

GRIGORY GRABOVOY
The Teaching about God
Terrorism Prevention System
15.09.2004

Hello
the topic of my seminar today
this is my Teaching about God
Terrorism Prevention System

in this topic first of all you need to do
concentration
and restore life where there were terrorist attacks

for this it is necessary to consider the following position
that the Soul of man has the form of a body
and just concentrate on the Soul
and in general on the Souls of people
where life needs to be restored

and at the same time this position
should be viewed this way
that life is restored from the hands

i.e. consider management in this way
what do you perceive first
movement of life through hands
and then the body is restored, for example

and in this case it is necessary to consider
such a position
what for system management for example
management should be done first
going means that
what when you control
for example, the level of one's own Consciousness, yes
and when you consider
the structure of one's own Soul
then it is necessary to come to a systematic approach to this
that there is no terrorism in principle regionally

i.e. it is necessary to make management
when you through regional glow actually yes regions
you get a feedback signal that there is no terrorism

for this it is necessary in the collective Consciousness
of land at once, for example
areas in principle of external space
to specific local areas
i.e. in your Consciousness
and consider that all signals
coming from each control area
they come to you
and you can see Norma

The norm is the glow of your actual Soul.
where the ray of the Soul does not waver
i.e. there is no, in fact, well, kind of unstable position
development of the following events yes
in the region for example

and first of all according to my Teaching
Here we should consider the following position
that from the point of view of my Teaching
everyone must be saved
including the aggressive side

therefore, if the representative of the aggressive side
there is a chance to survive
then it turns out that he doesn't behave like that
more aggressive policy
i.e. he provides life to those whom he captured , for example

so in principle in this system
needs to be considered very carefully
namely the position of survival of all parties

for this it is first necessary to see
in what way, as if representatives of so to speak terrorism yes
how do they react
on the external and internal environment

i.e. first of all you need to see
that they are more developed
system of perception of the external environment
i.e. they work as if on the structure of external space

and for this it is necessary in the structure of the Soul
do the same action that God does

i.e. He gives life to everyone at once
and on equivalent terms

i.e. this principle of equality
in this case it is displayed in that

that for example someone chooses a quiet life yes
someone follows some
that's exactly the problematic development systems
i.e., for example, participates in terrorism, etc.

and here is this principle of equality
which is given by God
in the Consciousness of every person
it comes down primarily to that
what we must in the Consciousness of every person
look at the structure
when there is a kind of equilibrium phase
i.e. knowledge of God by man
and knowledge of another person for example

i.e. man gets to know man
when a person gets to know the external environment
these systems must be equalized

those. actually specifically
to stop the development of any terrorist attack
it is necessary to equalize the positions of the external environment
and as if the inner Perception of all people

i.e. management is done
when, in fact, a sort of resting phase sets in

and the more people control
i.e. the greater the collective Consciousness
works in this direction
the more precisely the position is actually Norms yes
i.e. standardization occurs faster
and there is an opportunity to get out without casualties yes
from some situation

i.e. in fact, the management positions are still the same
that the concentration of collective Consciousness
should be high enough
for example, to align all positions at once

for this you need to have access

because the main problem is in development terrorist attacks in general
is that, as a rule,
decisions can be made fairly quickly yes
spontaneously or change objects
means in relation to which
let's assume a terrorist attack is being carried out

sometimes it turns out that there is interaction
just person to person

i.e. in fact we are talking about
that for example with ten positions selected there yes
a terrorist attack is being carried out
in relation to a particular object
well except for those cases
when a terrorist attack seems to be carried out all the time
in relation to one object yes
in relation to a person, let's assume, etc.

then it turns out that if you consider
here is the internal position of the terrorist attack
in this case we need to level it out
again, here are the levels of , as it were, one's Perception

i.e. when, for example, the possibility of a terrorist attack is yes
somewhere directed towards one person
or in relation to many objects there
then here it turns out what is needed
at the level of the Soul, develop such a position

what is your Spirit that you are considering
as the level comes to you
as if actually from God
i.e. it comes from above
The Spirit Coming to You
but it is your own Spirit

here is a very important position in this management
that you perceive your Spirit with your Soul
but actually coming from God
i.e. you see
how god sends you your own spirit
and yet you always have it within you

i.e. it turns out that you see

the phase of the ^{absolute} meaning of your Spirit
because of the high Spiritual level of management
gives a fairly specific counteraction

i.e. the higher the Spiritual phase of management
the more protected you are
because, for example, if you remember various cases
in the Great Patriotic War
when the concentration of the Spirit
allowed them to come out unharmed
to people

military operations there

it turns out that this is the concentration of external luminescence
should be high
for this you must see
source
where your Spiritual system is directed towards you

i.e. you must first of all see it
we need to make it so that all sides have life again
i.e. find the life line of all parties

because if the other side has life
then it turns out that she doesn't behave ^{extremely} aggressively
i.e. it is always as if it is located
in the structure of the diversity of future events
where events have a natural development

i.e. development where there is life
Eternal life

i.e. one of the aspects of Eternal life
this is the ability to restore
structure of preceding events
but the main criterion is that
that people should not die
i.e. they must live under any circumstances

so it turns out that
so that we can solve this problem systematically
we must see
how does it all happen anyway
real interaction
at the level of Perception of God
all elements of information

in this case we will have to consider
a deeper structure of the World
rather than assuming a simple direct control system

in this case
if we see the Norm of an atom for example yes
those. concentration on the Atomic Norm
when it's molecular level
or the atomic is in the norm
allows man to be saved too

i.e., in fact, the allocation of a concentration point
where do you actually have

normalized level of perception
where God gives the system of knowledge that allows one to be saved
for example, yes, not only to you
but also to be able through Macro-again Salvation
make that event
which, for example, actually implements Macrocontrol

it turns out that we work here all the time
in the phase of collective Consciousness

i.e. it turns out that the more we are in solidarity
we conduct concentrations, yes , on management
the more sparse the system becomes
possible, let's assume , in some problematic systems
development of events

and in this case we must see very clearly
that here is the restoration and for example the consequences
this is the next action
but it is necessary
and it must be completely complete

i.e. the ability to lay down a structure for reconstructing events
so that events do not come true, for example
let's assume in an extremely negative way

for this it turns out that we must see
how events are organized in Norma
God

i.e. He gives life to everyone in any case
and this peculiar contradiction results

at the Norm of life ^{yes}
at a normal level of events
i.e. in fact the Norm of events is somewhere very close

and it turns out that well, ^{well} how does factology arise?
some random variables
what is a normal spectrum of events
here is some random variable
or or ^{for example} a participant of the aggressive side
from the side of ^{this} aggressive level of management
somewhere, ^{as if} some systems are going through, ^{for example,} control
or he ^{somehow} accomplishes that
which is ^{generally} difficult to implement sometimes, etc.

i.e. here is the management structure system
in this case
it is a rather subtle system of knowledge in fact

Firstly, this is precise knowledge of events
secondly, here it is necessary to see absolutely precisely
people's reaction

i.e. to know the development of the thought process
know the development of the event-thought process

and it turns out that in the structure of all the terrorist attacks
often thought process
it does not correspond to the structure of the action
because a lot is happening
^{well for example like} random events ^{yes}

it turns out that there is a need to control the structure
namely , in fact, some sound forms
because the situation is very tense
and if ^{we suppose} that a heightened sound form arises
this may lead
^{well, let's assume there} was a shot there for self-defense , a terrorist, etc.

and it turns out that in this control system
it is necessary to see first of all
the root level of the collective Consciousness after all
this is where it happens
maximum concentration of Consciousness of all people
where God gives exactly the will of Eternal development to everyone

i.e. everyone has such a structure
but here inside a person, ^{as if} in the Spirit of a person

such a thing exists
as in himself
and in the system of collective Consciousness

i.e. it turns out that the main support
means counter-terrorism
is precisely the high concentration of the Spirit of people
precisely in the structure of Eternal development

where we have development
natural level of collective Consciousness
when the collective Consciousness for example participates
in the phase of recovery of people
i.e. in this case we must
well, for example, even people's health

i.e. we must consider that position
that here is the Consciousness of people united yes
begins to exist
as a form of development of matter

then it turns out that this Consciousness
has autonomous functions, so to speak
well, under complete control from groups of people

and so that, for example, a terrorist attack does not take place
or did not acquire
Well let's assume some extremely aggressive form
it is necessary to highlight again as a rule
This is a regional faction of governance
but there is still
and the faction of control is actually the Soul of man

i.e. a person considers himself
in the context of events
as in general your future yes
i.e. he can look at himself
as information in general just of the future

and here is this faction of events
this is a Spiritual event structure
i.e. in a person's system of knowledge
in fact, it is laid down
this is what is called, let's say, subtle knowledge
by event detailing

because in order to avoid terrorist attacks

it is necessary to make the detailing more effective

well let's say we can take a number series yes
if you look at the figure, well, it's purely abstract
let's assume as if a representative of the aggressive side
is a person

then it turns out that if we consider
against the background of management
just a number series
at the level of the right shoulder for example 1
then 4 7 8 9
at the level of, say, a person's left heel
then we introduce it
in the phase of stability in collective management

i.e. this is the numerical series
as if along the contour of a person
he creates well as if the norm of rest so to speak yes
for him it is the norm of life
there is the Norm of development of its events

and then the events of his past for example yes
they are starting to unscrew actually
into the structure of normalization of further actions

i.e. he begins to look for exits, ways out
from situations
and it turns out that this system is generally equivalent
as to any person
but first of all to the representative
as if in general it can be applied
precisely the aggressive side
namely the numerical control system

because the numbers are fixed quite rigidly
exactly the level of the Norm

and it turns out
that there is one very simple way to control
when you can practically see for example
such a management position

what if there is a number yes
let's assume the weight of the number

there is an optical expression of the number

then in this number we can consider
next level

Well, to restore human health
you can consider the natural level
Well as if the settling of photons of light yes

this is the concept of "living light"
light when it is alive for example
what is the next and the light of Eternal development

let's just assume we decided to consider
physiological characteristics
means human reactions
physical systems of this process

then it turns out
that photons have the ability to sort of settle
i.e. the lower the segment of light
the more active the management

and if we want to restore health
due to the number yes let's assume

then it turns out that we can watch
on the speed of settling of photons simply in the number

let's say we can take 2 and the number
This is reinforced, i.e. double
5 fivefold, etc.

i.e. to introduce the meaning of the Norm
exactly as if in the lower part of the number

and then when we work
for example against a terrorist
then here we can do it like this

knowing yourself what the upper part of the number is
but concentrate only on the lower part
i.e. there is a lack of image recognition
and we pass information through weight functions

i.e. management efficiency increases

we create the level of development of life
to all systems

i.e. those events that are most favorable
the number has only one level
i.e. from 2 ^{for example} it is extremely difficult
make another number ^{yes}
or from 1

and therefore it turns out that we are rationing
system within an event
we ^{kind of} increase the system with our Consciousness
in the control zone
and a person including a representative
^{basically any side}
rescuers, etc.
they still get into phase
namely collective management
where the concentration is high

and it turns out we can do it here
next conclusion
that the more people have access technology ^{yes}
to the system

because the real problem is often that
that even though there is normal social information
get into the control system
where ^{do} the secret services work ?

or is it a very fleeting situation?
quite difficult
or it takes a long time

it turns out that
so that any person in this process can be a participant
according to its standardization
it is necessary to increase the norm
due to some technologies

here is one of the technologies
this is exactly the system
as if increasing the weighting function of the number
i.e. the lower part of the number is carried out
and the upper one ^{seems to} be represented in Thinking

considering that here the concept of "Thinking"

in this case it is action again
then in this system it is necessary
first of all, see such a characteristic
actually counteracting terrorist attacks

that every action
this is the maximum increase in speed
actually the next action

i.e. you always have that position of control
what should you actually track
your own momentum in this way
what to perceive clearly
that your every action
in the future has
some kind of, well, for example, super-high speed

and for this if from the point of view
expressions such as a numerical series
we have an increase in the function of the number in the future
but there is already growth from the bottom of the number
actually like up yes
i.e. you see an increase in growth

in this case, the more numbers are used, by the way
some dates yes
those dates for example that only you know
some associations memories
the more precisely you make the control
because your personal association
this is Norma

if we manage through the structure of the past , let's assume
that's where the Norm comes into play
actually get more stable management

and therefore often
precisely to counter a possible terrorist attack
such a fairly effective level of management
may just be a memory
some specific personal event of yours
bringing this event to that growth
that this event, for example, provides information
well, let's say some kind of glow
Souls of man
who may find himself in a difficult situation

i.e. it is a kind of collective help , yes
and moreover, individual

because if you compare
with the physical body of a person
then individual assistance
this is when a person can do something personally
well, for example, shake hands, etc. yes
here in the Perception of people
is often perceived exactly this way

so if you have a personal event
you are giving virtually personal assistance

and in this regard when you see
that you work personally
this is already a stable form of management

i.e. when I was talking about that
what does it mean you bring it to a personal level of management
and you get that everyone survives yes
including the aggressive side
you get stability as if
Firstly, stability is visible in the process of the Universe
i.e. this
a sign of this stability is that
that areas arise in Macromanagement
well, like more of that clear, distinct silver glow
in the conflict zone

i.e. it turns out
that this is precisely the level of movement of people , so to speak
who can participate
this is a collective glow

i.e. it is necessary even at the optics level
to highlight this Spiritual power of action

and then it turns out
well, basically even those
who, for example, does not have such technologies
they are due to the difference in the light optics of ordinary, so to speak, light
can participate with their Soul in collective action

i.e. if a person, for example, has not mastered the technology
but it needs to be connected

it is located close to the conflict zone
then it turns out that we must select in the optical medium
the difference in color and light by the way

i.e. you can change color perception
at the level of simple human perception
i.e. to give information of another, for example, clearer color
containing the color of future events
future normal events

i.e. you can change the color of the event

if all events are as if recorded yes
and the future is too practically concentrated
at some levels, for example, of a problematic nature

then a management structure emerges
from the physical body
i.e. you must be able to act with your actual physical body

in this case the management structure is generally different
you must see clearly at the level of Perception
that your physical body is here and in control
this is one function of Consciousness

it is precisely the linear phase of Consciousness that arises
where there is no continuous glow
and it arises
namely the Perception of the body in the future
and the body here
one magnitude for example God

and when you see this structure
you are leaving this event
Well, no matter how difficult it turns out
i.e. you see the physical body
your own
other people

in the management structure of the future
and again, the basis is always
phase of collective consciousness

i.e. the more people concentrate
the more people you can attract, the more
for example, to the conflict zone
to the management level

the more stable the exit

because after all God gives equal rights
and each participant chooses their actions

and this is where you need to look
here is the source of the disbandment of events
among representatives of the aggressive side

i.e. here it turns out
a criterion for such management appears
what needs to be created event area
which would allow
Well, first of all, again, under no circumstances
no one can be destroyed

secondly, the next level appears here
that the event should be
quite rigidly fixed

i.e. the same as you have, for example, when you go out on the street
doing some physical actions
completely controlled
i.e. you can go to the store
you can go out into the forest for example yes
and you know that you will be there

i.e. the level of event recording
should be just as tough
that you clearly see the level of the future

In principle, this property is quite practical
to any level of management
i.e. in some difficult situations
or even if you cross the road somewhere in the wrong place yes
where there is no transition, etc.
i.e. where some kind of impact can manifest itself , for example

and it turns out that this is the future event
it was just as tough yeah

such as a normal physical action
then here it turns out we must be absolutely clear
to give precisely to future events
the property of rigidity is actually

i.e. we must have the same system of Perception ^{Yes}
from your Soul
from your body first of all by the way
where the Soul and body are concentrated in the event

here is the important element
God makes the event in the future absolutely stable
if you see concentration
and Souls and bodies

those. body light and soul light
for your Thinking it is one and the same
although you clearly understand
where is the body in the information ^{yes}
and where is the Soul

and at the same time you can take it out
namely your Soul
i.e. since the Soul is inside the body, among other things
precisely as a management platform

i.e., it ^{seems like} control appears
in the form of some kind of autonomous, ^{let's say,} level
some raft ^{let's say yes} in the thick of things
where the Soul is what forms the structure
the fabric of this means the carrier
what are you standing on
^{well as I said} some raft
or let's just ^{say} the level being created
this is the closest thing to a raft

i.e. it's not even a boat, not some kind of whole thing, ^{yes}
a design already created by someone
and what you create
^{Well,} you can add something extra to the raft there
add, etc.

and this stability is formed
precisely because of what you ^{seem to be} doing
more dynamic
next level of Perception

i.e. this raft which is in the thick of things
must have the properties of capturing a kind of specific ^{yes}

the following information
i.e. it must have the properties

let's say our own development in the future

i.e. this raft and the structure of your Soul
organizing this design
should be organized like this
that the structure of information of this well raft yes figuratively speaking
has the property of some intelligence

i.e. the system you created should
and in statics created
must be able to recognize future events
and navigate

i.e. this is some kind of next level of development
that you perceive the structure of the Soul as a level
like statics and this raft
and the speakers

i.e. dynamics and statics are the same thing
because the Soul is in Perception
it is a dynamic system
super speed Infinite
and the body is static

and when you start to perceive
you see God
i.e. God is near you, God is active

why do people there, for example, save themselves in some situations
because God appears He gives Salvation

and it turns out that God actually appears to everyone
God is visible to everyone

and then the question arises
why does some action happen
well, for example, when someone was saved
and somewhere problems arise

it turns out that here again the level
as a rule, this is the development of Perception
i.e. how quickly a person can perceive

I'm not even talking about that here
that of course there are
some previous systems are informative yes

but in this case, to save a person
we don't talk, for example, about the concept of some kind of
there are some concepts like a linear concept
suppose "karma"
some kind of "hereditary" "situational" cases

in this case, to save a person
we must generally deduce these concepts
from the phase of collective Consciousness

i.e. we have to make management
that yes, in the collective Consciousness there is a concept of "karma"
there is a concept of "situation" there is a concept
let's assume some kind of "insurmountable conditions"
but in order for us to make real management
kind of turn off these concepts yes
from management

because in this case
in the future there is a Norm
naturally there is a norm in the future
then in the future there is no global, for example, nuclear war
and the future is still predicted to be calm

of course we need to move towards this, we need to achieve this
nevertheless, such information exists
and for all people

and even if you make a reflection of this light
in Norma for example well which one you see yes
The norm is quite simple.
the person is not sick and at least he
there from this situation
Well, let's assume he continues to go to school , etc.
i.e. some one elemental part of control

it turns out that here we have first of all
this is the rationing of light
but who manages to see this light in the future
Norm
that's actually how the person survives

i.e. he manages to make a sort of self-capture
this information
and he has exactly this layer of control
it is as if it is above the structure of events

happening for example, well, on a material level

i.e. the body perceives the glow of future events
as a structure for connecting the future and action

then it turns out
that the human body is the same as in the event zone, yes
so, well, optimal normal
this means that the body and the Soul have one glow
then the next object yes well, this is the property of this certain raft

it means when we have the properties of development of the same type
God gives equal governance to everyone
when a person acts the same way
as well as, for example, let's say, a carrier of information
then the information carrier
brings it to a background level, so to speak
and here are natural objects
there is, for example, an untouched tree, yes
outside the conflict zone

i.e. this is the background glow
it starts to sort of prevail
i.e. moreover
the greater the concentration of collective Consciousness
the greater the effect

i.e. the ability to still find
external management structure
who helps and where

i.e. to recognize the signal
where there is a structure of real assistance, etc.

and it turns out that in order to systematically move to that
so that in all cases
it is not necessarily a terrorist attack of some macro-property
if this is in relation to, for example, a person
there are also situations that are even more specific there
that there is persecution of an individual, for example, etc.

then it turns out
if, for example, a person saves a nuclear power plant from an explosion, yes
then it turns out that here it is natural if
for example, a terrorist attack is planned

this person is the object of persecution
how can he survive and save this nuclear power plant

it turns out that he should understand in any case
that his internal resource yes

Inner strength Spiritual action
higher than there, for example, the action of a terrorist group

it turns out that the first element
this is to prevent the formation of a terrorist group
the simplest yes
it's like a permanent level of control over the nuclear power plant
to prevent

Well the logic is very simple
it means protection system
i.e. it must be objectified, proven and shown yes
the other side, etc.
well, that is, there are some social functions

but in reality the level of management
are still personality traits

because sensors, devices, etc.
it's of course good if they work yes or exist
but in principle it is always about that
that there is one personality
and there is another

someone creates
someone wants to destroy it there, for example

and it turns out that here it is still an element of control
is again knowledge
i.e. education of the other side
but sometimes super fast

and it turns out that the other side is kind of aggressive
begins to perceive at least some signals
precisely from the level of the Macronorm
i.e. this level of identical glow is the so-called

God gives equal rights
and get equal rights
it is possible at the level of internal choice

i.e. the other side must choose the Norm
so that she has ^{yes}
for example, some future events existed normally
because they are still outside the law, ^{yes}
outside of some norms of life, etc.
these people

it turns out that in principle
^{well}, those who are specifically involved in the terrorist attack
as the aggressive side

it turns out that
although we have full, ^{well}, provision
it seems to be legal
those people who ^{mean} on the other side
that's where the peaceful side is
nevertheless we find ourselves in a situation
when the interaction structure arises
personality - personality

and here it arises
structure of such management
that one person, ^{for example}, has ^{some} kind of weapon
some means ^{let's assume} the property of surprise, etc.

the other side has
^{well}, it's just some normal course of events
which was before the start of some aggressive process
and at the same time he must
to defend this course of events

here is the management structure
what is in the first level of management
again it is an equalization
at the level of Perception
i.e. the technology is simple
it's not about someone having a gun
or someone ^{for example} ^{yes} ^{no}

and that is what needs to be considered
^{Well}, the next simple position
^{well}, ^{for example}, there is a possibility, a probability, ^{so let's say} ^{yes}
some kind of nuclear explosion
but it doesn't happen

or so if we have
the structure of such management
what we need you to do quickly management
and be saved
then you should immediately exclude
the possibility of a nuclear war there, for example

and for this it turns out that you must
this control is done in this way
that this war does not exist yes
Well, that is, there is none and that's it

and this is the property of what is not there
aggressive external system
this is the level that you perceive
in fact, so to speak, that side of management
when the representative of the aggressive side
it's like it's being deduced
into the space of the ordinary Norm

i.e. it hits
into the structure of normalized behavior
i.e. thoughts are born in him
by the following elements of life
he starts thinking about himself, for example
he starts to think about how to get out of this situation
and as a rule, they are still terrorists
they are not as if they are not aimed at that
what exactly will definitely happen to them
some kind of problematic disaster
i.e. not kamikazes, usually terrorists

and it turns out that they are always looking for some way
even if a person is a kamikaze
then you can still enter
The management norm associated with that
what's at landing level
well, like the kamikazes the Japanese had, for example
at one time, yes, on airplanes, etc.

then a control system of this type was used
what about boarding the plane
so that he, for example,
Well, somehow they were minimized
even the consequences of his actions
a control system was introduced

Well let's assume the same agents are there
from the Soviet Union, for example
so that he would still develop standards

i.e. some memories were given
about past life
about some elements of the future, etc.
and in principle according to statistics
there are just such statistics
that there were quite a lot of situations
that in principle it was even possible to disband the event

i.e. it turns out that it is not a kamikaze after all
a seemingly fatal system

but you can work it out with words
not to mention that
what can be worked out by management directly

therefore, in principle, it is precisely in preventing terrorist attacks
there is only one position
means that in any combination of events
and in principle this applies not only to terrorist attacks
and in general to any level of management
where the system is complicated and sometimes
but man must still survive

because in general the situation is like this
what in Infinite development
a person must still survive
in any combination of events
whatever the situation, comets, etc., yes
external systems internal

therefore it is necessary here that the Soul of a person
had such a powerful glow
so that it is around the Soul of a person
provided that there are still other Souls and people
see this light
the norm was formed like this
so that the concentration of Norma that is near you
was transferred specifically to management

i.e. first of all it is the Norm of future events
restoration of some events of the past
and it is necessary to control the current level

so that there will be no future
some kind of problematic ones, for example, terrorist attacks, etc.

that's why I'm proposing now
make such a concentration
your soul ^{has} such a glow now
i.e. you are just now exposing the optics of the Soul
clearly visualize its silvery glow
coming from you near your physical body

need to show
that at this moment you begin to glow
i.e. collective management
the other person must see
and direct ^{as if} three rays ^{yes}
past
current
future
in this case, control mainly occurs in the current
in this case, ninety percent minimum work
happens in the current time
where do you manage
standardization
you reconstruct a past event and do it like this
so that in the future, ^{for example}, there will be no terrorist attacks
in general, any problematic events , disasters, etc.

i.e. concentrate now
make that the main element
to show that you are in control

I will work with you

at the same time in this management
we need to clearly define the structures here right away
that it is necessary to restore all the events of the past
for ^{example}, including resurrection, etc.

i.e. the task is very specific
we cannot allow for ^{example}
so that the system, ^{well, like}, aggressive control, ^{yes}
would have some, ^{well, like, like that, well there}
such harsh fatal consequences

i.e. we must definitely
align the system to Norma ^{yes}
it turns out that we cannot exclude any detail

therefore, the management of the past
can be very long
very intense

and we have no choice
we are obliged in any case
Well first of all, restore it ^{yes}
i.e. everything that can be done now
Now
but in the future I will have to deal with this problem constantly

i.e. the situation is such that , for example, someone doesn't know, ^{yes}
someone there can't, someone doesn't do it
however, if someone is alone
knows maybe and ^{how} he should
he has no other choice
he must definitely do something radical
Well, how can I completely restore Norma?

it turns out that this concept is again comparable to that
that everyone should get an education

be able to transform past events
to standardize, etc.

in this case it turns out that ^{well} the other side
in principle, such technologies no longer arise
just on the other side
they start using others
there, for example, by political and management methods

i.e. that is why it is important to show here
that's exactly it
peacefulness, ^{so to speak}
generalization of the action of Infinite development
have the status of a Spiritual message to everyone

i.e. you act independently
at the same time you invite everyone to do the same
so that they do the same

Well for example, if in the region
there is a collective management group there
which already has technology in that region ^{yes}
this information at such levels
then of course the management improves significantly

because it's one thing
Well, there are managers all over the world
which, among other things, solve their own problems
or they are counteracting a possible global catastrophe
where there is a lot of work
in general, there is just a lot of work in this task

and it turns out that
so that collective management is balanced
it is still necessary to saturate very much
regional systems of governance thus
so that means people who are on the ground
would actually be able to react correctly to events

Well, let's assume that preparations are underway
or some preliminary action
some unusual situation and a terrorist attack
People must be able to recognize
i.e. they should be able to do in general, in fact
diagnostics controlling this event

be able to actually influence in general
on the situation in this way

that when you see a situation in the future
then it is always clear what to do now

i.e. the ability to recognize
your own level of future development
in a given region or context

and it turns out that in order to
still provide real access
i.e. the educational level in the region
it is necessary to consider first of all
Well, again, the intensity of information transfer

for example, you have mastered
technology, well, prognostic and controlled
events
i.e. you see the structure of future events
even if it's in some specific cases, for example
or even completely

then when do you start working with it
and here, by the way, there are actually no special problems

because a person still perceives
the structure of future events one way or another

and you can do the same
for example, remembering an event there a second ago
a second passes
you are already highlighting the structure
you've already considered the future

i.e. it doesn't mean that it's very difficult
or do I need to practice there somehow, gain some experience
Of course you need to gain experience
but in this case when the countdown starts
about instantaneous often instantaneous action
this level of sort of dragging out the frames is kind of unique
second of the past
future
and in the interval you understand
that you saw the future as if it was the same type

and this is the sphere that arises
between these two screens of two frames
this is the level that you can pass on

i.e. in fact you can transmit the Norm
by forming these spheres

in principle this can be done
and in relation to yourself too

i.e. if you want to ensure
level of your future
as a kind of reserve level of sustainable management
then you just understand everything
that you see the future all the time yes

a second passes there
some system passed information
you can remember what happened at that moment
like this frame and there are photos
and naturally you then understand that you naturally saw
And what
to understand that you saw it
it is enough to make it inseparable
moment of the present time and the future

i.e. to minimize control as much as possible
to get a quick action result, for example

because basically

By the way, this technology also concerns that
what if there is a cure for diseases
even from some complicated ones
it turns out that in this case

let's say this ability

all the time pull out Norma yes

a kind of stretching

some internal Norm

i.e. you are fixed on the Norm

and you are constantly doing something at the same time

i.e. not just Norma, well, static, yes

physical body statics

Spirit Soul Consciousness is dynamics

and that's why it turns out

that this is how God arranged the World

i.e. where there are static and dynamic processes

processes that are perceived even more

at a polysyllabic level

for example, a person perceives the Soul

even with my Consciousness

that he sees Infinity as a rule

i.e. the first diagnostics of the Soul

this is the phase of Infinity of the whole future

by the way, this is how to recognize your Soul

here to any person

it is enough to tune in to this impulse

i.e. for example a simple question

a person can ask someone a question there

how can you even detect the Soul in optics ?

first you have to perceive it

this is exactly the kind of action

First Act Infinity

this is the first level of the Soul

this is basically the whole Soul at its full level

because the Soul is a rule for a person

it means it is shown in full at once

and at the same time he begins to detail

i.e. the techniques themselves are actually very simple
if in principle you start to find
level of simple control
i.e. do not consider that there are any complex constructions, etc.

it turns out that you can also recognize
as if the structure of the external and control of the Soul
i.e. what your Soul recognizes in this case

you can see clearly
that you are always saved in your Soul
The soul is always saved by God.
because the Soul always has a level of Salvation
this is the Law, we must not forget it

so if you know this Law ^{yes}
for example, you see the path to your Soul
where is the level of Salvation
then what are the problems?
Are you sure of course i.e. ^{yes} you can
even in some difficult situations
behave calmly

you can be able to ^{somehow} bring out your physical body
to that status of the Soul where the Soul is saved
but if the light of the saved Soul is near you
the body is also saved, ^{it's} elementary
i.e. Consciousness moves to the level of Perception

in this case your Consciousness
this is actually the Consciousness of the Soul
i.e. the Soul developing in Infinity towards God

God is naturally always saved
It has the status of Eternal Development
and at any level of information

i.e. from the point of view of man, God is saved of course
but God cannot be, ^{for example}, not saved
or get into some kind of problematic ^{situation}
from the point of view of final events

Well, from the point of view of Infinite Events
God can't get into a problematic situation either
because He rules
and the Infinite form of information

so by analogy to what God does
it's enough to learn how to manage
Infinite form of events
i.e. Endless events yes

it turns out that way in this case
control of your Soul
Infinite level of action

and when do you start doing it
this is one of the forms of management
this is the entrance to the level of Soul Salvation
By God

but the technology is in that
that we must do it ourselves
find on a human level
Soul Salvation structure
we need to pass on knowledge to others so that they can be saved

we are even those who have mastered the technology quite highly
anyway, his task is
pass on knowledge all the time

i.e. now the main task
transmission of intensive knowledge on Salvation
as in Macro level
and as if in regional personal, etc.

and here again the status of the individual arises
i.e. a person who can, for example, give the World knowledge , yes
She is generally protected by other individuals.
she is protected, well, somehow it works out

God generally speaking protects everyone equally, yes
But God transmits more information

the more you transmit
the more God imparts to you

and it turns out that then you have such a status here
that the Action of God and man are equal in terms of that
that the more knowledge you pass on
the more stable the future structure

i.e. it turns out that God is in control
all future events
because He transmits very high speed of knowledge yes

and when you start to go out
to such a level of management
then you understand that you are protected
that's exactly the collective Consciousness of people
people want you to pass on knowledge to them yes
which you, for example , mastered through Macrosalvation

i.e. it opens here
it is the status of the human Soul
where people generally exchange information very intensively

look at how people from all over the world
there they take part and participate
This is actually a colossal force
allowing to disband
some self- negative consequences
possible terrorist attacks, events, etc.

and if we add technology
this action
i.e. don't have it scattered there just
well, local one-time light yes

after all, many people empathize
but these may just be local colors
Thinking
if you direct it to one point of concentration
then generally speaking, naturally, any event can be disbanded

management task
from the point of view of Eternal development
is basically a disbandment
not only for example well some local yes

but also possibly a catastrophic future event
Well, as a rule, we have no other way
we don't have any generally speaking

and therefore it turns out that education is being completed
to everyone
ability to concentrate

exactly that movement of the Soul
when your Soul is away from you
how did you do your management practice now
makes light control
also to see that the Souls of people
their physical bodies
in general, a person is a whole personality, yes
integral system
and generally speaking, it is as integral as possible

i.e. higher in integrity than a human being
there is no system in reality
here in the World
in Perception

it turns out that he is a human
practically encompasses the entire world
i.e. this is precisely the basic harmony of man
that looking at a person
you can see the whole harmonious world

man is harmony
and when you
from the point of view of external Perception
when here are people
and well, generally speaking, internal too

when people are focused on that
what does it mean to have harmony in development
i.e. after all, management of this type should be based on
on fairly rigid, well, platforms
in fact, well, some kind of Norm
when you do have this base
completely as if developed into Infinity

i.e. you must again provide
a clear event of Salvation
that's why it's exactly the level of , well, kind of a kind of relaxation, yes
Souls
bodies
Consciousness
and the action is generally speaking harmony

i.e. having seen the structure of future management
it is clear that God is essentially He
in all systems of development is harmonious
that's why he is Eternal

and therefore He gives structure
namely Infinite Control

i.e. the maximum manifestation of Him
in any event
it's the detailing ^{that} 's what I was talking about
ability to detail
the ability to see very small systems of events
which are distant
from the system, ^{for example,} of direct reaction of Consciousness

i.e. in order to avoid a terrorist attack, you need to know that there is none
but do not allow this information to develop

i.e., in fact, you need to be able to control events
at a constant value ^{yes}

i.e. there is some constant
^{for example,} the letter C is a constant in mathematics there
and the management begins
that this letter C is glowing
and you constantly keep at a distance
possible level ^{of a} negative event

but if the other side is active ^{yes}
then it turns out that you are forced
periodically, ^{as if} saturating with light
this constant

but this constant is the whole world
this is the harmony of the whole world

this is how he can overcome harmony ^{yes}
i.e. how to disrupt your natural
^{in fact,} if you are still tuned to the Eternal, i.e. development
you are actually even more protected
when you are technologically capable of it ^{yes}
but in general every person has this
every person has the right
and his first right is precisely to Eternal development

then it turns out
to overcome this structure

the other side has to find

in general, quite serious means, yes
well, counteraction
in fact, if we are talking about that
that there is such a thing as "biological death"
then this is also quite a serious counteraction to the Norm

i.e. it comes from somewhere
so [...] let's say destruction of external control

i.e. external control as a whole from the whole World
it is originally harmonious
for God created a harmonious world from the beginning
this is where the erasure of these boundaries of control occurs

so to make instant Norma
we need to somehow remove these events
make the dynamics very fast dynamics
all external and internal properties of the World

and try to do it this way
what do you do when you do management
then these are precisely the properties of events, yes let's assume
i.e. you can make the control in this way
that the properties of events become the same
what Spiritual events
what material events

i.e. it turns out
what if the dynamics of the event have intensified
i.e. activity in the event begins
i.e. here you are at peace
but some kind of activation begins around you
you start to see that movement is starting
dynamics, etc. some
well let it be somewhere in the Infinite World
or next to you

then by comparing the properties of dynamics, as it were
you can see what we are assuming here
when you start the control action
what is Spiritual action
and for example physical action yes
it's one and the same

i.e. you start to equalize
action both physical and spiritual

i.e. to help everyone instantly
who exactly needs help

i.e. this help can also be because
that when people do management ^{yes}
as soon as they start

For example let's assume, well, how to block external control there
then this is still a burden, ^{for example,} on a person

and when you ^{kind of} start doing that
what do you ^{mean you mean suppose}
well, like a mutual aid structure
it turns out that when you equalize
internal and external events
then the structure of mutual assistance is identical

those. the light of your Soul is uniform

and when you distribute this uniformity
then no matter what event happens, ^{yes}
at the current time
in the future you always know that you can help
in real time

i.e. ^{for example,} you recorded an event
Well ^{for example} a person was born ^{yes}
he recorded any events
and he already generally controls
the entire system of future development
both your own and the outside world

because it exists here
it is precisely the level of continuity in development
i.e. the light of his Soul
this is the level of actual further action

and when you start to see
management structure in this way
what exactly is the Infinite Light ^{of your Soul}
this is action
then you see God's Action
towards you
i.e. what God wanted from you

and it turns out that you see

that at the moment of birth
the person has this
exactly this kind of direct development platform

which means in which you can actually
Well, just walk calmly along this generally straight road
where there are no, for example, there are some problems
at least there are no obvious or fleeting ones
you are coping with the situation

but so that you can cope in any case
these are the actions of your Soul
from birth ^{yes}
before birth
when you were just born
for example, in the physical body already, etc.

and then all these actions happen
must be equalized
with the action of the next life

i.e. why, for example, well, some aggressive side ^{yes}
thinks that she has the right to influence ^{there}
on your natural development

i.e. where do these thoughts come from?
why suddenly there ^{for example} Well, let's say the aggressor, ^{yes}
or there are terrorists there
think they have the right
or they can carry out such an action

i.e. we need to try to put everything in its place
i.e. in reality no one has the right
^{is no way} to force anyone there, ^{yes}
to some action that is not typical there
not to mention the fact that there is destruction there

and that's why it turns out
that when you get to the level ^{let's say}
well, like an internal normal Norm
at the level there is a question - the answer ^{is, for example, yes} in this situation
then your internal position
it determines naturally and the level of circumstances

i.e. a person who thinks
that, ^{for example,} they have no right to force him ^{there} in any way

all the more so to somehow influence there is harm to health, etc.
it naturally has a significantly higher resource
than a person who thinks that this is possible, etc., etc.

i.e. and therefore, in principle, even the point of view
it is decisive yes
in one position or another

because point of view
it is still a spiritual property yes
physical matter by the way

and so it turns out that when you have
such a Spiritual management structure
then in principle you are not really afraid
that's exactly how to do it
namely predictive systems
to deal with some controls

i.e. originally a human being
who, well, sort of starts practicing
if he sees it there initially, he gets used to it, yes
well, that is, to him
he knows what needs to be managed, etc.

but if he develops a system that is precisely predictive
then such situations arise
but for example, suddenly there are some problems there
and is it worth it, for example, to do it "head-on"

Well, naturally it is worth doing and should be done
because the exact knowledge of the future
it is actually like a guarantor and the main guarantor
namely the stability of management
normal development plan
civilizations
Peace
societies, etc.

and when you start to develop in this way
then you need to have a structure of internal conviction
under no circumstances and never, generally speaking
no one has the right to influence you
because you don't want for example yes

Well, of course there are norms of social development
if a person himself does something so unfavorable

Of course they are trying to fix it Yes
put on the right path
that's understandable

in this case i mean
when a person develops creatively
he has the right to develop infinitely creatively
whatever he does there, yeah
for example, he drew, wrote whatever he wanted, and so on.

so it turns out that under no circumstances
there should not be a structure of restrictions
in its free development

then it turns out that when you
do you have such a point of view?
You are generally proactive

this is the structure of the initiative
how can you increase control speed
as I said today
that each subsequent management
should be even faster yes
this is a guarantee that, for example, a terrorist attack will not happen , so yes

and then it turns out that it is precisely initiative that matters
your personal freedom
your personal creativity
this is the management in this case
very effective and serious management

i.e., it is precisely against such management
already context
personality - personality
you win

because it works here
that person has a lot of problems yes
breaking the law at least yes
violation of some moral principles, etc.

so when you start thinking
Well how to do alignment
i.e. your positive system
transfer to another person
another personality becomes the same

i.e. there are elements in counter-terrorism measures
when a terrorist he suddenly seems to
Well, he has bright eyes and a clear gaze, yes.
i.e. he understands that in principle in general
what is he doing anyway
how and where did he end up anyway
did he show up in such a situation?

and so, like, this Norm
It is desirable to increase it of course
and you can increase it due to the fact that

mean more actively
Well, you show your control, yes
actively showing
that even when you are generally speaking in another place
I'm saying it again
the concentration of precisely the collective Consciousness should be

that you have future events
you have a normal life
so the terrorist has the same level of glow
he understands that he also has a normal life

i.e. you with your own practice
by his own will
you show that everyone is given Eternal Life by God

Well, let's assume the person there did something wrong
he has the ability to fix it
due to the same management technologies, by the way
i.e. to restore the events that
Here, for example, were the results
his illegal unauthorized actions there, so to speak

I'm not even talking about the concept of "law"
namely unauthorized ones
he had no right to do that, generally speaking
i.e. he is outside the right of action in this regard

and that's why it turns out
what if he somehow achieved
the possibilities of this action
so it turns out that in principle he
Well, there must be some kind of ladder.

to go down to Norma Yes

you give him this ladder
let him, for example, descend and work favorably
again for the whole society
by doing this he will be able to somehow else
it may be fairly quick to restore
Well, my status in this life

and it turns out
that when the collective Consciousness, for example, considers
that he did improve after all, yes
at least it's that technologically advanced
that he, let's say, restored the status of his previous development
that he is definitely in control, for example
Well, for example, he won't be able to move on to the same type of actions

in principle, he has some hope
that he can go and kind of develop like an ordinary person yes
which is precisely in the structure of Eternal development

but considering that every person has it
it just turns out that the one who works is outside the law
he just himself, well, basically
not only does it slow down significantly, yes
he is actually located
at the level when other people are collective Consciousness
are obliged to control it for a long enough time
i.e. to conduct on a remote control, as it were
move away, etc.

i.e. it falls into the property of the environment
where the environment is not defined for his Perception
and it's difficult for the individual, it's very difficult

i.e. the soul of such a person
in fact, it minimizes the number of actions
and it falls into a much more complex structure
than he can actually imagine

and here the structure of the management is as follows
that we again have the task of helping him

i.e. it turns out no matter how aggressively he behaves
we have to give him control
so that he could get out of there

i.e. it turns out that formally we must
first of all, do not allow it
secondly, any situation can be corrected to the norm, yes
to equivalent development

those. God created the world this way
that a person should still have
equivalent development
at any manifestation

and here a certain stability is required yes
internal position
i.e. Eternal development
it is the accessibility of these technologies for everyone

i.e. it is clear that in Eternal development
those who achieve technology faster
who, for example, is more actively involved in this

but who, for example, is opposing
they too are obliged to comprehend this after some time

it turns out that first they have to understand
that they won't be able to, well, sort of counteract it, yes
substantially or effectively

i.e. to create such a system
consolidation of society
every person
what is not happening there, for example, there is a terrorist attack, etc.

and then start working with them
who, if any, participated in the aggressive action
so this means
again transfer the control system
it's just that that person will be forced to work much more
he must first reconstruct all the events
which for example he carried out yes negative
for society

and therefore it's time to start, as it were
from the initial launch pad
when other people have already developed significantly
Well, this is often in general incommensurable
even with the level of a kind of moral plan, as it were, of development

and it turns out that right here

Well, for example, here is the resurrection position

general resurrection yes

here is the element of the main control

is that since everyone must be resurrected

everyone should be

give

given as if exactly from the very beginning right away

The Eternal Path of Development

and here we have such control

what is there anyway

Well, it's clear that they are criminals, etc.

and this is where it comes in

the level is , well, more moral, more ethical

in fact, the level is again mutual assistance

namely the Souls of people

that's how it is for such a person

it's a collective opinion anyway

For example, there is a system of various legal proceedings

but it also says "do not judge" there is such a postulate

but when you start to act for example

this is the postulate, it works like this

that yes, one can judge, but it is often a waste of time

Better give control yes

and how often he is condemned

it's clear that he won't block it any further

development of society

somehow shield this person, etc.

but in any case

the task is intensive management

and in this direction too

i.e. in relation to the terrorist it turns out yes

generally speaking to any aggressive environment

i.e. some comet there or anything that can cause harm yes

some possible problem there

then it turns out that you should

increase speed very much

personal ^{like a glow}
i.e. personal positive level of events

i.e. it turns out that the faster you learn to manage
quite specifically with its spectrum of events
more stable, more ^{let's say, more} evenly , yes, more harmoniously
the more rigid the shield you put up
on the way to a general problem

and it turns out that there is only one such nuance
that at least one person still can't do this
we must then already collectively ^{and} radiate it
teach
i.e. here God gives everyone equal development anyway

and it turns out that when we
^{Well,} let's move these control objects
in particular Macro-creation there
there, ^{for example ,} animals and plants, etc., etc.
i.e. to all objects of the World

this is where control over the nuances comes in
any nuances of the development of the situation

i.e. I just brought it to that point
what if there is a possible terrorist attack there
which has not yet been realized ^{and} will not be realized
or in the case of ^{for example} in some way
if you need to influence
to reduce the consequences
this is exactly the point where all events are taken into account

that's basically how I started this lecture today
and brought it to the level of control
behind every event
it is

if a person is there in difficult conditions
at this point of Perception ^{it means} it works
i.e. he at least perceives it
he doesn't need to look where the glass fell
or the sound of some kind of incident

he needs to perceive
this area of information

where his Soul controls all events

and the Soul in the form of a very powerful
phases of information concentration
i.e. the Soul actually holds the whole World
at this point
his soul and personal

so when i say
A person must be able to save the whole world
this is technology in this case it is necessary
it holds the whole structure of the world
in front of you

i.e. a person may find himself in a situation
when the Salvation of the World is his personal Salvation

and it turns out that when he starts
keep this information
and you know, Soul, in this case
manifested as some kind of big drop
it's just that in optics it looks like a drop
and such a pure drop

why does it mean the world is arranged in such a way that there is a lot of
water

because water is a collective compound yes
the drops came together

collective management

if you take and look at the water
for a long time there, for example, a minute
there is a reflection of the phase of collective Consciousness
Well, I can't even look at it mentally
not necessarily there with physical eyes

then there is a reflection of the phase in the collective Consciousness
you can calculate this photon of growth of living light
what is he like
if you take and look ahead an hour
you can reflect even more information through water

i.e. water works very well
with the form of Thinking for example yes

and it turns out that from here we can understand
what is air
air reflection of thought from water
from the point of view of the Soul
The soul has its own system of knowledge

and if we want to understand
how ^{does} the Soul perceive the World
then we must know how the Soul interacts
with elements of external Reality

and it turns out that when we perceive
such is the action of the Soul
then we see that the Spirit, generally speaking, ^{yes}
this property means actions
on close and distant matter
but ^{as if} at the same distance of thought

i.e. we can learn to count the structure of Thinking
where we think
this is of colossal importance
namely, ^{for example}, in counteracting terrorism

because if you think
that means ^{at} certain points
at precise control points, ^{for example there}
you by scanning the heart
find the point
and you start thinking in this place

that's simple
just think anything at all
but in one place

then you get a kind of aura
the shield here is what doesn't allow it again
you will be taken to a zone of no control ^{yes}
over the event

and it turns out that it is right here
be more careful here

because here I gave a specific technology
how can you calculate literally in centimeters

reflection of the structure of thought
and see
that thought is an absolutely rigid property of matter in general

and from this it is clear that if you think rigidly
for favorable events
you do this

i.e. it is enough to see
just think that you are in the norm yes
here's a situation
impart rigidity
at the level of objects of the material world
water air
as a system of reflection of Thinking
External Reality
as a system for converting water and air, etc.

and see the internal connections

and it turns out that you see
that the human body is actually Eternal
in its True status
you see this status
eyes actually well in the Action of God
God perceives man as Eternal
you see how he perceives it means

and it turns out that when God sees
for example, human action
in relation to Himself
then he sees man as, generally speaking, Eternal
i.e. He, for example, believes that people have the same property
then why do they do it so often , for example ?
it means that some actions are being performed

which, for example, lead to some problems

i.e. from God's point of view this is often
He understands everything of course.
but it's completely clear here
that it is very easy for people to learn everything
but nevertheless, such an imbalance arises
related to the fact that some events are happening, yes
which might not have happened, for example

and it turns out that it is God's task

of course teach people as quickly as possible
all levels of management
to ensure real, Eternal life
harmonious
as I said, harmony is the level of strength

so God's task ^{is yes}
on the Eternal Development of People
and human action
taking into account the miscalculation of sometimes precise values
sometimes only
I have just given one element of necessity
calculation of the exact concentration

why him
because by concentrating
at any level of events
at one point
you basically don't do anything ^{special}
you don't need to be distracted, you are focused
^{for example, on some internal tasks} ^{yes}
at some concentrations
what is happening around you

you don't need to do any management as such
it is enough to think only at one point
and you are protected here

and in conditions when there is a terrorist attack this is very important
because sometimes it is a long lasting action
and that means a person is forced
constantly create this field of your protection ^{yes}
Moreover, he is often forced to protect others
it turns out that
^{so those nearby} ^{yes}
in fact, he owes everyone

that's when he would defend
everyone and yourself at once
then he would act more effectively

but when the work through Macrosalvation happens
it turns out that it works the same for everyone

i.e. a person who at some time, ^{for example, yes}

makes some movement

well, i.e. he thought that he had undertaken some work
and for example he rests yes

then the one who does the management

like he 's working for him

when he is at one point of concentration

it's somewhere in the heart area

but where the phase of God's Consciousness is, that's it
touches

with the physical body of a person

this is how this dot denotes

and in principle if this point

for example, to start means, well, to make more active

i.e. try to bring the Consciousness of God more densely
to the physical body

then you can see

how the body is transformed into Eternal development

i.e. one can see the Eternity of the body in dynamics

not only one light magnitude there yes

and fixate on it

and can you see

how your Eternal body is transformed

in the Eternal Events system

and it turns out that this is it

the sustainability of your management level

that when you think like that then that's what happens yes

that's why I now propose to do

such a systemic concentration in management

what are you watching for example

what does your body do

here in the dynamics of Eternal development

where in dynamics

The Eternal Characteristics of Your Body

for example, when a person walks, yes

or when he sits still, for example

what is the difference

i.e. when he walks

Well, he moves with his physical body, of course.

but for Consciousness here are very clear

it is precisely the gradations that exist

i.e. when a person walks, for example, moves
he manages events differently

and here in the difference of management in any difference of management
hand movement in general dynamics
people sitting
people who go ^{yes}
so this is a value
where is it located
it is the dynamic Eternity of the physical body

so try to get out now
here in this management
as a rule, this glow begins in the area of the heart
then it quickly covers the entire skin of the body, etc.

i.e. it is a very fast optical action
at the same time it ^{seems to be} very often
very fast i.e. ^{well there are} literally milliseconds
but it creates a very powerful stability
all future events

so what do you do now is control
I will do it with you
do it several times i.e. in a row
until you resolve the issue
to prevent future terrorist attacks
work
I will work with you

and there is also one more control moment
if a possible terrorist attack concerns you, ^{for example}
and in general someone ^{seems to be} trying
affect you negatively in some way ^{yes}
there with some possible harm
for health, life, etc.

then it turns out that you should
inside the body
very deep in the physical body
have a structure of Eternal development
Eternal structure

you must see
what does inner light ^{mean yes}

inside the physical body
that's how God is, He is Eternal
because He has a certain glow from within

Well, the Physical Body is the same as a human's
but it is precisely this Light of Eternity
it has a more rigid structure
than stone than any matter ^{yes}
above any level of matter

then any action is possible
including physical ^{there is} some mental action
can't get through
into your area of information

and then it turns out that when you
well, sort of "hanging" ^{yes}
you can say it figuratively in quotes
in this world
so it turns out that you are already protected
because you see it all the time
deep inside myself there is this Light

i.e. the other side, whatever the motives
happens that the order ^{is} paid for
or something else something else

you must be able to see this Light
well or this disease by the way even here
in complex diseases
to be ^{more} and more
at this level of concentration, ^{yes, as it were}

but this is not a normal concentration
and this is the Action of God
i.e. a person must see the Action of God within himself
he must see
i.e. he must be so close to God
for example why do prayers help ^{there}
for quick healing often etc.
or some concentrations
where exactly the contact with God is more active

because in this case, ^{in general}
well if you consider
let's say an external system
as some kind of disease ^{of} the external environment

then in this case you have
if there is some kind of terrorist attack
That
or the possibility of its occurrence
this is some kind of anomaly not related to the norm anymore
with the functions of the external environment after all

and you are at the creative level of development
and this certain not Norma let's say
is trying to influence you
you should well how to cure yes
in medical terms

so it turns out that here
based on this you should determine the properties
what is the medicine in you yes

so what is the level of your healing abilities
your personality
so it can determine
level of controllability of the external environment

and it turns out that the level here is like this
that you will have to do such management
that in principle take into account the interests of everyone who is in front of
you yes
who has ever been with you

keep that in mind
that there can't be a one-time approach here
whoever ever crosses paths with you
you have to make the management optimal for everyone

i.e. you should see
that even if a person crossed paths with you
a short time
because it is precisely the counteraction to terrorism
this is a very high concentration of information
this is a very, well, high speed of information exchange
and there is also a certain kind of tension for people
which work yes in this regard

and it turns out that you should immediately remember
as if all the persons who mean well need management

the easiest way is to do management all over the world at once

that's why I say that this is precisely Macrosalvation
this is always the first path in the management system

and no matter what signs of control occur there
whatever happens at this moment
nothing can stop you

so make the control here
for yourself at the Macro level
this is the level when you are constantly
at any time
work for everyone

i.e. always creatively everyone there for example, you restore
improve your health
improve events
and this is already the status of a kind of external Eternity coming from you

i.e. this level of inner Eternity yes
which I described as the Action of God
so this is also a real Action of God
you can watch it directly
that this is a local Action of God
in you

but at the same time you are in the Infinite phase
if you trace this optical impulse
then you are actually in phase
where is Eternal Wednesday anyway
i.e. there is better oxygen there , etc. , etc.

i.e. in this case you get an improvement
environmental conditions

so when you bring this property out of yourself
it turns out that the external phase of control
i.e. the action coming to you
this is an action that is connected
with the transformation of the functions of the external environment
and you see clearly
how the external environment interacts with you

i.e. you can see the structure
what does the object of information think, yes
or how he behaves

and it doesn't matter
it can be an information object
there is an animal dog there is the development of a tree yes
tree development forecast there

and try to understand from this
how to interact with the external environment

there is a tree yes for example, there is a tree there that is four months old
happens after ten months
in twenty-five years , in ten years , etc.

and you can see the development
tree crown root system
and when you look at how to restore
for example, as a result of some problematic actions
especially extreme yes
or violent actions of a person

i.e. [...] in the Soul to create a body
the mechanism is often the same anyway
what like around the root system
the body is organized

i.e. in this case, by the way, here is the mechanism for resurrection , for example
has structures of creation
as if in the root system
as if it were a physical body

i.e. the physical body is transformed
with backup functions
even more as if sustainable development

but the person who is now in control
he shouldn't have any problems
it must have all the control properties

i.e. he must know all future developments of information

and this is the concept of "getting a path to control"
well, that is, to interact in this way
so that the terrorist doesn't commit something like that
some more some aggressive action

i.e. how to be able to do it under any circumstances
influence the system
it is the ability to connect the inner and outer light
but already his own is kind of activated
i.e. somewhat transformed
he is so consolidated
with generalized external events
and at the same time it is internally yours

i.e. you perceive the entire external world
as its own but stable, so to speak, this is how you can call the management
although in fact it is actually your heart
the action of your heart
this is the organization of the physical matter of the heart

and when you start to see
how is it organized in this way
and by God and by you
your physical matter

because the person who is
in a conventional control system
i.e. he walks, communicates, talks, solves problems
he controls his body
he organizes his physical matter
in this case
for example, he even plays sports

in this case
there is a question of the organization of physical matter
as if unconditional

but in this case
when we look at ourselves
then we see that the heart
around the heart
the whole external Reality is being built

and you see that well, any human cell
has the same functions
autonomous as if creative
at least the same level of development

and it turns out that the entire external environment
It kind of balances and interacts

with the physical body of a person
this causes
the first property of external matter
well, something similar to that
for example, when a swimmer swims
he knows roughly where he should swim to
but the external environment still has properties
some of them are like soft, not hard
i.e. he doesn't climb mountains
he doesn't do anything that would be out of character
yes to the body
water allows him to swim

here is a study of an external object
that's what's allowed, yes
study of the subtle structures of the psyche
for example, yes, the attacker there, etc.
this is a property
and stop

if a person understands that his actions are understandable
firstly, it reduces the norm, so to speak
or some such characteristic of him yes
i.e. it reduces aggressiveness

and that's why it turns out
that it is precisely in opposition to the personality of the aggressor
know exactly the structure of thinking
and to know exactly the structure of the action

i.e. its system of action
should also be absolutely clear
thought out viewed
just like yours

i.e. you have built a rigid system for yourself
but you must know what he will do
and also harshly

and it turns out that you are entering a system of relationships again
man - man
in the physical world

i.e. a level arises
human contact
human understanding

and when you act as God acted , for example
on Macro-creation
you give him, like, a kind of similar path there
some kind of Eternal development
build its events
then he makes contact

i.e. this is human contact
which allows you to gain time at least yes
actually resolve the issues on the merits

and when do you start
then it's time to act macro-creatively
and show it in general on the controls
how to do it

i.e. very quickly
work show work show
you screen it this way
the possibility, for example, of committing a terrorist attack
in relation to you

and thus you show the technology
to all others

This concludes today's seminar.

Thank you very much for your attention
