

GRIGORY GRABOVOY
The Teaching about God
The Joy of Eternal Development
02.07.2004

Hello again
the topic of my seminar today
This is my Teaching about God
The Joy of Eternal Development

This topic is about
that when a person develops Eternally
looks at the very structure of God's joy
when He has Eternal development
conveys this joy to him specifically to the person

then we have any, for example, planar systems , yes
external perception
let's say when a person looks at the Universe
then he can find out
generally speaking, some kind of granular structure of Reality
where each grain is an element of creating a volume of space

this is where volume is precisely
feeling of joy
i.e. if you look at the Universe
Push
then the further a person spreads his Consciousness
the greater the feeling of joy he can receive

in this case the structure of Consciousness
as if colliding with a granular, so to speak, structure
objective external Reality
but this graininess or so to speak layeredness
or some internal structure of Reality yes
this is the same thing that is in the Soul of a person
but it belongs precisely to the personality of a person

those. Soul as the personification of personality
in this case it actually shows itself
but as soon as Consciousness moves away from the physical body

it turns out that this is the structure of joy and Eternal development
what is of fundamental importance is that

what exactly is the joy of development a joyful feeling

this is what forms the following tasks
and in a positive and correct way

this is the concept of "joy" in this case
this is, after all, a canonical system of correct development

this is how this control sounds in this topic

so when we look at
namely the Action of the Creator, i.e. the Action of God
which shows how to create ^{yes} including
here we see that in Action
His joy is shown by
that He acts ^{for example} for people ^{yes}
outer space
the outer universe for people
this is also the joy of their development

i.e. here it is clear that in optical terms , as it were
Actions of God
it turns out that He shows all the time
namely the structure of Eternal development
at the same time, on a personal level

i.e. if you ask a question here
^{for example,} how does a person form
well there is your psychology of Perception ^{and} your Consciousness
it turns out that formation is taking place
on the feeling of joy
and on that feeling
that the next one ^{is like} an interval
in space there is joy ^{yes}
i.e. joy as a spatial quantity is expressed here
it is being formed
and by God and man

i.e. first a person sees
your own structure of joy
it is in the Eternal development
I'm still sorting it out in this case
^{as if} the mechanics of this phenomenon in physical implementation

i.e. I am looking at the distant Universe
and I take some segment and say

that in the first iteration of Perception
joy of man
further on comes the joy of both God and man

here each subsequent iteration increases
it is the joy of God

and it turns out
that the further a person's Consciousness advances
the more clearly he sees
namely the structure of the formation of Reality
By God
in this way, a person begins to see himself
in Infinite Distance

i.e. joy is a super-fast feeling
where you can see yourself in joyful Perception

and it turns out that Eternal development
in such a way as if at a level
is there such a finite quantity as space?
expressed in that
that the creation of man for God is also a joy

it turns out that a person comes to this
due to the fact that he simply looks at space

and based on this
for example, there is treatment for some serious diseases
in general, even some local ones
this is the joy of future healing
and the joy of healing action

i.e. in this case
future processes
and current
are combined precisely in the concept of "joy"

it turns out that it is the technology of Eternal Development
implies the presence in a logical expression
quantities that simultaneously cover
as if a diverse system of Perception
and the future and the future healing and the present

and it turns out that in Eternal development

management structures they are changing
by structure for example further access
i.e. the further we have access
the more the concepts are modified

for example in a billion years
the event structure has a more compact structure
in Human Perception

i.e. the concentration of joy there is so high
that the feeling of joy reproduces
for example, there is energy and matter

and it turns out that we can work
through feeling as through a control structure
creative creating

i.e. it is enough to introduce a sensory level of control
for example, the feeling of joy from Eternal development yes
and we get the Eternal development itself
i.e. our desires form
the future structure of Infinite Development

and it turns out that this is how life works
a person at the level of, well, logical realization
he always has
ordinary, for example, including, as it were, a household development plan
where the household part is still not separated
from Macropart from Macrouniverse

because for example to say
where is the boundary for human Consciousness
between man and the external Macrocosm
someone can, for example, set a border somewhere near themselves
and someone starts to think from the physical body yes

and here in the Infinite development in the Eternal development
the element of Thinking it covers
not a specific point often but often a variety of concepts

this is what is meant
what a person
Universe
human relationships
i.e. sensory spatial concepts
begin to intersect

and here I get the following control element actually
in the future Infinite
that a person is at one level of Perception
actually solves almost all issues

and now he can solve problems
it is on the feeling of joy of Eternal development

i.e. the realization that this is Eternal development
brings him joy firstly
as if external information

well, the external environment seems to bring joy

including the fact that he can do this, for example
and acts as God acts
this is his personal information

and it turns out that a person with his Perception
creates matter

that's what God does
He also creates matter through perception.
for His Perception is often this
physical matter including

and it turns out that we can, due to the formation
precisely the joys of Eternal development
solve quite optimally
current situations related
How is your health?
and in general with the real plan of Eternal development

because Eternal development
technologically it looks like this
that there are local development tasks
for example there are the next hours days there yes decades
but generally speaking in these tasks there are
always the tasks of Eternal development
where there is no end to development

and it turns out that a person simultaneously decides
as a whole, well, to a greater extent, linear or current task
and also solves the problem that, generally speaking, initially
she may not be entirely known to him
in the field of technology and management of future events

i.e. he doesn't necessarily need to know, generally speaking
what will be ^{there} in a billion years
but at the same time he must clearly see and identify
this is the grain of joy
i.e. that grain, so to speak, a grain
means that God actually sowed

i.e. that which gives precisely Eternal Divine life
from the level of human understanding

when a person can on the basis of this grain ^{yes}
to grow ^{as if} an external Universe

it turns out it's at the management level
acts just like God
he should have this grain ^{as if} in front of him
grow
^{like} he doesn't have any other choice

i.e. the next system of Reality
it must reproduce

and then what should he do?
technologically master your own position
in the current tense
at least manage current processes
for the next few ^{decades} ^{or} ^{hours} ^{or} ^{days}, ^{yes}
but as a rule we are talking about decades at least

then you should accordingly
here to do such management
that the further development code of Reality
It depends
what is your grain exactly
i.e. what you personally choose in Infinity

God always chooses personally
He doesn't have any external criteria, ^{yes}
indicating the choice there

it turns out that there is a problem here
formation of that Reality
where the selection criteria are determined by you personally
i.e. here you need to get to know yourself
where exactly is your personal action

because any other action
or associated , for example, with external influence
this is an action that is nevertheless recognizable by that
what is clear is that external influence
may be a sign of external action
and comparable to that
that you and therefore choose some solution yes

but the choice of personal action
from the point of view of the task of that
the one that God puts before you
this is the level when you should
feel and see your personality
as a completely autonomous person
i.e. the current one

at the exact same level as God shows
from the point of view of the joy of Eternal development

and see what your personality is
able to decide independently
tasks of Eternal development

i.e. one thing to solve at a collective level
but that's another matter
there is joy, for example, personal
there is a collective plan of manifestation

here a person often perceives
personal joy
identified with the collective

Well, there is a victory celebration and a celebration of some kind of action.

and it turns out that it's joy
it is still a feeling containing
and Macro level
and for example your personal concept of Perception

and therefore in the Eternal development
this is the feeling of joy
and generally joy
as a conceptual or event-related quantity
events are joyful if they are positive yes
there is even such a principle in the formation and management

and it turns out that we have a structure
when here are the good positive ones in the sense
exactly the right ones
because the concept of "positive aspect"
this level is quite general

but this is exactly a good one
sensually good
personally good
for a person

then it turns out that a person is capable
decide the structure of personal management
choosing from the context after all
where he as a person is manifested in Infinity

then it turns out
that he must form and set tasks now

i.e. formally and actually on optics
management as if long-term it looks like this
what is this glowing grain
the joys of Eternal development in the future
and here are the structures of the outer World
grow because you build them

and the further from your from your as if control
is located well outside the world
the further away from you this optical glow system is
the easier and more accurate it is to build
generally speaking future events

and it turns out that here you are implementing
very simple technological principle
in this system

that having built as if at a practically infinite distance
some kind of system
in the structure of your Consciousness
well for example your event that is required
there in an hour, two, three, ten days , there ten years, etc.

you take and build at exactly that distance
where is this grain of joy sown by God, for example
it shines just for you

i.e. you will know that it is a grain
perceives your personal action
i.e. God gives it just for you
i.e. you go the way that was intended
and you and God

joy is a collective feeling
where God's joy is not separated from your joy
it turns out there is no boundary in the sensory plane

and here you come to this level
move on to the next level, so to speak
where well in general, there is no, let's say, level of information
maybe not even yet
and you build your management at this level
i.e. joy is like a supporting platform
where with the heart so to speak yes this joy is
God's love for you
and for example your love for God
in the action of creating the World

i.e. the intersecting form of Love
this is the creation of the World
build the world because there is love
and from here comes the joy which is the technology of construction

this is precisely the structure of the formation of joy
this is the structure of the association
as a sensory level yes
God and man
and generally speaking, the exact technology of construction
as if the structural form of events
the events themselves

and it turns out that if you think about it , for example,
if a plant grows from a grain
common terrestrial plant
where the joy of being for example and this plant is manifested
what is the level of Macromanagement expressed in

so here it is very clearly visible
that even the gravitational principle of plant growth
shows that the plant, for example, grows upwards
so in a linear version or something in a spatial one

joy is expressed geometrically

i.e. it's just the top
the pursuit of joy is the path

it turns out that those structures are arranged in the same way
which are at Infinite Distance
from the grain of joy coming from God

i.e. building geometrically
you get multidimensional concepts
there one line corresponds to a complex of events

this way you learn to form
time of Infinite development independently

in this case you are simply building on everything in fact
the information itself, so to speak, and the matter itself
and try to make this construction
it was always optimal, generally calm yes
and you did it completely consciously, clearly, without rushing

i.e. the construction of Infinite time
why is it quite often simple
because you have no interference

and when do you start
the constructed structure is already being brought here
then it turns out
Firstly, you leave a trace of proper construction
i.e. this line is stretching towards you
where things start to escalate

i.e. you are already scattering the seeds of joy
i.e. you are building a path to yourself, it turns out yes

and already from here the event is brought in
as if rigidly fixed in the desired point
as if in the time scale yes
and it turns out that this time scale
often declared to be originally by God
you start to see
where is god's time

and when you this scale
generally speaking it looks linearly simple

as a linear glow with specific parameters

entering the hard phase of God's time
you can see a very strong connection
all events with each
and generally speaking serial communication
or some with elements of the past or future tense

it turns out that you see
how does God construct the concept of "time"
i.e. you start to see
what is a quantity outside of time
and this value is called joy among other things

and you begin to understand that
how then to build an event necessarily
i.e. Infinite time
this is the time to build any event

as soon as you begin to understand this value
she looks in the information
like just a golden glow and quite bright
and you start to see
how the color and light of joy is created

and this golden color is originally yes
or there is silvery white
or how you want to see it somehow differently

but of course not dark tones
you can get space transformation
into the real part and for example there is speculative
i.e. how space is constructed
color
with light
why is one matter separated from another

and you can see it quite well
that the process of building the World itself
This is a technological process , generally speaking .
depending on the structure of your Consciousness

then it turns out that you can enter
to any structure of any organ
Well, either standardize it or grow it anew
or you can resurrect there, etc.

i.e. you can solve any, generally speaking
fundamental questions of the organization of Reality
because you know how to distribute
the color spectrum of joy is actually Eternal development

after all, it is the concept of "Eternal Development"
this is still the Infinite Path
which passes
and man
and God
there any system is essentially an external Reality

and you start to see
that this path is primarily aimed at that
so that you may know your own path in joy

i.e. it is not just a technology for that
to do yes management
and also so that you can develop joyfully
i.e. so that you have a happy healthy life, etc.

i.e. so that you have real joyful events also from God
i.e. God sees that you are fulfilling the task set by Him
I also had joy
other people had joy too

i.e. it turns out that this is also a quantity
as if marking or defining
correct status of Macro Event
that's why in joy the concentration is very high

and it turns out that there is identification here
it is precisely the structure of the Macroevent that it is like this
what can you do by structure
oh well, like grains of joy yes
by the radiance of joy
determine that overall everything is OK in the system

and when do you start using this principle
for some local matters
for example look
and how, generally speaking, is light emitted there from the microworld, yes
then it is quite clear how the microworld influences in general
through the Macrosystem on a person

i.e. where in the microworld you are expressed personally

for example, take some molecule there
and considering what such an expression means in Perception
that human growth can and should be
in Perception such as as Well, that's basically how it is
then see yourself in a microsystem
this means to create the following plan in the form of imagination yes

i.e. creating your own imagination
creation of the matter of one's own Thinking

and from this one can see
what exactly is in joy
it is possible to create such a fast operational Thinking
where exactly are the parameters of Thinking joyful
they are not fixed, for example , on some problems
and you start to think quickly, well, let's say successfully, yes

luck is the next characteristic
already event-sensory perception

and then you begin to see that well the concept of "luck"
this is, in general, a management space that is being formed, of course
nevertheless it exists in the form of information
this is the system that is called for example luck yes
and luck makes you happy
or some action makes you feel happy, etc.

i.e. it turns out that you can do it
here we operate with such concepts
how joy luck there are some good events

and here it turns out that you begin to understand
in general, how is the Personality of God structured?

from the point of view of physical development, for example

i.e. here it turns out that the concentration of joy should be like this
that He acts for example
as for example on everyone and on yourself
and at the same time teaches a person to act in the same way

i.e. practically you get that
for example, control of color and sound
control , for example, of some parameters
external development or internal

this is the level where God and man
in the joy of precisely Eternal development
they are inseparable from each other

i.e. it practically resembles this plot
that well there is like a system that has, for example, those characteristics
how exactly
and external
and internal
and Eternal development
and a person with this system
then it starts to interact
and if this is well expressed
for example, at the level of some known processes, yes
which exists, that's exactly what needs to be understood
like some kind of Macrocosm and Universe

Well, for example, let's say a rocket carrier, yes
and then the ship itself is attached
and there they go into space
then the trajectories diverge
but nevertheless the parameters are initially set yes
exist
at the object itself and at the rocket itself

here it turns out that this is precisely the structure of external development
in a similar systemic situation
maybe the same
i.e. the primary impulse can be completely of the same type
further complete free development

i.e. joy is the unifying principle
that through the structure of joy by analogy
Generally speaking, it is possible to diagnose equipment

for example, the laws of development of technical systems
often very clearly define
if you take and apply a screen of joy

i.e., in simpler terms, a certain technical system
just take it and enter it into the sphere
namely information of joy
all problematic structures will become very clearly visible

on [...] in general they can even often appear
on the number for example yes
or they may appear there

what if we consider

let's assume the name of the product is of some technical nature
then we can quite well get information
just from the name , etc.

i.e. because the name is a supporting structure
the structure of joy determines
The norm of event structures
even technical systems

and further we can clearly see that in the same example
where, let's say, there is a launch vehicle and the rocket itself, so to speak
then it turns out that well let's assume there 's like a snowstorm there
if you attach a buran to a spaceship
some small rocket
it turns out that the blizzard is developing its own trajectory
and some kind of small rocket there, yes

here it turns out that if we want
this system should be disassembled as a whole
and understand in general how the launch will develop
then we should see in the future
it is this marker of joy
i.e. it is on the trajectory of physical flight

here is the structure of joy in the structure of Eternal development
is always in a very rigidly fixed place in essence

and if, for example , we want to understand the gravity system
from the point of view of how to control gravity in general
then we must see the structure of the development of processes
precisely joy but in physical manifestation

i.e. for example, how does the physical body
one or the other or the third interacts
and find the Law generally speaking of expressions of joy
from interaction in Eternal development

i.e. to know how geometric objects
develop in the future
or some mechanical objects

it is enough to set the task
their joint but joyful and Eternal development

then it is precisely in the vector manifestation that they will be visible
all connections

they will be quite easy to understand
and you will be able to see them exactly Infinite development
and the local part is a manifestation of the knowledge of God

i.e. you can very clearly see what God gives you
knowledge
precisely in their local characteristics
although each object has exactly that embedded in it
that the object can develop Forever

and this is where we come to that
that once we looked at
elements of the reproduced example
i.e. for example, the technical level of management yes
some technical devices

further we see that the person is also located
at a level outside this control system
i.e. he runs this system

i.e. we can determine by analogy
that the position of God and man is the same type of position
in relation to technology

and here we can understand
where does God give knowledge anyway
for example, in technical systems
for some construction projects yes

i.e. we can see
how does God show at all
how to build external systems
i.e. where does the design idea come from?
where does the thought come from when constructing a particular situation yes
namely, for example, by objects of a person's external environment

and it is clear that as soon as we
We are bringing the platform of joy of Eternal development
for us, technical systems begin to look like
very specific in that regard
how should they be built at all
so that they do not harm a person
had comparable Eternal development

and here it turns out
that the correct construction of external Reality

this is an additional very powerful factor
for the very ^{Eternal} development of man

logically clear
that when technology does not destroy man
a person lives then at least
^{so} with the exception of one factor, this one
the impact of technology is already eternal

if the equipment is problematic
then for the Eternal life of man
criteria for some additional concerns arise
and he will be forced to react to that
that technology can cause harm

it turns out that for the real Eternal development of man
the stress factors must be shifted i.e. eliminated
and then again the structure of joyful Perception is obtained

i.e. a person is happy when he doesn't have any threats ^{there}
from some kind ^{of} low-quality equipment
or built according to other laws
rather than the structure of the Eternal and joyful development

^{Well} of course we are talking about this in this case
about the technology of the future
the technology that cannot destroy a person

and then when we look at the system further, ^{yes}
^{as if} having built, ^{well}, the structure of logical thinking
what do we look at first
some investigative systems
home technical devices
what a person can do himself
then we move on to the structure
^{means} in conceptual understanding
how can a person build the structure of external Reality
^{well for example there is} Earth and some elements of Reality

and now we are gradually beginning to realize
what is our Consciousness
^{so} in this way it forms the structure of joy
i.e. our Consciousness is already joyful
because we see
that further on the creation of man is already underway

i.e. we understand that the creation of man
it becomes clear to us that
why did God experience the greatest joy
when exactly somehow He let Himself down in general
i.e. there is such a situation there
that for God, too, Reality developed
it is precisely in the structure of joyful Perception
and the greatest joy is the creation of man

i.e. when you approach it
it becomes completely clear to you
how are organs structured from God's point of view

this is precisely the joyful glow of the organ
this is the canonical correct glow
This is a very clear diagnostic system.
you can then differentiate quite well
where is the changed organ where
where is the organ that needs to be restored

and then, generally speaking, we can build up
a fairly powerful amount of fabric
i.e. what underwent resection where there were problems
Well for example, up to large masses of removed, let's say, organs

and here, generally speaking, this meaning is clearly visible
that there should be no departed
i.e. people should live forever
i.e. it is absolutely clear there
that this is precisely a violation
The law of the ordinary nature of the Universe
that people, for example, somehow go through a phase, yes
there is no biological decay
or in general they undergo a higher level
rather first for Consciousness yes
transition
where exactly is some level of biological death

and when we go beyond the phase of further management
it turns out that for Consciousness
Generally speaking, biological death does not occur.

i.e. precisely from God's point of view
the concept of "biological death"
this is, in general, a rather conditional concept
where there is His Eternal development

then here it turns out
that He suffers precisely together with man, ^{yes}
constantly this phase of transformation

and why does God need it
so that every person lives forever

because this is the phase of transformation
when in essence the World is Eternal
and ^{how} can a person be
in a situation of ^{some} problematic diseases, ^{yes}

it turns out that God builds a position like this
so that ^{such} systems don't ^{exist}
so that there was
it is the standardized system of Eternal development
because He as a Person wants
so that others can develop in the same way first of all
and ^{generally speaking} He needs everyone to be able to do this

because the original joy ^{yes}
creations of the whole world ^{yes}
a point ^{of} self-assembly of self-organization of God
it was, in fact, based and is generally based on the fact that
that in the future everything will still have Eternal development

i.e. from the point of view of personality
when a person begins to understand
your own structure of creation ^{yes}
then it turns out that he sees
that he ^{generally speaking} in no way
it doesn't depend on gravity ^{there}
from some external processes like ^{air} , etc.

he is located
in the structure of the joy of God
^{where it organizes} the air around itself
the same force of gravity, etc.

Well, in principle, in practice, ^{for example}, in body control
such processes, ^{well, let's say} in yogic practice
It often happens that they can last for a long time
to be ^{there} without food
if they are developing this particular autonomy system ^{there} , ^{yes}

it turns out that there is a control situation here
that's what it consists of

what a person creates by realizing the Personality of God
access to the actual management of one's own personality

i.e. it is included there
physical body
Soul
Spirit
Consciousness ^{yes}
natural reproduction of health, etc.

then everything will be clear
what is event construction
it is actually entirely within the will of man
i.e. he sees how it is arranged
his own will ^{yes}
his own events

i.e. he begins to understand
what are the connections between him and himself
between man and external Reality
from the point of view ^{of an} external observer
i.e. timeless
joyful aspect of Perception

but when he perceives himself joyfully
he invests immediately
positive meaning in future development

i.e. he starts to show
that his future is initially directed
on the joyful wave of Eternal development

i.e. he begins to act as God acts
initially directing himself ^{yes}
for the better side of your own development

but in this case I showed
^{precisely} that information-optical design
where the effect on yourself can be very powerful
i.e. having seen his entire control structure

i.e. you actually take it mechanically
the entire structure of personality
move into the positive management phase
This is ^{actually} quite a powerful control
one of the most powerful in fact

because it's one thing to manage
linear problems of some kind
or there private ones

and it's another matter to take and lift
as if the whole layer of one's own personality
and take and somehow radically improve the position there
these are different things

and it turns out that such a design in general
it is possible to create precisely on the feeling of joy
on the understanding of the joy of Eternal development
i.e. understanding that Eternal development
a really joyful characteristic

but logically it is clear yes
joyfully develop forever

i.e. and when, as it were, this is taken up as a task, for example, yes
technologies are already acting as if by themselves
in the form of specific ones there
what needs to be done now
what needs to be done in the future

i.e. you get there
in the phase of expression of specific technologies
where technologies seem to self-reproduce
depending on the task at hand

It's one thing to simply cure something or improve it
but without setting the task of Eternal development
you will do it of course
but in principle through Macrosalvation
it can even be done effectively
but still there is a certain sense of locality yes

further
and indeed they are visible in optics
Well let's assume there are several decades there
in the form of optical glow in the future

but what's the problem then?
i.e. what is the task next?
there is always such a question
before God and man

then the person essentially asks God a question
as soon as he passes ^{there the} next decades
he asks
and what's next anyway?
but God says well it's the same thing
God Eternal
It shows further the Eternal development

i.e. therefore there will be no other task
there will still be a task of Eternal development

and it's better to set the task like this
to gain technological experience now
to know now what you have already now
instrument of Eternal development

and then, then, here comes Macro-help
it means helping others
ability to resolve local situations
ability to harmonize
the ability to, ^{for example,} solve current situations
it is still the joy of forming an event

and here is the Eternal
dynamic joy of Eternal development
and your event
when they start to merge
i.e. to be combined at the level of God's Action
other people
^{well} any person
you see then the World as a whole

i.e. you see the joy of the development of the whole World
for everyone

and it turns out that then you realize the value of life ^{there}
that it has the highest possible value
so high that it cannot be destroyed, ^{generally speaking}
If you approach it from this point of view, then even physically

i.e. when a person approaches from this level
it cannot be destroyed physically
And
especially since there is some kind of disease there, ^{let's say}
it means he can be cured

the main thing is to know access
to the structure of the observable World
where exactly is the observable World
this is exactly the whole world

just as a person raised his personality ^{yes}
on the structure of joy
and I was able to put it, ^{for example}
or make the following control ^{there}
i.e. it is possible to radically change ^{the management}

or to be completely cured at once
or even create one there
some kind of super-powerful system of self-development

and here when he sees the world completely
in this same aspect of action
then the approximation from the desired point
to this World
gives him Eternal Life and it is obligatory

he can't make a mistake here
you just have to put it
and joy and Macrosalvation ^{at the same time}
i.e. point
the route itself is ^{actually} determined by
which in optical terms
here is the whole world, also raised ^{as if on a lever} , ^{yes}
universal joy in optical expression

i.e. your Consciousness becomes Infinite
in a power context

and Consciousness holds the entire Macroreality
the whole world

God does the same
How does he hold Macroreality?
including for Myself
if you think about the question
God holds all Reality
but He is also in the form of a physical human body, ^{yes}
somewhere he goes ^{for example}

it turns out that when God is in some place
then He is still in some phase of Consciousness

forms the whole Reality

This means that human consciousness is structured similarly
and naturally a person can hold
the entire structure of Reality
I'm showing a specific way to do this

need to be formed

the structure of the joy of the Eternal development of the whole World
and it is precisely desirable to form it first
and then perceive

but it happens that Perception is a formation

it depends on the person's personality type
and here you can see that there are different personality types
has a different approach to the structure of the World

and when you start to see it, it becomes visible
what in Infinite development

those. development of civilization

Infinite time

in essence it is a collective action
under Macrocontrol of the whole World

so when you see this Macrocontrol

as a criterion for the development of the joy of the World
then your task is again clear

here is the joy of the World

i.e. positive good development of the World

so it was reproduced as well, so in general, some task for you

then these rings or joy lines are enough

take and choose some job for yourself yes

in this interval and calmly develop

to yourself

to draw the joy of the World to oneself

when do you start doing this

then you get stable control

first of all why

that you work with joy information

i.e. this is, in general, simplified, not stressful work

because joy is joy

there is no need for much, for example, to build it there

on the other hand you start to see

that joy begins to fill you

i.e. The world gives you joy
well really yes so often logically
Peace and gives joy

then you see what joy can give
another person
you see then
how to help him
to the person you love
you can make management there yes according to his Eternal life
because that means you see further
what do you love essentially from God
after all, really all people

i.e. there is such a level
when every person loves all people
manifests itself precisely in action

as soon as you reach this level
then it is clear what it means to be able to love exclusively
only one person there

and at the same time Macro love
this is the joy of universal Love
this is your action

those. your action
i.e. your action is simply any there on the everyday level, etc.

when you start to combine these concepts
then it turns out that you are aware of your own personality
it's in love there
to another
to others

and then it will be clear
why does God penetrate into this physical Macrocosm
in the form of a human physical body
because He acts generally speaking the same way

so it turns out that when He shows Love
He just determines his own path.
where is he at this time there yes
and in this particular place
in the physical body of a person, for example

and considering that God is He who can be

only in the physical body of a person
it turns out that the entire external structure
is rigidly locked into His Essence
and then the future is even more Infinite
because what difference does it make
there the physical body is the physical body of a person

and so it turns out
that any other can develop Eternally

i.e. a person simply begins to understand the structure in the same way
but it just fits the other way around
he is from the local level and his world
trying to get to the Macrocosm

while God makes as if an internal entrance yes
into the control system
in the form of a physical body

and that's when they intersect, for example
God makes an entrance there
at some point
inside the system yes

and a person wants to look from the outside
at the level of Consciousness
then the joy of the union of Consciousnesses arises
where Consciousness is the physical body

at the logical level it looks like this
well, it's the same as if a man greeted God there
there by the hand for example yes

and when we start to analyze
where is there any difference at all ?
here God reproduces the body
human body
so here is the joy of the meeting, the joy of that
that man is near God
this is the difference in bodies

the thing is that this is how matter is created
each element differs from the other precisely in that
what is the joy of mutual Perception

and it turns out that this is the criterion of joy

this is the diversity of the world
The world is built from the beginning
on the feeling of joy
on real Love
and it turns out
Love of God
love ^{there} of all the elements of the World

and it turns out that when we begin to see
this design
then here it is enough ^{to} understand mentally
this is where to interact with God
to get a feeling of joy

well, that is, to put it simply , how is ^{it there, well,} relatively speaking , ^{there}
say hello mentally
or is it real ^{there} or how to perceive it ^{yes}
vision
or how to understand His tasks
and "feeling of joy" is the defining concept here

joy is the way to normal life ^{yes}

here in prayer a person determines
this is exactly the state
or ^{there} in the management
and gets exactly Norma

because it is precisely this feeling ^{of} free joy
a feeling of free, internally joyful development
the whole world ^{as if} when considered
how does the level where you go to God inside the World turn out

i.e. the person is still forced
local turns out to be the World
overcome to reach the Macro level of God

and when you start to see this construction
as a structure ^{of its} own management
then it becomes clear
where does God help you anyway
and where can you do it yourself?

God will help you there too, of course.
but then where you can do it yourself
you master that technique
which is laid down for this path ^{yes}

why is there such a diversity of phenomena in the world

and it turns out that when we speak

well, for example, about other positions, yes

not only about joy about some other control systems

Perceptions of Reality

then it turns out that the situation is diverse, yes

in management it is the one that is going on

from God

from a person

this is the level of a person's personality in general

where a person first of all becomes aware of himself

and as a fundamental level in this World yes

and as a level completely open

often, precisely in everyday life, as it were

automated some action

a person thinks that it is enough for him to just

does something

and at the same time at the level of joy

here is a super complex and super simple one

human action system

this is a single action

i.e. he begins to understand

how does god even do it

some simple action for example yes

does all these Macro things, for example, yes

i.e. he begins to see it

because then

when he is precisely considering the position of joy

he begins to see exactly this

the unifying action of your Consciousness

where joyful Consciousness allows one to concentrate on the World

i.e. to collect the World into a level of generally speaking creative quantities

i.e. in this case

through, well, like, a level of control through joy

do something like this on everything

here is the compression in optical terms

structures of the world

physical

informational

so that negative characteristics simply do not concern him

i.e. super concentration of joy
it's basically pure mechanical
management in the direct sense

you take and separate the structure of the World
and it's like some tornado passes by
there is no catastrophe of any kind

i.e. in this case it is work with the World
this is work on the selection itself
as if from the very beginning
factions as if joy in management

then transfer to the event structure
there as I said right away
the diagnostic picture may be clear

and you can already build the World
it works out even at a very remote level
and in a completely approximate way
i.e. you get to the exact time of control
and you just start working with images

this is the concept of "joy"
it is still often work with images
there is an image of joy and an image that evokes joy, etc.

that's why the systems here are very simplified
like some kind of model - like management of Reality
i.e. they took the globe and changed the future
took it there and separated the structure from some negativity
everything you have is a real event

you can influence the Macro level of development of the World
prevent some kind of environmental disaster
protect some person from some problem
possibly pending
while moving entire arrays of information

i.e. for example, let's assume the whole house , yes
or is there some action there
you take there and push out this house
into a space where there are no problems
and as if you take the path of a person and translate it
into a structure where he has no problems
and all the events around him dispersed

keeps avoiding problematic situations
but you don't just work there
with a rigidly fixed system yes

and in this case you can
a huge amount of information to transfer
because it is precisely the position of joy
this position is still often easy
i.e. easier to control than other quantities

and when you start to see that it works out yes
you have a real so to speak
well from the point of view of your perception
the joy of Eternal development
you see that Eternal development is really real
that you can even perceive it
at the level of well as if identifying sensations yes

a person perceives when some phenomena
well, they fall into certain, as it were
within its framework
within the human frame
a clear code of Perception

i.e. in some cases a person speaks
yes it is true
because that's exactly how it is
that's how it should be, well, how it should be perceived
what is true

and when you start
this is the level to perceive
it is the joy of Eternal development
you are starting already
see with your heart
In my soul, of course, yes .

with the whole body
that Eternal development is indeed a real quantity
and besides that it is logically real

i.e. the person who has control
can restore itself yes
create conditions for Eternal life
rejuvenate, etc.

but in this case you also see

and that Reality
which exists simply as information of the future

and that's when you start to move on
into this information of the future
then you are the real action
Action of God
all people
as if a very powerful control system
well actually by force ^{yes}
translate into the implementation of your own events
here you have the control lever
In general, infinitely powerful

then it is clear that by simply putting it logically
having set the task of the Eternal
Eternal life
you are already solving it

and naturally then all events are decided
because Eternal life must have technology

then you should from this information
take control
bring ^{for example} here to the control point
and still decide ^{yes} to management

so on this very topic
the joy of Eternal development
you can build it quite well
versatile tool
diverse management apparatus
and quite as I said powerful
who has real funds
in real time
influence on Reality
including physical Reality

This is where I end today's seminar.

Thank you very much for your attention
