

GRIGORY GRABOVOY
The Teaching about God
Rejuvenation by Eternity
24.03.2005

Hello

The topic of today's seminar
This is my Teaching about God
Rejuvenation by Eternity

In this topic I show how
the person who has control
in the realm of Eternity
uses these concepts of technology
in order to rejuvenate and improve health

and in principle the situation here is like this
that to a greater extent it is precisely the context of healing
through rejuvenation technologies will be expressed
when it comes to management through Eternity

in order for this procedure to work
on this topic enter into control
it is necessary to do it this way
what when you consider
For example there is some kind of Infinite level of control
some kind of horizon Infinite

you can actually have this concentration of optics
use in order to have
already more favorable health
or, more simply put, just get healthier
and be able to achieve this concentration of the actual optical environment
use for that
so that health is always normal

because in the technologies of Eternal development according to my Teaching
we have in fact the following type of necessity

that any level of management that exists
For example there is some kind of horizon, some kind of real object
sea let's say river all these phenomena
should give to a person
actually well like energy

i.e. any visual object
must produce a certain effect

i.e. in fact, what we are talking about here is
that we simply translate Perception into action

and in connection with this, when we already have
for example the level is like this
that your Perception is as if a priori
before you even look anywhere yes
gives you an action level
i.e. some kind of translation into muscular movement
Translation into Health Norm
then in fact you get health
due to the fact that you simply live, so to speak

and it turns out that it's some kind of vicious circle
in the sense that you have
practically Eternal health
already because you are created

and here you can see it
how god originally created man
and gave him the opportunity , in fact, from the very fact of creation
already have practically well Infinite development

this is a very interesting point, generally speaking
in this regard one can see
how man is created Eternal and healthy
as if forever healthy

and by the way, here is a simple example in this regard
some horizon yes For example
here you are just looking at some horizon
then you imagine it in your mind
horizon
there is some kind of control point

and at this point you choose the structure
as if of one's own "I"

i.e. look
where you are created by the Infinite where you are created by the Eternal
and eventually you get to that
how god really created you

i.e. here is your movement and contact with God
at some point it's actually level

which is not perceived as a level
or something like the first wave of Consciousness
i.e. this is so natural that you understand
that you yourself are always in contact with God
exactly at this level

if you ask a person
where he always contacts God, for example

it turns out that it is precisely in the structure of Eternal development

because here is a simple, even logical , technique
in Infinite Development
there are a lot of some elements
Well, completely different, yes as if random
there is God's Action
here the Action of God is expressed there
where there is practically Infinite
in general the level of development

for example if you look there
for different regions, so to speak
there are different levels of perception
different levels of action in people
often exactly like that
at the level of the primary level of Perception

even such a plan in human perception
that in one region this same horizon yes
some Infinite information
it is closer in the geographical region
somewhere she is further
for example, in the far north the region is perceived
thus in management
that this line of the horizon
at the level of, for example, the action of the Spirit, it is further away
it's geometrically simple further

and it turns out that if we want
do the same as God does yes
for example , for Him it is all the same for everyone
then it's like a universal action
for a kind of universal level of man

Well, the Eternal Living Man
this is the level if we consider
then Perception should be the same everywhere

i.e. people generally speaking should be the same everywhere
it turns out to be a good life
this is the social level that arises

when do we start from here
from this level Well as if further control of Reality
then it turns out that Reality itself
this is a certain fairly mobile controlled quantity

and generally speaking this is the horizon of Perception
it can be moved closer to you

i.e. God created the World this way
that the world is developing dynamically
depending on your system of Perception too

if we want for example well, for example, a vineyard Yes
grew up to be more qualitative
and the harvest was therefore more in line with your goals

then it turns out that we can actually manage
create that level of action
what are we well so we are actually creating
as a platform, i.e. the soil itself, yes, in management
well as separate segments

i.e. we create, for example, a bush ourselves where there are grapes
and at the same time we can consider
this block is kind of separate from the rest of the world, so to speak
i.e. build it independently
and concentration of your Consciousness
increases at this level

and now if we consider it in the same way
action
in relation to a person
then it turns out that the action here is fundamentally completely different
man always exists independently
from the action as if to it

i.e. we come to the Action of God
in relation to a person
i.e. the creation of a healthy person
this is some absolute value

if we are in any other
as I have given an example here

here we can have some element of Reality
consider

as an autonomous element, as it were Yes

for example, a bush of some grapes

and act as if from the outside

then in relation to a person

we always act in relation to that

that there is the essence of man that exists everywhere

and so we came to the conclusion that the essence of man

what does each person have to do with it

as if there was no single person

exists in almost every Reality

just like God does

if you want to remember a relative there, for example

or some familiar person

or just some person

Well, actually, maybe you only saw it once

once upon a time, maybe in my distant childhood

and then you immediately understand

his presence seems to be everywhere

this is basically the level of perception of a person

i.e. another person is perceived

as a structure practically omnipresent so to speak

in action towards you yes

i.e. a person to another person

acts as a structure that exists everywhere

this level is like the center of human creation

in the Spiritual Plan of God

i.e. God's Spirit acts in the same way

like a human soul

precisely in the area of remote action

well, as an axiom in this case

you can see it on the light optics

and see how the interaction goes

The Spirit of Man and the Soul of God

or for example the Soul of God and the body of man

and here specifically

the direct path to recovery
where you actually start to correlate
i.e. to think simultaneously with God
and with other people for example Yes
in terms of Infinite development

Well, if you count for example
Well, how does a person even think like that?
so that thoughts are similar

all people have different thoughts
but here are the thoughts towards Eternal development
they can be of the same type
this is very important

i.e. in Eternal development thought can be
Well For example there in Eternal development when a person thinks for a long time
and there is some phenomenon of Reality
Well for example, the same bush here
well any plant in general yes
for example a bush that can be
in the form of, for example, your next action
bush plant

then here are all the people who think things through
like something in the Infinite level
begin to increase the glow
your any thoughts
on some specific plant there
we get
that any element of Reality at the Infinite level
it is very much expressed in the combined action of people of all

i.e. that's exactly what the difference is , so to speak , yes
in Infinite Development
that when people have been thinking for an endless time
it turns out that they just have health
because every element of Reality
due to their Thinking
becomes virtually Eternal
simply due to their Thinking

and when does a person begin to know this
then he sees
how God created even further and the primary thought of man

after all, in essence, this is a rather important point

what is a man
and where, for example, did he first express his thought?

if you put the question this way
God created man
and how did the first thought come about?
Well as if to say it into a person's head
or it just came from somewhere

and here it turns out that this first thought
let's say so yes the first level is actually Perception
i.e. the first thought
this is what a person first perceived

and then it turns out what he perceived
so that a person can simply be healthy and get healthy
from the original level to its creation

Primarily
he must see that he perceived precisely with his body

i.e. he must consider the body
as a system of Perception
how the level of God's Action is actually

then the body is not separated from the Action of God
i.e. in fact the Body of God and the body of man
have the same structures
at the level of molecules , cells, etc.

and in general it will be enough in this regard
just see in everything actually Infinity
due to Spiritual action
due to the simple work of the Spirit

those. Spirit Is Infinite
then it turns out that the body is also Eternal
here at this level of management

when a person reaches such a level
then it is clear that the very fact of, for example , human rejuvenation
it's just some kind of correlation
with the primary level of Consciousness

after all, it's easier to rejuvenate
when he sees a person
it is the level of creation by God

that's when god created man
and it is enough to go out into this glow
it is quite close on a geometric level
I'm literally showing it with my hand

this optics is expressed in this place
in relation to a person there are literally 15 centimeters
from the human body
the vertical line is the creation of God
and external Perception is 5 centimeters somewhere to the right
and that's all

fix Consciousness at this point
look
how god created man originally
this is actually a kind of generation of rejuvenation

i.e. this is the very action of rejuvenation
and in general generating a certain environment around

this is what is important in this structure of rejuvenation
through healing yes
we need to see that the external environment is also changing

Well, let's take any material object
and basically we need to do this
so that a person can become younger

and then it turns out that based on
like this level of tasks
we need to see how they interact
with the person who is rejuvenated
all elements of Reality

i.e. in fact we must
any adjacent element
as if such a material world
in time, actually, it also unwinds back
because real rejuvenation
some elements still become similar

i.e. God in the Image and Likeness did so
what practically when you do
some action similar to you
any one element at least
should be more like a young person

and for this you need
in the system of Perception how to choose
some one object
it can be any object for example there's a voice recorder there
there is just some material object there

and then you start
go to an object, for example, of an intangible type
let's assume the primary thought of a person
a person as such, and not yours personally

and here is the primary thought of a person
when did god create man

i.e. we stand all the time
at the origins of creation, yes, in this case, of man

and when we, for example, already
Well, we need to cure it there.
let's say the child is young
if you make some other control
if there is a person of age there

it turns out we are beginning to perceive
age difference thus
that the effect is actually rejuvenating
this is always an action for another by the way

People, they can't be separated from this process.
and your rejuvenation there for a millisecond
other people there there already to a lesser extent
also have to be rejuvenated somehow
i.e. they should also have more health

so it turns out that the main primary level
this is any approximate element
where should you consider
how to track the level of rejuvenation

Well, if there is some kind of handle
appeared only a year ago
then it turns out you move on to some other thing
standing next to it, etc.
but already standing at that time

and so that you don't have to search like that

as if in the control system different objects
and not lead them as if
Well like at this earlier time

you have to integrate the whole world like that
that your Consciousness chooses on its own
even at the level when you are not concentrating
in this process
and you are naturally young
you have a state of natural youth yes
natural health

after all, initially a person had such a level expressed
so that is how it turns out
that there are some external loads and external systems
which seem to exist from external control
they don't actually have to
for example, lead to the depletion of cells there
they should be like a system
generally beneficial action for a person

i.e. a purely technological task arises
any level of management
transfer
into the structure of beneficial action

i.e. even if the level
there is some kind of tension or unfavorable
so it is taken from this spectrum
favorable value
and it is translated into the structure of human health

as in general from some unfavorable spectrum yes
select the desired value

very simple by the way
enough to reconsider
some structurally future events
just go and look into the future
By the way, it's very easy to look into the future from this position
when you initially know
the point of creation of man
you are in it
you are approaching
for example, according to this lecture on this technology

and you just take everything from here and concentrate on it
in the future for some time
literally the primary impulse
there in a millisecond this is the future

it is not even necessary to define positions first
it is enough to record the desire
the future must be positive

i.e. you can look at the paintings yourself later
in this methodology you have to work quickly in general
because youth is a fast phenomenon

and when do we start
let's assume that the health structure is being drawn
then we should just impulse Norma
which exists as we have
we want Norma

and at the same time we see it from the future
we understand this signal
then this is the level of signal transmission
through some unfavorable event perhaps
it is actually a platform, yes
for this event

so let's say the event touches
with a positive signal from the future
next event

Well, it turns out to be some kind of link structure
the next link is positive
and we build it ourselves

Well, in any management we do it that way
we set some tasks
and we solve them

and that's when we are at this level
some unfavorable event
we highlight
spectrum of future positive value
then in fact we can draw positive status
in any unfavorable event

i.e. a person can be realized
in any system in full

and yet live quite comfortably
even if the spectrum is unfavorable

This is an important characteristic of today's management
because in the conditions
namely the technologies of Eternal life of Eternal development
when global destruction of civilization is possible there
Of course a person should strive
to implement exactly
immediately turn into Reality
namely Eternal development
it must be specific
i.e. it must actually be executable now

and then he must the person must master
in real conditions
real development systems

For example there he treats some disease
Well, if he is healthy
he means some kind of management yes
actions produce
and when you see
well, the disease itself as an unfavorable system
and identification of positive status
this is a treatment yes
this is the next step technology

i.e. we are moving on to that
what from unfavorable level
there is always a level of creation of precisely favorable

i.e. the starting point of action
is this the action
that this one well as if a system that we don't need
it is not always unfavorable
maybe we just don't need it at this moment
well some information that is not used yes

then we can make some capture
i.e. the translation of this information into the future system
where is this capacity already, as it were yes this volume is it
looks like some kind of informative glow
well just like the light of a silver level of the usual

and then you translate after yourself

this seemingly neighboring section of the world is actually
and then you get used to it after some time
and you begin to understand that this little piece
as if Well, you can carry it around with you all the time like a backpack

i.e. you kind of get used to it and start
to manage in this way
that this is the effect of the presence of youth
it's like a relic radiation, yes
primary
it is always near you from the beginning

and when do you start
actually lead this structure behind you
consciously yes
giving the functions of reason there actions
For example well and as if integration next to you

and you understand that here you really are
at this moment you become a younger person
this is precisely the transition from this state
to a younger state

and the transition itself is a healing after all

it is clear that the transition to a younger state
this is a level more health
but it may be that a person is at an earlier age
had some diseases there

it turns out that he should get there
not in this one, as it were as if Well, if you look at it
as some kind of system of cells yes
as if not in some kind of cellular system
which is modified there

and get into a younger state
but from the point of view of the Norma

here, by the way, the technology requires clarification
rejuvenation should be like this
that you are healthy at an earlier age naturally yes
even healthier

it turns out that here you need to have
like a closed control loop
some eight

i.e. here is the next age
you bring out all the most favorable things from it
as of the current time
and you already move into a young state
with all my luggage yes
with all the experience that I have now

it turns out you're not just young
you are more like Well Do you look young ?
it turns out logically
you have more luggage more opportunities
cope with the situation
and you are additionally still real
there you translate the cellular system
to a younger level, i.e. even healthier

and it turns out that here, if we ask ourselves about that
how did god set up the system anyway
Well there of His own Eternal life yes
there Self-healing or there Eternal development

then it practically works out
that God every next time
becomes younger

and if He, for example,
Well, let's assume it's at the level of cellular information Yes
but so that He could maintain the form of an ordinary person
He must create
some [...] well as if a static system of the body
For example Yes, like all people

it turns out that this is a static body system
human
this is an ever greater development
aside well means great knowledge
and in fact greater youth for example God

and in general it really is when there is more knowledge
a person can do more generally speaking Yes
some systems to implement

then we get some kind of paradox
God, for example, increases the speed of rejuvenation
with each level
next next development

here from the point of view of human logic

and He comes
to point C of your level of creation
it turns out at super high speed

actually passes this point of Self-creation
at super high speed
and gets into the structure behind it, as it were

i.e. He is always there
in the system of self-control it turns out
the more he rejuvenates
the more He gains the speed of rejuvenation
this procedure is quite clear

who starts doing rejuvenation
he sees that the speed is really directly felt
how it kind of gets dialed

the only moral criterion people have here
they might be thinking
how they will look in the eyes of others
that's another question

if a person has decided for himself
psychological aspects of rejuvenation
i.e. he is ready to be there and younger and it doesn't bother him at all
then in general this technology
can be realized quite quickly
this is where you start the structure of healing
consider

there is only one criterion that at some time
Well, a person should look somehow
there specifically corresponding to the general age there
and carry out some social functions

if you are these systems of collective Consciousness
overcome
then the rejuvenation system

it is quite accessible to you in this technology

The main thing here is to see the transition point
when God passes to the point of His Self-creation
i.e. He kind of carries it out at high speed, yes

there, if you can say it figuratively, there
into the structure of control over yourself
and what's more, He is there with His Physical Body

then it turns out that yes the body really is Eternal
it is always under control
over their own events

yes, for example, any thought can be obtained there
this is action
there is any structure of action there
this is some action that has already been implemented
the desire is that there is a new healthy cell there , etc.

if He is generally always healthy let's assume a person yes
then we are already talking
about event-based management to a greater extent

because as a rule it is still in management
the level of health should be standardized
and in connection with this it turns out that if we assume
we have a structure of complete health
then there is already a level of exit to event management

and so that the events would be favorable
there are more favorable conditions
from God's point of view, a favorable level
when there is a thread of this Eternal development
i.e. it is developing

i.e. everyone knows how to live in this regard, yes
they can develop Eternally

why, for example, cultural values
where there is a transfer of knowledge and experience
always seems to be guarded
both the state and the people
and here there is a level of Spiritual knowledge yes
The spirit transmits primary knowledge, etc.

i.e. the Spiritual level is originally Eternal
and the Spirit works precisely in terms of transmitting knowledge, but
or some information

but if for example we take
and we'll do the same with the controls

for the physical body ^{well}
just take and make a mechanical substitution

here is the history of the development of civilization
cultural values some moral

moral is clear enough
^{Well} for example, just some works of art
some means precisely cultural values

and this is some information
and we take the physical body of a person
in management
like this is just a model level
^{should} we enter something here?
it is precisely in the cultural layer that this glow

i.e. we place the body
outside the system of primary implementations of these actions
^{Well} , for example, in some kind of folk art
or some historical religion ^{yes}
orthodox original

and we see how human interaction occurs
physical body of a person
with this information

i.e. the person is located
outside the system of, ^{as it were}, previous human actions
and at the present time he lives like this man

a person when ^{for example} passes by
any phenomenon ^{in general}
the next time it's still ^{like} control
over everything that was, ^{well}, it is considered that in the past, ^{yes}

from God's point of view, this is control over the future

and that's when we realize
how does God come into existence at the level of simple logic
^{it means} it already has a level of actual control
and for the past and for the future

and here we see
that is how it is actually implemented
created by the man himself, by the way
his primary thought after creation

and when do we begin to understand this
i.e. the thought is connected so closely
like the next world there, which is controlled
with this thought

then we move on
into a very technologically advanced control system
where a person is practically in any region
it doesn't matter where the horizon is, where the optical system is
where is there some kind of control method

it can solve the control system of a favorable level
just because he's alive and well there
either he is getting better there or he is just doing something
namely positional control
as God does

i.e. does management for example well from the point of view of the task
i.e. recovery, well, it means recovery
rejuvenation well let there be rejuvenation
where there is health improvement, etc.

i.e. the system of action if specific
then this is a concrete expression
if it is an event structure
then it turns out that it exists here
another system of certain correlations

i.e. there is a certain event
you need to manage the event
you are engaged in rejuvenation

Primary Action Structure
at this very second I made the control
some events yes

For example there is a hall or civilization just for example
there are some specific events there

and I get this level here
what do i need to well for example, every person
could do something like that, for example, yes
through Macrosalvation there for all people
and he has the right to do whatever he wants there
he may do, he may not do

can for example learn this process yes

or maybe he already knows it
because he himself is simply enlightened
and he can , or he just knows

as if he had it by nature from God

and that's when we have many control systems
then this is precisely the level of a kind of correlation
this is the level when you start to fixate
primary hence the management status

and when you work in the future environment
then it turns out that you should be

Well as if by the same person
which is here now

and when do you start to rejuvenate
then here is the main task
what about by the way well as if the subject of old age itself, let's say so yes
what does increasing information mean
simply increases the density of control
and due to this the cells are loaded
and due to the fact that the person is holding static now
to carry out management in the future
his cells begin to deform
well, due to the voltage like this light-optical one

and when you rejuvenate
then in order to carry out control you must endure
primary impulse status

for example how does God do it
He does the management initially.
but with Him it is always clear
that it is exactly the same God there, the One

it turns out that based on this
you can do the same thing
some kind of next level correlation

i.e. when you bring control to a certain level
when you rejuvenate
you must correlate with the current state
this light

i.e. you choose some intermediate position, for example
somewhere as if from the side and looking at yourself

for all these exchange processes

so you have a task

Well for example you need to go to the store
to buy something it doesn't matter what
you just know that you will go there and buy

this is some kind of action

it turns out that when you mean this action
which you in the form of some kind of acquisition

for example, you output

it turns out that you start doing it this way

What how to output this impulse and control

Well how to attract attention to that future segment

and it turns out that when you start
to draw attention to this future segment

Well as if external Reality yes

attract to this segment

which is somewhere in the form of an acceptor point
exists in management

you start well as if to build around oneself

some images as if they specifically attract attention

i.e. you start translating more information

on yourself

i.e. to increase the age structure practically

i.e. you can be here

at a younger level yes there

or do a healing procedure

and the management structure of those processes, as it were
which are there

here they are such that there is concentration

at the expense of attracting some attention to yourself, yes

more attention means an array of [...] information
more is obtained at this point

when do you start translating here

the structure of management of this type already

that the array of information that is there

he is bigger

you equalize the age, i.e. you come

to some kind of primary age, let's say

where, regardless of management, there is some
Well, let's say there is a single primary age there
so if I may say yes

i.e. there is a single age there
which allows for maximum control
i.e. the age close to the Action of God at this level

and the question arises, for example there is the age of God yes
Here

if you attract a lot of attention yes
at this point
the more attention you attract
the more you kind of bring to the management level
myself
i.e. how do you show yourself?
and now the collective opinion is on you
you get well as if more control for myself

but in reality it doesn't really matter
any person who doesn't even attract attention
still receives from God
same level of management
i.e. well, everyone has
the same structure of information transfer

and it turns out that based on this
there is a concept of "the age of God" in this action
precisely in action

i.e. if we consider that the age of God
Infinite quantity
then how to identify the age here
to make it clear
how to compare with a person yes

the simplest level of the human plane
this is to go to the structure
awareness of the Infinite age of one's own
and highlight your own age in this axis

i.e. for example, to count
that man was originally created
he has infinite amount of life

and then we just need to determine the coordinate
at this moment for example Yes
well, like this, like a normal management task
we just look at this, that means exactly
time interval
what is your age

that's when you take control of the age structure
from the point of view of the Infinite Process
initially where you are immediately maximally healthy yes
or are completely healthy

at initial creation

then it turns out that here we have
in fact, it's like this level of management
what if we for example Well, let's say that they made the management
for the transfer of information
then they made some movements there aimed
to the fact that, let's assume , in fact , well, for example, they moved
some simple thing yes
there they made some movement near themselves, for example
or maybe they made some kind of movement with their hand
then we modified the information

and this modification it instantly accumulated
that which is in the entire external environment
some changes are already starting to happen there
and they can be kind of chaotic

i.e. you did something well for example, a purposeful action yes
something was moved
and in the external system there are events
some of their own structures of action
and they start to look like
as if some kind of external environment influence

i.e. the logical action comes to that
as in the outside world
some kind of unexpected actions occur

but that's how the world works
your logical actions are some necessary for you
and you meet with a diverse World

that's why the world is basically arranged this way

because there is actually a correspondence
the age of God at this moment
when you consider your line of action
and how your event affects Reality
you should see the structure of the age of God for example

and by the way the action of the age of God can be seen
in the internal structure of a person

for example, to improve a person's health
i.e. as a specific organ
that's what
in general, how can you determine what organ a person has
For example there is not healthy or it is necessary
bring control to normal yes

best to determine
before he started getting sick

i.e. to go to the point when there is no disease yet
but he has some predictive systems

and here is the discrepancy between age systems
as if temporary systems
i.e. the age of God at this moment
i.e. the ideal level
God decided to do the same thing Himself
so what age should he be at this moment
from the point of view of your already physical birth, yes

then it's immediately obvious
what needs to be done in relation to the organ
and this action by the way is infinite

i.e. it is possible at any distance of course
bring out this impulse to heal
and that person he won't even feel
It seems like he 'll end up with something that's just normal
and that's all

he won't perceive
that maybe there was some kind of disease
and in principle what is the most natural
he will eventually understand that he did it himself
because he saw the Action of God

when he understands it, he already understands it

that yes, perhaps he is beginning to see
the previous picture
what is possible in this organ
there might be some problem

but he looked at God correctly
and got a specific action
he already got it as actually an element of Eternal life
i.e. the Eternal life itself in its Perception

as soon as he figures it out
he sees that any of his Perceptions
constantly carries
this very peculiar thread of Eternal life

i.e. it turns out that you constantly see
management structure in this way
that in any element of Reality

as if in distant harmony we will say actions
man looks at Reality
looks like he has some problems

but are there or aren't there any problems even
but there is a concept of deep harmony
there for example in adolescence
a person reaches a level
when this level of harmony exists
in the form of any action

i.e. any action takes place there
nevertheless, man believes
that this inner harmony is yes
some well if you call it there let's say we can call it that
like "harmony cricket" yes
there's a cricket somewhere out there, it's hidden somewhere far away
but it carries a harmonious sound

for example, he doesn't like me physically, yes
and that there is harmony that lies behind this
For example there is silence there
i.e. some kind of internal harmonious meaning

and when you start to see
Action of God
towards you in this sense
then it helps a person on the battlefield

For example to survive there and in conditions where there are fragments
Well, during the Great Patriotic War
there are many cases when
or there in military operations
what exactly is the level of inner harmony
he was actually saving a person

i.e. the level of complete freedom
he can do whatever he wants at any time
i.e. its internal action is completely free
he feels free
he did whatever he wanted at that moment

it is precisely the concentration on harmony
at natural size
leads to the fact that a person practically receives
precisely along the line of freedom
it is the structure of life that was originally given by God
he is a man and must always live

and that's when he does whatever he wants
he gets exactly the Norma
i.e. he lives peacefully
there for example, fragments do not fall, etc.

and it turns out that we have
still the task of real Eternal development
because we are talking about Eternal development
then we have to talk
about real categories, quantities, actions, technologies, etc.

and in connection with this it turns out
that in connection with the fact that we have to do this for real
we should receive naturally
there is Eternal development rejuvenation there is healing
under any combination of events

and in this regard, of course, the task is still special
any combination of events
it is still a certain management structure
connected with the fact that there is a certain wave going on , yes
many private events

and it turns out that this is a layering of different waves there it means this
that a person must constantly draw

some specific spectrum
specific personal private events

for example, here is God the Personality
He gives to Himself personally
including He gives personal development to Himself

and here is the choice of the personal plan
this is, as it were, a private task of a person

but when he sees that it is necessary there
to make the structure of Macrosalvation
in action

it turns out that we already have such a level
what exactly is Macrosalvation
i.e. care for everyone and every person
action for all
this already exists in fact
Well, it 's a completely individual private task

i.e. it turns out that he is this person
practically sees that he is revealed to God
from God's point of view there for example in Eternal Development

there for example in Eternal Youth in Eternal Health

so that when he does for everyone
this is the level of his personal path , so to speak
which although it is private
but it turns out that it is the action
in fact, even for the whole world
is precisely a creative action there
this is a kind of beacon, a kind of criterion
behind which there are already these values
there is Eternal Youth for example yes Eternal life

the thing is that the concept of "Eternal life"
implies any process
a person can have some old age there
can be rejuvenated later
maybe we can just assume yes to be young
but it turns out a bit unnatural

but nevertheless, as if a person chooses
management structure as he wants
and as a rule the process

this is age matching then rejuvenation
age-appropriate, etc., i.e., as if amplitude-like

and when do you start
some kind of canonical process
consider
as a structure let's assume the following actions

then it turns out that we see
Well for example, let's take any light wave
the light goes in relation to the Earth
then it turns out that based on that
what does it mean that there is a reflection of some part of the light there
towards the moon etc. space
we see a certain system of periodic actions

that's when we're in this state there's no peace
decided to look at a certain photon
and see how it develops in general
in the structure of people
how does it touch people's tissue yes
here I showed the light
how it touches the fabric

what kind of light is this anyway in outer space
how does the interaction of one section of light proceed
well, some chaotic area

as soon as we start setting this task
we begin to understand its development structure
then we see that God is originally
He is very harmonious towards us.
i.e. It reveals some problems, actually yes
in our situations

why do we need problems at all
Well, he could, that's how it works logically
God just took and created
generally problem-free structure of the World

and it turns out that there is a linear principle of development there
it does not give a person personal freedom
that's exactly from the point of view of freedom
and the need for such an Action of God arises
what He at some point begins to do for us
some actions

For example there is identification of problems

Its approach
identifying problems

when God is already acting there personally
and starts showing what to do specifically, for example
and man begins to see His approach
harmony arises from the search engine
Well, here is this photon of light

why did we need a man
take and study this photon
For what
something else had to be done

but we wanted to study it this way
so that from this there would be Eternal development

and that's when we start
any phenomenon means to study from this position
then it turns out that there is naturally no end to the study, yes
we can do anything
and at the same time any processes
that exist in society
among people in general
they are renewable

i.e. there is no concept of "initial type of action"
an event can always be brought
into the primary most stable Norm

This is, by the way, a very powerful legislative level
Be very careful here

because what I just showed you
well, actually he said it
this is the situation
that we can not favorable moments in a person's life
you can always restore it to management

this means that they can naturally be expressed in different ways
not specifically maybe it's the same time yes
again the level of naturalness
if the collective Consciousness allows us to do so
to do something
in your own Consciousness
please, but to a greater extent this is restoration

any of the best conditions
for a person
what he thinks is necessary yes

from this point of view
there are processes, for example, of the resurrection of the universal
it's just that Norma is the only one

and when we, for example, proceed from this level
in general, I only showed everything
on the analysis of a certain photon
which has a periodic tearing off

i.e. a static element of light
which is somehow reflected
in dynamic form
linked some form element to an action yes
and I received that everything can be restored
to the most favorable Norm
from a seemingly neutral level of analysis
well some photon

what can you say about him
what does he even need
from the point of view of himself and as a structure
it may not concern us at all

and yet we come to this conclusion
just watch here
this is such an action
and you will see that in practice we can draw a conclusion
about Infinity and its own development

from any completely chaotic action
there is an external world , so to speak

but when you get from here to yourself
i.e. into your own Soul yes
or you start to act with your own Soul

you see that generally speaking your body
indeed it is always great
i.e. you have a level that allows
this is already in this case in the form of some receptors of the body there
this is to see

i.e. you see the future state of the body in a healthy form
when you are already in control well as if infinitely even
you should always see here
that from you there always come lines of Infinite control
i.e. in Infinity everything is Normal

and this is where the level comes in
already specific local actions
this is where you start to understand clearly
what needs to be done now

for example, if a person doesn't want to rejuvenate, yes
that means there might be something specific there for some business

if we assume he just wants to get healthier
or cure someone there
that means this action is clearly depicted
as the only control system in this technology

By the way, this technology is very convenient
can be found specifically
exactly what is needed now

i.e. and understand that in principle
if we make management like this
what well for example we need to make a decision quickly yes

then it turns out that this is an interesting aspect by the way
the choice of solution is here in this technology
it is the structure of the body's healing
but as if for an infinite time

i.e. from Infinite time you understand
what are you there for
but in the intermediate system there is some
you can see in principle

just what you need to do now
in relation to oneself, for example Yes
or in relation to other people

it is both a diagnostic system and a control system
aimed , for example, at Infinite development

and that's when you see the influence there, for example
some elements of the external world, like chaos , yes
some structure of the external world

so some structure, let's say, of such management
Well, let's assume that there is there is some kind of comet there
which can fly to Earth
theoretically at least
probability quantity

and no matter what
what systems are there political social opinions of people
there is a concept of a kind of "ordinary body" and physical

and so we must be protected from these processes

it turns out that this is the task of security
from any processes
she puts it precisely as a necessity, even yes
as if here are the implementations
that we are from any level
we get the optimal control for ourselves
Well there actually helping this level

and the transition is actually very simple
when you practice this particular system
I just said it now
that any event is possible
bring to a favorable level
well, some of your earlier meetings, and what do you remember, etc.

and when you start to see it already
from the point of view of Reality
then you see that any current system can be overcome
as if it were unfavorable
or there if it is favorable it can improve

here is a very dynamic space
and you watch it, it seems to adjust very well
it varies very well

and in principle in this space
a person is always confident that everything will be favorable for him

he can enjoy nature
he can listen to music there
he can be calm
no matter what happens for example
Well, except for some excesses, I guess
I mean what happens as a background level
that there are of course no catastrophes there, etc.

in case there are any problems
then of course he should concentrate
and help to avoid some special problems
primary manifestations if it is a disaster

and I mean that in a normal state
a person perceives the external world
often with tension too

and it is exactly at this level
the ability to find the Norm
this is also a special task for Eternal development

because often some well there are events there
which may not even be noticeable to other people
they can be a burden or have some negative effect
for example, on human health, etc.

and in this regard when we have
let's assume this level of development
that we overcome this state
maybe, well, periodically
it's not necessary that it's there all the time , but people are all busy
at least sometimes get to the level
precisely harmony, as it were
anyway

for example , you have a lot of events there
which are very concentrated
they are not necessarily bad often
maybe there's just a lot to do

and you need it at some point
to reach the level of such deep Macroharmony yes
deep harmony
where do you see God's action towards man here

when He had already created it yes
and already transmits the first knowledge

quite harmonious, as it were, this level

unless you consider that if some knowledge is big
then there is some kind of burden on a person

but for example we are moving on to something that is not burdensome for a person
he listens with pleasure to this knowledge of God

when we, for example, see this picture
we begin to consider visualize
there enjoy nature there yes

then here arises
this is like a systemic adaptation of a person
precisely to such favorable impulses
Eternal development

By the way, I introduce another new concept
Now
this is from Eternal Development
where is the spectrum of favorable level

but in essence, everything is Eternal development
should consist exclusively of favorable
the further, the more independent
from some external systems or any
a person must develop more and more favorably
This is, generally speaking, also such a necessary task
to solve some issues in the future

i.e. each next level
should be more favorable
more stable in fact

and this is the structure of finding stability, yes
often in difficult situations
this is something that a person should do periodically
Well, at least once every three years
Well, for example, I was just telling it in reality
can be done more often

i.e. it is necessary to reach some level of development
always try to understand
that you have reached the next higher class
or what about management?
and in principle it is better if you can appreciate it
informative
not even by logical systems yes
and through complete control over information

here is all the information in the world
in this situation, yes, even more difficult
but there are things that say that it is still much better

here you learn how to have this management structure
output
and by the way you will see
what is here then by the way this element of rejuvenation
this is a purely technical action
here at this level

because then it turns out
what does rejuvenation mean in general
i.e. pay attention to this
I'm moving on to the next level
more voluminous information
and rejuvenation is generally considered a necessary element
which a person should generally master
as just a technical element

and then when you get used to the idea
what for so that well it's even simple there
at least do some basic actions
from the point of view of Eternal development
you need to be able to at least rejuvenate yourself there
if necessary
Well, getting healthy is somehow considered a given

so if you have time and there is meaning
sometimes pay attention sometimes even for prevention
Well, as a rule, the majority of people
rarely deals with prevention

but nevertheless, if there are some primary signs
even the informative ones are starting to be problematic
then at least devoting a few seconds to yourself is enough
so that for a few months there again it would be possible not to
do not look at this information

This is usually typical information by the way
for those who are engaged in Salvation

so if of course he is a person there
For example Well, he has some problems and he needs to solve them
then he should of course devote more time to himself

and then it arises
an element of constant management of your tasks

and from the point of view, in general
if only if the person there somehow brought it to that
that we need to solve problems that are quite complex
Well, it wasn't necessarily brought to fruition
maybe the problems themselves are complicated yes
by themselves

it's just how things are in his life
let's say his system was implemented
but a person chooses his own life
and he usually creates events for himself
i.e. he sort of collides with himself, yes
in the structure of the external world

and it turns out that here he must
make some effort
this is his personal task from the very beginning of this creation

and by the way you can see it there
practically in general Well, initially
actually set before man

and if for example we have
Well for example some level of Reality
related to what God has set
let's say some specific tasks for a person personally yes

you can see
how he listened to them
that's what God whispered to him there
or as He told him initially
that is the primary level of contact
how did god even say
whispering there in some intimate silence
or there was some kind of sound, a rumble, or something

you can look specifically
conversation with God
at this level of action

i.e. the initial conversation of God is the initial one
man and God

and when do you start to reach that level?
then you see that any events
which are around you, yes
you overcome them in terms of personal action
when you are calm and confident you are constantly doing something

well, that is, the usual state of a person as a rule
then you are just a regular job option
you are taking out
to the level of primary contact with God

i.e. it is enough to see it once
you see it all the time

and then it turns out
there is no gap here
your further actions
because you know your task

Well, it's all simple
the man there is a traveler, let's say
who knows the task, he knows them
he does them
he doesn't need anything else
he knows the task and he does it

of course they change somehow
there in the management structure
some subtasks
but this is precisely the primary meaning of the primary task
this is the main thing in this case

generally speaking, for Eternal Youth
hear actually yes the primary task there
or at least see the place in the information
where she was placed by God
in front of you

this already happens often enough for that
so that a person there would be exactly stable, let's say Yes
in Eternal development

to live forever
we can just say it there
transfer technologies technologically
and that's all

and I meant that if you live forever
Well as if without straining myself there systematically
so as not to constantly deal with management there
don't waste time
for some special management procedures

and just live naturally forever
Well, because that's just the way a person is

then it turns out that here
Well, you can take control until the moment
when you found a certain root system
some kind of essence

and then the next control comes
in general, methods are often created just for that
so that you understand something
in terms of fundamental processes of building the World

and it turns out that when you, for example, understand this
then you have completely different tasks
why do you need the same tasks?

It happens that it is not necessary as if
in general, to have here
like this level of tasks
what if we did something for example
why should we repeat ourselves yes

life is constantly changing
the main thing for us is to find
this is precisely the internal contact with God
where do you see there is a young God for example
he gave you the information initially
at the moment of birth
or before birth
and you are constantly at this level
you see this contact

by the way contact can occur
and it doesn't necessarily happen in childhood
and already at the age when a person is already an adult
exactly like the next level

this is the initial contact

and the main thing is to see this single point

and this is the connection with God
This is the most powerful level of control
which gives both youth and health

when you start expanding it
then you actually get as if in absolute control
all your affairs are being realized

This is where I end today's seminar.

Thank you very much for your attention
