GRIGORY GRABOVOY
The Teaching about God
The fundamental structure of the World
21.02.2004

Hello again
The topic of today's seminar
my teaching about God
The fundamental structure of the World

when I talk about this topic
necessary immediately if possible
to carry out management practice
from the point of view of the fundamental structure of the World

i.e. we are talking about that
what is the aspect of fundamentality
from God's point of view
in the structure of the World
this is also an aspect of instantaneous, practically Action
i.e. Action
and the fundamental meaning of the phenomenon and the World
it's practically the same thing

therefore for God any action
as is fundamental
and so is the Outgoing Action
from a seemingly investigative sign
because from God's point of view
any action is an action
which is equivalent at any point

and it turns out that
when we talk about such a phenomenon
we should see it right away
fundamental level in personal management

so in this context
then this is the level of management
consists in the fact that
that action and for example awareness
it's practically the same thing

i.e. if we want to get
some element of Reality for example

let's assume there is a cure for a complex disease
or is there super fast control

then this action must occur
as in our Consciousness
so in any other system yes
as well as in Reality
in physical Reality for example

then it turns out
what is fundamental management
in this case it is that
what God gives as awareness of the practicality of action
from the point of view of knowledge of the World

and therefore the fundamental structure of the World
in this case it is the level of knowledge
i.e. the cognizability of the phenomenon, including

and when we want to use this approach, for example
as a completely practical approach
then we need to consider knowability
as a communication element
for example, your internal phenomena
with external phenomena of Reality

then you can say quite clearly
what are you in
at the fundamental level of knowledge
as if a personal factor of awareness of Reality
and at the same time you can quite easily draw the conclusion
as if of the following nature
what is your fundamental plan
and the external world is changeable yes
it's the same thing

i.e. you are
in the structure of the True
i.e. Truly structural, as it were, of a deep level
in many ways this is the Divine level of governance of the World

and it turns out
what is the fundamental structure of the World
from the point of view of my Teaching about God
this is what God gives as a system
practically the spheres of knowledge
i.e. a system of instantaneous cognition of Reality

and a system of simultaneous
management of this Reality

i.e. this is the level that allows
any fundamental aspect
realize
as a level
Well, in general, both theoretical and practical
and the level of implementation of the action

based on this
Fundamental Laws of the structure of the World
from God's point of view
this is the Law of Information Transfer
to man and God at the same time

i.e. God immediately transmits information to Himself
just like a human being
and the Law of Awareness
in certain areas of Reality
one and the same

i.e. both God and man
realizes the same
certain systems of Reality
Well, that's how it should be , basically
because God He gives the level of control
which basically implies that
that God still understands the same way as man

and that's why it turns out
that when we consider
this management process
then here is the level of knowledge
as if the same elements of Reality
in the same way
this is actually a level
the structure of the human physical body
from God's point of view

and that's when we look at this process more closely
it turns out that God perceives
human physical body
as a certain fundamental aspect of the World

from the point of view of his God

it turns out that we have
this level of management
what is the physical body of a person
is realized
by man and by God alike

and it turns out based on this
we can regulate it quite well
movement of your physical body, for example
from the point of view of development towards, for example, Eternal life
towards , for example, practical health

if we consider such a position
and how does God see man
i.e. how He sees us

then it turns out
what we must first know
the level of the World from God's point of view
well, just on a logical level
and then spread this level further
almost to the level of its action

i.e. must create their own action
just like God
conscious of the physical body of a person
creates action for him

in principle, well, it seems like this level is complex
it turns out that in ideology and in practice
but in fact we use it all the time , generally speaking

i.e. people can see
fundamental level of the world
for the person himself in elementary actions
and this knowledge is located in the Consciousness of God

when we start to highlight
in the structure of human development
some for example levels that correspond
precisely to the Divine level
for example, God Consciousness

then a person sees the Divine

in contact with it
and we can well say
for example, a person's faith in God
this is an action that is initially conscious
and coming from God
i.e. God gives faith

and therefore when a person begins to believe
then, for example , he can be cured there
can perform some beneficial actions
actions as if they were coming to him on their own

because God arranged it that way
from faith in God

i.e. the fundamental meaning of the structure of the World
from God's point of view
this is faith in God in Infinite development
God and man at the same time

when we, for example , begin to consider here
it is the fundamental meaning of management
from the point of view of this Macro-level of the World
i.e. the fundamental status of the World
then here it is necessary to separate
in principle as if the meaning of the fundamental structure of the World
as such, for example, yes
from a personal point of view
from the point of view of some information objects there

but from God's point of view
fundamental structure of the world
this is the Eternal life of man and God at the same time

and therefore when we consider such a process
as a communication process
Let's say there is a spiritual connection between God and man
then for God
it is precisely the fundamentalism of the structure of the World
this is knowability by both God and man at the same time
next status of the world

let's assume the world has changed there
a second later some connections changed
then both God and man must be practically at the same time
realize this change
because the World is actually rigidly structured

from the point of view of information development

and naturally a person participates in this process
i.e. it is at a certain level
perceives this change

and then it turns out what he perceives
from the point of view of well that
do as God does
this is precisely an unconditional action

in the fundamental structure of the World
from God's point of view
a person is designed in the same way

and he can catch
all changes are conscious

it turns out that the person is
in the structure of its creation by God
in this sense

i.e. if a person wants to reason
how it is fundamentally structured
and how can he recover there , for example?
how to make events favorable
he must see
how God creates it
i.e. the work of God

but considering what it means to create a person
immediately as the level of Macro life
i.e. manifested in all phenomena of Reality
it turns out that he can see
only the center of creation is defined
from the point of view of your Perception
i.e. he can see , for example, the Light of creation of himself

and when he perceives this light
i.e. for example, differentiates how it is created
he may well be restored by this light

i.e. in this lecture today
it is enough to highlight
this fragment of understanding in the Consciousness of man
and you can restore, for example, your physical body
well, i.e. make it for example there healthy

the only question is
how much of this glow is needed
to let pass on to oneself

because creation is from God
this is not light, for example, only continuous
and only there is it powerful and bright
it's often just one impulse

for God has everything in one impulse

i.e. here we need to highlight it quite subtly
the level of the desired shade of light

and here it turns out
what is the fundamental level of management

this is a selection of a very small shade
after all, a person's faith is often built
at the level of a kind of absence of external information

A person can believe , but at the same time
may not have any convincing information there yes

and it turns out that the level of absence is, as it were, yes
physical storage medium
i.e. the volume of information
nevertheless the level of correctness of the path
this is also a Divine level

and from this point of view
a person may well have , for example, the status of Eternal Development
if he just believes that he is there Eternal

i.e. how can a person check that he is Eternal
he took, let's say, went up to the tree, touched the tree with his hand
awareness of a more rigid Reality
Well, there is a different environment and a tree

but at the moment of touch
actually touches the Eternity of man
i.e. the Infinite World of man
Infinite means Eternal
and Eternity, for example, of some object of information
well, like a tree

and it turns out that at the moment of contact
this is an act of God, an act of interaction
well, like different elements of Reality

and it turns out that from God's point of view
the tree's reaction should be the same
as a human reaction

and when we, for example, in a fundamental sense
for God all objects of information are equal
let's look at this phenomenon
it turns out that the tree thinks and realizes the same way
from God's point of view
how a person thinks, acts and realizes

if a person realized that he is Infinite
it gives the property of Infinity to the tree

and then the tree can't be
For example there set on fire, break , cut, etc.

and not even because there
some people can't do it, for example with an axe or a chainsaw
and because that's how the events are already arranged then
around the tree
that no one would even think of taking an axe there, for example, yes
and cut down this tree

and it turns out that
human development status
this is the status of Divine development
in a fundamental sense
in relation to other objects of Reality

why is man in the Image and Likeness of God
it is created exactly like this
that he spreads the knowledge of God in fact
other objects of Reality
because other objects
equalizes for God

well it works out like there's some kind of triangle there
where the status of God is the status of distribution
through a person
Eternities of development

and based on this we can quite say

well for example to cure some disease there
you can even really do something there
Well, let's say they call the concept "biofield" there
or some action of a tree, etc.

In fact
Well, from the point of view of this level of my Teaching
we are talking about that
that we are self-healing
giving the structure of Eternity to the tree

and based on this it turns out
that the more we do , the more we implement
such management functions
in external Reality
then it is better for the whole world around us and for us

i.e. it is possible to recover
giving the Infinity factor
some molecule in some galaxy

just select the desired molecule
to the right galaxy

i.e. make your own decision
and the light is like a lever level of light
coming from this galaxy
can restore your cell or you as a whole

for this you just need to know
how could God think for example
from the point of view of Eternal development
what is Eternity
for the next level of development of the World as a whole
in the fundamental sense of the whole World

and then it turns out
that the World is Eternal in knowledge
and he is Eternal because
that you can perceive it that way

i.e. Perception of the World in general
this is the Eternity of the World

when you perceive it like that
then it turns out that the World gives the structure of Eternity
already spreading from as if it

from the outer level of the World
to you

it turns out that the light of Eternity
he also becomes Infinite for you
i.e. you can create
the function of Infinity in your Consciousness
it is only necessary to give structure to Eternity
to the external fundamental level of the World

and it turns out that here you can form
for example words i.e. initial status of the word
here you can form
there some system related to the description of the galaxy

but here when you start
form, for example, a description of a galaxy
you see that you are actually shaping the galaxy itself

the only question is
such as make sure that this is really true
the formation of a galaxy is underway
because in physical action
on Earth, for example, it's easy to make sure
but for a distant element of Reality
that's already a question

well, just like through the structure of distant light
you can basically stop
some kind of macro-problem process
or restore your cellular level there

then it turns out that you can act in the same way here
from myself in that regard
that you simply believe in this phenomenon
because you don't believe, for example, simply
as for example in logic and phenomena
and that faith is True
i.e. internal faith is precisely the faith of the Soul

i.e. your Soul is disposed to it
what do you believe
precisely in the fundamental meaning of the structure of the World
and through this meaning you begin to control

for example why fundamental sciences
Well, for example, there is mathematics and physics

namely the fundamental parts of these sciences
or any other science at all
any action is fundamental
this is an outgoing action
from the internal level, generally speaking , first of all, faith in that
that this level is truly fundamental

here's how to split
fundamental level from non-fundamental
in the usual applied sense
in some action
engineering there mathematical
or in a professional way
or simply in a personal way

after all, any phenomenon
from God's point of view
it's basically the same again

so here is the fundamental level
this is the level of faith again
i.e. here is the faith coming from you in that
what do you perceive
as a fundamental level
because in action
in the personal action of a person
the concept of "fundamental level"
this is still a rather conditional concept
from the point of view of the result

because it works out
that a person who, for example, achieves results
through , for example, fundamental management
or there through just some elementary action
it makes no difference to him
he just has to achieve the result

so that the nuclear power plant doesn't explode
we just need to make sure it doesn't explode
how he perceives his action
fundamental or simply as some kind of consequential thought
it doesn't matter anymore

from God's point of view
fundamental is
also the attainability of action
i.e. any action turns out to be fundamental

human
for man himself and for God

and indeed
because from the point of view of personality assessment
it means any action happens
in the universal interconnection of man
and all Reality
Means he is located
as if in the fundamental center of the World according to logic
all phenomena are tied to it, among other things

and as if here is a department
as if an investigative action from the fundamental
this is the level of development of human logic
from the point of view of already Divine understanding

i.e. God gives Himself the opportunity
to understand human actions
just like a person does

i.e. God gives Himself human qualities
in order to help a person
realize
his next Divine act
already from the fundamental meaning of the development of Reality
i.e. Eternal development
and knowledge of the fundamental Laws in general
well, for example, the connection between God and man
God and Reality

because God and Reality
this does not mean that it is God and man necessarily
God and External Reality
it could be something completely different
how God is inextricably linked there with external Reality
with the same tree there
with the same stone there
with some molecule
this is a human point of view

and the connection between man and God
this is a personal point of view
because the connection between man and man
this is only a personal point of view

and not to mention the fact that God and man

and here is the element of faith
this is the action of communication propagation
for example God and man
to the external elements of Reality
from the point of view of what a person can understand
in their Eternal development

and then the picture turns out to be something like this
this is a completely familiar room
where all phenomena are known
all subjects are known
and the person is in the environment
in general, well, in which everything is very familiar to him
from the point of view of this very approach

i.e. he is in a comfortable environment
and this environment includes his physical body

i.e. the physical body of a person
always aware of God
located
or nearby
or there at some distance

and this is the vision of the physical body
God
this is the formation of the Soul into Eternal development
and the Soul and body of the physical body

i.e. here is the Soul and the physical body
inextricably linked
here you can just kind of touch it
at the level of proof, well, logically as well

and it turns out
that just as God is inextricably linked
with any element of Reality
so is the Soul of man
inextricably linked with the body

and when we ask the question
for example where is it connected in what place yes
where are there what systems of manifestation of the Soul
then we can quite see
comparable organs of the Soul

for example, the heart of the Soul is located there
in the area of the right lung
there is the brain of the Soul
in the area of the thyroid gland and above, etc. , etc. yes
and the only difference is that
that the Soul can change shape within the contours of the body

i.e. the Soul is always
human physical body

and here is the transition
from the level of the general formation of the Soul
in relation to the body
this is the level of organization of the physical body

for example for unpaired organs
structure of the organ of the Soul
just located in a different place
it means if the heart is in the center, approximately a little to the left
then the heart of the Soul is accordingly more to the right
liver on the right
then the liver of the Soul is accordingly to the left
in the pancreas area
and somewhere with an emphasis on the spleen

to restore the spleen
what needs to be done
we need to work in fact as if
with the structure of the liver of the Soul, etc.

in paired organs
the structure is located just below the Soul
just for example the right kidney
a kidney, so to speak, comparable to a human kidney
here in the physical plane
is located just below

so in order to restore
for example, a kidney and a physical one
you just need to concentrate on this technology
on the kidney of the Soul
and that's all

just keep her in mind
but it is necessary to hold it precisely with the structure of the Soul

and here it is
that the fundamental structure of Thinking
here the Soul is the fundamental structure of the World
may lead to physical consequences
i.e. for example to restore health

if you want to think further with your Soul
then you should see that you think with your Soul, for example
and let's not assume there is a structure of the brain and the physical as such
either there or by the structure of the cell

here is the division of Thinking by the structure of the Soul
i.e. the fundamental management plan
and for example as if at an investigative level
there is Spiritual Perception
this is also an element of pre-Thinking
or even Thinking
you can think with the Spirit
but then the distance is clearly shown

Spirit is distance
this is Infinite development
i.e. the element of action
i.e. an element of development

for example, Thinking with the Spirit
and it will think in this area
if I want to think with the Spirit
for example, inside the structure of the Soul
I have to make an effort of will

while thinking with the Soul
it is possible in statics
The soul is thinking as well

and so when we start looking
These are generally inseparable communication systems
then it turns out that there is the same level of continuity
has naturally God

i.e. going here as if in the opposite way already to God
we see that He is always truly present
and here is the level of continuity
for example with the physical body where He is manifested
This is , generally speaking, the development of the physical body

towards Eternity

i.e. this is where the physical body of a person is
grows towards Eternity
where his Soul is manifested as the structure of Eternity
from the point of view of human awareness
precisely the fundamental plan of the person himself
this is the presence of God's contact

i.e. there is contact between God and man
just like God contacts
with any external element of Reality
where He is inextricably linked

here is an inseparable connection
God and man
this is also the same
fundamental structure of the world

as soon as we see these channels
regenerate quickly
we can get
absolutely the right course of events
but we need to know
where where often it is clear this is exactly how I explained
element of growth and development

and this is how God is connected with man

if from a human point of view it is understandable
that is understandable only at the logical level of Perception
after all, logic is like a derivative system of human development

and it turns out that as soon as a person begins to think
and how is he connected with God?
it turns out that he is using the investigative part
and here only one thing is possible
Thinking with the Soul

where there is no element of Perception as such
in the logical phase

but as if Thinking with the Soul
when Thinking occurs in the Soul

here it turns out that it is not different in general
this is a person when he is very experienced

and sees that the optics of the Soul are manifested
he can differentiate
that he thinks with his Soul

Often people think with their Soul
Well as if without realizing it
perhaps it reminds you of some state there
as if some kind of sadness or sorrow
as if as a harbinger of the transition to the level of the Soul
not even sadness but a state close to this vibration, yes

but in reality
The soul is the same as God
Originally True
well, actually, sadness , well, in the literal sense, I guess
The soul does not contain
negative system of perception
here Perception forms a system of some sadness

i.e. approaching the fundamental meaning
this is an extension of the deepening
well, some level like some bottom of a well

and this sound
as if the growth of the principle of fundamentalism
it is like a level of echo
well, close in vibrations
But but not the structure of the Soul

sadness is something that a person does not understand
in a fragment of your own level of Soul , for example
it's enough to go into this system
and give knowledge already logically

why does a person need logical knowledge
For example , he perceived and transmitted information using logic
and it turns out that then the Soul can have
further development into Eternity

but when we look at that
that all the same all knowledge is in the Soul
growing into logic
i.e. from the Soul this knowledge passes into logic somewhere

and then it seems like logic gives this knowledge
Again to the Soul

so God also built the world
He built the world like this
that any element of information
as if conveying information
any other element of information in fact
and why so
that it's as if this knowledge is somehow new
for another element

but in essence
any element of information
contains all communication systems
he has basically all the knowledge

it turns out
what is the point of development then

why is the soul static
this is also a system of Infinite development
i.e. it doesn't seem to show any movement
nevertheless, this is an Infinite level of super-fast development

and because here we are talking about
about freedom beyond the individual

that's when the information element
perceives itself as a free element yes
he is then practically
at the level of achieving any management

why here is God
still consciously educates people
complete freedom of action

because there is complete freedom
this means absolute creation in essence
because he is a completely free person
he is looking at the control system
as a system of development of the World
in fundamental terms

but how to move the World
in a fundamental development plan
give him growth
it's always creation
if somewhere there is a non-creative structure

The world doesn't seem to be expanding

and it turns out that this element is only creation

as soon as you start
to perceive this structure
then your inner harmony
this is what you see in front of you
already in the form of specific information
i.e. harmony is information

and when you look at the position like that
you see how the Soul thinks
i.e. you can just take it and look
well, like a person doing something there, sewing there, yes
is doing some kind of work
from the point of view of this harmony
you can see how the Soul thinks
and quite specifically
this is seen as the action of the Soul

and when do you start
see the structure of the Soul's action
then it turns out that yours is, well, a system or something
development of the Spiritual including development
in the fundamental understanding of the structure of the World
from God's point of view
this is the level of unification with God
in the status of precisely " final Eternity"
if I may say so, but in quotes, yes
i.e. Eternity in its full understanding

and when you start to realize this status
then it is clear that the structure of Eternity
it is still a finite value
in terms of awareness
and in terms of working with this value

i.e. to live forever Yes
there is a specific algorithm
connected , as it were, with unpacking the information of Eternity

as well as the Eternal and Infinite Soul
constantly gives
next level of developments

as soon as you dock
at this level of information
further it becomes completely clear
next action

that you practically start
own the mechanism of Eternal development
being as if in a normal calm state
well, i.e. doing my usual things
but doing them in the structure of precisely constant knowledge
Eternal development

then it turns out that this system of knowledge
these are your actions
any even logical ones, in general
not only there is a system of Macrocontrol
through for example there clairvoyance
or through , for example, the development structure
there is access to a fragment of Consciousness, etc. , and some separate one
namely any everyday action

after all, the task of the Creator God is One
consists in the fact that
so that every human action would be Eternal
and brought in the next factor of Eternity

i.e. any action at a sort of everyday level
there is a logical level
level of problem solving
even on the Spiritual plane means not only on the physical
any action must lead
to the next level of knowledge
namely Eternal development
i.e. as a further level
must be Eternal

and why exactly this way and not otherwise
i.e. there are many questions here
to which you need to find answers immediately

and when these responses are formed
in faith for example there in faith in God precisely
and in God's faith towards you
i.e. it is also necessary to recognize the level
that God believes you here

just as a person believes in God

because initially God always believes people
so since people are still a level created by Him
It turns out that he naturally believes them
for He knows everything about them

and every action of His
in relation to a person

expressed in faith in His actions
that He is there will teach , for example, to live there Infinitely, etc., etc.

and when you look
where faith in God is manifested
in relation to people for example
then you see where you can basically get some information
it is precisely faith in God, as if the opposite level, yes
and this is an action of Infinite perfection
and as if perfect in Infinity

i.e. here is the concept
"infinitely perfect action"
here in this case it's just like more
it's just a turn of phrase
where i show
what a person realizes
the fundamental meaning of what was done
i.e. Infinitely there a man painted a picture
Infinitely Perfect Action after all

i.e. it is subject to the condition
that the painting will already be there Evolve forever
and give the next level of information
then it turns out that its action
this is an action infinitely expressed yes
or Infinitely Perfect
at the time of creation

accomplishment and creation
it's the same thing

act of commission
and in general an act of the next level of development
it's practically the same thing

and then we get

what to do action Infinite
we must realize
any elementary action
there is the movement of the Spirit of the Soul
or an elementary action
along with these management phenomena yes
as an action
coming , for example , to you from God
so you too, acting according to the Will of God
i.e. those who understand the Will of God
and at the same time you remain completely free

i.e. the level that you act absolutely independently

then it turns out that God is manifested
as your personal freedom of action
your personal will

and this is the contact between God and man
this is absolute freedom
and God and man
God as the giver of knowledge of Eternal development
and man too
who contacts God by his own freedom

because True freedom
this is contact with God
understand it correctly logically

and it turns out that based on this
this is the point of contact that I spoke about
expressed in understanding in knowledge

here is the point of contact, this is knowledge
God contacts man
in knowledge
knowledge is a certain expression of God
this is a certain status
and in general this is also the physical realization of God

a person who, for example, can gain knowledge yes
he can do
including some cars
and that's how it's done in the world
and it turns out that it can develop comparably
with the way God gives development, for example

and in this case
the shape is different
the machine has a different shape from a person for example

so is God
creating some element of Reality
gives the following structure different
because every next element
develops in a uniform manner

if a person builds a diverse world
the atom builds the world too monotonous
from the point of view of sameness, for example for God
but also for the atom

but also diverse

although in general the atoms seem to be completely identical
from a human point of view
but from the point of view of one atom and another
here exists as a human point of view
Well, not all atoms are the same of course
but at least the main amount
can be exactly the same
in sight yes

and it turns out
that we have the same structure
in the atomic world

i.e. a person who, for example, looks at atoms
for him atoms are the same
just like when God looks
on any phenomenon of Reality

but when an atom reacts to another atom
there is a completely similar design there
just as a person builds completely different structures
there are buildings, cars, roads, etc. planting some forests there, yes
fruit trees can be planted
and eat the same
or sow wheat there

and it turns out
that one person
but the manifestations are varied

one form
and the manifestations are different
also at the atomic level

it turns out that from this point of view
we can know
how to influence matter then

study the reaction mechanism
i.e. Perception of one atom by another
and you can do it too
influence the atomic level

then what are your problems
enter the cell restore it yes from this position
there is simply a technical element of the matter further on

it's enough to delve into it
in the fundamental meaning of the structure of the system
and then you start working

for you the work is comparable to that
that you don't have to imagine
some specific atom
that it is difficult for you to enter it
you just need to select
big block in Thinking
and study atoms
in the system of their interaction

they can be increased there to Infinite sizes
increase the atom to infinite size
and all the properties will be known to you
they will be in plain sight there are no problems
study their connections and see
how one atom influences another
and you can the whole control system
just sew into one atom
or take for example sew it in
well, this is the impulse of control, yes , according to the Norm near the atom
then you don't use anything at all
you don't even touch the atom
all you need is
transmission of information going to the atom

and by the way many complex diseases
which, for example , are difficult to apply to Macroimpulses Yes
from a management point of view
because here I don't mean in this case
namely Macro Salvation
because everything goes through Macrosalvation
namely powerful yes Macropulse
he can sort of go through the system
if the disease is located
well, like the structure of the disease, yes
in a fundamental sense is in the microphase as if

and then you can
put very strong light systems
but they will not affect the microstructure

and here's how it is in this system
you can definitely take it
it is in this system of fundamental knowledge of the World
from God's point of view

you can take it quite well
insert full health pulse
near some atom of yours or any other one
and the main thing is just to conduct the signal
as a property of Perception of this atom

i.e. the main thing from God's point of view
what is the correct Perception
any object of information
if you have brought your Norm to the atom yes
The norm of the event there of the body or in general the norm of some galaxy
it turns out that this system is standardized
it is enough to express only one Norm

so in order to treat yourself or someone else
it is not necessary to look at the morphological atlas
or there let's assume very strictly let's assume to attach
as to some specific disease
it is enough to just standardize
Perception of any object in relation to the Norm

i.e. how to convince the atom that you are healthy
and you will be healthy
well, conditionally speaking , or directly speaking

and it turns out that you are sort of proceeding
from this picture of Reality
you get proof again
connections
any element of information
with any other

once you have practiced with this system
and you realize, well, in general, its implementation system
in your actions
then you will see
that no information is hidden from you

i.e. you will see any information initially
and any action that is, for example, creative and positive there
for you
you can only confirm this with your work

this is what is colossally important
for Eternal development
with the Infinite Development of the World
it turns out that it is very important to be able to mean to be convinced
or have , for example , a complete , precise path of development

just because you have
mechanism of this action
there is even talk about that
that it is not easy to believe there
but believing is often very important

namely, what do you know for sure?
as if some control system is working correctly
even if you, generally speaking, have n't implemented it somewhere before

because the world is diverse
he means that
that you always do the right thing
you live in any system of governance

and it turns out in this case
from the point of view of this mechanism
it is the fundamental World
i.e. a fundamental approach to management
this is the level that provides
here is this property of the reaction of your Soul, for example

i.e. Thinking of the Soul in this case
this is the precision and correctness of management
For example through the Spiritual phase of knowledge
or that there are no physical problems in front of the body
or no Spiritual problems
or there are no event problems in general yes

and it turns out
that the meaning is like a movement between events
in this case it consists of
that you move all the time in your own way
he is good, he generally corresponds to your goals, ideas, plans

and if we are talking about some
possibly negative events
these are very small and very distant fragments
some kind of light, not much

but once you start to see
this fragment and what
negative events are not light after all
but rather a dark phase of Perception
well, well, let's say it's darkness , yes , you can call it that

it turns out that there is both light and darkness
i.e. a dark background and a light one is like a breakthrough
a small little slip

as if a small light level on a dark background
and you can immediately differentiate
what is not Norma

then you have enough of everything for everything
because you are in the fundamental system of the World
you have no problems
you took this little piece of light
we looked at what kind of events

i.e. it can be considered very simply
or enter as if to unpack the structure
well, i.e. increase, zoom in
to a seemingly close system of Consciousness
most there something close yes at this point
and watch
what does this relate to in general in your life
or somewhere else

and here it matters
of course the effect is sort of busy
if you are busy with something
you may not notice

well, that is, a general feature of the form of light
he is not very problematic
and you went on your way

if it is still problematic
or the signs of physical Reality they are like this
that you find signs of reaction somewhere
then move the world
just take this plane structure
move the dark away everything

and this light that characterizes yes
like events, well, for example, in a negative way
he begins to change
or it dissipates
and the dark background then also dissipates

i.e. the dark is always represented
light level of solution possibility
this problem
that's exactly it
from the point of view of the fundamental structure of the World

it turns out that the path is actually quite simple, is n't it ?
in a geometrical level of Perception of Reality

i.e. you walk very simply and very freely
i.e. the level of harmony of the World there is such
that you have no resistance in principle
all you need is a remote signal
take it and in time, as if to just pay attention to it
at least turn

and it turns out that it's the same as
well, for example, in some fundamental control systems
in fundamental research
fundamental science, etc.
it is the fundamental level
this is a level that is often actually simpler

i.e. when you understand
fundamental level

all applied ones are already investigative
and easier to solve

although they may become more complicated later on
i.e. all you have to do is go out
from the fundamental plan
and you have a bunch of events appearing
which somehow move there like a swarm of bees
and they still need to be sorted out

and when are you
on the fundamental status of management
you have been for a very long time
perhaps for a very long time
there we are talking not even about days but about months
there is such a management status

and you can highlight very occasionally
some, well, maybe not big problematic systems
and just correct them
and that's all

this is the fundamental difference
a person located
at the fundamental level of management
from God's point of view
it can be for a very long time
Well, I'm completely calm
i.e. he can
here even the principle is like this
what goes Thinking to a greater extent
as the Thinking of the Soul, and as if pre-factorial

i.e. before any factor arose
for example, negative or external control
not necessarily negative
to see there as if nodal connections

you can go further
as if into the structure of external events
and feel free to do it if you want to
how to regulate already investigative signs

but then you'll have to use
as if powerful streams of light
you will have to increase the management resource

although it is often very effective
and this is where the level of emotions is born

that is, how to consider it
where does emotion arise in the first place

then it works out
we can well consider it here
level of external dynamic control, as it were
where are the ultra high systems
where is the material world, etc.

and the fundamental level
where the World is basically designated
only by your personal reaction
at this level
you define your own world

as a rule in this world
children often work yes
in such a control system
for them the inner world
and as if an external system
this is often what they make of themselves
and begin to lead out into the external Reality

and it turns out
well, after some time
maybe there are some household systems in everyday life
which generally move a person a little in this regard
one level more event systems

and it turns out that when we want , for example,
make an event system
as a control system for example

let's say you need to create there
some kind of sound control phase
i.e. you need to do it not remotely
there is no way to correct it
let's assume due to knowledge and structure of the World
and pronounce the word

then it turns out
that you can pronounce the word
pronounce for example part of the word there

pronounce let's suppose there in general
well maybe even some kind of sound there mantra level

but at the same time
word control level
it's always an event-based level after all, yes
you enter the event phase
namely, a physically manifested event, for example

so that would be verbal synchronization
it doesn't even matter which one
i.e., for example, you can make control
coming from you for example there
at the level of fundamental knowledge of the World

and let us assume that the external phase is verbal
maybe in general it's often different
for example you are driving a car
you need to have accident-free traffic
you can't say something completely different on the phone yes
change the subject of the conversation

i.e. the verbal phase of control
and the level of your presence and your action
in relation to, for example, an event
these are different phases

here the fundamental can be one
and the word may be different

and when you do a docking for example
i.e. so that the word, for example, would act in a different way
i.e. you can say one word
or pronounce one sound
and in this case the action may be exactly different
for example the car drove through there without any problems Yes
in this case
because your body

how God is present in phenomena
this is a rigid connection between God and the phenomenon

and when you are present there in some car
then that means you are here
and your level of maximum fundamental plan , so to speak
it is at the level of traffic support

and not in the fact that you are often at that moment
for example, you say yes on the phone
or are you just thinking about something even

that's why it turns out
that the level is fundamental
and the level is kind of investigative
these are often completely different things in principle
just like the presence of God is always and everywhere
and the presence of God in a specific action
according to God's plan

and it turns out that in this case
the sound is not important
here the word often has no meaning
the only thing that matters here is
awareness of the fundamental plan of management

and when you realize for example
you can move while reproducing the word
already as a level of ensuring the next Reality

and here it becomes clear
what is this word
the birth of material Reality

it's quite clearly visible here
in the internal structure of the word
how the material world is born
i.e. the light of the word is the material world

and from here, in general, when you start
how to consider this structure
then it is clear that, let's assume, some kind of sound control system
or let's assume a system where you have
connection between fundamental and sound level
this is the level where initially
the word still gives light
as if in your fundamental plan
i.e. the word is present here too
because it was created by you, yes

interacts with you somehow
in terms of your own development in Infinity

it turns out that the connection between words as information

it reaches your fundamental level
in terms of projection

i.e. it can be done with a word, a number or just a thought
shift events in fundamental terms the same
i.e. to have an input as if of an external word
into the internal event system

and based on this
the management itself is in this fundamental sense
this is the management that actually
it is quite harmonious for a person
because here a person does not feel the difference
between for example the word from outside
and in a word as if inside the system
inside the system the word is knowledge is information

and when we look at events like this
then we see that the World is essentially
from this point of view it is very powerfully informative
i.e. we can perceive
not a word but information

we can influence the event
there without talking about it for example yes this event
i.e. if the event is complex
there is a whole world, a whole galaxy
why explain every phenomenon with a word
enough to influence this world

and it turns out that when we, for example, in the form of a word
we begin to convert information to ourselves
i.e. into your inner world
then here we see
that the word as if reaching a certain level
turns into light again

how we perceive the word
including
and in the form of light
and in the form of information

and from here it is clear
that the word interacts , for example, somehow with the body
interacting or not necessarily only with the body

and interacting with the Spirit

it is precisely with that Spirit
which is in the state of Soul

we can see
what the word gives birth to, among other things
and defined as if
the system of physical Reality
connected with your physical body

i.e. then it turns out to be enough
to talk about some control systems there
build numbers yes and you can restore
as well as your physical body
because you got it through the word
as if actually the transmission route
Eternal fundamental Peace
to you
i.e. well, a word or something image or digital sequence
these are the elements of Perception

i.e. your Perception
forms your own Eternity

in this system
it's very easy to follow

and based on this
for example, here is the transmission system
information dissemination system
according to the given structure of my Teaching
about fundamental processes including in the World
or about the fundamental level of the World
from the point of view of God of my Teaching about God
dissemination of information knowledge
this is the level of understanding of the World
from a communication point of view

that's enough for a person
understand correctly
he immediately transmits knowledge

why for example
Often in the hall I take it and say
some often, well, generally complex things, including
although from a management point of view they are quite simple

and because in this case

it is enough to perceive some element

from the point of view of the fundamental structure
and it becomes clear one way or another
let it be later maybe
or as a rule it is clear right away
at least it means well at least to those people there
who understand it immediately

and therefore when, for example, you transfer knowledge
even very complex knowledge can be transmitted
very any there, in general, complex there, simple
so long as you are alone
that is precisely in the fundamental sense of understanding the World
then it turns out
a system for transmitting even complex knowledge
very simple in essence and fast
because the Soul of another person
perceives knowledge quite easily and quickly

the main thing is that it would be perceived
First of all, it is the Soul of a person

based on this lecture for example
make the controls like this

what would you bring for example to the Norm of Events
some of their distant, close plans
and do it like this
so that in a fundamental sense, or something like that, understanding
for you it was the same
that influence very distant events
what about close ones

after all, for the fundamental concept of the World
really so
for God it makes no difference
what event distant or close
influence

and here as a practice
Make the controls exactly like this
combine any events
distant and close
and make an impact

do optimization and normalization

This concludes today's seminar.

Thank you very much for your attention
