

GRIGORY GRABOVOY
The Teaching about God
Self-preservation system
18.02.2004

Hello
the topic of my seminar today
this is my Teaching about God
Self-preservation system

in order to immediately put this system into action
I propose to make collective management
based on that
means you are emphasizing your thought
over the territory of the city of Moscow
in the form of a luminous sphere
silver colored sphere
and follow where from the sphere
the control beams are descending

then you take control over the territory of Russia
and then you take control of the World

and when you look at these three spheres
then it is possible only by means of one's own thought
find the level that regulates the control
as if in the very first sphere
that is the very sphere that is above the territory of Moscow

i.e., in fact, management consists of the fact that
that you conduct light there
where there should be a normal situation
and due to the waves of this light
you are normalizing already doing the Norm
practically harmonize the situation in other areas

i.e., in principle, as if the principle of extrapolation of control
overlay light controls

when I talk about the topic
self-preservation system
then first of all I consider that
that when God recreated Himself
First of all, he made the following management
aimed at the fact that He must preserve Himself

i.e. any created information object
must have self-preservation functions
and if we consider let's assume such a control element
like , well, a purely specific situation
for example, a subway train car is moving in some direction
and this carriage needs to be intact
then the specific practical situation is that
what you need to consider
principle of God's Action
in a situation of Self-preservation

when God created Himself
looked at the external Reality
and then felt the inner level of His essence
i.e. He realized Himself through the structure of self-knowledge
i.e. he examined his state in general
initial state

when you see this Light of the original state
then you can adjust
movement of one's own Soul
but in terms of the movement of the physical body

i.e. in this case the physical body is considered
as a structure coming from the Soul
and the structure that is controlled by the Soul
and the Soul is indestructible and Eternal

so being on the platform
for this we need to consider
position exactly the same as God did
i.e. to consider the external structure of Reality
i.e. a specific carriage
then you look at your own condition
i.e. what do you feel at the moment
and remember this state

because it is the manifestation of the Soul
this is a structure practically and emotions too yes
structure of perception

when you remember this state
it is precisely the deep state of the Soul
then further you already consider management
as the next sign of action

i.e. you are already in the subway car
you just think about what that state means
which is originally Eternal
and you are there on the platform
generally safe and sound

then the further action is the same
that you do not further collapse

when you look at the walls of this subway car
from the inside
then you accumulate almost your primary state
because all the next development
God leads Himself to development
including

and initially
when you look at this control
as for control coming from , for example , your essence
i.e. from the state of the Soul
then we can develop the management further
through the optics of the Spirit
and the optics of the Spirit is more about control
directed at what you are considering
as if external and distant objects

Well For example there is some distant option
as if of a destructive effect
which, for example, can be somehow directed in your direction
then you just remember the state of the Soul
in some specific place
maybe it's even a place somewhere on vacation or fishing
or in general at any level where you are safe

but you have to perceive
the level of the state of the Soul as an obvious level
i.e. we need this kind of time determinant
remove from the level of Perception

because for God the structure of Perception
it's not conceptual in general
God can both consider
in the control time interval
but He can also act as if outside of time

so it turns out that in this management
main control coordinate

is to do so
so that you are in the space of events and not time

then we get the event structure
this is the structure of the Norm in general
initially very tightly connected
with a primary level of control, so to speak

because in the event
where there is no specific temporary management system
you see the structure
as a structure very tightly tied to the communication system

and so when we talk about that
that God created Himself
and further considered the World as a preserved World
then here first of all we need to consider
the level is that each object of information
has the property of almost complete self-preservation
and these properties are embedded in the information object itself

realize these properties fully , generally speaking
first you need this information object
perceive correctly
i.e. to perceive again the state of the Soul

and when do you already transfer this state
to the control level
then as a concrete practice
just take it now and just do Soul management
so that it would mean in general it has been implemented
the system in this case is of this type
that you should perceive the state of the hall
i.e. well, the norm of the hall, for example Yes
and spread this Norm in the form of light
into a structure that is external, as it were
i.e. first these are, for example, the walls of this hall
i.e. further, etc.

i.e. in this case we are considering that system
in general, which was implemented
based on your Soul
before you came here
i.e. we are talking about the fact that the Norm is previous
must be implemented in the current Norm

connection of external time and current time
this is an element of timelessness
at the level of Perception

this is when you perceive time
it doesn't really have any structure for you
as if tied to space

i.e., you can generally remember yes
what were you somewhere an hour ago

but at the same time, for example, the current time
from the point of view of the past tense
it is time that is simply laid down
in the form of extrapolation of Thinking

when do you start thinking like that, for example?
then the light of control begins around you
which, in fact, has no barriers
i.e. this Light is spreading
through the walls of this building
and at the same time the building seems to exist outside of event systems

i.e. the task is quite simple in this expression
how to do it like this
so that the building is permanently strong
and for example the structure would not have collapsed

for this the building needs to be removed
outside the event system
i.e. when did God create the entire external world
He left the control system to himself

and therefore when we, for example, want to make control
going for example Well as if to an external object
we need to make it so that the object itself
is not subject to management

and when you do this for example
by eliminating the determinant of time
then you consider the whole structure in the event element

just imagine the state of God
who created the entire outer world
and for Him it is necessary to work out
some thought on Self-Preservation

He was the first to perceive the World
He perceives first
this is generally a fairly calm state

state of Perception
this is the state of the Norm as if it were an internal Norm
and the impulse that goes to Him
regulates His own state

i.e. it turns out that God, when creating
in every impulse of external information
pawned Norma

and when you perceive such a Norm
then you are actually like from the outside yes
build a dome for example there is this building
and generally speaking any other building

then it turns out that if you
for example, the Norma is exactly the one that was made , for example
as a primary control system
you start to spread to the external system
that is the Norm of Perception
coming from each object of information
this is your inner Norm
i.e. your internal state
in the beginning at the moment of creation of the whole World
and also throughout the current time

i.e. in this case
to have a common governance
need to exit at all current time
which by the way is quite easy to do logically

that's how logic works
what can you logically consider in principle
that all current time
this is a parameter of a kind of external action

for example , I think that all the current time
this is suppose the letter A yes
I take it and lay it in the shape of the letter A
all current time
's enough for me somewhere like
to perceive in a distant part of Consciousness

that there is a letter A in the alphabet
and then I do the management
taking into account all current time

i.e. the time parameter is practically leveled out
if we work
through the entire temporary management system

and it turns out that in order to eliminate time
need to be controlled
all processes at all times

That's what it's for
manifested object of information
why is the World manifested, for example, in a material basis
for example, in the form of physical objects of information

because it's a rigid form
this is a manifestation of, as it were, an over-concentration of external information

and it turns out to equalize the system
Means Well as if it were a supporting structure yes
physical body system
system of external objects
so that there is no destruction of the physical body, for example
even if it's some kind of trauma
or external information objects

it is necessary that super concentrated systems
i.e. physically manifested
they would have the same status exactly the same
as your thought that wants there to be no problems

and it turns out that you come to the Action of God
where god laid equality
between the system of Thinking
and the system of physical manifestation of Reality

because in this case
you can see it quite easily
next question
what when God means makes some object yes
creates precisely the physically manifested
then for Him it is basically the same Action
what is the system of Thinking

i.e. for God it is enough to think through
some situation
it can be realized on the physical plane

so we can consider it then
such a simple task
what is the difference between a person and a
from God
why is he, for example, in some situations
does not fully think through this, for example, information
basically his controlling one

but the point here is that
what does a person perceive when
your own physical body
he believes that the level of his own Perception
it's like a kind of slowdown

i.e. the body as an element of the source yes
i.e. it seems to concentrate on the initial impulse
due to this, it receives a slowdown in momentum

if the body is not considered
as an element of information slowdown
and to consider that information exists in general
everywhere and at the same speed
then it turns out that the action is controlling
it is basically exactly the same as the Action of God
on Self-Preservation

for this you just need to look at the body
as an element of ultra-fast control
and in all the information

then you equalize the control system
for example, your body and your system of thinking

where do you put the controls
that your body is in the norm

then it turns out that you are moving
to the management structure from your Soul
where the Soul is the Infinite Eternal structure
and is Eternal life real?

then it turns out that as soon as you enter the body
as if into the structure of one's own Soul
and you give the same qualities to the Soul
what is a material object
then the body begins to be located
in a certain dome through which already
no other phenomena, for example, of a negative destructive nature, practically do
not pass

why do i say the word "practically"
because there is still
Spiritual control system

and when you are in the physical body
for example in the dome yes so let's say our own indestructible Soul
and create equal properties
then the Spirit has Infinite properties
by presence by the level of external control

and it turns out that here is the signal coming
from Spiritual basis
from the outside world

affects some systems of destruction destabilization
this signal must be filtered
and in general it is given
to the initial state of the Norm

it turns out that, for example, the development of the Spirit
towards standardization
this is precisely the creation of this form of signal

and it turns out that in this case we
just like God does
must combine the action of the Soul and the Spirit
at the level of security for example
there of your personal physical body
or the security of the structure of Thinking
aimed at
precisely for the implementation of a holistic, so to speak, management
basically what we're talking about here is
that management must be comprehensive
and cover almost all aspects of management
i.e. more harmonious than, for example, management
in general Well for example, the one that does not contain a level
as if for self-preservation

i.e. this is the level of maximum harmony
This is also the level of maximum self-preservation

so when we look at
for example, this control is like this
we must find
where God showed the realization of his own Spirit
and your own Soul
from the point of view of Perception of this implementation
through the physical body of a person

i.e. the task is generally quite simple
and it may even be very simple in terms of setting

i.e. find the points of Perception
in your physical body
or in the structure of one's own Soul
to recognize this signal
and at the signal connection level
means the Soul and Spirit of God
get all the knowledge at once

so this is the level, it is again quite simple
that's why i say it's simple
the thing is that it's really simple

here is Macrosalvation

Salvation from some in general may even be possible
non-macro destructive situations
often very simple construction
Well, what's more, it's such that it's given to a person right away
it is enough for a person to be in this design
enter with your Consciousness

and it turns out that why I say
which is quite simple initially
because for God the impulse of Self-salvation is Self-preservation
it is also the primary impulse
including the primary one, it is the simplest in general even

structure of creation
structure of the original creation
this is where the original state of your Soul is
this is the simplest structure for God

because God originally created your Soul

further developed the entire outer world
so it turns out that you should in this case
strive for simplicity of signal perception

when you see this optical signal very simple
you have self-salvation already in the extended time
Well For example there are a few hours ahead

if you have this signal
for example, extended to the future
where there is no time component
then you get the Infinite line
for example, there is safe development

the only question is
how to maintain this line yes
here is a light pole
it still needs to be kept under control somehow, yes For example
so that it does not move in space, for example there are events there

and then it turns out that in this case
it is precisely the temporal aspect of the development of the World
i.e. as external events
this is the line of development of Reality
it is in harmony and in general it was originally intended that way
that this is a safe development system

because the external normal events of the World
let's assume that the starry sky is a kind of vacuum

where is Norma
which for example does not shake yes there from explosions and everything else
this is the time norm
she is crossed
with your event any

and it turns out that this Norma is
it exists
as if precisely in the temporal aspect of Perception
you can after some time
see the same Norma yes
or remember the same Norma

i.e. time in this case
according to the given structure of my Teaching
created to normalize the system of events

and when you perceive this element
namely the creation of time yes
that time is created
then here we should consider the process of that
how did God create such a concept as "time"

i.e. one thing is, as it were, a speculative concept of a person
but if we just set ourselves this task
consider the structure of simple management
where God has a task
create time
and at the same time put this thought form
as if in the structure of human management

then first of all we come in reality
to the physical body of a person
and specifically to this
in general, which exists at any time

and when you solve this problem as an external one
then for God it becomes generally clear
how to transfer this knowledge

i.e. when you look at how to combine
action
for example the Spirit of God and the Soul of God
and how to get knowledge
you need to see what God wants to convey to you this knowledge
i.e. it means He is somewhere
and begins to pass on this knowledge
through the structure of Your Physical Body

for this it is enough to look
on the physical body of any other person
and having perceived the integrity
or there your own physical body yes
as if remembering it or any segment of your body
remembering
this means we have a completely integral structure
Infinite development of this physical body
It's just a matter of the state of the Soul
this is exactly the state that I initially cited
as a state that organizes problem-free
what would your future be like
in the physical body

it is this state that needs to be transferred
into the external structure
as if in front of the physical body
maybe in space
physical space of God's Thought

God thinks in general in Eternal categories.
and these categories are not destroyed

i.e. it turns out that you are technologically
just translate
the structure of the state of the Soul
where the glow of the Soul organizes
generally speaking, the Norm for your physical body
The norm for your Spiritual state
generally speaking, the general Norm

and transfer this Norm
into the structure of God's Thinking when you transfer this Norm
you already have it in a dynamic understanding
management related to that
that in dynamics you are practically indestructible
because in this case you are already there
in the structure
where the object is external
and the object of Thinking
it's the same thing
i.e. for example the Norm of external physical space
and your Norms are one and the same

that's as soon as you go out
from this structure of understanding the World

Now this is real
a complex system of understanding the World
I am specifically clarifying

this is where you come in
into the structure of a complex state

i.e. you well it turns out to be just like the structure of DNA
the structure is being organized [...] it's just complicated
you are sort of on Signal Perception
you are moving into a complication structure

i.e. you start to complicate things

the external structure of the World

example why God created the world it turns out like this
[...] if we consider it as a complex yes

i.e. here it turns out like this

what a diverse world

which God made for that

so that the World would be developed in general Infinite time

here the management structure rests on that

that you come to this on your own

i.e. you need to consider the diversity of the World

as a structure in general of one's personal action

Well, why do you need a complex world ?

and in order to achieve stability in management

because the more external signals you have

the more opportunities there are here in general

have a signal in the norm which

and when you have such

in general, it turns out that it is actually a complex signal

which in this case you can consider

as a signal of Norma

then it turns out that this is the main thing in this matter

highlight the Norm signal

as a system of its own management

i.e. you must have a Norm signal from the outside World

make the structure of your state

in this case I am getting to the point

that was selected from a large number of signals

for example the Norma signal

and the Soul does this, generally speaking, almost immediately

you are already translating the external signal

as a system of state of the Norm

it turns out that for God it's all the same

that the state of the original Norm

that the state of any other level of information

i.e. this is why God is indestructible even in the Physical Body

because for Him everything is Norm

what is the external signal

that the signal of the original level of creation

and when you start for example
in this structure to do management
then you see that it is the standardization
i.e. bringing all signals into a uniform system
Norm this is a system of creation in general, in essence
more general plan
i.e. you get a system for creating a human being
where in general it turns out here
that it is man who is the control system
from the point of view of the external world

i.e. you kind of create a person
being outside the contours there For example well this person
i.e. in principle it is a system of creation
where man has not yet been created

when you, for example, enter the structure of this management
then you see that at each control point
where man has not yet been created
it is quite possible to create that system in general
where man will be created
precisely in its Eternal manifestation

i.e. the concept of "Eternity " is essentially a system of provision
for example, the physical body of a person
the right position at the right time
and it turns out that you are at this particular level of management
must move to a management system of that plan
how to do well for example management
coming from you to the person and so on
so that man was created in the Norm

i.e. in this case we must consider
structure of creation
and not only the person himself
but also the structure of the creation of the entire external World

because in essence Self-preservation is, for example , God's
this is a level where it is quite specific
communication systems are demonstrated

and let's assume if you need to take cover, for example
from some external object
then it is not necessary to physically hide
It is enough to just consider that position
that the external object is the Norm

some kind of primary substance

the object itself is not designed for that
destroy something, let's say

and when you start doing management from here
you can see it here
that when an external object starts
here you can say so
its development initially
from some primary point from God
then the object itself cannot cause harm or any evil

it turns out as soon as we are in an external object
we find such a structure
then we see the primary point of creation
physical body of a person

Well For example there is some atom there

from the point of view of the stability of this atom
we are considering how to further develop management
i.e. we can well consider the development of the atom to, for example, from

Well, let's assume it's at a more complex level

where there is already a Macro level
where we can fully consider the system
as if of a more general plan

and it turns out that, for example, well let's assume if we sort of consider
here it is precisely the subatomic level
then it turns out if we assume we increase the speed control
then before the atom there is a state of matter
well, which can be studied , for example, yes

and studying this state we come to the conclusion that
that God gives knowledge where
again His Soul intersects with His Spirit
where generally speaking the state of matter is not defined
we don't need to know what level the state of matter is
why do we need to study physics
if we need to make management
for example, according to Eternal Development

we can do it separately if we have time
study physical processes

but it is enough to have
own Consciousness at the current time

and then we should immediately receive control

i.e. God is at the level of constant creation of matter
in this case
constant level of self-recreation , as it were , including
for a person

and therefore the transfer of knowledge to a person
to a physical person, precisely to a person
where a person considers management
as a system of sorts of Macroperception yes
system including local Perception

here we can very well see the following status
what a person perceives
with almost the entire physical body
but at the same time he perceives more
perceives first of all
precisely the state of the Soul
where there is a Norm of all external and internal events

i.e. in practice we can say
that when control is done by a person
man normalizes light control
yourself first
and at the same time normalizes the entire external world

it turns out to be the creation of another person
it's just on all about giving the Norm
Means Well in general, to all objects of information

and it turns out that for the regulation of the whole World
God created precisely the image, as if in His own general Likeness
where in this case we can consider the concept of " similarity "
how exactly the concept of " similarity in Soul " including
i.e. and " by the Spirit "

i.e. in this case we can say
that the Soul of man and the Spirit
it is the same in the action of Salvation
that both the Soul of man and the Spirit of God

i.e. we can consider
Operation of the Spirit of God
in relation to a person
i.e. the level of knowledge transfer
where God can impart knowledge to man

about Macrosalvation ^{yes}
or about personal Salvation

and in this case we can well consider
Action directed towards man from the Spirit of God

i.e. it is enough to consider the Spirit of God
as an element of knowledge transfer
as an active link directed by God
we can see there
that in dynamics the world is also indestructible

and when we want to consider here
how in such an indestructible world
God generally perceives Himself
he is also Eternal
i.e. He basically ^{succeeds}
some external ones, ^{well} there are problematic events ^{there}
they still don't seem to have ^{any effect on Him}
from the point of view ^{of for example there as if} external control

but when we start in this case
act exactly like that
that we are considering such a position
then it turns out that we are starting in this case
consider precisely human psychology
which if he knows how to act
from the point of view of Macromanagement
and ^{let's assume} it can do this
so that there are no problematic events

then in this case we can well consider
what this person is
if he, ^{for example}, takes control from himself
even if it's just a one-off
and exactly the one that brings you back to normal
^{for example, some element of information}

then as soon as he made such a control
can convey this Norm according to the given structure of the Teaching
almost everyone
just on total topics
that he has his own self-preservation status
will be able to show it somehow
even to yourself

i.e. in this case it is enough to show
status for yourself
after all, for God if we consider here

similar process of thinking
God perceives His own actions accurately
He can accurately determine the further path
from its development
from a human point of view

i.e. if you put the question simply enough
the man wants to see
how God creates future events for Himself
in terms of self-preservation

then it turns out that here
God must know quite accurately
generally speaking, any future event
but not just know
and He still has to tie
with a preceding event
what relates to the structure of human memory

and it turns out that we are dealing with
with Macroarrays generally quite large
where there is everything from the point of view of past events
and including everything that concerns specifically future events

i.e. here are the past events
this is the entire volume of information
past
but future events should still be events
absolutely accurate

and based on this
we look at control points this way
that we are the light of our exact event yes
we start receiving from the future level
already in myself

i.e. right now you will make such control
normal events are shining in your direction
you get Norma here

once you have fixed the Norma
for example on the physical body
well, like a wave of light

and it is an internal wave

and the difference here is that self-preservation
this is an internal wave
i.e. it concerns you immediately and in its main essence

when you get this internal wave
you get the structure of the next action
i.e. the next action is in front of you
arises in your Perception
when you have the status of a complete level of self-preservation

and indeed the next action
may arise in management
if for example in a second yes everything is fine in the World
i.e. you can do it when the status is fixed

it turns out from this point of view
self-preservation
this is the Norm of both external and internal status

so do the following action
i.e. consider the entire external world
select any Norm
and bring the light here
let it be brighter in this hall yes

and when you start doing management
coming from the light of Norma
then it turns out that you are actually doing this
as God does
tying any normalized objects
with each other
and intersecting them with those objects where there is no Norm

let's assume there are some problematic actions
For example there are military actions there
there are structures as if nearby which
where there is no military action
and here are the information structures of these actions
leads to these actions among others
bring some regions back to normal
where, for example, military actions are taking place

i.e. here is the structure of mixing
Standards with a site where there are some problems

this is the level of creating even more
systems of the outer world

this is another reason why God created a diverse world
because the more normalizing objects
the less it means there are some local problems

i.e. the law is as follows
the more developed the world is
the fewer problems there actually are in it
and when you start to consider here
the development of civilization from this point of view
then it is enough as an example of a control system
use even that
of things happening in the world
for example, even telephone conversations
i.e. the information space is quite clearly expressed
just kind of logically

and you can from the level of that
that conversations are happening
i.e. there is some formal Norm and there is a connection
from a variety of events
highlight the management structure for standardization
and get the Norm of an already physical event

those. not necessarily Norm is something just well how can I say it's somehow
calm as if only such a state
somewhere on the river bank or there while fishing
or in any other quiet place

This is the Norm which is even logical
follows from a large number of events
i.e. the more events you highlight
in the structure of your Perception
the more accurately you can regulate
your own management yes
their own security in development
as if in a more prolonged time

and it turns out that logically this is so
the more you become aware of all the processes of Reality
the more precise you will make the control

so let's do it
next application control

i.e. here are all the telephone conversations
they are happening
this is a certain inherent norm, yes
highlight the light of the Norm and bring about the realization of events
by the way, you will also help those who speak
because light is actually mutual, there is no vector there

so make such control for example there's a second
then any other types of control
I will work with you

when you do something like external control
to yourself
try to work more calmly

i.e. I am in the first part of the lecture
somewhat sped up certain control actions
try to do the management calmly now
i.e. the entire external world gives precisely internal peace
i.e. here is the task of inner peace
this is the structure of the creation of management
coming from the outside world

because God
He interacts with the outside world in this way
that He is connected with him in a practically inseparable connection
from a human point of view

i.e. for God
the outside world
this is also His own Action yes
his own creation structure

so try in this case
see external control
as if the outside world is calm yes

i.e. in this case you can see
that God who looks at the external world
as a structure of its own development
for example through the Eternal Life of man
at the same time, God is not dependent on man
and in this case the entire outside world
this is also His initial Action

i.e. for God one can consider that situation
that every action
this is the initial action

and then it turns out that in order to create
initial action
need to make a primary impulse of creation yes
some level of choice of optimality of the solution
it's generally calm
these are generally logical movements and Thinking

and it turns out that as soon as you do
such fairly calm control actions
then it turns out that you can do it
some unfavorable event

eliminate almost instantly
management system of its own

i.e. let's assume that it happens
some movement in the outside world
that is, somewhere there is a task of one of the managers
do something for example in another place

and when you start to consider, let 's say
what do people do generally speaking all together yes
here is another person
what is he even doing at the moment
let's assume there in another part of the world
what does he do to ensure that the Earth is not destroyed there
or is the entire outside world preserved there?

then we see one common structure
his physical body should be like this
so that the light of all events would guide him
on the path of development to God
precisely in the physical body

i.e. the path of its development
these are the systems of Thinking
they are practically manifested in that
what do you see rays
coming , for example, from all external elements of the World
Look at all the external elements of the World
right now
and see the light coming to you there

then this light is obtained
well, as a kind of ladder, let's say ^{yes}
builds a path of development
where this path is the path to God
to the Eternal level of God's development

and when you see this structure
that is already an applied aspect
as if the calm aspect of management is that
that you are building again the physical body of a person
but already my own

i.e. building your own body
this is the calm state of the Spirit of God

The Spirit of God in this case is so manifested
that you are in static, ^{yes}
at birth
during life
the physical body is
static state of physical matter

so in this case we can immediately say
that this is the calm state of the Spirit of God

when do you use this definition
to build your own path of development
it is clear that any event
naturally, it can be excluded , as it were, from the point of view of precisely that
that this particular event may be unfavorable
For example there for the physical body of a person
or even for the Soul of a person

i.e. in essence we come to the fact that
that the Soul of man can be protected
from some traumatic actions

and when we come to this
through the Spirit of God
then here you can see that the interaction
The Spirit of God and the Soul of Man
these are the creative events of the World

and in this case
and the Soul builds creative systems
and God gives the way to construction

and when we start to analyze and think
and where are these microscopic grains of construction anyway ?
how does God connect any information systems
how He puts them together to create favorable events
Well, let's just take and ask ourselves this question
to take a closer look at this system of Reality
and see where He gets this information from
how does each element of the World build

it turns out that our vision is based on awareness
this is what we look at from the Soul

and this is what we look at
so we look with the physical body
including the physical body
but initially we look with the physical body

and when you see this vision of the physical body
then you are definitely already there
in a system of complete self-preservation

i.e. you are safe
because when a person sees with such eyes
he sees only harmonious Reality
that's exactly what it is, in essence
where is the control going to Infinity
this is the level that is controlled
here and now

i.e. you find yourself in a control zone
above all external information

once you are in this system
This can be defined as, for example, a system of force and a system of light, etc.
but it should be important to you
what you control here and you are sure of it

here is the control signal that you are sure of
this is a state of the physical body first of all
namely the physical body
this is a detector that perceives this state

and Perception is produced
let's assume there by some parts of the physical body
but above all at that level
where the Soul comes into contact with the physical body

Here's an example of a question
quite often in childhood we thought especially
where is the soul of man yes for example, in the physical body

so this question is not an idle question
essentially from the point of view of self-preservation
because you just have to define it
touch of the human soul
to his physical body
correctly determine yes from the point of view of self-preservation
and man is in fact truly self-preserving

and when he, for example, with the sight of the Spirit, a person
sees this point
in yourself
i.e. he is spiritually aware
as you can see now
I always give rather general concepts
without specifying the location if possible

but the thing is that you see the place with your inner vision
with the vision that exists there

this way you begin to perceive
the structure of Consciousness already
exactly the structure that you are considering
as a structure coming from a specific organ

i.e. the Soul created some organ and some cell of yours
healthy cell
and from here you look
it turns out that external vision is just as intelligent
as well as yours yes

i.e. vision coming from the cell
has basically the same function of reason
that you perceived this cell

again the principle of equality of information
any information
any impulse of information

then it turns out that formally
you can determine
just like when building a human being

the same as when man was created
or ^{there} when determining some path for a person
another person means
you can also give a certain ^{command to your cell}
from the point of view of equality of information objects

but here it is very simple
similar to how it does
already ^{as if} the investigative level of God's Action
some kind of social systems, any personal ones
^{for example, a person is walking and you want to help him}
give some recommendation
you just say ^{yes with words, for example}

then here it turns out
well [,] ^{does} ethics still exist there?
so that he would ask you at all

it turns out that when God gives knowledge
you need to somehow formulate the element of the request
if ^{we suppose} a person is very busy
or he ^{for example there} he is more busy with his own affairs
^{seem to be clearly turning to God with some kind of problem}
then it turns out that the channel must be open
who always gives God the opportunity
determine his next path
this is what the future Reality is built from

this is what God gives you
and how are you even open to this

i.e. God builds, ^{generally speaking,} in agreement with you
future Reality
the only thing he doesn't give is destruction in essence
i.e. you can perceive this ^{Reality}
and develop ^{there peacefully} for an eternal number of years

but if, ^{for example,} the question is about that
that after, ^{for example,} a hundred years there is [,] well, such an opinion exists
and this is the reality now
that people may have some significant problems
due to aging processes, ^{for example, yes}

then here to exclude this point of view
and develop simultaneously raising the level of the whole World
enough knowledge exactly those
where God transmits knowledge to you about Eternal development

just pass it on to everyone at once in your personal action

i.e. here it turns out that the control element
is your action
those. co-operation with the tasks of God
and this is this co-operation
this is what you organize with your personal action

why for example is man completely created by God
while being completely free
because it is co-operation
there is no concept of a hard dependency there, yes
primary
in his next actions

so in this analysis
so that there is no destruction
you need to do it this way
to make your control element
was directed towards the Eternal development of God already

keep in mind that this is already a matter of principle
this is a rather complicated moment in essence
to make management aimed at the Eternal development of God

because if there is
equality of information objects
then God doing this action towards you
accordingly you may have the opportunity
to receive such an action towards oneself

and it turns out that when this action occurs
then you are learning the way of God
logically you want to give the structure of Eternal development
To God
you should know for yourself in general
what is Eternal development in principle
from God's point of view
here's for you

in this case a logical fact is already emerging
as if the level is exactly like the logical phase even more
here we can say it is precisely a phase
where is the connection between
the structure of God's Consciousness and your Consciousness

and here in this case again

the control element is precisely calmness
i.e. a calm state where in a calm level
combined
the structure of the Spirit of God
and your Spirit
it is precisely the calm state of the Spirit
this is where there is control coming from calmness

and then we begin to consider the next level
if there is some kind of uneasiness
Well for example, problems are often linked
with a naturally restless state
and generally speaking any significant problem
this is a restless state

so if we start here
it is this optical level
implement in this way
that you see some kind of restless state of the external environment
then it turns out that this state
just need to harmonize it with your own
i.e. already in a calm state

i.e. you should logically follow your entire next path
For example there during the day during there hundred years
or until the Infinite time of development
the concept "to the Infinite" means
that is simply an Infinite level of development
because the concept of "before" is like a kind of ending yes

i.e. any element you take external control
and see how to do it like this

so that you have your own control
they did it very easily and simply
and at the same time it is the same for any time interval

all, for God it makes no difference
what is the time interval

i.e. you have the first concept of "Eternity for God"
this is any level of information
in space and time

and when do you start to analyze like that
you can see it quite well

that the light coming from you is that S light
which comes to you from God
i.e. you begin to see the path of knowledge yes
it is precisely the knowledge that comes to you specifically from God
for some specific action

i.e. and that this knowledge is from God
this must be felt by the Spirit
i.e. the Spirit can also have sensations

when you switch to structure
it is precisely the feeling of the Spirit
then here is the criterion for obtaining this level of knowledge
is that it is precisely the feeling Spiritual feeling
this level is the accuracy of perception

because for the Spirit there are some precise terms
there for example, "The Spirit perceives strictly"
this is already the state of God

and here is the feeling of the Spirit
this is a state that is closer to the state of a human being

when you start working in those states
where is the state of God and the state of man
these are basically similar states, yes
here is the feeling of the Spirit, this is a certain Light
and the exact state of the Spirit of God

The light starts to mix and you see
how it starts to organize
your own Soul
in terms of Eternal development

that's when you start seeing this element

but here we must take into account
what do you see from the point of view of just Perception yes
as if by the logical structure of Consciousness

however you can see
how Consciousness is structured from the point of view of indestructibility
when logical actions lead to that
that you are doing some logical actions
and those that you need
it's not about you avoiding anything there

you just do your specific job
at the same time, it often happens that it is completely unambiguous
and you can't get away from it or from any specific work

i.e. you do it and at the same time you are indestructible

and here I have already shown
how is it organized
logical status of Consciousness which is indestructible
and the glow of this logical status
on your physical body
you need to go somewhere, so you go there
and at the same time it is one hundred percent that nothing will happen to
you

because [...] the path is laid
and the glow of this structure of logic
gives the Path Norm
i.e. the connection of your Thinking
with some physical phenomenon
as God has it
God both thinks and creates at the same time
physical phenomena

and when do you start
to perceive information at such levels
then in principle the following control system
the one that is already coming to you from the external Reality
this is already a more and more balanced Reality

because from the point of view of, for example,
just if we consider the World as a control system ^{yes}
as if including external internal management
then it turns out that you gain more experience
and in this case the external system
is becoming more and more manageable

i.e. logically it should happen like this
what do you do the more you work
the fewer external and internal problems you have in essence

and when you start ^{for example well,} let's consider
some phenomena of Reality of precisely that plan
that somewhere in the world something is happening

that is exactly according to My Teaching
in this structure of the Teaching

it turns out that we must definitely do this
this does not happen in any structure
some problematic actions ^{there}
because the external ^{is still} a problematic action
or even let your Perception
of this problematic action
simply even the perception of some action as problematic
although maybe from an external point of view this is the norm
it's still an unbalanced management system

it turns out that in this case
the system can evolve forever
have precise criteria for development in that case
if you can standardize
Perception of another person
but by their actions in creation

i.e. because there is no access to another person
from God's point of view and in general there is no reality
because God created each person completely independently
and only God has real access to man
then you can only do it by your own actions
show
how can another person be saved, ^{for example}
if you ^{for example} Well, you can pass on some of your knowledge
and the sooner the better

why am i still trying
to focus attention all the time
I do this periodically quite often in that regard
so that, if possible, knowledge specifically on Macrosalvation
by action through management
through Macrosalvation i.e. through Salvation of all
still do as much as possible
and pass on this knowledge as often as possible
as wide as possible

because in this case
we are dealing with that effect
that here is the external light of events
besides the fact that there is an initial level, exactly that
that every person needs to do good from the start

i.e. originally created by God
God created the structure of goodness, including
as the structure of the organization of the Soul

i.e. if we, for example, start thinking about that
how did God create the human soul
then there is a natural level
well, just like rivers naturally flow
the same should be true at the natural level
the knowledge of the Eternal development should be transmitted

so it turns out that it is natural
need to transfer knowledge immediately
and when it comes to what we want
this knowledge is somehow more logical
to issue and transfer
in a more , as it were, more quickly implemented version
it turns out that you can see quite well
that this is precisely the logical status of knowledge
what you can understand by logic
this is that link
i.e. that level, that sphere is exactly that
through which you can do exactly Macrocontrol
generally speaking, transferring knowledge even to one person

because this one person
he can do the management quite well
where there is no, for example, macro of some problematic level

and it turns out
which we can easily do again right now
general collective management related to that
what try to identify exactly
your own place right here in this hall
in general at any level of future development
and clearly just make some kind of control
that as in the photo there is absolutely clear
perceive yourself as normal

Make such control right now
what do you look at yourself actually yes
like in a photo of yourself somewhere
but it is better to have it done like this now
while you are always in the norm

try to lengthen this Perception
i.e. do it so that you perceive yourself as Normal
and now determine the location
generally speaking, where do you perceive yourself?

i.e. in what place near the physical body, for example Yes

as soon as you begin to perceive yourself
look at what fragment of Consciousness
how do you perceive yourself

i.e. the next level
what specific area of Consciousness
where is it located and how do you perceive it
even from the point of view of this area
how would you divide the mechanism of action
into some elementary components

well, like in a camera, there is film there , yes
let Consciousness be the element that is similar
as if with the concept of "film" for a camera
then it turns out that the signal gets onto the film
this is where this area of Consciousness is
who perceives your Norm

so that's when i said what needs to be done
Well like a photo of the state
then we get this section
this is the Eternal development of any person

here I showed you on each specific action yes
as if personally related to you
that there is a universal receiver
i.e. universal for all
from the point of view of Macroinformation

i.e. in all information there is a level
which is completely unique to you
but it is completely general

i.e. the World is built on very precise Laws
on very precise connections

and that's why we do actions
means which applies to you
we are actually implementing a Macrocontrol system
to save another
it is enough to fix it once in Perception
then he can, let's assume, move freely somewhere
he will already be saved

i.e. it is enough to highlight

into the universal Norm his image
how to take and how to file yes
how to take it from a computer and enter it into the control system
it turns out that when you kind of do this kind of management
we can very well get it here
level which is actually
is connected only personally with your Perception

i.e. when we do such management
what we record
then we translate it as if into the structure of the Macro level
then it turns out that you can do it quite well
the area in your Consciousness is completely common

and this control system is like this
that you are quite this management
can be translated into Infinite time structure

as soon as you did it
in relation primarily to another person
in this control system
exactly to another

because God when makes the system of Self-preservation
It preserves all created Reality yes
i.e. a person
another person as well
but first the other one too
there is no time gap here
God is connected
with any element of Reality completely directly

and it turns out that when you have already done such management
you get
that the Eternal development of this man
this is Eternal development, including yours
you only have one path according to logic

universal level
the universal level is related to that
that it is the same body
in general, often similar mechanisms of Thinking
by one element
Well let's assume there are elements of the social world

and it turns out that the path of another person
it may also mean absolutely

Well, from God's point of view, we are practically knowable
as is the way of God
in relation to this event here

and when we already begin to look at the path
precisely from the point of view of this event
then it turns out that it exists
the structure of the event construction as such

i.e. we can fully consider the event
as the structure of the Eternal development of another person
following the Eternal development of another person

because when you make an event structure for him
namely the Eternal
you can walk along it yourself
and it turns out that the action is for another person
action for God
assistance yes so let's say to the Eternal development of God
this is your own experience
and the more people
the more people you help
the more experience you gain, the more experience you gain.

and when you start doing this system like this
that for example you are already starting to view
some phenomena of the World of the next plan
let's assume there is conservation there plants yes
or some molecule
then the light of the control system is exactly like that
that you begin to see the structure of future events
absolutely right

here is a very simple layer of system recognition
precisely the unambiguous future
and it depends on your will
when you have the maximum number of events
you begin to translate into the structure of your own development

i.e. you see the details of any other event
the point of view in this case is very simple
Here is what I wrote at the beginning of today's seminar
that there is for example Well let's assume the control system
For example, you can put a sphere on the left side
or on the right

but it stands above Moscow yes
next level above Russia etc.

but when the task is
how to make the following control
i.e. to place such a sphere above God
then it turns out that God is external control after all

then it turns out we can only be in a logical status
put such a structure

when we put this structure in logical status
we actually get there again
into an external, God-created governance structure

i.e. continuity of connection
God is man
in this case it is visible at the level of just Thinking
but Thinking with the Soul

here I have just given a fragment of Thinking
actually the logical status of Thinking
but Thinking where more is realized
optical status of the Soul

and so try to implement
next management training
in fact, it looks exactly like a training level
but that's the only difference
there is no concept of where there is no control
i.e. it is impossible to do training outside of real management

i.e. it is possible to do Soul management
you can do Spirit management
Consciousness for example Yes
but at the same time the level of knowledge accumulation
this is your physical body
and any of your next actions

when you start to see this level
i.e. the projection of light of what you achieve
the next action is quite optimal for example Yes
i.e. you achieve it quickly, for example

for example we need to do this
so that there is no macro-destruction of the World

we want to know the result now we need to know in general
what does this information look like

i.e. on "The world is not destroyed "
we want to know what she looks like
this information
then we should take this information generally speaking
and how to attract first to the level
by logic Perception with heart

but at the same time with all this
the heart should be as if inside the Soul

i.e. in this case you should see
physical heart but inside the Soul

when you see it
you see that your heart
it is practically indestructible at any time
but at the same time around the heart there is your Soul
at a real level
i.e. this is what the Soul is specifically around the heart
this is a special level of knowledge
this is already Thinking with the physical body

because when I talk about Thinking, for example, with the Soul
it's like a body fragment
or is there just a physical body
this is external control

this is how God " mixed " it up as if yes, but in quotes of course
control system
that each object has a control system
over any other object
in terms of the Eternal development of another object

and thus we come
to such an understanding of the World
that in essence the external object of control is like this
what if there is a system
Well as if it was originally calculated
this system for example destruction destruction
then this system also has a property
which originally
from the point of view of God's original thought about Eternal development

this system is such that there is no destruction here

i.e. it is enough to decipher ^{yes}
or just see
in this system, Norma and that's it
you use it calmly ^{as if Yes}
it is being implemented

for example, you are walking somewhere, some yard is dark
and you think what kind of events could happen here
from the point of view of the Norm
when you have an internal Norm
it will still be normal no matter
at least ^{there are} ten such courtyards or something like that

i.e. any event is normal
if you initially involve
it is precisely the element of, ^{as it were,} the isolation of the Norm
from external Reality

and what I talked about at the beginning of the seminar
that we normalize the signal or isolate the signal
it is simply the primarily perceived Norm
for God

i.e. God can always perceive normally
but He gives, ^{for example,} development to a person for that
so that man may understand His knowledge

then it turns out
that a person only needs to perceive synchronously
and he is ^{basically} in the Norm of God simply
in the Norm of Perception of God

try in certain situations
just consider
and where is the Norm from God's point of view
for God did not give destruction
just ^{kind of} get into this Norm ^{yeah}
be able to think in the same way

and here is the same type of Thinking
Thinking with God
Thinking at the level ^{of fact} ^{as if} training management
but " training " is still in quotes here, of course
because you actually do the management

always see the line of Reality
because once you get there
only in logical status
then naturally you can just think about it
here the control is different in this case
and quite seriously
from the level of Reality in that
what does your body ^{mean}
your Soul
and your Spirit
so in general the whole system of your personality
must perceive
it is the real status of management

this is when we start to think
and what does it consist of then?

so here it is
what is the answer to this question
that the world is saved is your ^{knowledge}
and where does that knowledge exist?
in general Well, there are absolutely many different thoughts
or some actions of other people
that's exactly the knowledge ^{in general} what you are aiming for
not only as a person ^{yes}
but also strive together with other people

i.e. you should see here
what is your own management
This is management, including that aimed at that
to take into account collective management
from the point of view of Macro-creation

i.e. in principle, here the ^{level} of logic is simple
what if someone has already done something useful
in Macro-creation
why ^{do} the same thing better do the following

and this is the level of advancement
as if the next control component
and from God's point of view this is exactly it
the level of your personal action

that is why God set a task for the individual
to perform some permanent personal actions ^{there}
because the ^{personality} perceives

first the whole volume of information
then does some next action

maybe the person is just sleeping
but he moved his finger
but he did it in the space of events
some action

i.e. man is the original action
this is already from the point of view of the essence of things in the World
i.e. from the point of view that all external events are, as it were, external
all external information objects
this is the level where human action
carries precisely the level of a kind of personal action
and in this case we can consider
that's exactly how it works out here
personal system of self-management

i.e. it turns out that you can do it quite well
see future events

if you can consider for example
actions of each person
in some one local event

Well for example you can take it under some microscope
study the structure well for example cells yes
then take a look
but in a collective sense
what do people do for this cell

and as soon as you ask this question
you see the Norm of events in relation to, for example , the Macro level
i.e. you get the same level of control according to logic
where can you see
very specific future events
just looking at collective action

it turns out that this collective action
this is what is sent to you by God as knowledge
and for this you just need to set a task
in general, micro-level connections
from the point of view of your Perception
and the Macro level of action of all people

i.e. it would seem to be a rather abstract connection
it may even be quite conditional in logic

i.e. for the logical level of Perception

it seems like it doesn't give much as a logical answer yes

For example , I take and focus attention

at some kind of micro level

and at the same time I benefit

because I know the future specifically

For example there is yours or any other person

but through the collective action of all people

i.e. how can this be connected at all?

so this is the structure of the construction of the World of Reality

i.e. when I considered the process in that sense

that when you see some element

how does God create Reality anyway

so this is one of the levels of constructing Reality

but I showed you practically

try to see it as a practical demonstration

i.e. well as if from experience yes, that means look at it that way

not even from the point of view of verbal explanation

and here I showed it

and do the same control

select any control of some kind

let micro let macro

and through it

through a collective management system

look at the future but at your bright one

i.e. where all events are normal

and also look at the future of all people

i.e. now do this control

I will work with you

try to see the future of each person clearly

i.e. when I said to see the future of all people

that's exactly what I meant

each person specifically

perceive

as if in a single bright impulse of one's own Soul

i.e. here is the light of the Soul, the wave of the Soul goes

and if someone's future is uncertain

there the vibration begins

well, that is, a person sort of leaves the level
where he has standardized events
i.e. then he needs knowledge in this place
i.e. the place of a possible problem
it is absolutely clear that you can receive
from this point of view to see
when do you actually watch
for each person at the same time

God's point of view
God He is forced to see everyone yes
because that's how He is made
i.e. He is His natural state

and when you, for example, consider it from this point of view
not that as if His personal impulse
aimed at seeing people
but He sees people all the time
this is normal for him

and it turns out that from this point of view
this is a state from the point of view of human logic
this is a forced state

and then it turns out like this, well as if in a state
dependent on its own development system

how about God then
to have freedom of one's own will is possible

i.e. He sees everyone
he knows everything
and then where is His further Will
from the point of view of well as if freedom of action yes For example

so here is freedom of action
this is the action of a specific person

i.e. as soon as a person determines
structure of personal choice
then it turns out to be human freedom
this is the freedom of God in this logic

and when do we start doing management here?
from the point of view of, for example, Eternal Development
then here it is enough to see God, for example well in that sense
how is it that God is among people yes

i.e. why is God among people
and because He is free
he can easily be among people whenever he wants

then it turns out
that the transfer of knowledge from God to man
it's a pretty simple way
every person can know
there are no secrets here, really

so the next element of the construction of Reality
This is precisely the human approach
i.e. the level coming from a person
and when the knowledge of God is transmitted from one person to another
this is also the next level of development

then it turns out that it is precisely the level of state
where is the Eternal God who knows everything and perceives everything
this is the level of development of a specific person
the task of developing a specific person
from the point of view of Eternal development

well, that is, to do it from the point of view of abstract knowledge
make the system similar

then it turns out that he is not alone
i.e. he has a system of external development, etc.

and try from this point of view
just translate
here is how external control of the norms is
so that you have Norma everywhere

i.e. I translated it specifically
to the human level of knowledge
showed that God completely transmits knowledge
just like from person to person
Just try to translate this Norm to everyone

with such an elementary action
just a comparison system
because comparison is also an action

there are control systems
where it is enough to compare and you get

very effective action

and when you do that
you see that the Soul of man
Spirit of God and Soul of God
and moreover, you can even say so
The Action of His Physical Body
movement of His Physical Body
this is one in terms of knowledge of this system of Reality
where is the comparison or is there an abstract comparison
or just a vision of the essence of the World
this is the act of Salvation in essence

because if you correctly perceive the essence of the World
then a person is always alive, always preserved
he for example there is healthy, etc.

i.e. it turns out that there are elements
which seem to displace and do not allow a person
to focus attention in time
it is in the diversity of events in the World

so, in order to highlight the main signals and move correctly
again the level of Macrosalvation

i.e. as soon as he comes to him
it turns out that it will simply stabilize then
a person in this regard
it is already becoming stable
and receives control precisely from God
through Macroregulation

this is again the management level
coming precisely from God

and when you start acting like that
then take a look
for example, the level of organization of one's own body
that's exactly in Infinite Development
level of assistance to other people for example
level where you can for example make control
coming from you
so for example from God yes

i.e. you can kind of connect
to the control of God

i.e. just send Him a request
so that He could rule somewhere there

keep in mind that it is the level of Self-Preservation
from the point of view of my Teaching about God
he exactly means that
that it is quite possible to treat it this way
that Self-preservation is for God
this is self-preservation, generally speaking, of any person

i.e. that is why it turns out
that you can turn to naturally
here is the ability to handle naturally
i.e. not only by concentration, yes For example
but simply in any action
this is actually a guarantee of that
that any actions, even everyday ones, where you are busy
you may be distracted by some business
anyway, they are kind of in a safe zone

i.e. you are at a natural level
as if on this stream
there is that path before you
which you go through while doing your business
but at the same time you go
precisely in the structure of general and personal security

when you start looking here for example
well, well for example, what exactly do you need for that
to make management
then of course you can take some logical thought from there
and do management
but often it is desirable to simply get down this path
and this way he well as if for example, let's compare
with such a phenomenon as just movement there Means

just on some device yes For example
on some kind of mechanical device maybe
i.e. you move and this device
it just kind of moves you
into the structure of sustainable development

i.e. you have to feel a certain platform
where there is movement going on
both from God and from you
i.e. you should see how this system is, so what
that if possible to see her

First with the Soul
i.e. here is the control technique
then Consciousness
and then the structure of one's own Spirit

i.e. logically, for a person to be
just in the safe zone of developing one's own
it is enough to fix it first
the optics of one's own Soul
i.e. to highlight simply take and concentrate attention
on the optical phase of one's own Soul

then move on to the structure of your own Spirit
and when you see the Spirit as if more of a diffused glow
then you see how your Consciousness is organized
where is the Norm in the essence of your own development

i.e. you see that your development
completely practically as if in a normal version
but from the point of view of organized logic
i.e. you can see it here
that the Spirit and the Soul create the Norm of Consciousness

and when you start to act
It is from the Eternal Control Components that
what we consider from the point of view of Soul and Spirit
it turns out that Consciousness is created in this way
this is a very precise tool for further management

because when we create the structure of Consciousness
simply from external events
this is one management structure

if we see how Consciousness is created
through the work of the Soul and Spirit
then it turns out that this is your own work
this is already the level of complete management control

when you start combining
external events thus
what is the level of one's own Consciousness
at full control level
and then external events

then you see that you are doing the same work
as God does when creating externals

namely sustainable management systems
where is the level of Consciousness
this is a level that you created yourself
and the external level is a combination
as if with a primary level

then you get
a completely stable control phase

and try when you achieve this exactly
in fact, it is precise control
as soon as you reach it
try to fix it above the level
where the event must be positive

i.e. precisely that event
which you personally want

This concludes today's seminar.

thank you for your attention
