

GRIGORY GRABOVOY
The Teaching about God
Generalized Control System in Eternal Development
22.02.2005

Hello again
the topic of my seminar today
this is my Teaching about God
Generalized Control System in Eternal Development

in this topic i show
in what way does a person
having completely different
for example principles methods there systems points of view
generalizes in a managerial way
different systems, means and methods of management
and implements precisely the technology of Eternal Development

i.e., in fact, his own Eternal Life
or other people there as well

therefore, in this topic it is necessary to consider
firstly as a general management configuration
when we say the light of different levels of Reality yes
going to human perception
this light characterizes that
that the path he is building for himself in management
this way is exactly correct
and a person generally guarantees himself
that it will evolve forever

this is actually what we are talking about here
what from the ordinary human perception
as if his line of Eternal life of Eternal development is being built

in this regard it is necessary to consider
a certain fundamental status of a person
from the point of view of God's Action
or so to speak, the state of God Himself

if we then consider the state of God
then for Him the concept of "Eternity"
it's a definite well as if a sensory quantity

Well , if we consider the principle of Infinity
it's a certain kind of opinion or impression

what He Himself created
for God
outer Infinity
internal
it's the same thing

and when the internal action
this is accomplished for a person for example Yes
Thinking Feeling
for God it is the same action
the only difference , so to speak
when He considers Himself as a man
then He, by means of volitional control
structures the internal system
i.e. it does it like a human does

and therefore when for example
Well, we are considering such a process
what for the person who is considering
for example, Infinite Earlier Life

there for example, a person simply takes it and looks at it
for example a simple position
that there is some kind of preliminary
An infinite amount of time
because logically it is Eternal time

and it turns out that the huge array of Eternal Time
is being implemented
in the current state yes

but the Eternal amount of time
excludes , generally speaking, final processes
i.e. against this background, if we think about all of Eternity
any final process it disappears

and if for example there resurrected
considers the Reality of the Eternity of the past
then he may have the idea that
that there was a termination of his life there
in the biological sense

i.e. he can actually go out
to that level of knowledge

when his Soul perceives life like this
like a man who never died

and it turns out that based on this
Well as if the level of interaction is getting closer yes

with any other person who has not died

so based on this we can say
that, generally speaking, technologies, namely , for example, Eternal Development
under conditions, let's assume , including there is a general resurrection
in conditions of general recovery
any object of information
not only for example yes the resurrection of man

and what can be restored
any creative systems
which existed previously in the Infinite level

here this system leads to that
what is a person in principle
just as God builds knowledge
through the perception of Eternity, yes
for myself
man creates eternity
through, as it were, internal actions of internal resources
where the element of some kind of transformation of information
is his own Perception
in the center of which he can see himself first of all

if a person has looked at himself
then all external information gets to him yes

and it turns out all right there let's say Eternal structure of development
is transformed through the physical body

but first of all, to see yourself there accurately
it is necessary to determine the position of one's own tasks

i.e. not every person
will generally take care of himself, so to speak, in detail
because it is often more oriented towards the outside world
Rescuers are mainly engaged in Rescue, etc.

so it turns out that based on this
so that the structure of precisely generalized, as it were, signals of different
Eternal development

led to some kind of integrated Eternity, so to speak
needs to be considered
different positions as if different connections
between man
Human perception
and how God gives different paths to man of Eternal development

i.e. for the same period of time
a person basically receives
many signals of Eternal development

and it turns out that if, for example, he these signals
differentiates together
it gets a more powerful boost
for your Eternal development

so that the impulse was, for example, Infinite
what guarantees the eternal development of man
at the current moment in time

i.e. that nothing happens to a person, for example
it practically implements any control
under any combination of events
we must unite all of his actions as if
introduce a sufficiently high concentration
event management

i.e. any action of this person
this is a level that in any case is realized positively
for this person

i.e. the status of the event is as follows
that we can fit into any structure
actually introduce the element of Eternity
where there is a positive level of development of events

it turns out that there is mutual intersection
these optical rays of Eternity yes
mutual concentration
this is the level that actually should be
as if self-growing, self-regenerating
at some level
i.e. another optical branch

and such an element arises

what does increasing the intensity of management mean
before creating statics of a separate optical beam
Well for example, the one that characterizes a person's life

and if we have such a level of management
as if we achieve through knowledge
here it is enough just to know by the way
that such a level exists

then it is practically impossible to change a person's life
i.e. he lives and that's it

i.e. we are talking about that
that due to the external optical system
as if there were external radiation effects there

main optical beam
it becomes unchanged

i.e. the light actually begins to fill the light
This can happen physically, well, that's right
as an increase in intensity yes

in fact it's just the light of life for example
is filled with an external element of different event elements
which also carry light
and the filling is maximum

Now if we consider
any space there near such an element
like a person's life
there is no such event
it turns out that all the adjacent space
filled, generally speaking, with the same type of light

because in order to move, for example, in space
well the level of light control
through a concentrated and dense physical body
the body needs to be aware
the nature of external Reality as if in complete integration

where what light exists where it looks there
what is the vector level of light

and if we consider the molecule of the external World
as a source, let's say, of Eternity, yes
or there are technologies of Eternity

after all, if a person looks there
the same molecule
he can generally determine
that it exists almost all the time
at a certain point in space means
in the form of some kind of universal value

i.e. elements of Eternity
exist virtually everywhere in humans

and so if at the level of management
consider
how does a person move in information in general

as such so level yes For example
let's consider the frontal principle

then you can see that the body
it is precisely the physical body
this is a manifestation of complex systems
all these informational glows

i.e. concentrated optics
gives specific parameters of the human physical body

and therefore when, for example, a person
there along the hereditary line yes
born with certain meaning levels
there let's assume such as external signs

and here it turns out that this is what
the very features of a person's face or his character
this level is, in principle, quite clearly defined
well, like previous generations, yes
and to a certain extent the structure of the external environment

i.e. why aren't the people there completely similar to each other
because here is the influence of the external environment
there is a structurally modified optical parameter
gives changes in appearance
according to the structure of the Eternal development

that's why if the difference is in Eternity
so there is even such a concept
as "a difference in the structure of the Perception of Eternity"

you can see it here
what exactly does the development of one specific person mean
determined precisely by the difference only from that point of view
that it is man who develops Eternally
and therefore he has
different structural level means different time

Well let's assume why
for example, if you just formally take and ask such a question
why doesn't god do this
so that everyone would be born at once and everyone would live peacefully yes
Infinite time

and because if we proceed from this
then here is the next structure of Eternity
arises in dynamics
from one state to another

i.e. for example a person who was born
there, his relative is there , yes
and here is the difference between the first and second birth
This is exactly what a complete control system means
for a born person
in terms of what exactly makes it so different
from for example there are parents or relatives there
because the path of Eternal development is determined for him
i.e. his physical body

i.e. through the physical body of a person
it means you can view it
almost all systems of its implementation
who for example there are relatives there

and also look at the trajectory showing
where his physical body develops
from the point of view of Eternity

and if a person realizes
its structure
Well for example in the information
or there in one's own Perception
with a hereditary level of management
or not necessarily only from the hereditary level of management
but maybe it's, let's say, an event contact
for example, his relatives are there
contacted in information and vulgarity
with certain systems

then it turns out that we have
highly integrated management level
from the current state of the person there

because relatives
which once means Well, we worked for management.
and had contact with other people
here a certain thing arises
well the level of information management
similar well For example you can say it like that there
like some kind of vacuum cleaner
which sucks in not dust of course
Well, it does draw in some information
into the structure of the past

where is there a certain center
which means the Eternity of past development

because in essence everything in the past has its roots
also a certain structure of Eternity

the past has already happened it is considered Eternal
but the past is a speculative level of man
just linear time sharing well let's say into components yes

so if we consider
already intellectual well how can I say that
structurally intelligent system
where the sound form changes
for example through the structure of the future
i.e. in the future there is a different sound

if we look at the structure of words, for example
how are they even pronounced in terms of the future yes
they either speed up or start up like a record
at a higher speed

and it turns out that we have
logically it's clear there are more events there yes
they become more concentrated, therefore the sound is faster

but if you take the sound and turn this record up even louder
look far into the future
then what does the sound turn into then

the sound then turns into words firstly
i.e. the word emerges again
and already we
or we can pronounce it in a certain way
somehow express this sound

or we can assume there mentally means to imagine
some level of management
in the future
and consider that this level of management is such
that we have for example the opportunity
create any word there
any action
any sound by yourself

i.e. the reverse action coming to us
there from the light optics of future processes
gives birth to current management now

so if we consider it in general
An endless system of development yes
we are talking specifically about Eternal development

in fact we are talking as if
on guarantees of the Eternal development of man
under any combination of events
and we use a generalized structure for this

here is some information yes
she's hypothetical, well, it's obvious that she is
the one that will not happen yes negative

i.e. there are such forms of information
like some kind of ballast that exists
in information on a single-type feature

For example there you can say that you can cut your finger
Well, theoretically it is possible to cut it
but it is not necessary that a person will ever cut it
and yet such information may exist

so here is a person in this information
must react to this
as if at least having determined the status
how effective and appropriate is this information?
and generally speaking it applies to him

as soon as he understands
that it's just a form of information yes
not the action itself
then very clearly he can well how to proceed further
depending on what he wants

but he may not use it
as if that information is of no importance to him
i.e. it won't happen to him

but to go through this information
in the future he should still
because for future development it is fundamental that
that there should be a controlled area of its development

i.e. any of his actions must be like this
what he practically implements
full control over any event
and even for an event that was insignificant
but for example there he does not want to cut under any circumstances
finger then he should
well from the point of view of Eternal development
he should strive for this
and I must very clearly bring out this event
to a plan that will not be realized

and that means there are obviously control factors
which will not come true
and in principle there is no point in dealing with them
but nevertheless well it's not even like "nevertheless"
but generally speaking there is just a general approach

this is how it is in the conditions of human development
well, provided that aging exists there
there are certain things to do, etc.

and how to save it anyway
it is Eternity in the physical body yes

so this is where it comes in
it is precisely the level of the state of the Soul
or there let's say the glow of the Soul
the inner glow of the Soul arises
which is starting to show almost
what and how develops in a person
from the point of view of its future events

i.e. it turns out that the Soul begins to glow
here is an important level of control
where do you start to see
how your own Soul glows

as soon as you set the task of Eternal development
that means it's actually **at the level**
as if of **your own capabilities or abilities**

i.e. you in this case
must guarantee themselves
that under any combination of events
you can still live forever

Well, imagine what could be there
some earthquakes, avalanches there
if you are well in the mountains there yes, if you are not in the mountains, you are
somewhere else
some events
these are the events in which we must live forever

therefore it turns out
what needs to be clearly differentiated
can affect this control system
and what like well, it does n't matter
you shouldn't pay attention to this

so this is what you shouldn't pay attention to
a person must know immediately and always

i.e. there is a mechanism
which exists
absolutely definitely absolutely clearly
that nothing negative ever happens to him there
and he must know this immediately and always

and this is where the Soul and Spirit of man are
act in the same direction
they do act
against some negative event

as soon as you find this point
From now on, you can stop dealing with the event altogether

just in case you can check
a few more times there two three there five times maximum

and we can go further
as if to the next level of management

then it turns out that a person has
a certain guarantee of that
Well, in front of myself , first of all
what he man looked at means in front of him
a certain system of events

and in principle this system is like this
what does he mean by his personal management
chose a certain path
and this path begins to be realized

so in this case the main level of control
is that a person chooses his own path
when he knows for sure
For example Well, what signs does he not need?
for there Eternal development
what needs to be taken to the side, what needs to be continued there

and here is a personal choice , a personal choice of one's path
this is what we will call it there
for example, the glow of the Soul into Infinity
i.e. the Soul shines into Infinity

then the person likes it
that's when a person likes it , for example
such is the management there so let's say glow
then it turns out that his physical body is already
Well in general, you could say it's luminous
together with as if with the state of the Soul
and the luminous Soul means

increase control
such as there you can increase the sound prolongation
there by means of an act of will

here is the external Light and Souls
or is there the inner Light of the Soul
as the Light of the will and the Light of the body
they can merge
inside the physical body
or for example inside the Soul

and so we came to this concept
that there is a concept of "inside the Soul"

so when do we, for example, start to analyze
and where then is this "inside the Soul"

because the deeper a person is
enters the structure of the Soul
the more he simply perceives the Light itself
approaching the Light of the Soul
it's just the Light of Reality
which becomes more saturated

and it turns out that if we wanted
get inside the Soul
we must first consider
the next person, i.e. that person
which one would you like to look at

and based on this you through his state yes
you start means you act
with your own Soul

i.e. the Soul acts
when you see you understand
or help another person
it acts more actively at this moment

i.e. it turns out that the overall level of management
in Eternal development
this is the level when there is action of the Soul
aimed at good for development
and at the same time it is completely clearly visible technologically here
that the center of the Soul is exactly here
as if the radical center of the Soul
exists
but for the Soul itself

i.e. You see it with your soul
and let's assume to translate into thought form
then it turns out that you are translating
as if only a reflection of what you see

and that's when you say
well what is there level
where the Soul and the body merge
this can be traced
and the glow begins

Fine
it's all clear, there is a merger going on
where is that Light that, for example, is from the Eternal body, yes
where is this Light in this case

so that's how it works here
what we have is Eternal development
when a person knows that
what is his inner state of Soul
these are all his external events which he himself wanted

and sooner or later he begins to understand
that in essence he didn't want negative events
there to someone or there to yourself

God how does it
He basically sets the controls
but He Himself may not build
some negative events

and this is where that level begins
when a person begins to know his own Soul
why did the Soul set such tasks for him
why did the Soul determine for example there
Well, that's the body's property.
how to react to your own Soul

and when you start to see
that the Soul sees itself as a center
through the adjacent segment
i.e. she actually looks
basically with the same tool
well, the one that can be correlated
as with the tool, yes, it works like this
and operates through its own structure

i.e. the mechanism of cognition
is the very matter and structure of the Soul

and that is why the Action of God is visible
means regulating
in fact, the movement of the Soul into Infinity
through the structure of the actual, as it were, internal Eternal development

where the Soul itself shows itself in general
what needs to be done

i.e. in the Soul there are all events

hence

she will show herself

she builds it herself

and it turns out that we end up in an autonomous system

where is God's Action

this is, after all, also an internal action of the Soul

for example, the Macro-creative plan

and with this level the solution of your questions

as per my Teaching

action through Macro-creation is mandatory

is happening

it turns out that based on this

we see the following Law

as if this is the development of Reality

in terms of precisely the obligatory Eternal development

what we have here ^{actually}

level of full realization of the Soul

through Macroaction

where Macro action is locally manifested

in the form of specific ^{local} actions

and these specific local actions

they are actually at any level

manifested as the full form of man

but through Perception already by the Spirit

this is how the Spirit perceives a person, ^{for example}

if we ask such a question

can be perceived by the Soul of a person

Well, it's the same person, ^{yes}

In spirit in principle

then there the optical perception is simply ^{as if} modified

but if the Soul perceives a person directly

^{as if} in the form of that status

well which is the most common

then the Perception of a person, ^{for example}, by the Spirit or ^{by} Consciousness

this is already a different Perception, there is more logic of connections, etc.

it turns out that a person can be perceived
there are an infinite number of ways in essence
Well, basically, like any other information object

but there is a difference in a person
that when two adjacent segments of the Soul
where one segment for example is well there is the vision of the Soul
another segment is the event itself
begin to interact
we understand that internal interaction
can be translated into all external systems

i.e. it turns out that we are dealing with the same
that the internal systems of human development are actually Yes
they develop simultaneously
the structure of external Reality

if you follow this Law here, it means
that how many people were born
for a certain period of time
what changes have occurred
there in the Macrocosm there for example yes on Earth

then you can build lines quite clearly
connecting
the birth of a specific person there with the external environment

and it turns out that this is an internal manifestation
from the inner glow means coming
in the structure, for example, there is Infinite Development

this is such a manifestation
what you see you begin to see almost that
how are different objects of Reality connected
at the level of God
with each other

i.e. a person, for example, remains on the sidelines
then he can see how it is connected
For example there is a clearing with a tree there
or there is a speck of dust with a clearing, etc.

and we begin to see
that each form of Consciousness can be different
well the one that perceives

but at the same time we have

a certain integrated structure
where there are completely different systems
related for example there on certain optical laws

if we take
Well, we'll connect completely arbitrary concepts
here are just any concepts that come to mind
in optical quantities
due to their glow of these words even from them
then we see that it exists
absolutely universal Law
by which any combination of events
leads precisely to Eternal development

this is an important Law of life
where, in general, there are about ten cases or more
you are convinced that such a Law works yes For example

but it is possible
it's one thing to be sure
another thing is to clearly know there and implement it
system or technology

and it turns out that in this case you see
that here is the implementation of the management technology itself
in this case it consists of
so that here is the root level of the Soul
yes, the deep level of the Soul
perceived all external events in the same way
as the Soul perceives itself

and in the root system and in the external one at the same time
i.e. how he evaluates himself from the outside
and knows that control is taking place
at the root of this system

and at the same time you begin to see
what then are all the external signs of the system and management
any optical manifestations
it's just a kind of personal emission of the Soul
in information
optical phase emission of the Soul
although the Soul remains unchanged

and based on this the outside world
this is an informative manifestation
which leaves the world practically unchanged

and internal manifestation
this is that the human world can be regulated
from the side of such a process
as a system of interaction with the outside world

this is how a certain boundary appears
which is set up like this
that new phenomena and new events often occur
but this is the event level of God
who also constructs any phenomenon as if actually Himself

and that's when a person fully realizes
management structure such
what does it mean he has to build everything himself
then everything falls under the control phase
and you get that
that the integrated level of Perception of Reality
i.e., in fact, any element of Reality
it can also be called an "integrated level"
those. at such an "aggregate level"
It clearly provides
Eternal development Eternal life to man

when is the maximum concentration
leads to some one local thought form
this thought form is like some kind of protection for a person
i.e. when a person practically means
under any development systems
starts moving all the time
towards Eternal development
in any direction

i.e. as soon as he recognizes
what any means direction any action
this is the structure of his Eternal development
then he becomes free to move wherever he wants
and he knows that at this moment he lives forever and will live forever yes

i.e. precisely the selection
this centralized factor, so to speak
in all information
in relation to which movement gives Eternal life

but in the center of this information
God may be there

The One God who gives knowledge
and when moving towards which
it turns out like this, for example there is universal development

i.e. it means that any control center
built on that principle
how is it built

Well like a level of vertical phase of control
where is the external information

it is processed there and then accumulated
and management is done
going from you for example to Infinity

so that people can be confident
that no negative control will occur
this is the autonomous region that he controls
Human
must constantly narrow
into the structure of some kind of internal center

and this center may even be near the skin
not necessarily inside a person but close to a person
center at superconcentration
forms around it simply the space of events of the World

and based on this we see quite clearly here
that this very space
it's almost like that
what are you starting to see
how does God build external Reality?

Well in fact, for its Eternal development, as it were Yes

so although why "as if"
because God has it anyway
so you can only see similarly
i.e. you can kind of guess
for example, apparently God does it this way

and it turns out that this option is like Thinking and guesswork
where does thought as a guess come from
of action there, yes

i.e. we can guess too
what does it mean, i.e., artificially, as it were, we derive control
and we think that here we are, a person can guess

by a combination of features
that some action is happening

but this guess is something external
i.e. it is your personal action
there is control and there is, for example, personal action

that's when in any action
including for example there is a personal action
you get Eternal development all the time
then in fact you have already left
to the status controlled by you
namely the status of Eternal development
which is practically
so this is how it is implemented
is this how they treat you?
in management
what can you say quite clearly

that when you learn this postulate
that any element is a carrier of Eternal development
then this is exactly how to get such an element
it is possible from any external environment, generally speaking

and although this is complicated
there, for example, it can be perceived as diversity
which contains there different forms of answers and questions
and in principle this means diversity
can still develop itself

then you see that you are getting there
into the very structure of life
i.e. to the center of life
to the root of life
and with all this, life then becomes Eternal
because you are
in the structure, then, of that projection of one's knowledge
on Reality
that you actually begin to personify knowledge with yourself

i.e. you come to that
that your physical body is knowledge
Well for example God has a Physical Body
this is all the knowledge of the world
although this is the physical body of one physical person

and it turns out that when you start to see
these are the connections
then it turns out that the body is initially laid down
in terms of development there as the Eternal body
it means it's developing correctly
and therefore actually gives a level
or something of one's own correct development
when the body itself also recognizes the future
such as Soul Spirit Consciousness

i.e. the body has its own level of intelligence there yes
means a certain level of action

and then such a process arises
is somewhere, for example,
Well there it goes in one direction
then he doesn't want to
he changes direction or some situations arise

this is precisely the level that contributes
initially, that's basically it for this technology
namely the Eternal development of man

but despite all this it works out
that some external events
which happen near a person
when he realizes all the time there is the external World
i.e. builds, as it were, an external World
they are such that a person can trace them
Well, in each case, my personal participation

and in connection with this it turns out
which is what I said in the lecture
that here is to trace personal participation
This is an important level of management
where you practically make the management like that
that then you definitely control the whole Reality
and this is precisely the Eternal development
is a guaranteed factor in these conditions

and that's when you start to see
management well there for example in Infinity

i.e. what difference does it make to you if you can manage
then you can take it and look
For example there in Infinity

in some very distant future
its own design and control
there specifically work with physical things yes
at that time

then here it turns out that this happened
we must first guarantee ourselves
entrance to the future
and then, as it were, implement this level

i.e. it means that you can
Well so let's say in logical terms to speak

that you live forever
when you control any cell there and any event
here in the logic of processes

and when you start to see
this is some kind of oncoming traffic
so through thought control yes
and vice versa, the space you built
is moving towards you
built by you

then this is where it arises
the structure of the truly real Eternal development
which by itself it exists
and you are , as it were, at the pole of Eternal development

but at the same time, technologically
this is the generalized level of use
various information for Eternal development
it works in this case somehow
that yours is like an element
which exists directly yes
like your Eternal development
this is yours

and all other elements
Well so besides the one you considered
for example in the first impulse of Perception
these are elements of the external world, so to speak

it turns out that it's the same as God does
It divides the world into two parts
in the structure of Perception

i.e. He differentiates Himself
at a constant level of action
in relation to the World
then it turns out that it is in such a systemic form yes

and when you do the same and try to see
for example, what is your World like there?
he actually speaks according to certain parameters
is no different from the World of any other person, for example
in terms of this, for example there Well, Eternal development

then you can pass on any knowledge
absolutely, meaning without any loss of quality , so to speak
through understanding
because you are going out
precisely to the same level of management

where the control is actually of the same type
this is the level where you can determine
presence of God
because God is always at work
well, it's the same as one Person there

and therefore, based on this
uniformity is an action together with God

and when you start to see it
then the next level of management
where did you consider uniformity
as a projection of different elements of Reality
at the current time

then in the future you may well see
such a management structure
when all the elements of Reality
they have something similar, yes
because of what you did

i.e. every element of Reality
has a certain structure of Eternal development
where this structure is also based
on certain system connections

and if by analogy to these connections
look
you can see how in the future
man develops civilization around himself

i.e. you can watch
through a kind of Microworld to look at the future
because the Microworld is considered a more stable value
often and mainly
and it turns out if we, for example, apply it correctly there
we then see all future processes

and why does this happen yes
and because it is minimization
In general, one can also consider the Macrocosm
but in this case I'm talking about the Microworld
because minimization brings management to that point
that such a small place and starting point
that a person has no current time in control, yes
he always lives in the future tense

because if you squeeze it out
as if a system from the current time

control system
then it turns out that she only gets into the future
She can't get into the past for us
because the past is considered in the collective Consciousness
that this is a poorly controlled level
specifically for direct control

and it turns out that he ends up in the future
although as soon as the future begins to be realized
a picture of the past may open up, i.e.
but through a structure where control of the future is precise
that's exactly how the picture of the past will be revealed more precisely

and so that the past was absolutely clear yes
100% open
just like it was perceived by those people there
who participated in these processes

it is necessary to highlight this aspect of management
that when we deal
for example with all the future processes there
as if in different directions, different positions
then here in principle such an aspect arises
what the future might be
as a vector yes For example there is a value there
developing in one direction
and constantly, well, a multidirectional value

which changes depending on
how do you think

and that's when you learn
change the structure of the future from Thinking
by means of the technology that I have just given
at the same time I give it at that speed
which is necessary for mastering
exactly the next action
the structure of future events to be more optimal

i.e. here you also need to be able to present information
so that even what you said, for example, Yes
what you said
this would be used for the Eternal development again

i.e. it turns out that you can say the word
to highlight some quintessence
from this word
and this word is the builder of the following construction there

while you are in control
no matter how you reduce it, you don't diminish it in any way
because some matrix principle is triggered
highly energized there luminous system
if it emits some amount of light
light does not affect her condition in any way

well , to put it simply, if it means some kind of criticism
was held there then it's wrong yes
it turns out that this is, in general, a fairly problem-free option
because there is some kind of pushing going on
negative information yes
from the point of view of the Infinite there future development

and based on this, if we consider
for example, the control principle is as follows
what are you for example you see there
all future development as development
there personally yes
all people
as the action of all people

then here is the Action of God
this is a level that is developing towards you

and it turns out that all the combined features
as if external control
this is the level that is just for everyone
we must follow the lines of maximum concentration
namely the Eternal Infinite development
recognizing this level in advance

hence the level of recognition
this is, in general, already a special but less energy-intensive level

it fits under Eternal Development
any external system is obtained
here it can be translated into universal
through electronic means or mental
due to human thinking

and it turns out to be just the place
where can people live
in principle, well, the whole system of Eternal development is like this
that the impulse of this Eternity
is the man himself

i.e. its glow
there it pushes through

this physical informational Reality
and it turns out that due to this
we have quite an interesting level
in fact, personal control over the situation

i.e. the person controls
my own deep inner world
and at the same time he can control it
any other external situation
for myself

and that means this Light there is of Eternal development
this is the Light that in principle is actually like this
that in general it can even be differentiated
as if in the optical range
as some special Light after all

and you can immediately walk along this Light
there without moving away to any other structures
the main thing is to learn to recognize
this is precisely the Light of Eternal Development

and how it shines vectorially

by the way, this is what happens there
that it shines directly often on the physical level
and therefore is completely clearly visible
specific vector

in how to further when you already see
what is Light for example Well, a certain one
The Light of Eternity is such that you learn to walk in it.

Well, actually, if there is water there
there it is not deep, there it reaches up to a person's shoulders
he can learn to walk there in this water
on some there For example there are special systems
well which may be unstable
and let's assume that water will come to stability yes

and that's when we look at
these are exactly the systems
well how about some stools there
put metal in water
and walk along them
strong current
then the water starts to wash away
if the stools are wooden
then they are like well, it starts to rise and so on.

this is where some kind of instability arises
for example we will consider such a picture in the pool yes

then it turns out
how a person can go through all these movements
while maintaining a neat row
he needs to walk on stools for example

so based on this design or concept
here it is important to develop the next level

what is inside any dynamic system
which is , well, conventionally , a stool there
or any other movable level
There is always a level
which is controlled by a person
in fact, as in it, as if in the mental plane itself
i.e. how he thinks about himself

thought includes some sub-thought
and so it turns out in all external Reality
at the expense of well as if Macrosystems of external relations

and it turns out that when you find
even in any dynamic system
I told you before about a more static system
find exactly the nodes of Eternal development
that suit you personally
then there are no problems

all the glow that comes at you
this suits you
and you walk calmly
in any static or dynamic system
you just need it in any thing
highlight the structure of Eternity
which is directed at you

then any control is carried out very quickly
and as I said
highlighting the structure of Eternity
achieved through this level of knowledge
where the diffuse system produces uniform glow
well and other control systems
where is the uniformity of the glow
this is the Action of God and God Himself is visible yes
in control action

i.e. in this way you can fully determine
a completely correct line of control

the main thing is to see that there is a glow
on you personally
that it is yours personally

and then you will really be calm
Evolve forever
because you know you're moving in the right direction

This is where I end today's seminar.

Thank you very much for your attention
