

GRIGORY GRABOVOY
The Teaching about God
The action of private and general management
28.06.2005

Hello again
the topic of my seminar today
this is my Teaching about God
The action of private and general management

in this topic i show
how to bring it first of all
sequence of actions
your private management into a universal constant

because it is always necessary to resolve the issue
personal actions

i.e., for example, God acts privately
He still solves issues of a general nature.

therefore, a person has the same task
the ability to translate the spatial- temporal environment
in the substructure of your tasks

and it turns out that its action
should be universal
where from the general component
the solution to a particular problem turns out to be a kind of inverse value

for God it looks like a simultaneous action
in humans as a cause-and-effect system
development of information

so when i say
about the action simultaneously for example
private and public
then we are looking at an earlier level
than the level of action in humans

for example there is the action of the Soul
and here is what exists before the action of the Soul, let us assume

then it turns out that we can consider
the level when a person actually

Well as if with its whole essence it reveals events

i.e. he does not implement them as such
and reveals it in a soft form

i.e. life is a soft form yes it is light
which has the status of a living management level

so if we consider
a state of some kind of soft light
as a state of human life yes For example
at one of the levels of manifestation

then a more rigid structure, as it were, of the external World
it turns out that it can be manifested
as a system of interaction between soft and hard media yes
soft
there is a harsh reality

and therefore it turns out that we can work
from the point of view of the organization of sensations
i.e. sensory level of control
where is the organization of primary sensation
this is the factor of primary creation

for example when the Soul was first created in man
then it turns out he accepted the first fact
as a fact of sensation
and not even actions yes

i.e. how to recognize
let's assume the structure of the creation of the Soul
how did the Soul perceive
your first fact of creation

this is a fact that can be reflected
pre-verbal level
this is a kind of Perception of information

it gives a feeling
this is the primary speed factor of Perception
some element in the creation of the Soul itself

so we have
at a remote level already of Consciousness
it means that the Soul perceives
your own creation

as a fact of the same Perception
or there are sensations of Perception
forms the logical phase of Consciousness

i.e. logic is structure
which allows the Soul
actually form
status of one's own essence
in this world

i.e. logic has rigid connections in this World

it turns out that the concentrator of these rigid connections
is physical for example Reality
i.e. the system that surrounds a person

then it turns out that the transfer of the control system
in the structure of, for example, the management of hard Reality
this is again simultaneity of action
for example there is a pulse of light
in the structure of soft Reality

i.e. life which, for example, implements an action
and at the same time this action is realized
in the form of the same light
the same shape
and the same level well as if even density
in the phase of hard Reality

i.e., in fact, such management is taking place
when in the phase of hard Reality
you put your light on

then you get a person
passing some section, for example, predicted events
can clearly define
that any event can be overcome
i.e. well in terms of pro-managing while being
in the structure of action in physical Reality

for example why did God create physical Reality
from the point of view of development, for example
well, to record that overcoming is taking place
some control systems

and then you get a harsh Reality
this is a certain coordinate system

i.e. if we work
with the light of life
and at the same time life initially has an Infinite status

then you get light
which we implement as an action
this is the light emitted
from some kind of primary matrix of life

i.e. life itself does not change in any way
She is Eternal and that's it

this means that we basically perceive and work
in Perception
with an investigative element of interaction
primary standard of living
and actually external physical matter

it turns out
that at the deep level of physical matter
the difference between
action
and as if the primary matrix
i.e. by the action of the primary matrix of life
there is practically none

i.e. the primary status of matter
as if sintered by life

and it turns out that life itself
Well, there is the biological life of a person, for example
arises
from the status of awareness of life by matter itself
i.e. matter carries the information of life

if we sort of dig from the inside
this Reality
it turns out that in this system
for example, harsh Reality there is any
physical Reality manifested

from the inside there is always an action of life

on matter

and it turns out that it is enough, for example yes one person
his form begins to expand the universe
begins to move matter into the external system

but he must be a human being
somehow compensate for the control
and get your stable status

i.e. the more the Universe expands in width
this way we have a higher concentration
Well something inside the personality structure

then we get simultaneity of action
consists only in that
to integrate the inner light

i.e. to be able to direct the inner light
somehow rearrange it inside
may be the physical structure of a person
not necessarily even the physical body
and somewhere inside the Soul
so that the entire external Reality would react

because the connection here is direct

and here is the body, the physical body of a person
as a structure that organizes interaction
for example external and internal systems
this is an element where it is taken into account
the slightest human action including

i.e. for example there the hand movement is a logical movement
however, if we begin to see the connections
then you can do Macro control there with a hand movement
if done correctly yes

if we start to analyze the situation as a whole
Well, it's not necessary to just do hand control there
and is it possible there not to , well, not to make any movements
nevertheless, to receive as if a spectrum of Macrocontrol yes

then it turns out that you concentrate more
i.e. you work more

at the level of the internal management structure
and as if this is a transfer of knowledge more like knowledge of action

and if for example we add there
some element of movement, some kind of scheme, etc.
it turns out that you are transmitting knowledge significantly more

i.e. the outer shell of a person
this is expression and multiplication
systems of internal knowledge

i.e. the physical body
how the knowledge dissemination system actually Yes
in this regard, here are the controls

and it turns out that this is what happens then
simultaneity of human action in all systems
this is basically it as if an equal harmony
for any system of Reality
and then the person practically
maybe for example there is some kind of recovery
if he needs it

if he is healthy then it turns out that he can
put your affairs in a more favorable light
more like further strategic events

and this is where the main element comes in
here is today's management
strategic events
i.e. distant in space and time
this is an element where there is a change in shape and even color
here, as if carrying light [...]
event management context

i.e. we begin to see
that the light starts to work
as a system of creation of matter
and the light that comes specifically from the person himself

i.e. we track any
and moreover the only unique impulse
but he achieves the creation of matter

as soon as we begin to see
this control system
it turns out that we can do it

for example, if we have a task, let's say
do management well as if coming from the development structure

For example there is matter that arises
as a result of the action yes
and the matter that begins to develop there
in the form of a life structure
this is your action your awareness of life

and can this matter be obtained
in the form of, for example , some physical Reality
this Reality, let's assume, begins to integrate
have different forms any that are possible
i.e. the forms here are not limited by the way

and you need to choose the most primary form
which is as if in the collective Consciousness

is precisely primary

and the reflection of this form
get any other form

i.e., it is precisely as if a conversion from the primary form
which is in the collective Consciousness
Well, it is perceived as the simplest one

and get any external control system
and see because of this
that on any even negative information
you can put positive health there for example
you can put positive events

because if there is a conversion
from any form any other can be obtained
that means we can from a kind of negative
well phases in collective Consciousness
what is considered in the collective Consciousness
well, like a non-positive phase

get always positive phase of management

and it turns out that if we, for example,
we already have in Infinite distance
development structure
this primary impulse of life
and there you already achieve the creation of matter

then the substance can accordingly
because the transformation is happening
always the one you need
you can get any
First of all, a macro-creative substance

and Macrocreative substance is that level
which is actually designed in this way
what is matter
Well as if directly addressed to God

in fact, it is the very structure manifested
in material life
there is a cycle in nature, the birth of man, etc.

and that's when we start to see
this structure of matter
it turns out that matter is actually physical
she seemed to turn to God with this order

i.e. God didn't have to
in detail - for example, to somehow regulate everything
there it was enough to create the primary level of matter
which later, let's assume, manifested itself
as the next action level is just for the whole

i.e. had the following event
and it turns out that matter itself folded
into exactly this kind of mosaic, well there let's say so

and when we begin to see
this development structure
then it turns out at the point where we create
we have in one actual impulse
or after one impulse
well, in fact, the structure of the Macro level of development in general

where in general we can see
practically how the matter itself is created not just there
here is what he did with the management
there to some point in space
and then the growth of matter occurs
and what's more, the matter also folds correctly

and that's when we start to see
this is the correct addition

all control was carried out

i.e. here is the bend of this light level
to the level of the actual start of the return signal
we see that the control has been carried out

and from God's point of view
that's where God is
addressing oneself
this is His Action towards Himself

i.e. how God works
He still sees Himself in any action.
i.e. God does not perceive
there are some discontinuous processes there
in space time

and it turns out that for a person this means
initial impulse
this is his presence here
here he sort of perceives it figuratively
and generally speaking appears at this point
as an element of Consciousness

means for God the real situation
for a person it is an element of Consciousness

and then it turns out that
for example, to cure any disease there
does anyone have it there for example
or not to get sick and let's assume that a person has nothing at all
if he wants

so here it turns out he must be constantly
appear at the pre-action level
i.e. his personal presence in the form of an element of Consciousness
in any action
must be ahead
and managing as if from outside the system

so it turns out in the system of local actions
exists besides being distributed there
in the cause-and-effect version
i.e. well, the person took it by force of will
and made the Macrosystem management yes

there is also action

from the system itself
on the event itself

i.e. on the one hand, in fact
as if a person himself invents or stages an event there
some
a person doesn't always come up with everything

and if the events exist
as if controlled from a person yes
i.e. directly in the vector version
there is an event here
you control yourself

then at any point of the external event
there is also a level of its element of Consciousness

just as God has it everywhere
His own Essence of manifestation

and this external element of Consciousness
by its functions and properties
behaves exactly like the person himself

it turns out that we see
a line of seemingly unique human development

i.e. we see the line of construction of a person's destiny

how a person builds his own destiny
where are those key moments
when he makes radical decisions, for example

as a rule
well, exactly radical ones that influence his fate, for example
and for his future

every element in life
it is naturally equivalent to almost
and at a high level it is always there
in the decision making system

but when you have for example that
what exactly is radical level
this is precisely the fundamental change in the situation
well, like slow motion in a movie

So a person ^{sees} what is in front of him
from his point of view, some such position
that now he is making some kind of radical decision ^{yes}

at this point if you go into the position of the actor there
and look at yourself from the outside ^{as if}
then it looks ^{like} some kind of play there
slow action
here is a radical solution now

arises instantly
secondary level of perception in humans
he begins to identify ^{himself} with the action, ^{yes}
see yourself ahead of the action
simultaneously enter into external surveillance
which increases controllability

i.e. as soon as a person forgot
that this is precisely the key moment that is coming
some kind of transformation immediately occurs
at the level of an external observer, ^{so to speak}

Well, that's how God does it
He sees at the same time
and the external Essence
and internal
and at the same time He participates in management

i.e. He acts ^{as if by control}
in the growth of matter

and it turns out that for Him the growth of matter
this is management

for a person this external identification ^{is like that}
consists of obtaining the result

here man coincides with God
where the result is what is needed
in this action

in intermediate actions it may not coincide
because a person can be an external observer
from a human perspective

and it is precisely this human position
this is what determines the growth of his Soul, yes
in terms of the development of matter even

i.e. a person does not touch matter
but because of well as if actually increasing
geometric level of the Soul
in Perception
gives the next matter such that he doesn't even touch it
this is the function of God's Action

He creates matter.
but He doesn't twist his finger at every atom there, for example

and it turns out that based on this development structure
we see
what for a person to well there it was balanced
and did the exact same thing there, let's say so
control
from the point of view of the logic of development there
Souls
Spirit
Consciousness

you need to have a completely autonomous one
average point of action
and this is the point of action
of course it takes into account the human physical body

and that's when you start to see
taking into account this physical body

it turns out that we are considering then
body construction position
as a multivariate quantity
accounting is not direct management it is only accounting yes

and then it turns out
but nevertheless for God
that accounting that there is direct Reality
it's all the same anyway

so it works out
what if we look at it from God's point of view
this is management
then a person gets a feeling like

well, at the information level, I guess
multiple redundant systems
where is the information of the human physical body located

the information is visible
like many bodies for example yes information type

but for God, for example , it's the same thing
if he saw many bodies
then they are, well, with one unique body
must merge into some structure of matter

so it turns out that God creates matter
With your own Body because it is one

He can't do all this there . as if at the level of God
consider a multi-body control system

and for a person at the level of thought
it can be done

and it turns out that when a person thinks
Well, there are many options, i.e. through the Macro level, yes
we are considering it
personal action
Macro level action
what is generally a Macrosystem in personal action

it just appears here
that here is the growth of personal action into a Macrosystem
this is a simultaneous action as if
many information bodies of a person
and at the same time these bodies organize
the structure of any matter in general

i.e. we can see practically the same thing again
matter that is in the collective Consciousness
manifested
how so in general, one of the simple forms of yes material yes

and at the same time we see
complex transitions to the Macro-Creation system
when at the moment of action
matter itself arises

and it turns out that here

this one is ^{actually} quite thin and unique
transition to the structure of the organization of matter
through a multivariate world
multivariant level ^{or something}
Perceptions of one's body ^{are actually} Yes

we see how matter is organized
from the human body
here it is clearly visible if
Well, if you look at it, there's such a simple plot there
to represent many physical bodies in informational terms

then you can see
as a result of their interaction
even at the level of Thinking
of oxygen, ^{for example} , is organized there

can this atom be traced
direct to the desired point
leave here
and it can grow there
into some structural system
with oxygen enrichment, ^{let's assume, if necessary} , yes

and when we start ^{well for example,} do management here
from the point of view of, ^{say,} some movement
on the construction of the muscular system ^{yes}
^{let's assume} it's further there

if oxygen atom
introduce into the structure of muscle tissue
then an impulse of oxygen saturation of muscles occurs
it's an impulse ^{of sorts of} muscle movement

i.e. we can see what we see
^{well,} that is, muscle saturation
the muscle begins ^{to become} saturated with oxygen
how does a person do sports there

and she once and increases ^{yes}

and this can be done through management

this way you can train
the structure of physical tissue, ^{for example}
the oxygen content increases there or
or leaving it at Normal or slightly increasing it

leaving in Norma
in this way you can train your Thinking ^{yes}
muscle tissue

but if so, i.e. giving cyclicity
well, there, like, to some kind of local thing or something
fragmented level of management

we see that this way we can logically move on to that
that it is possible to create a cyclic phase
the same atom and in bone tissue for example

and then you can go even deeper
and then you can see
what is the structure of the body
functionally manageable
at the expense of something earlier and at the same time future
phases of Consciousness

i.e. earlier
because the first impulse is familiar to you
to the level of Consciousness
and the next one is the future

and as soon as a person enters this phase of Consciousness
where is local and future i.e. universal action
actually united in the management task
he can train his body
from the point of view of Eternal development
including

i.e. you can work for this
by the structure of external control
where is the organism and external tasks
These are independent systems

and then it turns out that you work by functions
not even that there are assemblies of the organism

because assembly is a kind of question

where it happens that sometimes people get tense
and make an assembly point
this process is often discrete ^{yes}

and in this case with linearity

as if life's simply ordinary processes
i.e. uniformity or something
not that linearity in the direct sense, as it were
just continuity

a system of external control arises

it turns out that you can train like this
so that due to external impulse
create constantly in fact
well, the next system of development of the physical body

for example, an athlete when he trains
he knows that he will achieve greater results in the future

the same thing if this level
apply to the human physical body
you can train the structure
well, internal content or something
where the Soul is spread throughout the whole body
at the point of interaction
matter
and physical matter
matter of the Soul
and physical matter

and from here you can see
that the body becomes more stable

then it turns out
the only thing is well as if a unique human action
and universal action
integrates at the next point
from which the action takes place
on the physical body for example

Well, in principle, you can train the same way
the structure of the matter of the Soul
but there is a more complex system there
because everything comes from the Soul
in a person

and it turns out that it can only be done on just about anything
having selected a logical fragment of Consciousness

having received a reflection from the Soul
get a kind of investigative department

and not radical, not at the platform level
some information or something

but the body can be controlled
at the level of the Soul platform for example

then it turns out
what we can say quite clearly
what is there, the spread or the development of the Soul
as a rule it is simply the spread of the structure of the Soul
in an ever-increasing area
this is precisely training of the physical body
from the point of view of Eternal development

i.e. how, for example, to solve the issue of Eternal development
for the person who is there
I encountered this situation there for the first time
according to this formulation of the problem, if he didn't know there
and he thinks that maybe it's difficult
he needs to be given something to touch
so that he understands that there are processes
controlled well in some current time

here is the simplest option
ability to control the body
due to the external, as it were, disposition of control

the ability to see that it is, well, a kind of level
which is saturated with experience
due to external control
experience can be brought to absolute value

then you can see it here
that the physical body becomes Infinite
under certain conditions of such external manifestation

i.e. some kind of systematic correctness
ideological action
must be constantly observed
what is this for Macrosalvation
for the sake of all the people there, etc.

because it works out
what if one of the components fails
then the process simply gets longer
and there is a component of Macrosalvation

through Salvation of all
it is the main one, it is generally a supporting platform
there is no way around it at all

it turns out that thinking about this is a process
on the one hand it's easier
on the other hand, people have
some personal tasks
find this volume of information which is called
there is Macro-rescue and Macro-management
somehow implement it

and this is the development that results
well, some kind of training in a certain sense
body control systems in Eternity

you could say that at a certain level
the organism becomes Eternal
and it is recognized
in the current state of the body

i.e. a person trains and trains
and how would I train myself to that point
that I saw the signal of Eternity from my future yes
if I may say so

and then it turns out that this is the signal
it also provides a coordinate system of connections
at every moment of time
between the current time
and the future general process of action

here you receive a signal from yourself
by investing you get another resource there
having spent time on some training

and you get a completely unambiguous line of behavior
Means
from the point of view of God's tasks, by the way
here is Eternal development

it turns out that based on such a management context
it is enough to just put in some effort yes
some management resource
and you get
a completely controlled line of command

from the point of view of the tasks of Divine development
but controlled by you

it means your personal action
coincides with the Macro level

i.e. harmony comes that works
and in the structure of a normal physical body, so to speak
which is there, well, actually, in a normal state
i.e. for this, for example, a person does not necessarily need to
there you can do horizontal bar exercises to increase muscle tissue
it is not necessary to achieve something

although this can of course be done
and even this is better for those who have time

but for example here it is precisely the training part of management
consists in the fact that
what you start to control
also the structure of Eternal development
of his own physical body
as well as the body which well for example, it can be controlled
from the point of view of the development of muscle tissue there

and then it turns out that we already have a transition
local physical state i.e. sensation

this is how the Soul was created and the feeling arose
this is a primary feeling, like a relic feeling
falls into our time
and we start from this feeling
to receive that we begin to know the future

that the future is almost always perfectly optimal
and there is always a solution to the problem
taking into account such trainings as management programs

we get that everything depends only on that
how timely we will invest
resource management

and it turns out that it is precisely timeliness
it's a decision making task yes
the task means to define a complex
there in the structure of the World
correct positional state first of all

i.e. how do you positionally define yourself

but positionally in the information system
this again influences the entire Macrostructure

to determine how correctly you are acting
you should still understand
where are you
and still have to be able to
spread the momentum
or something of your Soul
of his personality in fact Yes
your information
in the general sense in the whole structure

i.e. even the diagnosis of this condition
again leads to the fact that we are forced to work
via Macrosystem

and so it turns out that we
no matter how close we get to ourselves
we constantly get caught
into a system that is investigative

so in essence a person is the same
separated from the information and management structure
even often from its own mechanism of research of the process
just as God does in principle in many ways

God is simply separated from the entire information system
and a person can be separated
from its own system
as if searching and analyzing information

i.e. and this allows him to be constantly present
in the background of precise action by the way

i.e. from God so to speak
current management system
God's system
forms this layer
some kind of unique space

it differs fundamentally in that
that when approaching this space

you can also get closer to the Soul there, examine and touch it
see the light of the soul
there are no problems there

and this is precisely the space that is being formed
in the action of God and man
but it denotes an earlier structure
for a person
where God began His even earlier Actions

how to understand
which Action is earlier for God
here is pre-material yes

here, in this light, you can see it
what is the earliest Action of God
is human life
earliest action

i.e. life has
the longest development coordinate is obtained

basically we came here more by a logical path
well, informational and in management too

but if so, then the processes of life will be obtained
It is easiest to observe from the Infinite magnitude

and they are therefore more controllable
because in the Infinite version
those processes that are the earliest
they are also easier to control
because they are large in volume it just turns out

and based on this
any state of a person's life
this is quite a large value

as a rule, this is an infinite initial value
she's just, well as if it were spreading
local spectrum of action
and it turns out that the local type of human action
these are his local affairs
i.e. a person is in principle inextricably linked with affairs

God who is connected with all affairs
It can be physically manifested in one place.

but work on all systems
but in principle it is still no different
from the point of view of the human physical body
Then
and in general it does not differ even logically and really

it turns out that here
the action of the physical body determines
exactly, well, the growth of some information
which corresponds
exactly to the usual healthy physical body there
in Infinity

where there is an aspect of action
Souls
Spirit
Consciousness
love
there is no physical body
or there is love of the Soul
in an integrated understanding

and then it turns out that all external space
as if it accumulates and merges
with the system of the Infinite or something of the essence of man

and then we see
that the approximation of this space
to a person
into the inner content of a person
it's only on everything
well, simultaneous, as if collective
on the one hand, the actions of all people

i.e. although I speak only just
because it is a very simple process
at the information level it seemed

and collective action reproduces again
one person already in action
in the system of other people's actions

and it turns out that the person himself
in this control system
creates for itself a certain mechanism, so to speak, of interaction
some mechanism of influence of its internal system

and it turns out that it looks like this
what a person can do
at some kind of mechanical level
find a line of communication between different information objects
i.e. to look at how information systems
are working
for example at the level of direct optical influence
on these systems

develop a system of interaction
between its action
and these optical systems
i.e. well, some kind of level
that there is a system of communication with the outside world
in this information

and the information is well [...] there are some cylinders
there is just information, nothing else there

and now it is enough to influence the information
and the whole structure of the World will bend under the structure as if
your control
i.e. you do management without setting the task

enter the control [...] there
you click on some optics
and the problem is solved but it is yours

like God does, for example
He doesn't really have any tasks from the start.
according to logic

because there is a task
but God Himself formed the task
It means he was in a state where he might not have set the task
For yourself

then that means
what is a task from God's point of view

this is a result obtained in the future
First of all, yes, from a human point of view.

and then it turns out that based on this
we see what the main problem means
in this action
to find a connection

how did this happen
that the task was not set
and in front you see that this is your result yes

here's how to understand that this is your result
you understand it at the heart level
at the level where the Soul becomes
in the overall context of management
i.e. it becomes universal
from the point of view of the external observer, so to speak

and it turns out that if we have
this is exactly the solution, let's say, to this problem
in the form of understanding, i.e. personal understanding, yes
we can see
where the structure of understanding as such is formed
in the structure of life

i.e. in the structure of life there is always an understanding of the process
i.e. there is always a level of the next development

if there is at least one primary level of understanding
then all man already lives forever

because what difference does it make
on the unification of the World system
if he ever understood anything
Human
that means he can already understand anything
including can always understand that
what is Eternal development and how to achieve it

and when we begin to develop the structure of understanding
to the level of a kind of internal action
then you can see that due to understanding
a person can completely recover on his own
given a certain amount of time

if there is no time
but there is a task
then you can improve your health there by reducing the time, etc.

and it turns out that, well, it might be difficult there
It would not seem that sometimes a person's life
ability to get into management
this is a fairly harmonious real value

connected only for a total of
with a spectrum of understanding of the moment
and that's all

if we start to go out
into the structure of primary information creation
then where, for example, there is no information
what should have been understood

it turns out that man had to create himself
structure problem yes situation

and that's when we start looking
the root of the situation
you have to look at what a person creates for himself

i.e. what are the trajectories of his Soul, his actions
create for him
this particular unique situation
and why did it arise

and here the structure of Macro-action begins
where all connections and all parameters are visible
what was he doing and why did he need this situation
why did he even come to her?

from the point of view of the whole universal Reality, yes

for example, there in the questions of resurrection
and meetings with resurrected people
it is often enough
one neutral thought simply about the stability of the World
the resurrected man appears

i.e. it means that often here
well, some kind of everyday thinking
some everyday actions
lead to some level
such a fairly large-scale yes
such as, for example, the resurrection of people

when it comes to that
that the uniqueness of your personal action yes
in search of some kind of Truth
when you start in the applied aspect
just there as such Truth

The truth that leads there to an accurate diagnosis
there is some kind of technology there
healing other people there
or simply for the health of anyone there, etc.
Well, to event management

then it turns out that here
the level of this kind of internal action
it's still a level
identified in one person
with Macro collective Consciousness

i.e. everything that all people do
a certain overall image is integrated
also having the image of a man
but the light image for example

and then the person makes a selection
of his own participation
and as if not yet present in the system of action
he receives signals and speaks
that for example to myself

that's why he does this
what well Means there is that action it exists or something else yes

i.e. it turns out to be a future construction of oneself
man creates himself
but in the system of collective Consciousness to a greater extent

and to understand the structure of actions
logically understand that here is a person
among people there among objects of some other Realities yes

and then it's clear
that it works through the system of collective Consciousness
but in this case I showed the work as such
i.e. what does it look like

not because logically it exists
and what does she look like anyway

when you start to base yourself
on this principle
then you can open up a lot of direct vision systems

any situation at all

you just have to ask the question

what does the system actually look like

Well, from the point of view of some kind of absolute Reality , yes

in Perception

then you just need to do everything, well, actually speaking

look

on the processes of transition to management of this type that

what's going on here anyway, well from a logical point of view yes

for example there is Reality in Management

you can see it in the distance there

well let's say clairvoyance etc.

and when do you start to perceive

Reality as a system of actions

then in the True understanding or something

Reality is something you overcome in action.

i.e. what you interact with

at the information level

and you get a controlled system

i.e. it turns out that some kind of general control is taking place

and because people control everything

The world looks more or less balanced, so to speak.

therefore the general action

happens at the same time

in any private human gaze

i.e. a person looks into external Reality

and he sees that quite a lot is happening in general

great general action

although he can see just as if physical space

but can see

how the collective will of the people participated

in that this or that person

for example, was born

and you can determine why he participated

what that particular person wanted

when he wanted, etc.

and then it turns out that God takes into account ^{yes}
opinion on a collective level
and there, ^{well,} some people are selected for action
some specific management structures

for example, there was such a term that was always in common use
in the educational context of history
that there is a certain concept
as a "historical necessity" ^{for example Yes}
formed by collective will
emerges as a will
^{Well as if} separate people
individual person

and this is like one of the acts that was ^{well} we are observing ^{yes}
in management
although in fact as such there is the Action of God
and in the direct sense
as such this necessity is of course
in general, in a direct sense, no
it's just like a logical conjecture ^{yes}

that people ^{kind of} watched it directly
control
and decided that this level of management
that's it
^{well,} some kind of formed reality

and from God's point of view
He can make any decision.

and it turns out that based on this
then there is only Action and decision of God

and there is some historical necessity there
or some condition in a person's life
this is what comes first and foremost
the level, ^{well, let's say,} is actually like this
that a person is just at some point
makes the following decision
that what he perceives is how it should be

and then this process of transition occurs
in Reality of action
in direct Reality of action

i.e. the person is looking

and some kind of Reality begins to organize itself, for example Yes
which exists in this World

then first of all it is the Reality of man

i.e. at a certain level
man all the time

well, actually, how can I put it that way
understands means creating another person
even participating in assistance, i.e. building a system of assistance there

that's why healing is often
it's not complicated actually
what is the control level control option
because this understanding can be expanded
and fix it

a little bit of fixing action
and that spectrum of improvements in a person begins
what is actually being created
Well, a more complete picture of management, perhaps?
for example , another person is improving his health there

i.e. for this it is enough to just look at how
to the management level in this way
to get in general well, some specifics there
in action

i.e. to see
How does a person develop at all?
in the system of precisely these interrelations
singular i.e. particular and universal

where does the intersection occur
general information
there, for example, with a person's personality

and that's when you start to see
these are the intersection levels
with the participation of some kind of collective management system there
collective phase of management

then it turns out that you see it all the time
that the person is
in the system of real Eternal development
as soon as you see this system

it is constantly in dynamics
some lines of connections there
where are the Eternal elements of connections

and then it turns out that based on this
we see that the structure of Eternity
here in human development
this is actually in many ways
Perception of another person

this is how the other person perceives
there on the third of ten, etc.

and if a person is brought up there
at the level of Eternal development
then he tries to discern in another
some lines of Eternity ^{yes}

so it turns out that it still works
the educational level of the person himself
in many ways it is determined by some kind of radiating ^{or something}
into the external structure of levels
another person

i.e. a person passes it on to another
some information through radiation
some structures coming from Eternity
and it turns out that another person can too
or perceive
or do the controls like this
to receive the structure of Eternity

i.e. at the interaction level
interaction occurs all the time
through the Eternal some such constants there even of light ^{for example Yes}

and it turns out that if so
then we can see quite clearly
that interaction between people
even on some ^{kind of} optical systems
based all the time
on the categories of Eternal interaction

i.e. the lines interact between people Eternal
they have neither beginning nor end
and constantly

Well, there is just some dynamics in the movement of light
and that's all

if we for example begin to see
this structure from the inside as if in a harmonious phase
like internal control or something
it turns out that we can move
along these lines of Eternal interaction

and to see that then it is clear
why is God, for example , a Person, yes
He created himself, including human first of all, yes
human personality
and in essence is the human Personality

because interaction
between elements of personality even individual ones
has Infinite stats
then the element is well as if of a private quantity yes
private action
all the time fall into the structure of the Infinite system

well, that is, any private action
well, it is in some space
where any element of space is Infinite
so if we bring it to such abstract logic
conditionally, here's how to show the connection between these phenomena, yes

then it turns out that
so that a person, for example,
in such a well it turns out somewhat
for a single action in an unnatural environment in general
managed to somehow fix the direction yes
and somehow move there

then it turns out that it must have some kind of pendulum yes
some kind of, well , formed , I guess
material type system
which is always in one place

and it also depends on him on a collective level

and it looks like this
what is the impulse of human information
even all the information of a person
touching all the time
with Infinite Space of Action

all the time forms the action

Well for example there is planet Earth
i.e. some elements of the planet
or the entire planet as a whole

and then returns to the original action
at the level of the actual reflected signal

i.e. how can one even be there
in the space of Infinite actions yes

so "Infinite" means like a completely different environment
and if, for example, you step on it somehow
she will try to disappear somewhere in a dynamic form

i.e. in fact, the person is
as if in absolute space
i.e. it can be located
only on its own reverse action
and everything turns out like this

I just deduced it more from logic
and in general he showed these light levels
in Infinite Interaction

it turns out that it is what God shows
this is the only option for development

a man owes himself
create a platform for the next moment of development
in fact he can do it
only if it controls the Infinite Systems

this proves that man is designed
at the level of Infinite development
this is actually quite a useful system
rigorous proof
what i told today

if for example you can use this system
recognize precisely as a system of proof

then you can
many consequences can be drawn from this

and if so, it turns out that the person

so actually constantly even
in fact, it even creates
a certain element of its future development
just creates them
They ^{just} don't come from anywhere
but just takes and creates

and based on this, if you think about it then
how he creates them

that's exactly it
here is the analysis of the general action
like a general action ^{for example} Yes
falls into the structure of local action

and the fact is that a person creates them all the time
these systems
that means he is always somewhere on the level of the Soul
and pulls a very large array of information here

and that means he has these arrays somewhere
there ^{it seems to} transport, pull, bring here
and here it looks like from Consciousness instantly ^{as if}
although in fact it is a colossal work of the Soul

and here the properties of the Soul are visible
that the Soul also does not have the time of action
and works in a timeless system

because to build there a second of time
personal actions ^{yes}
in a changing world
this requires a colossal amount of time in general
to ensure events

this means that the Soul also works in a system where there is no time

and this level of integration is there
such a Macro ^{action} and micro action
it turns out that leads to that
that the Soul is actually already active in space
and singular
and Macro level
logically it's simple

once in one pulse

you can have a huge amount of space
translate
into the pre-action system
well or the next action of a person

and it turns out based on this
we are already beginning to understand
the work of the Soul more harmonious
from the point of view of interaction with the body

i.e. what is the Soul for at all?
sets some tasks
in front of the body yes

a more dynamic management system begins
i.e. faster communication systems
a person begins to understand
that he can overcome
very integrated and fast in a dynamic system
in general, any development systems
towards Infinity, precisely to overcome

i.e. the ability to do so in the direction of Infinite action
so that when a person does something
is there any information
he could always give negative information
go around

i.e. make the information simply a local system
if the information is not needed
localize yes

and God too
took and localized matter
and that's all
in one place

then it turns out to be a more controlled system
and you can always introduce external control
and do everything as it should be

need Infinite life yes means
and the opposite action is actually yes
from Macrosensation Macroperception of the system
from work in the timeless level of management

and drive to the local system

those. actually committing

local-physical space
allows very precise control on one impulse
this space is actually made mobile

and already influence events
but of course it is not necessary to touch it there
streets roads and trees
namely, to influence events
in a precise coordinate system

in those that are permissible of course
at the Macro-creative level
influence
from the point of view of the consent of the persons involved
which act creatively yes

if they are not creative they can be influenced
naturally to save others yes
and give them a creative development status

that's why it turns out that in this control system
when do you work
at the Macro level
and in private traffic
it can be found out very clearly
coordinate system of influences
and achieve influence faster
without affecting any systems of the material world
there is no other there
the same roads, cars, etc.

and get almost instant control
in the current tense

This is where I end today's seminar.

Thank you very much for your attention
