very space of human development

i.e. when a person can at any point
there to project and have Eternal development

it turns out that well, the concept of "projection"
maybe there is just physical movement there

and here it turns out that it is precisely the status of a person
as if by himself
has this factual system of Eternal development

i.e. it turns out that the human cell I spoke about
or is it the person himself in general?
it also has these properties

i.e. here we perceive the factor so to speak
it is to have these properties
Perception system
this is means that a person has it
This is basically what I would like to bring to now
control
what if a person for example did not possess
the structure of Eternity and Eternal development
he wouldn't perceive it then
this is exactly how the structure of the external world
i.e. only such a system can be perceived

and based on this we immediately build
next level of management

Well For example there from the point of view

let's assume some social laws

or specifically jurisprudence even yes

let's consider

such a field of human activity

there are processes here
which well can be called permanent there, yes
there they will have an eternal number of years
basically the same constant yes
there is the Eternal development of man
or just a person's life
life support

there is a man of society
within the framework of some social processes
legal support

and so if we are from the structure, then this system
we highlight the structure
actually, there are no legal acts
then we see what happens here
the control system is like this
that here are the acts themselves yes

it's possible, as it were well just highlight them
and somehow further subdivide it
on the structure of Eternal development
structure for ensuring current levels there
or there is a comprehension of past parameters
life management

and here everyone can highlight
as if in my own way
but there is a standard value

and if, for example, we don't do it
is deep jurisprudence there
but we want to use the mechanism
or engaging deeply
and we want to use the mechanism
this kind of science in terms of Eternal development
OR is there a factor of Eternity?

then we can highlight here
it is human interaction
with the legal side, as it were, and the social side
Well there with the political side with a certain society
in terms of exactly the same factorization of Eternity
any of this size

and it will turn out that, for example, so let's say jurisprudence
this is the level that is integrated
again born from the level of human Thinking
anyway

i.e. where exactly is the structure of Eternity, yes
implemented in the structure very systematically
well, due to the history of development
there are some elements present

civilizations in modern

and we can see here

what if for example we want to make technology safe
we should consider it in approximately the same way
namely the realm of Eternity
and already information from this area as if
which in the form of some kind of light shines on the equipment
creates a certain structure of exploitation, for example Yes
work with this equipment, etc.

and so if, for example, for a person to get healthy , yes
for example, from this management position
we need to make it so that the space

like God
space of Eternity
separated from the space of seemingly ongoing events

i.e. for God the concept of "Eternity"
this is a concrete matter

and here it turns out that in this case we must
for example some mechanism
there the organism is under control
translate into the structure of the Eternal magnitude
as if into the structure of the matter of Eternity

and that's when you start learning
the structure of the matter of Eternity
then it is clear that we will assume resurrection technologies
organ regeneration technologies

although regeneration
it is absolutely often a different technology
if a person does not mean Well as if overcoming
threshold of biological death
then regeneration is a completely different process

but nevertheless
it is the structure of the organism's restoration
here you can see that the main principle of this management
especially during resurrection
this is an absolute level of accessibility
for any Perception

Every person has a resurrection structure

anyone should be able to do this
at any time
at any distance
regardless of anything happening at all yes

i.e. in connection with this, by the way, it is absolutely clear
what for example is resurrection technology
it is a process that must be transmitted
just ideologically
without any kind of retaliatory actions
there are accompanying actions
a person must pass on
as a natural Eternal environment

and that's when a person understands
that the structure of Eternity can be transmitted
like Eternal well as if a phenomenon yes

then there are no actions inside this system

Now, pay attention to Eternity itself
she is perceived
as a kind of static control system
i.e. I am specifically complicating the controls here
Well, in terms of verbal accompaniment, yes

that when you start to see
it is through the word management
this is one level
if there is a complicated system of expression of phenomena there
it's like one control value

if we simplify then we see the other side
like the same medal
i.e. the other side of the coin
is this a simplification or an adaptation

and it turns out that when we, well, if we're not talking about a medal
and about some kind of management system
then all the phenomena of Reality are as if
well expressed
focused on the Infinite Distance
from Human Perception
this is precisely concentrated Eternity
where there are no well as if obvious events

it is a certain quantity that has

there is a factor of calmness
factor of inaction
or some kind of inaction, as if external

but as soon as a person gets drawn into it
then the speeds start to be super high

and by the way, if we have this structure
based on as if well purely as some version yes
hypothetical factor of Eternity
that man believes that yes Eternity is possible

in this case I started exactly with this
what we don't talk about
that the matter of Eternity
and we say that in principle it exists
in general such a factor
in our Perception
it can kind of exist

and we are already making full-fledged management out of this
where Eternity is realized

and in this regard we must clearly see here
that as soon as we highlight
due to such a logical postulate
that Eternity can exist

we highlight the structure of our action
i.e. visualization and revelation of the structure of Eternity
and already management through this structure
it turns out that one assumption is enough , yes
or some version of the development of Reality
like God does

at God's
what version what action
it's basically the same thing

and it turns out that when we start
make management like this
what already from here yes how would we get
actually real Eternity

it turns out that due to
Well as if reproductions of the activity of Thinking

we get the real value

i.e. the world is changing in quite a multifaceted way
and what awaits a person in the future ^{yes}
a person does not always know exactly
but if he learns his own Thinking
transfer
into the structure of real Eternal development
it turns out that it is enough for him to think of something

for example, he can count
what ^{if} there is a person there
somewhere in a cave ^{for a long time}
and then he gets it
limited system effect

then it turns out that there
as soon as it comes to the surface
then the element of comparison arises here
^{well,} the structures of Thinking

and so that a person has ^{well} as if in a cave
and when he already came out

the structure of Thinking was synchronous
i.e. when he had already left the cave
he should in principle
immediately perceive all Thinking
when he was in the cave

i.e., to put it simply, how not to get ^{into} the cave
how not to be limited in space
for this you need to see all the time
open space in management
i.e. ^{as if} a larger ^{space}

and if at a mechanical level, ^{as it were}
and as I said
as soon as he comes out ^{well} there are cavers there, ^{let's assume} Yes
here is an analysis of their psychological state
exactly at the exit
the entire level of action is covered instantly
when he was in the cave

i.e. the first
the first thing he projects in his memory
that's when he was there

Well, any person understands
when he's there even in action someone climbs in
some kind of hatches as soon as he climbs out
immediately the first feeling
which covers the entire period when he was still there
Well , let's assume that somewhere there he was crawling in some such voids, yes

then it turns out that if we
this is the mechanism, well how would we study
from the point of view of the psychology of action Perception
then here we see that God's Action
this is first and foremost
first of all, at the moment of something more widespread
scaled action
we perceive practically what was before
Well as if in a limited version yes
spatial again

i.e. it turns out that Eternity creates
as if a local structure in management

here Eternity is always translating
structure of Perception
in more or less limited at first
spatial variant

and now if we move to Eternity with Thinking
i.e. how to understand at all
that we have moved to the structure of Eternity
how to understand this
that's what I'm talking about here in this case

we must first understand the whole structure
associated with the pre-spatial level of reaction

i.e. a person must quickly comprehend as if instantly
everything related to the level before the transition
Well , there's the astronaut before he opens the hatch.
At first he seems to be thinking
did he turn on all the devices there, etc., etc.

and this is the level of understanding
instant comprehension of the exact absolutely
once you realize the element of precision
here the transition level begins
in Perception

once you get into Perception
into this structure of Eternity
further and further you are already
First of all, there is such a unique moment here
With soul
In Spirit
Consciousness
see the structure of Eternity
in fact, as if it were an external quantity
some kind of spatial one
well, like a characteristic of some field there even
as a field quantity
being electromagnetic fields, etc.

well, that is, it is often not even visual
and the Spirit feels it as a field

and on the other side you are
inside the system

but at the same time when you are
inside the system
you are still here
i.e. you perceive the element, for example, with Consciousness
what did you do to control the transition to Eternity

and when you look from the outside
you see only Eternity itself

i.e. you are in Eternity
you are kind of removed from the management level
to the control level

and it turns out that based on this
Well for example, if a person gets tired there for a long time
all the time the same questions the same tasks
he kind of pushes himself out by the way
in the field of control over the external Eternal value

how to solve the problem at all
we need to get the structure out of control
as if not to be present in the system

then it turns out that you, let's assume, have it yourself
well, that is, let's say you have some kind of management task
then it turns out that the task is completed faster

it seems to bypass the structure of Eternity
by the shortest route
and you can see that the shortcut is the solution

i.e., for example, let's take some segment of a sphere
let's launch into this space of Eternity
and although there may be a long way to go
but here is the solution in Eternity
is reflected as the shortest value
this is another sign of Eternity

any solution is found
at the closest possible distance
to a person to the physical body of a person
in space

for example the space of Eternity is here yes
at a distance of fifteen centimeters
and it has some properties there
there let's assume a development system
maybe this is all external Reality up to this moment

and when you start to see
closest solution systems
you see that they are in the structure of Eternity
and Eternity seems to be further away all the time

it's clear that's how we perceive it
that Eternity is always some more distant quantity

and it turns out that this is such a unique space
which seems to be simultaneously removed

but at the same time it contains a segment in itself
as if not containing it physically
i.e. there is no optics there

there are events here they are also located
at some interval of Eternity
For example there is Eternal Peace
and it is clear that there is somewhere in the Infinite magnitude
The world is developing
but this segment that we see even with our eyes
he still somehow
not that "somehow" but in general he is in this system

but as soon as we begin to see

this is the plane that is being removed
when analyzing the structure of Eternity
this is the real Eternity
which no longer exists as a certain factor
and as a specific value

and now if we start to highlight in the management structure
specific quantities
then in principle, for example, here there is treatment of diseases
becomes a completely non-problematic level
and in principle it works out from there
that it is possible to regenerate tissue yes For example
to do, let's say, the resurrection of the departed, etc.

and it turns out that in this case we act like this
Well, because the structure of Eternity
this is a structure that practically answers
there are all the questions of a person, well kind of potentially yes

and if we want potential action
bring to real
then we get the next level of control

that the real action is there in the very system of Eternity
is already contained as an accomplished action
and here you can see that yes, in the Eternal level of development
in any case, any control values are implemented
That's why
well, let's say it 's of a creative nature Yes

so of course you can highlight it there
information segment
which suits you specifically

and based on this you can get
solving your own problem in this way
what if you want to do management and get
Well, it's not necessarily only about resurrection there
there is complete regeneration
this is like one of the private tasks
having, in general, equal status for Eternity

any quantity is equal to the quantity

and when you start to consider

factor of one's own presence
in this value
it turns out that you are kind of
well, in place, i.e., as if in a motionless state or something
at the management level

nevertheless, the management is carried out very intensively
Well let's say there's news on TV
but a person may not watch them at the same time
and do your job, etc.

i.e. it turns out that the situation is like this
what if God does management while being at rest
with all the elements of Reality
then being in the real system of Eternity
it's like a feeling or a real value of peace
this is management

and then the person is really there
in the structure of Eternity
which determines its next period of validity

i.e. it turns out that the next action
this is a derivative of the Eternal quantity

this is what I came to
that I started as if with some kind of conditional positional series yes
management well in general it looks like this

that for example we believe that Eternity exists

and came to the conclusion that this is a positional value
which practically determines the following
any next action

By the way, this is the connection on optics
she literally and I'm just pointing with my hand
where optics are expressed

and [...] the word "for example" is here yes
for example, we believe that Eternity exists
Well for example We consider any other
that in the fall such and such a leaf will fall from the tree
and will it fall or not?
I still have to see this, go to this place

and in this case we kind of think

and we get control
which is connected with our personal action

and when, for example, there is variability, as it were, of Thinking, yes
Well like some kind of probability side or something
which exists at all in Thinking
starts to bring in constantly
the next factor is precisely the Eternal Management
a person gains confidence
in that it is in principle from any thought form then yes
from any property of Reality
there from any object of Reality
can get control very specifically

For example there is a video camera there is some kind of optical signal
I can view the signal at all
and take from here take control of the implementation
because I know anyway
that there is an optical action of this system

but I can take a video camera
I can generally take any segment in the air
and consider that it has optical refraction

Well, as any person knows
that there is an action of light for example Yes
or take, for example, some third tenth
any distant planet
and then I already want to look at the diagnostic level

Well, it's a simple task
how can you diagnose an airplane
so that he doesn't fall there

where to get this light, all this knowledge, this optics
but you just need to look at everything
from comparative quantities
so that Eternity would be sudden
for this system

i.e. we see a local system
and suddenly we bring the structure of Eternity

as soon as we
I showed there a video camera, air, etc.

some third planet
but between the planet
the video camera is here the air is here and the planet is far away
but nevertheless I said quickly
and the perception is almost the same

the structure of the touched Eternity
she was fast enough
to that planet as if

the same thing if I diagnose an airplane
By the way, here is a simple property of equipment diagnostics
it means just to attract everyone quickly
Macroarray structure
precisely the factual Eternity

not the mass of the substance of Eternity
because then you will have influence, well, go to the system
and you will have to do additional management
to get information
because the control level will begin

namely, you look first
that this is a normalized level
you have to define it
in the structure of the Eternal development too, by the way
but already personal in Infinity

and then already attracting the array of facts
what exactly is the factor
as if a wave not filled with matter, so to speak

but this is precisely inter-Eternity
and you immediately see
the whole structure can literally be seen right through

here you can just see the plane
either there is equipment or there is a person
but a person is a different matter
the control level is immediately visible there
and his personal participation

and if it is some kind of mechanical quantity
that is a very useful property or there is a house yes

how to protect your home from terrorist attacks
there so that it is not destroyed

there, for example , from a natural disaster

here is the most important thing then
level of contact
where the house touches the foundation level
Lands
the structure is like a platform connected in projection
maximum degree to Eternity
the whole Earth
and a large array of information

and at the same time the outer contour
closes
on the contour of a kind of spatial Eternity

i.e. we take as if from the bricks of Eternity
we are building a very simple model
as if actually two two-level there
consisting of two parameters
foundation and everything above

and enough in the structure of this Eternal development
take
Well as if Eternity
take it and even turn it a little clockwise
you can see the signal with an interval
there literally a month from the event
what could happen in terms of possible destruction there, etc.

by the way, this is the principle
my crystal systems are working
They first outline the buildings
and then they work on searching for this signal
and everything is as if in search mode

and if the signal starts to appear
In a month it is already clear that the building may collapse
then we need to identify the reasons
is this a terrorist attack or a natural disaster
or maybe the building's design is already like that
let's assume that the building is old, etc.

and it turns out that if we have this structure
as if dynamic Eternity
Should we start unscrewing it? so let's say in dynamics
i.e. we take some properties from it as well
well, not even properties

and we take it and put it somewhere
this segment of information
and it starts working

and here's another reason why it works
as a projection value
in Eternity all the same, all events are Reality

somehow make contact somewhere
Well , for example , they took the foundation of a house and projected it
we see events as if on a canvas
that's all

the logical meaning is very simple
the only, as I said, fundamental level
is the transition to this structure
at the level
Souls
Spirit
management

i.e. you are inside the system
at the same time, she seems to be
you should see the system properties there Yes
it's clear that there is living Eternity there
she takes you and takes you out of the system
at the same time the output level is not visible
God is present there

that's when you don't see the level of action
then this is God's action

because you can't see beyond the Action of God
as if Well as if they should not see but it is considered

but at the same time God gives any knowledge
like, well , as much as you want
you can see how you were even taken out
from the structure of this array of Eternity

for example, there is a matrix there and there are N dimensions of some kind
how to take one parameter from here
there is no way he would be well as if not noticeable

if we take it there with an eraser we will erase it
it will be visible yes

so we can take this element too
set a completely different value
at least mentally

and it turns out that a different meaning has a different content
this is already a different system

and it turns out that in the World, besides man, if so,
a person cannot be given a different value

and in general to any other system
it is possible to introduce a system of action of another type
Man is created in the Image and Likeness of God
it cannot be modified

and by the way, in the forecast you can clearly say
that man does not change under any conditions
there are developments in cloning systems, etc.
it means he is absolutely protected
in terms of modifications there

i.e. the concept of different "mutations" there
This is usually a local action
which is treated there, etc.

and when we do this well like a matrix
this is a conditional value
you can take any plant there, the same leaf
and make sure it doesn't fall there and is green
and there it grew somewhere in that place where there is no influence of
autumn , yes
evergreen option

i.e. we can do the management like this
that we ourselves, as it were, bring this management to fruition
to the level of own implementation

i.e. Eternity of action
this is how it can be brought to the level of implementation

when your action is like this
that you can act
Well as if Eternal amount of time yes
it is action

and when you start Eternity of action
for example, you set a task

and you need to do something

it is clear that if your action contains
as if the Eternal number of elements
then it turns out that you achieve control in any case
although time may be limited
i.e. time is not Eternal, ^{yes} in this case

and Eternity of action
at some local specific time
there's a second there ^{for example}
leads to implementation

which means that you have to participate
together with God
with other people
in action in general as a whole

here it is taking shape
it is the role of social processes
when, ^{for example}, society understands
your actions
when he doesn't understand
when it supports there or it doesn't support ^{there}

so that society supports your actions
it should be in the same tasks

and ^{how does it} turn out that in modern conditions ^{yes}
there is a possibility of global nuclear destruction
and this is really a possibility there
everyone knows

so that everyone can participate in this
someone made a device
someone there in the form of Green Peace participated there
somewhere in some action
someone there, ^{for example}, is engaged in the technologies of my Teaching
but with all that
everyone has the right to do whatever they want
as long as he does something
so that the Earth is not destroyed

and here is where the element arises
this is the center of attraction ^{in the systems of Macrosalvation}
the center of attraction for the real Salvation of civilization
it is the level ^{of concentrated Eternity}

already expressed in event form

and that's when we move on to the level of Macrosalvation
then Eternity really does pass
into the event structure

in all other cases
Eternity can be
namely the structure of the external quantity

and here by the way on optics
this is even very clearly visible mechanically
what is light localization
the light becomes brighter and more concentrated
and we see that the structure of Eternity
she is, in general, that real value
on which the position of, for example, Macrosalvation is built

i.e. in ideological form
Eternity always has a material basis

By the way, here is an interesting property of Reality
very unique now i showed
It is in ideology that Eternity turns into matter

if we want well there to pour out 10 grams of Eternity
somewhere in a pocket and let's assume take it somewhere
we should be then
very ideologically stable people

otherwise how would we have
just information yes
so but but in order for us to get
the substance of Eternity
Well, there, for example, we got ideological stability
we got some conviction
Well, it's just our personal choice.
we decided to live forever
Well, that means there is substance, yes

then we need to do this
so that some elements there mechanical elements there
some microsystems were Eternal
we took this substance there too
Well there they sprinkled a little bit there
and decided to test the properties of the substance

i.e. we received the Eternal substance
and decided to extend it mechanically

it turns out that this is where it all comes into play
fundamental as it were Well, is that a problem ? Yes
in the history of the development of civilization in information

that another substance is not yet synchronous
in terms of similarity with humans
at the level there may be remote action
at the level of even, as it were, Perception as for a person, yes
elements of Eternity or something of Eternal development

it doesn't seem to react to it at all
for him it's also like just information

that's the difference between
a system of the external world that is not formed
and which already exists

and it turns out that at a remote level
so that this object is synchronous
or there it developed in the same amplitude with a person
in Eternity
he must be
or it means in a system of complete control
from a person
Well for things it's quite simple yes

or he should
as a rule, those who are in complete control
they still go into the system
as if an independent level of co-development

this is precisely the principle of co-development
the principle of freedom of action and freedom of expression
Well for some systems it's very simple
and it seems like there is nowhere further than this level
there is some development there

for example, there is a table there, it is just a table
can he develop further?
there are other shapes of tables

but it means in human perception
maybe there is a chic table there is a unique table

again again in Human Perception

and by analogy we can seek from God
where is the development of humanity
i.e. we have already found the path of development with God
by comparison

He sees a man
and here is His path of development
it is clear that this is Eternal development

because only such a substance exists
in terms of the structure and development of Eternity

i.e. we have come to the substance
which God Himself produces

By the way, this is the first time I'm saying this
that such a level really exists

all matter is produced by God
but it is God Himself who gives to people in its pure form
the structure of such a substance as Eternity

when do you start to see it
you find the presence of such a substance
in the elements of Reality

By the way, the substance can be isolated by physical means
if you know this property of matter

and if we for example Well, there's a piece of substance there
we'll take it there
and suppose we scratch it out there, for example , with a needle, it means conditionally
from some larger array
then the question is this
what will happen to the other part

Firstly, the structure of Eternity is such
that integrated exists property
God is Eternal
and first of all nothing will happen

we just get this structure
but so that it is as God does
we need to get this structure
without changing anything in the substance itself

By the way, I have a discovery
in the "Creating Information Area"
that means that I'm showing it geometrically there
that in any thing
Well, here is the plane of the table
or take any square centimeter from here
there is a point of creation of this Reality
geometrically it is calculated

and here is this reference point
by the way, here in crystals
I use these reference points of my own
specifically in patent systems
where are they
namely the structures of light reflection

because the point of creation
it's always some kind of stock

no matter how the light flows
he always hits that spot

and by the way, they are very clearly visible on the geometry
these lines
i.e. it is enough to put it in ultraviolet light, for example
and it's clearly visible

First, for example, I calculated it mathematically
showed the point
then I turned on the ultraviolet light
and exactly in these right there literally to the micro level
this light gets in

it turns out that if we, for example,
by the way, when diagnosing the same buildings, yes
to determine
Well there is a possible explosion or terrorist attack there
or just building clearances

we are then in the building as if in a contour, yes
we just have to find this point
as in a whole object
and that's all

and when we have this point
then the operation of the device is generally simplified

what does the device do
it's just a reference point for the device there
or microboard or crystal
fixes one other point
it's a solid line
not like some kind of a re-upholstery , yes

and it turns out that it's enough for them , well, for someone there
cling to this constriction
everything is visible at once

there is no such long scanning there
and the devices themselves are therefore simplified
which are local to the periphery
these modules are given away

they are quite simplified
and because the system is simple
and mathematics describes exactly the simple version
it happens often
that simple things are actually effective yes

i.e. everything is often quite large and complex
It is described very simply

and based on this we are already moving on to that
for example, when we talk
about the Soul of man
Yes, it is a complex concept.

but there is a human soul
where there is ease of transmission of information
simplicity of actions and naturalness of actions

i.e. all people walk and the most simple actions
are performed as Spiritual actions
but Spiritual high-spirited actions
they are simple, they are simply recognized by people

and at the same time the Soul contains
a huge amount of information
to perform a highly spiritual action

but a highly spiritual action
it's quite simple
for Perception by Other People

and it turns out that if we ^{assume}
this is the information factor
's get started ^{how to} correlate compare
with external Reality
then this wave of Eternity
it is clearly separated
from the state of the human Soul

i.e. a person always determines the external system
The spiritual man is there the Soul of man
it is always the control level

and the structure of Eternity there is the information of Eternity
there is some substance of Eternity there
it is always an external system
except when the substance works there
^{well} there for creation
there you can add to the metal, etc.

I just had a research paper once
In 1991 I worked at TashKB
there is such a material AMG
AMG ^{is} a special alloy.
and it is used there in space instrumentation

and so that the laser there are the first experiments
didn't burn through
we added it there
specifically, as it turned out
it's enough to add it in one block there
additional substance
and the material as a whole holds the laser

^{Well,} the laser spreads in a spotty manner.
although the general beam but the spots are chaotic often fall

regardless of this chaos, ^{as it were} Yes
it is enough to calculate one place
add this additional material to the alloy locally
not cover the whole thing with some kind ^{of} protective material
and the alloy still holds radiation

i.e. physically, ^{as it were}
^{well,} practically I just worked a lot on this topic
for protection specifically from super-powerful radiation

physically it turns out that it is protection
i.e. as if in the plan of the creation of the Eternal, as it were, material
not in the sense that it
it is the same material AMG
it's actually quite soft
but as if creating dynamic functions
static system

and this element as I said in the matrix ^{yes}
make the shape change
you can even keep the same shape
but to create dynamic functions of a static system

and that's why when we look
to the outside World ^{and} to the external Reality
then Macrodynamics i.e. ^{well} any dynamic processes
which ^{means} they exist in this system
this is a static manifestation of God

that's why the religions there are completely different
but there is only one God who gives
all the information ^{and} all the knowledge
i.e. the One God the Creator ^{means}
That's exactly what he shows
^{as if} a different level of perception

that's why different religions appear there
different structures of identification with Eternity

even depends on regional levels

basically the more fundamental religions there are
all the better, at least there will be as many of them as you like

the question is what
^{well} the most popular ones there are those that do the management
the main thing is that there is a principle "thou shalt not kill" ^{yes}

i.e. it turns out to be a spread
this system, ^{well} there in Infinity
and we see that in the future
at a level ^{that is} even, as it were, religiously integrated
everyone there will have a nation there or a region
some kind of religion of their own
or integrated it doesn't matter

the main thing is that there is unification in the plan

faith in Eternal development
namely faith in the Action of God
it was still a level
real Infinite development

that's ^{what} 's needed for Infinity, apparently
^{so} even from here certain sometimes
religious actions
or religious level
religious status
which may often not be reflected
as a religious status by the person himself

and generally speaking in the structure of the future
any person on religious status
there is a level of Perception of Eternity

and at the same time, ^{well}, even if the person is an atheist, ^{yes} For example
however, there is a certain wave
^{like} this soft light
where is the level of personal faith
or ^{there is} an integrated religious faith
into the structure of future events
provides a supporting structure

where is the form of Eternity or factor
some factual form
where the substance has not yet been identified
carries precisely the structure of conviction
^{Well} For example there's an action of God
in the correctness of God's Action, etc.

and it turns out that, in essence, by and large
it doesn't matter often
externally ^{there is} some kind of factologization

the main thing is that a person must live
^{there} be happy to be healthy to live forever
and what does he think there ?
^{Well}, of course it should be creative
and ^{for example} how is it there
what religions and scientific directions are there near it
what kind of society does he live in
^{Generally speaking}, this should not be a matter of principle
for a person

^{Well} in general , it's fundamental for him

Well as if for some kind of universal person

that's from the point of view of the constitution
She is the one who defends this right
yes any person

and based on this we will see
if for example there is a Declaration of Human Rights there
in general, such a national international level

then here we get this integrated thing
Well let's say the substance of Eternity
it is quite clearly manifested
in the form of incidentally the actions of individuals

Well for example, we take and build
some kind of model problem or something
we take a piece, a grain of this substance
and through the Declaration of Human Rights
we pass it on to the person
Let's see where it will lead us

Well, constitutions are created
some kind of system of development of Reality is being created
and we see that the structure of Eternity
this is the level of development as such
in terms of precisely expressed personal development

i.e. personality when it develops
sees before him this structure of Eternity
as if he is certainly aware
this is what a person is aware of
here we are exactly
by the way, how does space realize

and here it turns out
what is the local manifested level
perceived
as some kind of external standard, as it were Yes
Reality

and very important
that from the point of view of distant events
by the way, a person is always in control
your own actions

a person has a level

allowing him to always see
strategically distant events

by the way, through this structure
objectified structure of Eternity
through the substance of Eternity, as it were
through confidence there in the future Eternal development there
it doesn't really matter
through religious principle, one's own practice, etc.

By the way, in my own practice, the support systems are like this
that a person can quite see
sustainability of processes in the future
because he practically already did it
some action ^{yes} he accomplished an event
he is confident in himself
and this is also , in general, a very serious status in management

and if a person does management
as for ^{example} God does
He also equalizes all future and past events.

and for this He must be Himself
at the level of complete knowledge
due to past ^{events} and precise knowledge of the future

i.e. God knows future events as well
how does he know the past exactly?

and based on this we can clearly ^{talk} about that
that the more concentration we achieve
in the structure of past events
as if a bright glow were brought together into one point
the more precisely we ^{seem to} control it
future events
Well, this is a logical factor of control.

at the level of the Soul
if we are talking about some disease there
or ^{let's assume it means} at the level of the Spirit
when you need to heal quickly
some disease ^{there} in another person ^{for example}

if the person himself is healthy
he can improve some events there dramatically

this is exactly the structure of interaction
where are the past events and the future
somehow they interact
this factor disappears

i.e. the past often remains firmly in the past
we don't need ^{the} previous design
a healthy person is needed

and then it turns out
that's where it comes from, thanks to the powerful output ^{there}
structures of Eternity
God turns out to have cut off ^{the} structure of the past

but mechanically, how does it work?
the light that now exists ^{yes}
and what does a person remember
these are basically different things

why does light have such properties
like now
if the structure of past events
was not physically cut off
then it would have different properties
it ^{would seem like} a train would stretch out ^{yes}

a person can sometimes think something through
and a trail of past thoughts stretches
as a certain light ^{that} touches the past
and at the physical level there was a cut-off

it turns out that
^{Well,} I explain it somewhat mechanically
but to see it here
namely the speed of movement
this is the magnitude of Eternity

i.e. Eternity turns out to be big, ^{yes}
^{seem to} have any outlines
but God shows

what can be used as a tool
local having a specific surface

and when you start to see it
super speed of cutting ^{off} the structure of the past
this is a very powerful element

self- in general, even healing

here in some very difficult situations even there
in case of some kind of fast-moving problems there , yes For example
there Well, sometimes in a taxi a person might eat something wrong
there is some poisoning there
need to react very quickly yes
or a bite from some poisonous animal , etc.

so here is precisely the structure of the work
this is the characteristic of Eternity
information cutting off precisely cutting off
so fast
that the information does not have time to come into contact

i.e. you basically don't even touch it
at the level of some kind of action
the information is simply not being implemented

here here here
this level is very important
and the use of this mechanism
by the way, it allows for very mobile control
a group of events even events
which are generally considered to be insurmountable

i.e. for example a conglomerate of events yes
is considered logically impossible
there is no way to change them in a short time
it would seem

but due to what you introduce into the structure
such a super-powerful and fast-acting Eternity
it turns out that you can correlate events there
and save a very large number of people there , for example

or do it so that, for example , the house there doesn't collapse
if you have time to do it there or you have time
yes , work with him

but in principle, each of us
when engaged in management
still responsible for any home

and still you need to be able to work like this if possible
so that nothing is destroyed as if on
almost at a background level

i.e. if we consider that we can control
that any brick that no one needs at all
and it can be controlled so that it does not collapse
the whole system is already stable

Eternal development is generally realized
in technological terms there
or from some things
and then another level of action goes to the person
then he is more confident that he lives
it's not enough that, for example, even if he himself can do it, yes
live forever technologically
then the external system becomes controllable

at least due to diagnostics there
waiting for system action
the house will collapse, it won't collapse
there will be some problem there won't be

but he can still manage in the future
system due to Consciousness
but that's another factor
it is up to each individual
should i manage or not

but the most important thing
that it is still Macro-creative
management is always an act of assistance
to the neighboring person always

i.e. we will under no circumstances this person
we don't go around
otherwise, control simply does not take place
because he must benefit
from management

that's what God does too
why does God really always give Eternal life
He gives Action and action is always help.

and that's when you start to see this structure
then we get the factor of Eternity
i.e. in general, even a certain area of Eternity
which gives control

and when do you start to see
this is the property of Reality

that Eternity is also an accelerator by the way
your action of any
this information can be extracted and accelerated

moreover as I said
you can just think it through and get acceleration

then you can see that in the Eternal development
even structures that are not declared
as systems of Eternity
but you just kind of thought them through, yeah
either they came up with something there or they just perceived something

they are a powerful factor
real Eternal development

as soon as you understand it
you are starting to implement these technologies
everyone consider this to be additional
quite a powerful method
which guarantees
even in the conditions of a kind of absence
targeted information

real Eternal development

and this means healing
it means just normal calm
there is a happy life of a person

This is where I end today's seminar.

Thank you very much for your attention
