

GRIGORY GRABOVOY
The Teaching about God
Health system
21.04.2004

Hello
the topic of my seminar today
This is my Teaching about God
Health system

in this topic i show
technology of knowledge of the Action of God
when He heals and at the same time recreates Himself

in this case, first of all it is necessary to apply
this technology immediately specifically for yourself
i.e. when you do

let's assume some recovering level of management , for example
it turns out that during recovery
you get in recovery
i.e. at the very level of recovery
therefore, the following concept is applicable here
how exactly is "recovery level of recovery"
when you separate a word from a sound, let's say
and then you get what you get right away
into the system of the Spiritual level of knowledge
in the process of healing

i.e. as God does
When he does the management
for example, based on the level of one's own health, let's assume
then here the action takes place aimed at that
that when He gets well
then everyone around gets healthier

and therefore in this technology
you can see a very simple principle of healing
when you are already at the system level
you can restore
let's assume the health of others
and your own
simultaneously

i.e. here you need to pay attention

precisely the simultaneity of action
in your healing impulse

so when you decide for example
event management issues in this case
a kind of binary impulse right away
sometimes the impulse develops
to the Infinite level of information
when your health is also the norm of events

therefore it is necessary to consider
management position in this way
what are you forming
how all the events around you at the same time
as well as the status of one's own health

it turns out that you have to
in the system of Infinite number of events
find your own health on the information actually
i.e. at the level of one's own Perception

and it turns out that here you are
except for direct control action
you can also additionally apply the search level
i.e. you see yourself in a healthy state
and at the same time you create health events
it turns out that this is already the second criterion of management

there is also the following control criterion
when you see your health level
in any event as your action

i.e. considering
for example, an action to improve the health of another person
or generally speaking just any action
you see in the so-called reflected systems
that you are healthy

i.e. it is not necessary to observe, for example, yourself in this case
but you get enough indirect information
doing let's assume some kind of control
You see at all levels of management that you are healthy

for this you need to have a special one
as if it were the level of one's own Perception
to be able to see yourself
in all manifestations in a healthy state

for this you need to consider the level
when god makes health
First of all, it makes everyone healthy at once.

then to each one separately
and it turns out that this is how it is formed
His own health

i.e. for God
any level of deviation from health
this is a value that concerns Him personally

and it turns out that if you, for example, make management
in the same way as God does
you should consider
there may even be the most distant signal
which concerns your health

i.e. this is first of all
if someone somewhere is not healthy
even in the Infinite level of information
you must identify what specifically concerns you

i.e. in this case we are talking about
what you need to identify
level of own health
in fact, at the level of strategic, i.e. further management
and identify what is the cause of, for example , that
that you are a healthy person

i.e. the very reason for your health
i.e. what is entrusted to you, for example, yes
and when you do the management
then what is your task?
here's a specific situation

for example , we have gathered in this hall
we need to make sure he is healthy
for example, some level is quite large in area, yes
some kind of there let's assume the country was healed

and then if we start, for example, to do management
so that people in Russia are healthier
or were simply healthy
then it turns out that we must identify

the structure of personal tasks in this action

i.e. to see as God sees
see your own knowledge system
aimed at improving health

i.e. technologically at the level of Consciousness
we must perceive absolutely clearly

some one reason at first
and exactly the one that concerns you personally
i.e. i.e. in principle it turns out
that this is a personal matter for a person

and when you make such a design
at the level of understanding the action itself
then it turns out you do the same as God does
you make management directed primarily to you
identifying your own task on your own , basically

i.e. God gave freedom of action
so you identify this task
then in the Infinite level of manifestation of any action
you see your own health status

i.e. in this way you have already formed it in fact
and your task is only for the sake of it
to be able to project these further already
from the area of, for example, diverse manifestations yes
your health level
direct it towards yourself
i.e. on your physical body

then it turns out that you form
status of one's own physical body
and it turns out that in this action
you are again dealing primarily with yourself

but later on when you start to approach
closer to yourself
you see God in action
i.e. the closer you get to yourself
on information
the more accurately you see God's Action
towards you

and when you start to identify

my personal reason

i.e. you are, for example, one level of management
and God as multidimensional, i.e. universal level of control
then you see that God gives you knowledge
including in your physical body

i.e. if you look closely in this case
to the physical body
and look at yourself, for example, through the Eyes of God
then you can see

that you have enough resources
even in the primary action
i.e., for example, without studying any long-term health courses there
and already in the primary action
you can identify your own health system

then it is necessary that diverse areas
merged as if into one level of Perception

i.e. now I do management all the time
around the fact that there is a multidimensional system
and there is one level of Perception

and I'm trying to get to that point
so that your every action
was a healing action

i.e. if a person learns
for example in the structure of any action
get your own health
it turns out that then Eternal life will already be
in general, it's just a personal task
when a person is just on everything
sets this task and carries it out
i.e. I again lead to the fact that there is a task of the individual

after all, it turns out from this point of view
Eternal life is also a task of the individual
because in the Eternal level of development
a person will always reveal
the very reason for management that interests him

and when you start doing management this way
i.e. even just thinking, for example
it turns out that identifying the cause of management

i.e. that's why you make the controls immediately clear
i.e. there is a task
but at the level of the Soul
and at the level of the Spirit
or at the level of Consciousness
simultaneously
does this reason coincide with, for example , that
what God gave as a management goal for example for the Soul

i.e. in this technology
it is necessary to separate very clearly
exactly the level
Souls
Spirit

Consciousness
physical body
when we have complex, i.e. harmonious health
it turns out that these levels should correspond
according to the purpose of God's management
i.e. you need to look
that in each individual case
God set before man

i.e. the task of the human body, the physical body
task for example level of Consciousness
exactly that level of Consciousness, for example
which is aimed at Infinite development

i.e. if we highlight this particular level
then it turns out that we have a management status
when you have for example
tasks of the Soul and tasks of the Spirit
implement for that
to have a healthy physical body
but at the same time the physical body has comparable tasks

and that's when you get to that
that the physical body can have tasks
comparable to the task of the Soul
do you understand that the Eternal life of the physical body
this is the norm from God's point of view
because for God it is a single level of control

and that's when you, for example , understand this
then it turns out that you provide
Eternal life of the physical body

because the Soul has Eternal Life

and when you are already watching
how does this action happen at all
it turns out that this action occurs technologically
It's actually quite simple

i.e. the coincidence of God's purpose
and the goals of each level of your personality
at the level of Infinite Control
this is what you provide
namely the Eternal development of your physical body

i.e. when you are a physical body
provide the structure of Eternal development
then basically you get
already local control systems

i.e. you need to restore
let's assume some level of our own health
and you can do it
at the level of predictive management, for example

i.e. at the current time if you are doing management
but for example the level of action is that
that you are always healthy
God does it this way
so that a person has the opportunity
be a healthy person all the time

it turns out that the level is restorative
this is the level of managing future events
and when you do this control, for example
then it turns out that you can
constantly restore another person or other people
and at the same time have, for example, the status of one's own health
but you don't have to
do health improvement all the time
as a level that is directed
on the process of treatment, for example

after all, recovery
This is also the level of event management
when you decide
tasks of the Soul
tasks of the Spirit
Consciousness

and in this case it turns out
that you are actually improving the information structure
i.e. you do the management
from myself towards Norma
and it turns out that around your actions
virtually all external Reality is being healed
or is there an internal Reality yes

if you have perceived the plant at the level of reason
i.e. the plant is in your Thinking
then you are healing the plant with this action

and it turns out that the healing process in this case
flows harmoniously
precisely in the general process of healing

i.e. you are not only taking care of yourself
but also according to the fundamental Law of God

you consider any level of Reality
as a level that needs
in your action it is the Norms

i.e. if somewhere the same plant
needs management Norms
you then have to actually restore yes
for example, the norm of functioning of this plant

but then you move on
to the structure of understanding how the plant is generally structured then

i.e. it turns out to be a general health norm
this is an understanding of the process
in the current time

for example, a small period of time passes
and then the technological level of control
may be different

so here the main thing to understand is
how your own action
coincides with that
what is in the world and how it is arranged at the moment
and how you can help this
action

precisely in harmonious development
towards Eternal development

and that's when you have this very root of control
what exactly is Eternal Development
you start to bring it out to yourself
then you see that your Eternal Soul
i.e. your Infinite Spirit
forms your local physical body

i.e. it is clearly visible here
namely the technology of body formation
your own systems data from God

it turns out that you can
at the level of Consciousness
observe the interaction of Spirit and Soul
to shape your body's health

when you realize it
then it is enough to be in this state of understanding

at the same time you are healthy and you don't have any diseases
and you can completely heal others
only by understanding

i.e. this is a very simple situation in general
God who can give health to everyone
He may not deal with each one in detail and locally, for example.
He may simply be in a state of some kind
well for example in the one where you can
also by my own efforts
seeing this state do the same actually

i.e. you can
aware of all external Reality
and seeing how your health is
how do you personally shape Reality
This level of healing can be passed on to others

i.e. now we can
to conduct a specific practice of this type
in management

you will perceive all external

Reality signals that concern you personally
and make it so that this level of control
was aimed at the health of all other people
and at the same time on your level of health

i.e. yours is kind of passing
through the universal plan of Salvation
but there you find yourself

i.e. in this way we can fully distinguish
your health structure
and if we need to do so
so that, for example, there would be no explosion at a nuclear power plant
then we can very well
according to the Health Norm of another person
generally speaking, to make such a situation
so that this explosion does not happen
i.e. to implement the structure of the Norm
health of another person

i.e. the level of health
it is understandable enough for a person

and when you do management for example
towards Infinite development

then it turns out that you can do it
for example, considering again that
that at this particular level
there must be a Norm level
then this is the nuclear power plant system of the nuclear power plant
enters the system simply Norms
just like the fact that some blade of grass is in Norma yes let's assume
any object of information in the Norm
towards Eternal development

then it turns out that you only need everything for everything
how to listen to your own health system
i.e. this is essentially a control diagnostics
where you simultaneously do management on rationing
just reacting to everything
on your own status Norma

and when you, for example , make control from here
then your personal affairs
they are often resolved much more quickly

because you perceive
more global tasks in civilization
generally speaking, locally, for some groups, let's assume
or does an individual have it?

for example, a person decided to do some work
and he needs to add health
and this is a pretty strong level for him
it's the same as creating a whole world there, for example

then you can identify this person
and the whole world comes to give him health
here is the one he is just about to create
because the situation is inseparable
i.e. the world , for example, in the form of art and works of art
or in the form of something else
in principle, it could just be that he has this idea
which covers, let's say, the whole world , yes

then it turns out that you get control
to myself already
from the entire level of his potential desire
i.e. if you take into account
this is precisely the personal state of another person
you get a level that is incomparably greater
in the level of precisely the positive effect of the action
but for you

then such a level of control arises
what do you get back
a very large amount of information

i.e. sometimes doing a small control action there
already at the level of benefit or something let's say so
for you to restore your health
you get a very high level
reverse wave of information, so to speak

it turns out the task here is to be able to do it this way
for this whole system to work
at the level of Norma back yes

i.e. you must reverse the control wave
direct in this way
to distribute control by level, for example , to

where else should I add
for example, targeted health management

but here the main task is
and generally speaking for all tasks is
distribute this system correctly
as if for mutual benefit in management

it turns out
because when God does management
It creates health in a single impulse.
generally speaking for everyone at once

and it turns out that here when you start to sort of figure it out
in these communication systems
then it turns out we can see
that for example in the formation of some organ as a healthy organ
this is the level when you can
make the event normalized
in relation to oneself as a whole
if you know how health is formed
for example, one organ or one system

because here we have
after all, the principle of operation is essentially universal
and from this it is clear that it is always possible to recover
if you for example reached there at least once
one controlled impulse
for the restoration of any level there, let's say
or someone else was restored
or got the effect for yourself

but even if you, for example, did not do such management
then it turns out that you can still always be healthy
because you can realize yourself
as a person who understands everything that is happening

i.e. which reacts immediately to everything that happens
and has a level
as for your health
and the level of general health
it is in the Eternal development

I emphasize this all the time here
the structure of Eternal development
because that is the criterion

namely creativity and infinity
your action

i.e. when you act in an Infinite way
you act as God acts

because tracking
namely the Infinite level of control
this is a special task
which allows any of your impulses
have still infinite value

i.e. for example, you don't need to look for some energy there
or come up with some kind of access systems specifically
just one wish is enough
bring into the structure of Infinity
and you get that in the Infinite level of development
your desire for example to restore human health
reaches the norm

but when you reach this Norm in implementation
i.e. the person is restored
you can this same impulse Infinite
bring it to the final system of its origin

i.e. as God does
It may not form, for example, by time
Action
He simply creates a system of events.

and it turns out that for Him, for example, there is no source
where can he get some information from
He should do it technologically like this
to create the information itself

and teach others at the same time
how can i make the same type of control

i.e. in fact, this is exactly the action
well, which is perceived from the outside
this is this is a system of information transmission
this is actually teaching others

and it turns out that based on this
for example, here you can look at your own status
Well, if you as an individual want to consider

what do you need for example in this system
then you should be able to learn from yourself in fact
how do you distribute the management system

i.e. you must look from God's point of view
where is the mechanism for example self-learning yes
embedded in your action

and it turns out that in this case
the body can be considered as an infinite quantity
from the point of view of God's Action

i.e. here is the logical key point
when you can see the action of the final body
as an Infinite quantity

and when you look at it this way
that the action of the physical body
this is an infinite quantity
then further it is clear that, in fact,
any element of the body is also an infinite quantity

and from here there is direct contact
physical body and God

and here is where you start
such management to carry out
it turns out that by reaching the structure of direct contact
you see God creating your body all the time

you acquire knowledge
because you are already working with your physical body, in fact
i.e. your physical body
is in a status of constant interaction yes

there comes a certain feeling of warmth , for example
and you are already deducing this thought
to the level of understanding through logic

i.e. you form your own Consciousness in this way
what do you have
the status of one's own development in one's Consciousness
and exactly like this
that your Consciousness begins to form
your physical body
according to your control impulse

i.e. you can then regulate the action
at a level not simple ^{there} For example
physiological level of control
^{for example,} there is a stream with cold water
you need to take a bath somehow but not catch a cold, ^{let's say}
then it turns out that it can be done
in some other way
go to a sauna ^{there}
but it is possible to form the structure of Consciousness in this way
that you won't catch a cold anyway

and then it turns out that the action of a person
formally it is expressed in this way in general
in the history of even the development of civilization, ^{so to speak}
that a person always actually has resources
for complete restoration of health

i.e. if he wants to do ^{this, for example} , it's really ^{possible}
and will reveal ^{, for example,} these very personal ^{characteristics}
as I said at the beginning of today's seminar
then it turns out that you will be able to see here
that the resource is always there

and here is the identification of personal characteristics
This is ^{generally speaking} a very simple quantity
it's either your own task
which you really need to implement

i.e. as a person you can identify
and myself as well
it doesn't have to be someone else

and then it turns out ^{like this} Well, let's say it this way
it's easier to work ^{yes}

i.e. and it turns out from this point of view
when do you do such management
you just have to justify everything
your task
but already in a technological sense

precisely from the point of view
Eternal control
Eternal development

who, ^{for example,} has been studying for a long time

systems of precisely Eternal development

well let's even assume several months

he starts to pay attention

what is in the structure of Eternal development

there is a certain level of Laws

which actually begin to act as if

to the level of exactly those values, for example

which can be attributed to finite quantities

i.e. if there is, for example, a final action

For example there is no physical body in terms of just action

i.e. a person can show something with his hand, for example

and when you do the management further

then further Action of God for example yes with the same hand

it may be indistinguishable

i.e. if you, for example, begin to understand this structure

then it turns out that you can realize

where the Physical Body of God does the management

in relation to the external environment

i.e. you can see

how are you supposed to do it then

for this you need to understand

exactly why for God

having for example yes One Physical Body

Well , for example, in this case you should just consider

why for God

Action for example His own

and the action of all people

this is a single action at the level of precisely Eternal development

i.e. it turns out that the structure of Eternal development

this is what any value in Infinite development

it is always a quantity that has its own will

that's when you reveal the structure

what is in Eternity

this is the level of complete freedom of action

then it turns out that you naturally understand

what technologically have you mastered?

structure of own recovery

you always can

because you can identify

even just on information

what does this actually concern you in this regard?

i.e. identifying this ^{actual} reason for management
for precisely Eternal development
this is the revelation of your own magnitude
in management

i.e. you can in Infinite action
to identify the entire algorithm of actions of those
and not even just an algorithm
and the whole one can be systemic
in general how can I say it here
that the systemic characteristic of action

here are some very complicated concepts
because here is the personality structure
it intersects
with the structure of the external world

after all, the main task
to grasp how personality affects the World
How God acts on the World

then it turns out that the verbal phase becomes softer
i.e. word and action begin to coincide

and when you start to see
where there is a division, ^{for example,} between words and actions
then you already understand yourself
i.e. their own tasks in this action

because besides your action
there are still tasks personal tasks in your action

i.e. ^{for example} you go to the store
but at the same time there are internal tasks
tasks of the Soul that may not coincide with that
that you are going to the store

or do you act
at the level of your own management, ^{let's say}
but at the same time the internal deep tasks of the personality
they may be different

i.e. they are in sync with what you do
that's what you do

but at the same time you think about something else
and you can do something completely different at the level of the Soul

i.e. directed, for example
to solve the problems of Saving Civilization , for example

then it turns out that your internal action is yes
Action from God actually
you start to feel it

what is Action from God
i.e. the external form is what separates
your personality for example and the world yes
and your very Spiritual action

then you see that the status of general health
this is generally speaking your norm

i.e. you just have to enter this Norm
at least for a few milliseconds
you can make a very large number of people healthier
there you can completely recover on your own
if you for example are just tired yes
may you not have any diseases

i.e. the question is only
that you begin to see where your personality is
begins to actually influence the outside world
and at the same time your own inner world is formed

i.e. the inner world
as a constant level given by God
and inner world
which is practically revealed here
as the level of your own task
i.e. you see how your inner world is formed then

i.e. at the level of feelings , for example
at the level of your own management
at the level of your own tasks
you start to see
how can it be formed
all external Reality
and at the same time create a controlled inner world

i.e. the system of intersections begins

with what you do
and with what you already had from God

and that you can, for example, also from God
but get it in the form of a manageable level
and through this level already realize
primary structure
what was given to you initially

i.e. the level of comprehension of knowledge
when knowledge gives your True roots
from the point of view of development from God

i.e. to see God through the eyes of man and with personal eyes
and perceive as the Personality of God perceives

then it turns out you can see here
that His Action is directed towards you
it is always an act of benevolence
the action of desiring and doing good

not only wishing good for you
but also doing real good
and in Eternal development
i.e. God gives this constant in time and in events

and it turns out that the task of a person
in some cases
just rely on this constant, so to speak
i.e. to be able to identify
it is precisely this impulse and signal of God, the Action of God
aimed at the fact that you have Eternal development
and you rely on this system

then it turns out
for example, a system for resurrecting people
this is something that they too should just consider
what does such a thing exist
at least at the level of your Perception

i.e. if you can perceive
you can convey your Perception
to any system
i.e. you can restore all systems in this way
which were in the past

and it turns out that in this case
there is a compression of space and time
if we want to understand for example
how can we suppose to make the whole world like this
that the world is ruled by you

then it turns out that the past should also be controlled yes

then it turns out that there must be action
which would lead to that
that it is your action that would not be separable
with the action of the past
i.e. you must be able to influence the past in fact

but since the past is considered to be an expired quantity
in control logic
then here it is precisely in the event plan
i.e. how to check that you influenced, for example , the past

It's very simple here technologically
trace the management structure
for the current moment
and for future moments

then it turns out that if you squeeze it really hard
for example the structure of future events
to the level of the Infinite level of the Norm
i.e. information, for example, is so dense and powerful
that Eternal development is ensured
at least at the level of the Soul you see it

then it turns out that only the current phase of events remains
current phase of events
it is defined in logic very simply
this is the logic that builds
all external and internal Reality

i.e. I have just now brought it to this
that in logic you can see it very simply and

when you start to see this structure
you often don't need this control system
somehow special there for example, to enter the control level yes
or make some strong ones, for example, some control systems
in terms of, for example, concentrations of some enhanced ones

but it is enough to simply concentrate
this powerful logic, so to speak
in the structure of the current event
and introduce into the structure simply the desire for universal development

but then you have to choose personally
you must decide for yourself
what is your desire
Eternal development

when you enter this desire
into the structure of the current practically unified time
where event and time are a single value
you get a solution to almost all issues
including often a very quick solution
your personal questions
and for health
even if you, for example, do not exercise , i.e. you are healthy
but then your health reserves increase
and at the same time the Norm of events is fixed

Now you do this control
and I will work with you
through powerful concentration
including in this hall
and better in the whole world

here by the way we need to do the management
quite fluent in logic
i.e. logic should be very relaxed and calm
because the management level
comes from the physical body, including in this case

so it turns out that it is logical
you can manage very easily and freely
you don't have to concentrate too much
to get the original or the desired action yes
initial from the point of view of the outcome of the Norm
and the original from the point of view of the management objective

and when, for example , you start doing such management
try to see how your logic
at the level of a background glow
it is very clearly defined in the form of control boundaries

i.e. in this case
let's assume the sphere of control logic

For example there above the man's head
this is a very flexible and very simple level

i.e. here it turns out that you can see
your own logic
at the level of almost just a glow

and then it turns out that you can
from my own Soul
or for example from the physical body
or Spirit

to form the structure of logical development
in this case the backup logic level will be very strong

and then enough in logical thought
just put it in as if
multi-parameter action of your personality
where you are quite on the parameter for example Souls
i.e. the level of control from the Soul

for example, let it be the Soul parameter
level of control from the Spirit
from the body
and from the level in general it is possible to make control of all external
information

then it turns out
that you translate logic into external information

here the transition is generally not noticeable
at the level of even Soul Perception by the way
because it perceives the physical body more
in terms of Eternal development

i.e. your Eternal physical body
knows that it is so
and for example the Soul records the current moment in time

i.e. your Eternal physical body
this is the entire external Infinite World
and the Soul is what forms the current time

and it turns out this way
you can get closer to your Soul
but already as if from the outside

through the physical body
through the Infinite physical body

i.e. having revealed in the structure of Infinite development
Norm
you can see that your Soul
has the whole mechanism of development of your own body

i.e. look at your own Soul
through your physical body
and through everything

i.e. without highlighting there for example thought
without highlighting any special level there

and since the task is again everyone's
learn to do it yourself
as God does
in terms of Eternal development

then it turns out that the task
it is not shifted onto anyone
or at least it is being implemented yes
together with someone
or if there is a technologist there
which is a good technologist in management
then he can of course help

but the problem here is that
to understand your own status
this is how you express yourself
in some specific action after all

i.e. in the action of general development
this is how you express yourself

i.e. for example you made a decision
for Eternal development
some action needs to be taken
then where are you in this action
from the point of view of your Perception

here is the Infinite Information System
in this case i'm talking about
what for example there governing clairvoyance
or there by Spiritual vision

can you see where you are Yes For example
or you can see
where is any object of Reality

but here we can consider such an element
try to see it yourself too

i.e. to see your inner world
which controls the outer world

then you start to see
as for you in terms of the management task
i.e. you see who you can save
already , for example, by any of your actions

and when you start to see
what is the Salvation system itself
it is always a universal system

i.e. just make one impulse of Salvation
and so that it was local
you can't get something like that in general
in essence, it is precisely the general development

for any action is also universal
especially the action of Salvation

it turns out that we have a management level
when the structure of your own action
this is the structure of the general, i.e. universal action
and what about the structure that helps you

i.e. you can see that the whole outside world
i.e. the entire information system and, of course, God personally
He helps you in your action.
your task is just to learn how to do it

those. often in the structure of an action
a powerful technological system of training has been established

so here at this level of my Teaching
the system of education is also a system of action
where through your state
and your action
people can learn very quickly and seriously
at the level of precisely such fundamental knowledge

i.e. the levels of this training can be as follows
that a person through his own level of development
i.e. when he does it on his own
maybe just by personal action show it to another
even without saying it in words, for example , yes
education system

but generally speaking it is necessary
in the long term it would be desirable to accompany this
or in telepathy, i.e. precisely mentally in words
or simply give some designation in the form of words
this action

i.e. in this case it can often be like this
that you just said to someone around you
what how does it work and how does such a system work
one person often enough
if more is much better for the salvation of all

then this action spreads to everyone at once
because you passed it on

in fact, this is the organizing signal
namely, general development

it turns out that identifying one's own status
precisely in Eternal Life
This is the control signal transmission structure
to Eternal development

i.e. to see oneself precisely in Infinite development
and get the right useful information
the structure already has its own action in general
i.e. how to see yourself and receive information from there
but from the future
including the Eternal Future
It is important to follow this here
how do you transfer knowledge to another

and here is the element of knowledge transfer
this is what denotes action

i.e. based on this we can see
that all actions are based on the principle
as if the expansion of space in time

i.e. since God can do everything at once and instantly

that is precisely the learning action
i.e. the transmission of the impulse of knowledge
this is what forms the event

here it turns out as if we are dealing with the inverse value
i.e. not with the fact that we just manage
and we do, for example, some action as if coming from us
and the fact that we are simply revealing the structure of knowledge
let even one impulse of knowledge yes
this momentum begins to increase
and form an event

in this case, well, if we consider this case
as if there were two physical objects there
to make an action between them
we need some third value
enter into control

it turns out that this is precisely the level of management here
this is what actually shapes your event
because you have received the correct knowledge

i.e. obtaining correct knowledge
on Eternal Development

this is the formation of events where you participate

and it turns out that the event
this is the value that is directed towards you

i.e., for example, let's consider, let's say there are even a lot of events there
then your knowledge turns out
you understood some system of knowledge
but this system of knowledge begins to regulate the event

Please pay attention to this in the future
because it is a very simple event management system
as God does
He actually gives the structure of knowledge to others.
and it turns out that an event is formed

and in this case
this is exactly how the collective Consciousness is structured
from the point of view of this aspect of management
It's very easy to see here
what if you for example get this event
in relation to oneself

then you are doing it right in this event

i.e. the criterion is generally diagnostic
for example, you take some independent values in an event
you get from the ratio of quantities
just understanding this process
and from this understanding you get
why some action is happening right now

i.e. what is it connected with
what is it connected with
this is the acquisition of knowledge, for example, sufficient yes
for this action
there by someone or in some situation
or is it still, for example, an action
aimed at Eternal development
but in such a context of the formation of the World

and when you, for example, begin to understand this structure
it turns out that in order to understand simply and correctly
these are precisely the complex processes of the World
you need to be able to simplify them

because in this case the system of understanding
can be very different
and you need to get the final correct control

and often there may not be much time for this
but then you have to go to your time
i.e. time that is stretchable and it is controllable
depending on your wishes

and when you move on already
on your own time management
then you see that the Infinite level of control
you have him too

i.e. you control this time
and you can regulate the situation in events
i.e. time moving to the event
i.e. time where, generally speaking, there are no events as such
i.e., as if a pure fraction of time

once you highlight this structure temporary
then it turns out that you are exactly in the structure where
even if there are two levels yes

event and time for example yes
or event and event
or even the primary moment in time
there is the next moment in time

so here is the division system
if the primary moment of time
this is the organization of the whole Reality, for example, yes
then we get the next time element
it is still every current Reality and Infinite

i.e. here is the level of Infinity
he is practically here
i.e. the level of the Infinite Plan of Events
because Infinity is not somewhere far away
there is no need to go far beyond the horizon to get her

the task is
to highlight the concentration of Infinity
near for example there is your physical body

when you start to highlight this structure
you see that the whole world is arranged often
at this level of Perception so
that these very lines of the Infinite level of control
these are the lines that give structure
Infinite life i.e. Eternal life
just because you are moving
in this structure of space

but since we are engaged in management
and should not depend on any lines, for example
then the task is to form
so that in any system of space
we were in an equivalent system of Eternal development

for this you need the knowledge that you have
transmit very quickly
from the point of view of development regulation
because knowledge of the Norm
They are endlessly folded before you.

the principle is very simple
you understand what you mean now you know
in the structure of general health for example
or there is only for example yours

or just how to act in general
from the point of view of achieving Eternal Health
then this knowledge turns out to be through Infinite action
are already coming to you

and you get multiple levels
increase in knowledge data

i.e. you can next time
give even more knowledge
practically no longer just for one person there
or to many people there
and generally speaking, even if that person
for example, to whom you gave knowledge
you gave even more
even if it is an unconditional action yes
for example, showing how you personally do it

but you can also accompany it with words as I said
for example, you can give it in telepathy
the main thing here is to follow
what a person has really learned
that he can be saved
and he has data on the Eternal development
in this case he can be saved
with just one impulse from you

i.e. not necessarily in this sense
let's assume somehow very long yes for example, to teach
after all, the task is a large amount of knowledge
in order for all people to gradually engage in
namely the technology of Eternal development

and you can learn often
generally speaking there in one action in one phrase
or just understanding the situation yes
even just observing from the outside

so you see
that your personality exists as there as if yes
from a management point of view
from God's point of view
in the outside world
and from the point of view of your Perception
in that area exactly which you perceive

i.e. for God your personality exists generally speaking everywhere
after all, God created you in His Image and Likeness, including

and so it turns out that when you understand this
you see that you are very close to God

i.e. the level and methods of His management
they are generally very clear to you
often they are generally speaking the same

i.e. if we consider, for example, the Perception of God
then at the level of simply human action
He can perceive himself and others in exactly the same way.

i.e. He does not divide, generally speaking
that the man is there for example, created by Him
does something less significant
or less there for example, extended or less controllable
i.e. from God's point of view
a person acts the same way on a human level

and it turns out that this is the lack of separation
between God Himself and man
this is what God constantly transmits knowledge in essence
because He knows
that a person acts correctly, for example
then he transmits the correct knowledge

i.e. knowing that you are doing the right thing
this is the transmission of correct knowledge
logically very clear

from the point of view of how to achieve, for example, this state
then you just need to build it right away from the start
at least make every effort to do so
so that every action you take is correct

after all, the concept of "correctness" is management
for example, you need to do it like this
to three nuclear power plants
there after five years
then it turns out that now they are no longer blown up, yes
in another impulse of control from the Soul
i.e. the Soul immediately disbands this event

and at the same time, for example, you are for the criterion of correctness
what do you take

what is naturally directed towards your personal action Yes
in this action criterion

and it turns out that when you start to analyze, for example,
it is precisely the concept of "correctness of actions"
this is what you simply did in management
through Macro-namely Salvation
through universal Salvation
i.e. it is always correct
act for the salvation of all

then it turns out that it is correct
this is understanding and unambiguity of action
for example through the general level
and what's more, the Salvation of All
and each one individually
moreover, so that each one could teach the next one
to the general Salvation

and it turns out that the more this task develops
the easier it becomes
this term is like "universal Salvation"

i.e. the person does not feel himself
standing under some such powerful level of tasks
but in fact this is his natural level of understanding of the World
i.e. this is the accuracy of control in general

and when you start looking further
what should a person do
then the rest is clear
that he should again simplify the situation

i.e. simplify it so that it is
more accessible more understandable more simple
from a technological point of view
from the point of view of ease of management, for example
well, such a kind of , let's say, wave- like principle

that there is some kind of complication going on, maybe even
although in fact the fundamental understanding of the World
this is simplicity in essence, maximum simplicity

i.e. the more fundamentally you understand
communication processes in the world
the easier it is for you in this world

and it turns out that taking into account
what needs to be done in the Infinite World is
so that a person, for example, does not get tired , yes
so that he could do things constantly
for example , he should have
the system is not just there for personal development now
he must constantly take care of that
at least well for starters
maybe at least take care of it periodically
so that there is a resource for Infinite development

and it turns out that if we start comparing
this work
with the work of God
it turns out that God also does only one-time actions

i.e. He doesn't constantly do what
for example , He has the task of Eternal development
and He seems to do it all the time
as God does every next Action
then it turns out that he does one-time actions
for the transmission of information to people, for example

and when you see this technology
then it turns out that there is a single impulse
he is from the point of view of this action
it is almost equal or so to say similar in appearance yes
at the level of information on periodic actions
and also he is exactly the same
as well as Infinite amount of information
only the size is different

i.e. here you need to see very clearly
how information is structured in general from the point of view of Perception
i.e. simplification is often a translation
on some simple forms of optical systems

i.e. in this case in this technology
namely systemic healing
according to the technology of my Teaching about God

you can see that the form of information
this is an adjustable value

i.e. any informative action

you can simply translate it into the form system

i.e. Infinite development, for example, is Infinite form
but which has, for example, a spheroidal shape
closer to you
and the first impulse can be some point yes

and when do you start
your impulse for realization
enter into Infinite form
i.e. you need to achieve that
so that the action would simply be Infinite

then the local impulse
just translate mechanically
into this Infinite sphere
and that's all
hemisphere even and then Infinity
you don't need to ask any further questions
you only need to select the outer border

it's arranged the same way
the structure of Consciousness of influence on the external World
i.e. where Consciousness generally speaking influences the external World

here you reveal the optics of your own Consciousness
for example , there is a glow around you
there are certain structures
there are such concepts as "biofields" and so on .

in this case i am talking
about the structure of Consciousness specifically yours
i.e. what you reveal in the form of optics
and this structure is often different
i.e. a person perceives differently
and in different sizes
at different times
therefore, this is not about the biofield, for example, as such
although such phenomena naturally exist in Perception

but in this case I mean
what is the structure of Consciousness
This is what is called Consciousness
i.e. we call it exactly as it is in this case

and that's when you see

the structure of Consciousness itself
then it turns out that the influence on the external system is yes
let's say to the outside world or to your inner world
I keep saying this in today's seminar
that it is precisely the inner world
after i say outside world

the thing is that it is
namely, the systems interconnected in this technology
where we often find in this technology
exactly the border

and here is the influence across the border of the region
this is what you achieve by management

i.e. in this area it is always possible to achieve control
if you see for example the border moving
i.e. simply moving the border

pay attention
you don't even often need to track
further action

i.e., the structure of Consciousness has been revealed
you know that the influence goes beyond, for example, the optical phase
boundary
there as if an active faction of Consciousness

i.e. it is not even necessary to identify the structure here
let's assume some other impulse
namely, the acting Consciousness
and you can increase the effect
by increasing the number of simple words in this sense

let's say if you take and say "action" twice
then the effect is intensified
or there ten times
it gets even stronger

you can just go and say "action"
and for example, strengthen the sound "and" with Consciousness
we can assume we just take the combination "d" "e" yes
"e" is the Infinite Phase
"e" is like a letter that is close to the system of Infinity
then it is enough to say "de" for example yes
and goes into Infinite Action

and it turns out that if we start managing
from the point of view of the logic of the information device

then the identification of an already informative constant
here is the one that starts to help you
God gave everyone the opportunity
have an infinite amount of knowledge

then it turns out that you see that this knowledge
they are very close to you
the knowledge of God is generally near you

and the Soul receives it almost all the time
at least she always has this path
receive knowledge from God
and if a person, for example, is set up for this
that's when he gets knowledge

and in this case you can see
like for example to see with the Soul
how does god work
and see how you act
with your physical body, for example

and it turns out you can understand
how is God himself organized
i.e. how is He organized at the level of physical Reality

why for example does God have structures
namely Eternal development
why does he know them
how does he even explain them
i.e. you start to enter
into the interaction structure
and then it becomes clear
that communication is an action of control
external and internal Reality

i.e. often ordinary human communication
gives birth to some events
and it is precisely this dense, as it were, warm communication
when people understand each other internally
it turns out that the event is realized faster

and based on this it is clear that management
from the point of view of action
this is the mutual interaction of all systems in essence

for example people
the outside world
Inner World

if from this point of view we want to understand
and what is the inner world of a dog, for example?

then here we can understand
how does a dog act on us, let 's assume

acting like this at the moment
or why is there a plant
through the internal system of action
located at that exact moment in that exact place
that's when you pass through a specific place

i.e. it is clear that you made a decision and passed yes
in some place
but from God's point of view
for example, when all processes are controlled
what is the meaning of this management
i.e. why did this tree end up there, for example, on the left side, etc.

when we start asking such questions
we see how the tree is given in general
it heals us there , the whole world heals us there, even yes

i.e. because if there is an element of Norm
i.e. the tree is not cut down
then the Norm applies to the whole World
so it turns out that it is clear that there is no need to cut down trees, etc.

and when you start to analyze for example
what is this connected with
then it turns out that this is connected with your personal decision

i.e. you have passed and left the structure of the Norm
the tree is saved
this structure is distributed
to all other information systems
and the learning process is already underway

i.e. God acts in the same way
He gives universal knowledge by his simple Action

and therefore when your action
aimed at general knowledge
you begin to understand from this point of view
how do you affect others

but there is another principle of understanding here
that this is really so

i.e. this is the World that surrounds you
this is really that world
where did you take part in its organization

and when you start to see these connections
you come to yourself very simply
then it is enough for you at the level of internal management
set a goal
and the goal is realized

at the information level you begin to understand
in general how is information constructed
how do you get it

and when you see it
even in relation to the physical body
then when it is also and for example you clearly verify
that this coincides at the level of just ordinary events
including physical

and then you start to see
that the task ahead of you is actually quite simple
i.e. just study this process, let's say, more deeply

that is why in my Teaching I try to give all the time
it is precisely the most fundamental level of management possible
and as a rule, often simple control
it is always a fundamental level as well

and when i well For example let's say I start acting like this
so that through amplification yes there is no sound
through the strengthening of the word
via sound control
i.e. by all sorts of methods except verbal ones
give more powerful control
it turns out that a person often perceives
exactly another form, i.e. a form of amplification

after all, God created the world like this
that for example one level is the primary level of management
this is some local level of the World yes For example
and the form of strengthening is the entire developed world
a person perceives it more
even historically, let's say, it turned out that way

and it turns out that in order to understand
mechanism of development of civilization for example
and know what will happen in the future

to highlight this form of amplification
in your Consciousness in your Soul

and it turns out in this case
the body interacts
at the level of the logic of the development of events
i.e. by giving logic to, for example, that process
what is the development coming from the next action
and having traced how
you can build your own Law in management

i.e. to build, for example, a fundamental level of management
where you fully understand the fundamental meaning
for you at this time

it is not necessary to study all the time
precisely the fundamental meaning
or to focus attention on it
it is enough to select only one level
and you will see
what is the next level of allocation
precisely the fundamental principle of the structure of the World
this is the action when you receive
for example, the first concrete results on management
You already understand that this is systematic

i.e. this is a systemic level, for example, of healing
this is a systemic level of action
where your action is the action of the Infinite
and here there is no concept, for example, of "absence of action"

God, let's assume, also has no concept of , for example, "absence of action" yes
for every manifestation in the World
This is also the Action of God

and when you look
that this is the primary Action of God
it turns out that by analogy a person is always doing something
i.e. it is always in motion and dynamic

and so, for example, to make control
going to the Infinite level
but in such a way that for example you can see
how do you personally participate in your tasks
how intensely yes
how intensely do you help others

here it turns out that there is a
emission spectrum

in the Infinite information of that
how do you even solve your own problems

and when, for example, do you start doing this analysis?
then here is the concept of "simplification of action"
the concept of "simplicity" is that
that you start at the level of multidimensional systems
solve their often simple problems

i.e. to solve, for example, some simple task
you start to enter
into the structure of the fundamental management level

and when you gradually get used to it, for example
to manage at this level
then it turns out that you can already do the management
coming practically from you in Infinite action
through some elementary systems

i.e. you went to the store
you did some household chores for example
but when you, for example, understood the fundamental meaning
then this is the prolongation
as if the actions of the fundamental meaning of the World
She is always present
then every next action of yours
this is an organization of an even more fundamental level

and then you begin to understand
that a person is constantly
generally speaking in this system

i.e. if you need to simplify yes for example action
then at least we need to understand it logically
that he can't be a human being
as if at a simpler level of control
he is always in communication
with all fundamental systems of the World

and it turns out that we just have to do everything
these phenomena are practically simple
well at least use it periodically for that
to regulate the structure of one's own development
management structure from your Soul

and then it turns out that as soon as you go out
on the structure
where the Soul intersects with the outer World

where God actually is
after all, the entire external world is also God acting, yes
Action of God

and it turns out that here as soon as you go
from the structure of the Soul to the Action of God
you see every element perfectly
precisely in its real status
in the status of precisely Infinite development

then you can say very clearly
what a specific person needs to do, for example
so that it is he who is focused and actually performs
the tasks of Infinite development
and was focused on Infinite Development
in every action
and in the case when he acts completely freely

i.e. he can do any of his work
from the point of view of precisely what is meant is creative work
and when you can thus identify this system
it is not necessary for this person
I don't even have to say anything specific

and it's enough for just about everything
give him at the level of even knowledge of your Soul
just for the whole knowledge exactly on that
what should he do next time
and he, generally speaking, is from the outside

can give knowledge then it works for you

and when you for example start to see
not only personal character
i.e. one person transmits knowledge to another person
but also to see that others are all people
they also pass on knowledge to you
and of course there is a level that shows
that God transmits universal knowledge
and at the same time personal

then you see it already in the complex
how is your soul
how is your physical body
how is your spirit
for example your consciousness
how does it form well in general here separately
for example your physical body
as your Spirit suppose forms
the structure of the development of the Soul

i.e. you can see where it turns out, for example here
that where the Soul acts for example
through the structure of the Spirit
but on the physical body

i.e. you can practically consider
all communication systems
and when you already see it
you can very well form complete health
at any level
for example, there in any organ
actually get the information

i.e. action on Eternal development already from one's own knowledge

i.e. you don't need any external information for this
Well, precisely in order to ensure Eternal development
you just need to focus on God's Action
i.e. to see what God is doing , for example , in this situation
and it turns out to do it, for example , simply by analogy, yes
in a specific action

for example, well, just to look
what does God do i.e. learn this process
you can learn it generally speaking once
and then just use it

this is also quite possible

but you can walk with God
constantly improving further

for example, the management level

deepening expanding passing on to more and more people
and this is the path that is, by and large, appointed by God
to everyone

so when you start to see

that you can reproduce any action

from your own level of your personality

it turns out that the organization of any action

this is actually the development of your personality
into the structure of this action

i.e. you perceive any action as personal

This is exactly what I have just brought up
to the fact that this knot is untied in that
that when you identified the personal action
in the outside world

in this case you are from the inner level
perceive any action as personal

i.e. the entire external world

this is your personal action

i.e. you realize, for example, the level of deep responsibility

level for example possibility of assistance yes

and providing real assistance

then it turns out

that you often provide very quick assistance

for example, you can do it now

collective management is simple even in words

for example, according to the tasks of everyone who has gathered in this room

and generally speaking on all the tasks of the whole World

and it turns out that these tasks are tangible

at the level that they begin to be realized

here you can see how they are implemented

in terms of the tasks of the individual

and free tasks of personality

and for this again there is a level of greater calm

i.e. logic starts working again
at the level of, for example, just a calm state

i.e., this is precisely the state of logic, it is calm
and Perception and action proceed as the work of the body
physical body

and then you start to see
that the Soul forms your body
your own Soul
and the Spirit forms
structure your own tasks

i.e. you see the intellectual properties of the Spirit, for example
but intelligence is embedded in your Consciousness
from your tasks
from the tasks of the Soul

i.e. the intellectual Spirit is exactly that
which you personally form

God does everything Himself, yes
and therefore learn to do it yourself
this is a special task

i.e. to give, for example, the properties of intellectual action
or the properties of Infinite Action
just at the optical level

This is also , generally speaking, intellectual
but when the Spirit is perceived
as the structure of life, for example, Eternal life
then this is already a different level of intelligence
it's like an independent status of one's own development

i.e. your Spirit can also develop Infinitely
and therefore the body even more so

and based on this
you just make the control now
exactly
a completely calm level of Consciousness
i.e. you look very calmly
you react very calmly
for all control systems

exactly maximally, i.e. specifically in management
introduce the system of calm Consciousness

and you start working with your physical body
for all its tasks
and therefore according to the tasks of the World
I'll work with you now

based on the goal of further development
after all, the whole World must have Eternal development

it turns out that the action should not be tense
i.e. the action of Eternal development
should be fairly easy often
or generally speaking it would be better if it were
always light and natural

i.e. try to take control out
into a special task system

for Eternal development
example, we just carried out the management
there is a specific result by region, for example, yes
but the task is to teach everyone
and so that people can implement everything
namely the structure of Eternal development
but it turns out that this is a more general and longer task

and it turns out that here you need to be able to
here is this own concentration there in a single action
necessarily extrapolate as if to perceive
level of your personal task
exactly in Infinite Development

i.e. in this case we are talking about
that the ability to quickly enter
precisely in the system of absence
well, like some kind of pressure of information
when you work completely simply
this is precisely a logical task
but the task of the Soul in general is essentially

God gave this opportunity exactly
when people pass on knowledge to another person
and moreover, they often convey it very simply

that's why when we do something like management here
needs to be considered
how to make the action more calm
i.e. to disperse the concentration system
because control is from the physical body
This is often a very powerful system of concentration.

and when you do this for example
then you can, well, by the way, quickly
For example there to cure, for example, the most serious diseases
For example, you can make a remote control
but at the same time, even if, for example, you cure it there
a very large number of people
or make for example Macrosecurity management really
there are no macro-catastrophes happening
then this is a one-time action
going on from the current time

and then your specific work begins
and for example, to apply the concentration system
for this you need for example yes
or do the management again
or, for example, do this periodically

but in this case we are talking about
what is in the collective Consciousness
if there are a certain number of people involved there
even if it's very big
but does not do it for example there is one person there

it's still the education system
God gave everyone the opportunity
master the entire system of Eternal Development
she will be like this
for the sake of this one person
of external control will still continue

and it turns out that here is a sign of this action in general
he's also in that
that God gave the possibility of equality
because equality is achievable
in terms of Eternal development

i.e. anyway, sooner or later there will be a specific person there

which ^{for example} there is no activity ^{there}
technologies of Eternal development intensively ^{there} or at the moment
he will master this knowledge one way or another

but it's easier to master knowledge that is natural
i.e. knowledge that is simple is easier to master
and they are ^{generally} the most natural

that's why this system is exactly ^{like} a deconcentration, ^{yes}
it turns out that such a word can be entered in the plan specifically
that there is no need to concentrate the action too much often

because when especially again I show here
that control is from the body
it is often overconcentration

i.e. there is a process of very strong approximation going on there
to the Physical Body of the One God
at the level
and information
and at a mental level ^{, so to speak}
when a person starts ^{to} think like this
that he sees God always
that's exactly at the level of Soul Perception
that's exactly how the thought is focused, it's concentrated
that man sees God always

it turns out that when you start doing management
^{for example, more , for example , simpler and more relaxed , so to speak}
then it's easier for you to pass it on to another person
here is one that, ^{for example} , does not have the same amount of knowledge as
you

and the easiest option
this is a skill in normal state
constantly transmit a very large amount of knowledge

i.e. in this case, by the way, the structure works
where is the Spirit
Soul
physical body
and Human Consciousness
it is a single value
it is a quantity that simultaneously perceives God
and by the way perceives it the same way

and when, ^{for example} , you start to reach this value

it's often like a glow somewhere on the left side
and the beginning coming from the heart for example
you see that the beginning comes from the heart
this is often just the one level of the beginning

if for example you look at another organ
need to control to transfer the control center
to another place

but you can just look at yourself yes
then any level of yours is a transfer of knowledge
Well, for example, you can translate it to the little finger
simply by controlling action

then it turns out that your hand action is there
this is management
it doesn't necessarily have to be anything at all
i.e. it may not contain
some special meaning there , some symbols there

you just know that you can
for example, to know certain knowledge
for example, the little finger of the right hand there or the left there, it doesn't matter
at all, for example, any level of manifestation
of your physical body
your Soul level
your action of the Spirit

then it turns out that you have
this is the level of concentration
where is the simultaneous Perception of God
as a level of constant Infinite level of knowledge transfer
i.e. you
by the way, you can see it very clearly
as if so, like on a physical level
it's approximately in this area yes
it starts to get lighter , like, well basically a small sphere
the flow increases

if even externally there for example, a digital video camera
fix it so you can see
maybe not all digital
but with special settings there, for example
this value starts to be recorded
which practically says that
what you can Infinite level of personal knowledge

pass on knowledge to others

i.e. this is an absolutely non-stressful state
Here are the characteristics of this condition
this is a calm state
on the contrary, a state of joy
the state of simplicity that all people master
for example, yes, the system of Eternal Development

and when you come to this
this is your True health
from God's point of view

i.e. the ability to transmit
Infinite, well, sort of informational level
Endless simple information
Infinite knowledge
in a state of any calm action

i.e. the joy of the fact that you give knowledge
about Eternal development to others
well, as one of the characteristics of this state

and when you look for example
how does God do it for example
it is clear that the Physical Body of the One God
it reacts to this state
i.e. this level always exists for Him

when you, for example, start to ask a question
and how do you identify this structure?
then ideologically it is very simple

the task of Eternal development
technically it is clear how
i.e. the physical body
Soul
Spirit
Consciousness
in general, all the phenomena and manifestations of your personality
they perceive God in the same way

then it turns out that it is like "body language" and "language of the Soul"
it's the same concept
from the point of view of the logic of Perception
and naturally there are Perceptions of the Spirit, etc.

it turns out that this is a single level
but this is the level of God
i.e. you see God at that moment
when He created you
i.e. you recognize Him

and when you already recognize Him
i.e. you know Him
there are no problems further
then it turns out that you have already received it in words
all information on Eternal Development

i.e. you basically don't have any problems at all then
you can easily make any control
and achieve mandatory implementation

you see the status of Infinite time
but you can achieve implementation
exactly at a controlled time
i.e. the one you put in

i.e. in this case you have all the resources
and in essence there are no special problems in this case

This concludes today's seminar.

Thank you very much for your attention
