

GRIGORY GRABOVOY
The Teaching about God
The Counter Movement of Eternity
07.07.2004

Hello again
The topic of today's seminar
This is my Teaching about God
The Counter Movement of Eternity

we are talking about the development of Eternity
for example, as God does
in his view it looks like this
that God who realizes Eternity
originally being Eternal
from the external side, as it were, of the form of space
external space in general
sees almost the same
that external space acts similarly, generally speaking

i.e. for God and generally speaking for any of His Actions
any external action can be similar
if He for example yes he wants

it turns out that the form of statics
It gives it some kind of well let's say certain movements
personally connected with Him

so that God could express, for example, the form of Eternity, yes
and presented
on human perception
He must first create this Eternity
create the entire management structure
events and everything
and only then implement
in the structure of human perception

i.e. it turns out that God created
some kind of single practically human perception
we need to create the whole Reality
and then form this Perception
as because a person sees Reality
let's suppose with our eyes Yes
or hears there

and also because He forms
God the very form of his Perception

i.e. it puts the meaning of God's Action into practice

here to highlight the meaning of God's Action
in approximate Reality
a person must see Eternity
which is moving towards him

i.e. one thing

Well for example, technological systems
there we will say linear control
move in space time
and do it on the logical status
Well, that 's clear enough

i.e. the ability to restore oneself

Well there health is meant to restore the ability
completely restore some other system
and how to develop
within the framework of the usual criterion for the development of any
processes

another question is what can be highlighted
in the system of Eternal development
that Eternity itself has certain properties
as if like an external environment

touch this environment correctly, as it were
then you generally fall into the system of Eternity
because you took it correctly
namely the external, well, sort of characteristic
and generally speaking we have already entered that control space

it turns out that here is the selection
counter movement of Eternity
for example to your physical body
to your Soul
to the Spirit yes
in general to the personality as a whole
where personality is manifested in the form of action after all
Souls
bodies
Consciousness
i.e. precisely in the form of active characteristics

after all, God is also always active
i.e. there is an analogy with the likeness of God
analogy to act as God acts
for example in the dynamics of human perception

i.e. how does God actually act and live, so to speak Yes
from the point of view of God himself
here in this case you can see
structure of life
precisely from the point of view of God himself

then a person sees
that all phenomena of Reality
so-called final phenomena
this is also to a certain extent
manifestations of the movement of Eternity
or the manifestation of Eternity as such
from the point of view of the statics of the Perception of God

and that's when you start to see this structure
then we'll see what happens next
that the concept of "disease" yes
"distortions" of space and time there
cause and effect relationships in the Eternal process
this is a process where the structure is like Eternity
she's like Well, it slips away there

it turns out that this is what
optical signal of Eternity
it reaches into extremely remote areas
and the distortion of the area begins
well, manifested, for example, on some organ

and it turns out that initially
this is exactly where we see it
what is man originally
He is, generally speaking, Eternal

and that's when it starts
in interaction with external systems
as if to rest against some sharp, hard corners, so to speak Yes
i.e. not expressed in the viewing plan, so to speak
in precise terms
control system
then it turns out to be some kind of disease system

or is there a distortion of events?

and so that there is no such thing
i.e. so that the road is smooth ^{yes}
and coming from you
she would be calm
need to
firstly, ^{as if} a viewing system of Spiritual development
when you clearly see the future design

as accurately as possible

and at the same time we need to take into account
what exists
the entire multidimensional multivariate external World in general
then it turns out that it is enough
to the outside world
give the characteristics of Eternity
and then you work
with only one design of this World
knowing the primary structure of the World

The world is still originally Eternal
in any object of manifestation

i.e. you understand
The action of God is personally related
how are you
and so with the mechanism of obtaining knowledge by you
i.e. you can create knowledge yourself
in this case

knowing the mechanism of obtaining knowledge
from God
you can understand the structure of knowledge
and create knowledge that is acceptable
for the Eternal development of all Reality

i.e. you actually teach by your actions
actual action
external object of some information
there is a molecule of the Macroworld and in principle of a person too

here is a rather rare ^{aspect} of management
where a person is clearly and fairly equalized
with any other information objects
because as soon as we talk about Eternal development

then a person can perceive it almost the same way
and at the same speed
for example, how do you do the management?
and perceives there for example microobject

it is important to highlight this gradation here
that the equalization of man
it doesn't mean that a person is somehow equal there
to another information object
namely, that this is obtaining super speed of Perception

i.e. you can take
optical signal to drop on molecule
and move it yes

and you can do the same thing
teach a very large number of people there
namely Eternal development

i.e. where, in general, we see
manifestation of the structure of Eternity
or suppose in a repeated characteristic
i.e. the movement of the molecule there is plus or minus yes
two characteristics
there are two words following one after another of the same property, etc.

then we get control like this
that the control coming from you for example
this is management
where God has already formed generally speaking
status of events and your Perception
that's what I was talking about a little earlier
that this is precisely the form of Perception
here is the outer world
this is God's action with you

i.e. you form the World and look at it like this
how god actually works with you

and that's why it's precisely to form
in general, it's an individual or personal perception
yours personally
to Infinite Development
this is generally speaking to create this development
for God

and when can you see it
then this is precisely the counter movement of Eternity
i.e. Eternal development
this is your personal path
where you are aware at every level of development
that you are Eternal
and you realize this even without the help of
there as if or something organic Perception

and it's so clear, even logically possible
not by way of distinction as if from that
that you have Eternal development technologies
and someone else, who else, as it were Well, I haven't learned yet
he doesn't seem to have it

vice versa
from what you naturally perceive
just like everyone else
it's often enough that you know it as if or what about a person ?
Well as if someone, for example, hasn't learned yet, yes
or do you know the person who learned
and what's more, you can see between them
there might even be some difference

but for God all people are equal

i.e. it turns out that initially
only what you can do
it is enough for another person to be able to do it
as if well at the level of development
specifically, of a logical, informational nature
of all space time

i.e. you can say
look into the distant future
see that yes you live there
this is approximate
precisely to the level of absolute controlling clairvoyance
i.e. you see the whole structure of Eternity
just because you look at any person
on the image of a person

and it turns out that you don't record
I myself am kind of a tough image, yes
i.e. you don't have to be there
To keep his man in memory for an eternal number of years

he's always there for example, to improve health

it's enough for you to just

as if by inner awareness

pass

image of a person

and here it is

what for God

the image of man is He Himself

i.e. it turns out that He always has it in His Soul

and his Soul is built like this

what exactly is the passage like what information yes

from a human point of view

through image

it gives eternal development

and where Eternity itself strives towards man

here is the image of a man

this is the system so to speak

to which the already created Eternity strives

i.e. all events can be considered as follows

that the created structure of the future

this is where the future is

where there is, well, the past is clear

but also where there is the Personality of God

i.e. Personality creating

for some Laws and reasons

all events in general

i.e. here you can see not the event line

not a line, for example, of the structure of some internal connections

and in general how does God create

there for example, Your own Reality

external information

i.e. an eventless, timeless system , as it were, even

Management and Perception

there you can see how the Personality of God creates events

and why anyway

i.e. you can understand why

because when a person supposes

Well, he's looking at another person.

he can understand the reason for his actions

at least
at least visually observing another person
you could say he's sewing there
or does something specific ^{yes}
and why does he do it
he sews because he probably likes it , etc.

and God too
from the point of view of external observation
He is understandable

when he does some work
for event production
to create the next level of Reality
then this also becomes clear in this system

and here it becomes clear
that Eternity is the reference point
where a person forms
its own ^{place of} Perception of God
and the One God

and he can then understand in any system

i.e. it is enough to see
the movement of Eternity towards you
a rather tough one stands out
as a rule it is round-oval, ^{sometimes} oval
maybe ^{there is} one such form out of a million times
usually very specific
rounded form of information

i.e. you can touch it
initial form of information
such ^{as there is} a spherical value

then you can touch it
what can be made from it in principle
by transferring thoughts to another point
^{there let's assume there is} a triangle, any figure at all

then you can take
and how to create a constructor in this system
anything
^{there is} a molecular system
moreover, when you move away a little
from [...] ^{as if} designing away

you will see that the molecule is real

it is possible to create an oxygen molecule
or just increase the amount of oxygen yes
create oxygen in any system
Thus
not necessarily just oxygen

i.e. you begin to understand
that the construction of Eternity
it is a building material
for any system in general

at the same time it is so harshly manifested
building material
i.e. Eternity in a logical sense
that's basically it Well, it's clear that it's an Infinite quantity
and in this case it is as if realized
as a system of constant development often etc.

but in logic it exists
in the form of a specific building material
so where do you start to see

that this material is transmitted specifically by God
i.e. Eternity is the structure of the material being transmitted
By God
to a person
you could say it this way
because there is, well, let's say, a master, yes
here is God doing concrete work
then it's just material

and then you need to look
how God works and glue as if to build some events

it turns out that all the management in this case
is being translated
it is precisely in the structure of the work in this way, so to speak
even the construction of some buildings
the treatment here is very clearly expressed
the principle of universality of action

it's quite clearly visible here
that the action is original
it doesn't have a vector of action

i.e. you can take different structures
to mold as if yes, construct from them
by a simple transition of Thinking
in any other system, generally speaking, by form

say that let this be a molecule yes
take create molecule
then you can actually see this molecule
as through for example controlling clairvoyance
so generally through a microscope, etc.

i.e. this way you see
that your management does not depend on external systems
if this system manifests itself somewhere later
you can always find your own status

i.e. you put yourself into a strict form of control
which by the way doesn't change
already external collective Reality

i.e. it is enough to learn
control system well at least once in something
fix your position in the information space
then how would it be there Well no matter how I wriggle out of it
system of external Reality

you stay constantly
in the level of stable position in the past
in any information system

it gives you confidence
that you know the future
and when you start to really know him
it's clear that you are protected then
structure of Eternal development

i.e. nothing can displace you
to the level of well let's assume there is no Eternal development

and it turns out that here it is very clearly identified
such a criterion
that external dynamic Eternity
i.e. here Eternity begins to acquire the property of an environment

i.e. the dynamic environment of Eternity

it's basically a constantly moving optics
Sveta
matter
whole destinies of people are visible there
here you can immediately see your fate
and make her happy

this is where it starts more like let's say so
Well or what, the informationally revealed more subtle
Well as if more comparable to the Action of God
namely a completely combined level of management

when you do such management
a person may not perceive it
as the level of management of some external
because this is his destiny

in this case, the action takes place
without influence on fate
i.e. you are actually just
it turns out that you are showing God
here we saw the whole picture of a person's fate at once
and then God knows
that you see it and can fix it
He does the management himself

i.e. here you can show that structure
where God personally rules
because you kind of ask for it

i.e. you see some distortions there yes in fate there in health
and then you see
what does god do to you
i.e. you see that it is specifically God who is working

then highlighting precisely the structure of God's governance
when it is clearly identified yes in this system

it's hard to say for sure
where only God is
It is clear that God is manifested in all systems
but to identify your system, your personal
you still need to define it very clearly
in general how to highlight the work of God specifically

here in this technology

when in the movement of Eternity to you
development of Eternity to you
you can highlight the work of God

and then it turns out that this is a person's work
after all, it is still built in the image of God
even in his work it is not necessarily only a form

it turns out to build a molecule
it's quite easy to build a system
build an organ for example
take simply the points of Eternity the points of Eternal development
even near the organ
Well, it's possible and it will be there in fact
more intense level of work
more dynamic

and can you put it around
look at this technique
where does the control flow come from
what kind of glow does God give
just watch there for a few seconds literally

and make the same control
It is possible in principle from the same point
i.e. it will be the Action of God
but activated on a personal level
to you

and what does this mean
that this movement is again God's
then Eternity to you
knowledge of God is knowledge of Eternity as well

and it turns out that when you transfer
on a personal level
then you get accurate knowledge
i.e. the individual receives precise knowledge
because it exists
Firstly
a completely individual level of the Universe

that's what personal ones are for
namely free characteristics
every person
so it's quite clearly visible here
that this is an exact coordinate system

why are the events completely different ^{yes}
if there in robotics
some systems can do the same things
it is clear that for a person
all events must be different
for each individual person
they must be different

and here is the difference in Perception
difference in location, etc.
this is the construction of Eternity
where Eternity is constantly moving
to each event element

then we enter
into the root system of Eternity
what does it originally grow from?

i.e. where does this system come from?
visualization ^{well for example} what is this
a purely logical argument ^{is} comparable to that
like ^{some} tree that grows
but then where is the root ^{yes}

^{so} then we enter into the concept
yes we see the crown we see the tree
but we see that it is there
some external display
i.e. some picture just

and it turns out that the forms are fixed
what a person reproduces in the form of pictures
if he does find it
root system in your Consciousness
then his drawing will be Eternal

i.e. it will be a work of art for centuries ^{yes}
or ^{there} for millennia

and when you begin to see with Consciousness
you see that thought is that structure
which creates this root system of Eternity

i.e. the thought of a person
this is the concentration of the whole world

All external Reality is based on Thinking

i.e. you come to yourself but not just
and do you know
point
place
where the interaction takes place
of all external Reality
and where Eternity already has a stabilized position

i.e. Eternity as a system is practically
Well, not necessarily only there let's assume there is a brain there
or some cell of the body
but it is clear that the structure of your Thinking
or maybe it's in Infinity

i.e. it's clear here
why thought can be completely Infinite
and at the same time as a finite quantity
be perceived
because it turns out that the movement of Eternity is towards you
occurs in the structure of Thinking

shaping your Thinking
and here it is already clear that the management
that's exactly one thing Thinking can be thought through
but to manage
i.e. here you start to go out
on the technique of that control
where you can dose the control
control step by step by iterations

i.e. think about it ^{first}
look from the outside
do you like this design or not

a completely calm situation, no rush

further the construction of Thinking
does it define True positions
some ^{yes} in real life

i.e. to look
if ^{well} there is something missing
add to the Thinking structure

work with the thought practically as if in front of you

and as soon as you external viewing action
convinced
that the structure built on Thinking is correct
calmly take it and connect it
to the management structure i.e. to Eternal development

and it turns out that then
the control system is not only dynamic
i.e. there is some management technology, yes
as if a constant flow of information

and here you can work in peace
in a known coordinate system
just like you solve some static problem
just like you do even some basic actions
there may even be complex super complex ones
but at least those actions
which are familiar to you
you don't need to hurry , it's like a walk in the park so to speak

it's clear where each bench is
and it is quite clear where each leaf can be blown from
he lies and no one touches him
it's the same design

work in the structure of Eternal Development
or generally speaking in real Eternity speaks about that
that there are events where there is a quiet place to work

because Eternal information
contains any set of positive systems

and then it turns out you can use logic
it is enough for you to think
why is thought born
this is an event that actually happened
precisely in a creative sense

because here you can pull out this event
and generally determine the development picture

i.e. you don't need to waste time for this
for example there is some special creative message there
or enter a special state

and this is what the system is based on

Well let's say it 's called

Spiritual knowledge

knowledge of the Soul

or sometimes they call it clairvoyance yes

controlled by clairvoyance

where you always know exactly

but you don't have to for this for example

do some exercises there

somehow, for example, specifically develop the system, and how

well, its own management

you're just there

in the correct understanding of the position of this World

and when do you know

then the whole outside world becomes

in the positionally correct position

i.e. you are in a real control system

you don't need to somehow technologically increase it

that you generally often just have it from the start

the main thing is to just come to this

Well there earlier or later

and it turns out

that the task is precisely your personal development

this is the task in this case

in general, any object of information

you begin to understand why God

in general, he created exactly the Macroverse, that's exactly it

which is at the same time very close

and at the same time has Eternal development in the future

because the dynamics of Eternity

this is the next reality

with which you can create everything

if, for example, the development system had not been laid down

then how would the elementary material be created

for the construction of Reality

but God still has the task of control

the entire development system so that there is no collapse, etc.

it turns out that the control system

this is again the Eternal mutual development
all information objects
there is no other at all

because the principle of complete free will
means it contains the meaning of Eternal development
then the system becomes soft
it does not destroy, it only develops
as if simultaneously in the internal system
and at the same time in the external

a person is designed the same way
he has an inner world
and there is, as it were, an external environment , yes

and it turns out that based on this it becomes clear
Why did God create man in this way?
from the point of view of the elements
internal so-called Thinking

but in essence, man is a huge, super-complex person
well, like Endless or something in terms of difficulty
system

the fact that now it is like a common point of view
which I am telling
it's more like a mechanical thing
in the understanding of information
but nevertheless a simplified system
gives very clear localization
what signals are transmitted to you

i.e. you are simultaneously and practically in essence
The whole world at the same time here
in its action
in their understanding of the complexity of processes

once you cross the structure of Eternity
you see
where does some information constant come from to you
which needs to be modified yes

where there is information pressure
what's holding you back there For example there is some action there, etc.

and you begin to understand absolutely clearly
what should be done at this moment

from the point of view of Eternal development

and logically
not even by informative viewing
namely logically
being in the right system
of its action
of his position

then it turns out that logic is enough
to develop forever
i.e. quite simple
perceive some objects
hear music
and that's enough
to build the structure of Eternity
hear the words and see the movement of the hand there

i.e. any information at all
this is information of Eternity for Perception

i.e. when you start thinking about it
it is clear that it is man who is built
in Perception so
This is what makes it different from others, let's say
objects of information of any level
what is his perception
creates the dynamics of development of living Eternity

i.e. it is life that arises
Human perception shapes life

i.e. it turns out wherever a person looks
there, generally speaking, the life line is formed
life is improving
if he begins to perceive some object
and he brings life there

i.e. the development of life Infinite
this is the development of human perception
i.e. he must consider
all new areas of the Universe
and bring life there
and that's all

i.e. it turns out that God is the same, acting in a similar way
In the beginning, it was really enough for him to create

are not many people there, yes
initially there was one there
the next person
and then everything goes naturally

from the primary level of the next creation

as well as the movement of thought
information flow
or the movement of the Soul of God to man
evokes his own creation of man
and the next action on the already Infinite development

i.e. a person himself chooses Infinite development
because he sees further
that he is already under investigation
but he was the one who gave this investigation a go
he chose and the question of choice is again
precisely in that true Eternity
exactly in the one that is in the Infinite distance
and there is already a created image of a person

i.e. he sees himself and he creates himself that way
i.e. the mechanism of human creation
Well, exactly the one that God gives him
embedded in the structure of Eternity
and a person can have absolutely all connections
in your body
generally speaking, any other person of any system

and it turns out that any person is generally capable
another to recover there and fully restore health, etc.

i.e. this system is very clearly manifested here
there are no special problems there
you just have to go out
here they look like these very luminous lines
at the optical level
they even feel like lines that are located
as in the Spiritual
and as if in a spiritual sense
in terms of the Soul and the action of the Soul
i.e. somewhere in the conversation of souls

i.e. it is such a collective level
where Eternity is manifested
verbally

for example effectively
generally speaking, from many angles

i.e. there Eternity can be like this
which, generally speaking, can often be unexpected
it could be an ordinary object

this could be ordinary information
from some photo yes

and it turns out that in the structure of objects
there is precisely one moving towards you
Eternity detection system
i.e. it kind of floats towards you
and you have an interaction structure
become Eternal

but if you act properly speaking
without a system of some kind of target management
then it's just like an ordinary object
and you don't detect the system there
as if the movements of Eternity in your direction
if you don't want to

but if you start to identify
you start to see
that in any control system
in any information
these are precisely the manifested segments of Eternity
the more you start doing them
the more you come to the conclusion
what do they generally occupy
first the basic level of information
then the whole system

i.e. you start to see
any level of information
For example there is a table there you can see it as Eternal
it is from this point of view

and when you start to see it
it turns out that the creators of the table are generally speaking people
i.e. that which is outside of Eternity, yes

it turns out there is a level
which is completely outside of Eternity

creation of Eternity
it's you, human again
And
but if we move on to logic
yes, there a man created a table
the man created the same microphone there yes
but an electrical signal passes through the microphone , for example Yes
that which relates to electric current

then it turns out
the structure of Eternity is distributed there
we still need to control
where in electric current there is Eternity

i.e. static objects
they seem to be filled with Eternity, yes
like a ripening apple

and as dynamic systems
any complex mechanisms
they require control first
behind the situation
behind them
and then revealing the structure of Eternity
at the nodal level of the mechanism

and when, for example , I diagnose an airplane
I just often identify one point
and everything is clear at once
but I still find it quite often
and it is absolutely clear what is in the whole mechanism

and it turns out that this is a control and diagnostic tool
for example, super complex and complex systems
where you see well there's like a peculiar drop there
such is the dynamics of the movement of Eternity

i.e. Eternity in the form of optical
like a drop-shaped formation
these tracers are like tracers
maybe this is the image that comes out

and you see that as soon as
this is the tracing image of Eternity
hits a point or near a point

then you start to see specifically already
then how the World is created right away in harmony and in Infinity

i.e. it is enough for you to understand
at one level of management
how, for example, this
it is the structure of Eternity that develops
i.e. how does it get into some area
it is quite clear that the one flying there for example an airplane
above just the Earth
he won't have any problems
i.e. calm Earth calm plane

i.e. you see at the same level
and knowledge and at the same time
image

but then you perceive
well some other controls
then why do you need to see the image when everything is clear anyway, yes
in the future
why get distracted by this, as it were

and it begins
in another part it begins
as if folding this information

and that's why the world is arranged this way
what is for example the vacuum level
where there seems to be no physical matter
but in essence it is a level
where the concentration of Eternity actually takes place
on the condition that you are provided with information immediately
in a generally manageable form

i.e. you can control the type of information
make it the main one
if you can collapse the events correctly
as if to myself

and it turns out that observing Eternity
somehow turn future events towards oneself
very simple

fifty percent of the event trajectory
it's at the same time

and visuals
and verbal ^{yes}
and ^{kind of} informative
it's clear that an object like an airplane is flying ^{there}
or in general ^{the} person is fine with him, etc.

and it turns out that when you start
to wind down ^{as if} to bring events closer
you get this point in the future where everything is fine
this is the point of your current time
and in the current time you are already fine

i.e. at least you control the situation that way
that you, ^{for example}, can go to the management ^{there like this}
what ^{well for example,} make control
at the current time it is normal

but ^{generally speaking,} the current time is different in this way
what if you did the management
so there are means and methods

and therefore it is considered
what is the attraction at the current time
and in general it really is like that
this is already practically a solution to the event structure

i.e. you reveal the future design
at the level of the controlled system
then it turns out that Eternal development is achievable
already because you know for sure
that you can attract all future events
to the level of current decisions

and it turns out that this is ^{basically it}
it's not even entirely mechanical
because action
and here is the road to you
is your own Soul in this case

i.e. space ^{means} movement
this is the formation of your Soul
originally by God

and that's when I said
what god shows you
^{for example,} the control is original ^{yes}
this is what He does and why

it becomes clear to you down to the details
you begin to understand how He thinks then

i.e. where does He get the thought from? It is similar to yours.

i.e. it turns out that you see very clearly
that His projection of thought is your thought

and you start to see
that ^{logically} there is no division
but then you go out
to the very maximum intensity of the mind
i.e. the property of the mind to increase, ^{as it were} , intensity
here it's more like a concentration of the mind

you can see this position
that the mind is so concentrated
that's exactly what starts
what is called the mind of Eternity in fact

i.e. Eternity has such a property
like the ^{mind}

i.e. your mind the higher you develop ^{it yes}
your intellectual level
enter the structure of Eternity ^{as if further deeper}
the more you see that this property also exists from the outside

i.e. in fact you are in Eternity
you see a reflection of yourself in essence

on a personal level you begin to see
what is the same type of signal level
i.e. you perceive at the signal level
the structure of external Eternity
and development of your mind , ^{for example}
and this does not concern that it is just a concept

there ^{for example} "smart"

or ^{for example} "developing mind"

it's just that state when you can see
that ^{for example} there is this very concept
this is where we need to identify
"mind of Eternity"

i.e. Eternity as a living quantity
as a quantity that has the property
deepest, most profound , ^{or something like that,} Eternal mind, ^{yes}
maximally developed

Well, the Eternal mind means that Eternity has it
from the point of view of conceptual systems
what is associated with the mind in a person
developed Infinitely
This means it is a very intelligent system.

and since it is maximally developed
then of course she has ways of contacting all systems

and therefore such a concept as "Eternity" is natural
contains a mechanism for transmitting information
in a form favorable to humans

because it has designs
those which God put and showed
as constructions of precisely Eternal development
designs such that the autonomous quantity
has properties means
and Eternity
and for example some final actions

it means means For example there is a movement of a human hand
is some movement there
where finite action touches Eternity

i.e. you start to see
what do you mean you get from this value
almost the knowledge you need

and it turns out that your action
well let's say your mind
of your Consciousness
these are actions manifested in Eternity already then

i.e. as soon as you start gaining knowledge
you receive the actions manifested in Eternity
your personal

it turns out that human consciousness
his intellectual actions
Well, let's say the structure that exists
beyond just understanding physical matter there yes
this is the transition level
between the real development of physical matter
and the level where physical matter

receives information
about how to do it

i.e. it is actually like this
Consciousness is a learning system, it turns out

and when do you start
that's exactly how to interact
with God
with Reality
then here you begin to see quite clearly
that God is manifested precisely as a Person
so that you don't have any difference
in obtaining information
here is some kind of abstract autonomous Eternity
or from Himself ^{yes}

i.e. God takes on personal characteristics
to show
that any object of information is knowable
any object of information
transmits the True knowledge you need
and according to Eternal development

then it turns out
as soon as God took on the physical form of man
then the whole system immediately becomes knowable

and from this point of view
you can make such control
what to bring out your own status
to understand these events

i.e. when you look at your personality
and you see that you can similarly deduce
^{as if} the structure of all events
on yourself

and then you start to see
what then is natural just
even in the ordinary movement of your Thinking
you can see the target constructive management

i.e. your Thinking
often this is in this control structure

movements of Eternity to you
this is the most precise control

then it is enough to just think through some situations
being in this structure
and you immediately achieve control

i.e. your natural life is Eternal life

This concludes today's seminar.

thank you for your attention
