

GRIGORY GRABOVOY
The doctrine of man
Method of restoring the human body
Soul of God
10.12.2003

Hello
The topic of today's seminar
This is my Teaching about man
Method of restoring the human body
Soul of God

In this method I consider
first of all, the ability of a person to consider
unified principle of God's Action
in relation to a person

those.
i.e. for a person it is first of all necessary
see that God
in relation to him
creates a level playing field
so that a person can be healthy
not only for example there at the moment of birth
but also throughout the following period of life

while considering life
as an Infinite quantity

in this case in relation to
for example to the elements of Infinity
God gives man constant equal opportunities
for health

because for God
a person born
and a person for example lived there for a hundred years or more
it's basically the same value
from the point of view of all the connections in Reality

That's why
this is the unified principle of relationship
man to God

from the point of view of Eternal development
and back again

God to man
speaks about that
that a person is always able to learn to restore
the system of management in general, so to speak
in relation to its future events

for this a person only needs a little more than
need to remember
as God i.e. His specific Soul of God
created his physical body

this memory is still there
to the level of human birth
i.e. to the level when a person first
For example Well let's assume he was conceived as an embryo

in this case we are talking about
that there is a possibility
the so-called past memory of a person
where a person can see
the structure of the Thinking of their parents
those. how parents interacted
for example with the external environment

and here comes the fundamental moment
in this technology
because if we look at this position
it turns out that the parents who were
at a certain fixed time
and were healthy
carry information about health, happiness and norms
even in that case
if, for example, they have not yet conceived a child

and it turns out that this is like a reservoir of energy
yes, you can say that
sent by God for the future man
is in space
which does not depend on a person
and does not depend on external conditions

i.e. in this case
this space is located in general
as Infinite space

God's Soul space

when a person begins this Soul
look at see
he sees quite well

how is it possible
this is , in general, a "reservoir of energy"
if you can say so
in fact it is the Eternal Source of Life in essence
how can I recover

for this you just need to
mentally place yourself
as a unified level of Reality, so to speak
as a person who has the opportunity to live forever
place yourself
this Wednesday

then it turns out that you have
a certain interaction with the Soul of God
where is the interaction
this is a question of your personal attitude in general
to God

when God gives life from the beginning
exists in the form of your Infinite life

once you realize it
you can very well regenerate
i.e. to recover to the level
for example, completely complete
in terms of, for example, health restoration

at the same time for God
recovery time
for example, one human cell
or is there a complete restoration of a person?
let's assume resurrection
it's basically the same time

the unified principle of action also applies
personal Action of the Creator

when you realize the Personality of the Creator
where God creates precisely His Soul
shows you

how does he do it
you come to that
that you can do it yourself

i.e. you can regenerate it yourself
you can restore it yourself
for example, not just one specific cell, let's say Yes
not only can you restore let's say there is an organ there

but in principle in this case we are talking about
that you can restore a person
there, for example, make a resurrection
for example, make control
on the Infinite Development of Man
on Saving Civilization, etc.

for in the Soul of God
where God shows
the structure of your Soul
By the way, there is a very significant value here
in relation to a person
God can show
how He develops His own Soul

at the moment when when we speak
for example about the difference between a person
he was created in the Image and Likeness of God
but in this case we are considering the difference
what is the difference

God created the Soul of man
He created it
but a person can see
How God Creates His Soul
for God creates everything

and it turns out that He creates
and the space of Your Soul
those. space
where the Soul of God restores man
and this is the space of Eternity
this is the space of God's Action

therefore this space
where God thinks exactly like man

then it turns out

that due to the structure of one's Consciousness
it is quite possible to achieve
completely complete restoration elements
just because we can
highlight for example
namely the parameter of the Action of the Soul of God

Well let's assume if we consider
some extreme situation

when a person is in an extreme situation
highlights, for example, such positions
as a structure of light

i.e. he doesn't have time to concentrate on that
how will he act, let's assume , further
but he sees some light

as a rule it is angular light
i.e. spheroidal, as if gently sloping objects of light
in Perception
this is already a calmer rhythm of management
coming from a person

and rigid primary structures
this is the manifestation of the Soul of God

and when a person is in an extreme situation
strives for such rigid, as if rhythmic, systems of light
rhythmic, i.e. changing towards Infinity
he survives

and here, for example, are the surviving people who saw
this one is kind of hard and angular
well, in the form of some kind of "tick" light
"check mark" i.e. go here
they got out of extreme situations
because they saw
how the Soul of God is organized they went further

but God gives such a way
He also gives the way of resurrection.
He also gives the way to Eternal Life.
already as if in prolonged objects
where the Soul of God creates the object of Reality

but in time

Soul of God
which created the object of Reality
for example in the future
she practically created
and at the initial moment of organization
i.e. where there are these so-called angular ones
i.e. rigid light systems
in optical perception

and also already in implemented form
i.e. God creates the same everywhere

therefore for a person
when we consider
human physical body
possibility of regeneration
it's absolutely the same

because when we look at
let's assume the reaction of a person
to some external control element

then we see that the person is acting
like a developing structure
exactly that structure
which corresponds to the Soul of God

when we see this position as a Law
and in general a unified Law
development of the human physical body

then here we can quite confidently consider
recovery process
physical body of a person
due to one's own, so to speak, internal capabilities
the physical body itself
exactly that body which knew
how the Soul of God is created

and when you see it
you can by analogy
create your physical body

i.e. the physical body
can be created similar to that
by which the Soul of God is created
in relation to a person

and when we look at this process
as if in a compartment
well, i.e. maybe without going into detail
even for example in those structures
this is how the body develops further

but in general we set the task simply like this
create see some organ
and if you need to create a cell there
create a specific body
the one we previewed for example

then a very simple concept arises here

spirituality of the organ
i.e. for example we can consider
internal organs of a person
through , for example, the position of the so-called
heart glow

i.e. if that part of the lecture that I just said
listen and get the idea
glow from the heart
then with the glow of the heart
just ask yourself a question
how the heart shines
and take it as if to mentally illuminate it

and this light of the heart
going in relation
to another person's organ
this is the light that illuminates the path
and that organ
and in general the person himself who sort of diagnoses yes
builds another person at the same time

i.e. within the power of man
make recovery management
for example, some specific organ of another person

and here when we see this organ
we can quite see
as if some kind of glow
well, similar to steam, let's say, in the optics of Perception
near another person's organ

and this glow
this is a mix of controls
in fact the Spirit of God
Souls of God
Human consciousness
and at the same time
information about the physical body
as a person of action
and the person on whom it acts
this is life-giving management

i.e. the one who saves him
it is in this control system
Well as if in the form of information
his segment of Consciousness is located

and when we begin to understand further
this design
but you have to understand
namely the deep structure
human reactions to external Reality
and in general on the person who restores it

i.e. you need to understand
how the other person reacts to you
that's when you restore someone or even yourself
we need to understand in general
how does your body react to that
that you are restoring your body

maybe you are busy with something
let's say you are watching TV
and at the same time you restore yourself

then your physical body
is it even aimed at that?
to get a recovery boost
or maybe you continue watching TV
and as if in the meantime you restore yourself

i.e. here we need to be very clear
with an external reaction or something Yes basically another person
towards you

the Soul of God does the same
in relation to the Physical Body of the One God

i.e. the Soul first determines
position of the Physical Body
and considers its direction

let's assume there God drinks water or goes somewhere
but He is at that moment
it can't be there, it turns out it's in two places, yes
The Physical Body of the One God It is also one
the same as in humans

it turns out that here is the definition of parameters
this is the location
first criterion
this is the location

if you have fixed the location
then any relation of the body to itself
it is still the same
that you can restore yourself

i.e. it is enough to realize
your body structure
at least in one segment
and you can always restore yourself

why, for example , in some tough situations
when extreme situations
some kind of skirmishes, possibly military actions
a person often sees
what are the body segments
as if they were somewhat convex
in some situations are considered
at the moment of this critical action

i.e. let's assume there is a hand there as if through a magnifying glass
pieces of skin become visible there and increase in size
because in this case
there is an increase in the number of places of presence

the more we record
place of presence of the body
at a specific point
this way we create more reserve capacity
so that the physical body is healthy
and was restored in real time

because in essence it is due to Consciousness

a person can do an action
but first he will definitely restore himself
in the management structure

for he is the source of control
i.e. a person always restores himself somewhere

so you can naturally watch TV
you can do whatever you want
but if you found the control point
which characterizes the possibility of your recovery
i.e. you can restore yourself on your own

then you can do it
just focusing on this point
and bringing it, for example, to a cardiac glow
as if slowly leading
you can always be healthy
even if you do basically anything

such as the Physical Body of the One God
can perform all external control
being essentially in general yes in one level of reaction

i.e. God can also highlight in reactions
one thing
in His own reaction

then it turns out
that we can very well act in a similar way
and highlighting some fragment
be able to reserve your functions, as it were
due to external control, in fact
i.e. to select a permanent restore point

so here is this point
it is the structuring of the Soul of God
of your physical body

i.e. God is constantly creating
as if the following structure
event-based
and cellular

after all, for God it doesn't really matter
that a person lives in a healthy state
that he is, for example, in a painful state

in terms of specifically I mean universally
from the point of view of that
that this state It seems to contain yes
in the control space

it works out for Him
reach the parameters of a healthy organism
it's practically the same
that a person is like Well, let's normalize it
in general in the current action

those. This is the Soul of God
that she constantly treats a person equally

here it turns out
that the question is only in the personal will of a person, just for the sake of it

i.e. if he wants to recover, for example
then it reacts to this control system

and it turns out that this control system
she is like that
that your desire is what you are as a person
express
it is precisely in the process of, for example, control coming from God
in the form of , for example, some specific person

i.e. if you suppose you have control
coming towards you
then this control is always going on
first of all from God

i.e. it is necessary to consider it in the structure of things
necessarily the structure of God's Action
for example when you are considering
interaction
of your Soul
or your physical body
And
Souls of God

you may well consider
where God is present in your action

i.e. what is God's task
and what is your task

if you do it wrong
you still see where God is present

if you do it right
then you understand that you are doing the right thing

i.e. the difference is that you understand
when you do it right

if you act incorrectly
this means that the understanding may not be complete
or for example it may not exist as such , well , in general
in terms of either targeted or prolonged
solutions to the problem

although there may be some temporary understanding there, yes
in the area of human development

so it turns out that when you set a task
understanding of God
this is what he wants from you right now
and then your physical body
begins to structure itself in the same way
as is the Soul of God
and the Soul of God is Eternal

it turns out that structuring
i.e. determining the phase of the event
self-control system, etc.
these are structures inherent to your physical body

i.e. if the Soul of God
it means with the structure of Self-creation
controls His Physical Body
it turns out that the physical body of a person
by analogy can also control itself

then let's just find control bodies
i.e. what the physical body controls
just yourself
i.e. which bodies are responsible for this
and how can it be done
for example, concentrating in advance on some systems
bring management to the level of complete self-control

for example , in my practice there is training pilots

especially for extreme situations
there is an exercise
where pilots initially concentrate
on some organs, let's say
not to waste time during a flight, for example

and then these organs begin
how to glow, shine
and restore the pilot
regenerate its tissue
even in tough extreme situations

in principle this practice
it can be transferred to ordinary situations
the only difference is that
what if there are no extreme systems there
i.e. let's assume the person is not on the plane
or he is in a calm situation

then here is the principle of control
it's just that it's transferred to that
what is the prolonged form of management
the so-called calm form of management
it is such that a person has a task
basically the same as on the pilot
task to save
from , for example, possible global destruction

therefore in my Teaching about man
it is in the method of restoring man by the Soul of God
I am looking at the process of knowledge transfer
as a process of conscious level of management
where is the universal Salvation
this is the management level

This is where we need to go into detail
here information
to the level of such understanding

I am entering this data here for the first time
what is this level of control
which the man himself chose
to improve the technological efficiency of your management

he sets himself the task of saving everyone
those. Macro rescues
and it turns out that he comes out instantly

in general, the system is often and often subject to extreme management
for example, to prevent a nuclear power plant from exploding
for example, Kursk NPP, etc.

and when do you want to save the Kursk NPP
even when at rest
you are at the level of a kind of centralized glow
coming from that
that the Soul of God solves its tasks here to the maximum

and the Physical Body of God
naturally cannot be destroyed
for example, an explosion at a nuclear power plant

then it turns out that if we consider
it's a completely different process, yes
let's assume it means the dam is not collapsing
and man is saved

then so that the dam does not collapse
a person just has to be very close to everything
mentally yes to the dam

so close
that his thought in general should be practically united
with the dam itself
and this is the dam itself
i.e. the thought is indestructible and the dam is indestructible

i.e. in this case we have the same thing
and in relation to the body
if a person has rigid fixed thoughts
that his body is indestructible
then it turns out it is truly indestructible

and when we form
such a control system coming from a person
in relation to you, for example
i.e. it means from a person in general

then we see that the person is like that
First of all, it creates structure
their own events
in a more positive way

because if he knows it
then it turns out that it is natural

as if more focused on the level
or what about fulfilling their tasks?
and he reserves it for that
in order to generally complete these tasks

i.e. it reserves this state
he gives you a fortune
for example yes Eternity
and at the same time his own resource increases

because man
who masters the technologies of Eternity

he can naturally do much more
then he can basically do much more management
it means , for example, depending on the level of your tasks

and including this management
it is aimed at that
what if let's say you make the control coming from you
then another person can do the management quite well
coming to you

then it turns out that your reservation is like a situation
consists in the fact that
that the more another person can
example, you yes you can do more
in personal management to achieve

God does the same
For example , to your own there by his own presence
in the structure of solving your personal problems

for example, simply asking a question
why did God need to create that Reality
where is the Eternal development of man

but we can consider
this is generally the question
as a question of the birth of a person exactly like this
which can develop forever
by analogy with how God develops

i.e. here is a question of birth
that man was born himself
and God created him for that
so that His tasks can be solved in the same context

i.e. giving more to a person
God solves more of His own problems

it turns out that we see here
in general, the co-development of Divine intention, for example
in relation to a person
and the development of human intent
in relation to God
intent in the concept means mind and thought

i.e. the mind developing in terms of Thinking
when your mind gives you
for example, development based on the fact of restoration

thus we can fully distinguish
some specific organs
in management

for example, just now when I was talking about this
I showed it on the controls
what organs does a human have
which are capable of regenerating, for example
for example the nearest yes or some other organ

i.e. in this case I can say quite specifically
what we are dealing with is a situation
what every person has in their body
certain level that moves frequently
in his personal fabric
where he can restore himself from this level

that's why I didn't actually record it on purpose
any one organ
and gave more through the management structure
in a conceptual version

but it is possible to fix a specific organ
for example, draw the palm of your right hand there
in the space of control we assume
from the structure of the Soul of God

and due to this glow
receive
let's assume the restoration of any tissue in the body

and of your own organism

or any other organism, for that matter
right down to the plant ^{yes}

it can be done
but when you ^{suppose} you do it
must be kept in mind
that the world changes almost every moment
and God who created the World
gives you the opportunity to understand
the internal structure of this action

when you realize it
you don't have to be fixed
on the right hand specifically

i.e. this can be done for that
so that recovery is really possible
but the real action of management
this is health in a calm state

Here's ^{an example} of what's different
^{for example,} extreme or some kind of human condition
from non-extreme
in terms of action from God

God gives to everyone ^{as if} at an equal level
in fact, even situational

it turns out that the only difference is that
that the individual chooses this path
and God gives this path

and here there is a choice of personality
if you choose the structure also locally ^{in general}
purely physiologically I already show
that these processes are quite comparable

if you show
that you choose the structure of the hand and recover
God willing it will be so
i.e. you will recover
through the structure of the hand

but when you find the deeper meaning
^{for example,} you enter ^{there} with your mind, ^{yes}
structure of the mind in the palm of your hand
and find

the entire structure of the body's glow
do you understand that your mind is so developed
that you can do it in a calm state
or there in extreme
It would be better not to allow extreme ones of course

but nevertheless in any condition
you can regenerate

and for example in intensive control systems
when there are extreme systems
they need to be overcome
self-healing system
this is a multi-reservation of each organ
in relation to each

i.e. in order for, for example, Well let's say go through the situation
in case of flu and not get flu
or leave the battlefield
and for example not to be affected

here it is like this Well, these seem to be incomparable situations

but the body always reacts the same way
on the survival structure of a specific person

and when you this line as if uniformity
you will work out
in relation to a calm state
i.e. you will start walking along it as if without bothering
even in a calm state
then you won't get sick

moreover, it will not happen to you
some negative events

so this is actually the structure of the Soul of God
where a person has a normal standard of living

i.e. it is enough to enter this structure
and you have a Health Norm, an Event Norm

the only question is
what when you already have
some specific expressed diseases
then recovery
this is the process of conversion to the Norm

in general, often of a consistent level
some disease
i.e. for example there is a gradual recovery

but there are also elements
when can you transfer to the health structure
almost immediately

and then it turns out
that this is your personal thing
what are you expressing
in relation to oneself to one's action

for example, to resurrect a person
can be resurrected immediately
and it is possible, for example, to resurrect
but we will meet much later

i.e. this is where the situation is most connected
with your personal attitude

and it is also known from Jesus
that since everyone will be resurrected
then the action comes most of all
from the level of acceptability of these controls
in relation to everyone in general

i.e. you can do the management
i.e. do as you wish
you can basically study on your own
or there is no need to train someone

but when you progress further
in terms of management
then you will see it quite clearly
that your management system is like this
that the more people around you know
the more you teach them
the more you can actually do

i.e. here the system is exactly that
what everyone should know
what to do in a specific situation

when you realize it
then here, in general, it is quite clear
this is the principle that works

Well, well, well for example, if there is some kind of military action
Well, maybe in the information, yes
and there are several people there or there are many people there
which perform the same task

that is precisely the centralization of management
related to the fact that a person must survive
and complete the task
it is like a system of understanding things after all
as if reactions of the outside world
where you can easily make the management
coming from oneself
and reveal the structure in any object
that another object is controlled

then you won't be overtaken by some problem, for example
there is something related to health
or some kind of control
aimed at worsening the situation

that's why when I talk about technologies , for example
which allow, for example, to make control
you should take a look if possible
what is the difference between technologies

after all, principles can be the same
and technological approaches can be completely different

i.e. the methods may differ radically in general
because when we talk about the Action of God
then first of all we consider
His actions are instantaneous and complete.

and here is the Light of His Actions
Light of God
it can be completely different
i.e. it can be unpredictable
it may differ in different characteristics

so is man
human physical body
arranged by analogy
including the Similarity of the structure of the Soul of God
can be in different states yes

different sensory level

different event level
i.e. the light of the human body
the light of his actions
the light of his events
can be completely unpredictable
from the point of view of sorts yes external control
and this is also the principle of human free will

so in the conditions when we have
as if some kind of unpredictability of the situation
Well, in a more logical sense

then the need arises here
introduce additional control systems
which generally relate to the system in essence
guided Spiritual vision
or there clairvoyance
or clairvoyance
it doesn't matter what you call it

the main thing you should understand
what happens next
with you there yes
with humanity
with civilization or in the World in general for example

basically what's going on
in the next movement
what is the next move

when I introduce the word understanding again

then it turns out that we mean
that we understand God
we want to understand and know
what does he want from us next time

but the question is "from us"
it's not really widely placed
How as if there is some kind of requirement yes
and as if there is a requirement to perform

in fact, the requirement is not expressed as such
this is a personal motive, the personal will of a person

and here is the desire to co-operate

it is a desire to help all people
the desire to be able to comprehend Reality
provisions for example there are civilizations of the world
what is possible and what exists now
threat of global destruction, for example
how to make it not exist, etc.

when you start for example management
coming from you
towards the implementation of your tasks

then you see that the highlighted one, for example,
self-regeneration management segment
Well let's say you took and activated the control
there is a palm
let's say for example the left hand of a person

and this so-called abstract person in general
we are talking again about the left hand of a person in general
not specifically may be yours

and when do you know
what is the left hand of a person
restores suppose there is the right lung
it's really so
in extreme management
if, for example, you concentrate on the palm of your left hand
then it is quite possible to restore it quickly
For example there is the right lung

i.e. there are specific phases here
they are related to that
what if a person, let's say, works
Well as if in an extreme situation
seeing myself at all

after all, I showed it today, among other things
that you can see the organ
both your own and that of another person
I gave technology to look at the organ

and to look means to restore
For example there with the glow of the heart
the technology is actually quite simple

then you can see it quite clearly
how to restore your entire body

see one successful one
or one that has come true
fact of implementation

because the concept of "successful" is such a concept
that once you see it you succeed

management consists of
that optically expressed systems
this is what you did

and you can in real time
control the management process

so when you start
for example, to act on control from oneself
then you can completely restore it
let's assume we make control over the hall
make a restoration of the people sitting in the hall
just by personal desire
and highlighting a segment of your body
exactly the one from which it comes
restoration of those sitting in the hall

i.e. this is, in general, an elementary action
you just need to find the glow yes

and the glow in logic is as follows
if you were able to restore
for example the right lung
due to the glow
just mentally giving a glow
palms of the left hand
that which comes from the right lung
glow
this is what restores the hall

i.e. the investigative system
you taught yourself how to Yes
others can learn too
what are the problems

i.e. it turns out that you have taught yourself to restore
therefore you will be able to pass on your experience
but you taught yourself to restore
well, as if in a closed system
took some organ of their own

and restored themselves

so is God

He has for example yes one Physical Body

can restore everyone

and at the same time give the technology to everyone

guided only by that

that the principle of learning is transferable

then it turns out

that in order to restore for example

fabric sequentially

it is quite possible to single out

as if a series of specific organs and systems

I won't describe it here

that's exactly how it's done , in general, consistently

because the technology must be mastered

at the level of the Spirit

i.e. the Spirit must know and be in that state

that it regenerates and the body in general

and the people around you, for example

at the same time, one can quite understand

as your Spirit does

how does your Soul do it

and how is this the most important thing

in terms of the Teaching about Man

if we consider the section

let's assume the physical body of a person

how the physical body reacts

on this system

when we consider this process

then you can do it in the same way sequentially

consider the following for example control system

let's highlight for example there is the little finger of the right hand

and we will consider that the little finger of the right hand

this is the human recovery level

let's assume from top to bottom yes

but if we highlight the little finger of the left hand there

we can quite distinguish

some specific segment of recovery

i.e. we can say that the person is recovering
somewhere locally
it's not necessarily from the bottom up

pay attention here
I specifically showed that there are linear processes
as a rule there is none here
linear processes

i.e. it is necessary to constantly consider
how
how does your reaction happen
on the entire surrounding structure of the World

and when you, *for example*, follow this process
then you see that the restoration is specifically for you
this is an ongoing process
from the primary support point

here to know how your Spirit
as the Soul of God together *with* your Spirit
restores you
it is necessary to understand the movement of the recovery level

i.e. it is more important to understand
the structure of the action of the Soul of God
than to study there, *for example*, a lot of technologies
which may well be effective, *for example*
and it may be so that it is enough
there is some technology to solve your problems

but the world is changing
and restoration *for example* well not only you
but there is an external environment
management of the external situation
this is a system of your personal level anyway
your personal task

a person walks past a dam or near a nuclear power plant
his personal task
so that this dam doesn't collapse there
The nuclear power plant did not explode
This is a personal task for a person

and when a person, *for example*, wants to make management
so that this doesn't happen

Well, there is , for example, an elementary action
take develop a diagnostic system
diagnose
call for example there to the staff
say that there are some problems
and for example they can remove the defect
if it will be like in time yes
this action has been carried out

it can often happen that the staff does not react
or you don't have a contract with the NPP
and they won't listen to you, let's assume

and then the question of personal management arises
identity must be preserved in any case
a person must live and forever

as well as the Physical Body of the One God
a person's personality must be able to overcome the system
as if there was some external influence yes

it is still the effect of the environment
in relation to the individual
some kind of adverse effect
if we consider

then it turns out that this is the level of management
it is, first of all, a choice of the individual at every moment

and then we may well find
defining as if orienting
control system
in relation to the individual

i.e. at some point
God and the personality of man
Well For example there is the Soul of man
expressed as a personality structure
so we discussed the management process
related for example yes with mutual presence

because God gives free will
means freedom of expression

and at that moment they were built
systems of external Reality

For example there is a dam there again
with some possible future defect
some nuclear power plant that needs to be repaired in advance yes
so that some block doesn't explode
or a plane that shouldn't crash, etc.

or at least the state of health
which needs to be restored
or better yet, don't get sick at all

then it turns out that there is something here
possibility of negotiation process
that's how only a person
at the level of diagnostics, generally speaking, thought forms , so to speak
of your own
is part of the structure of negotiation systems
negotiation processes
he begins to influence
as if at the level of logical harmonious action

negotiation type system
Thinking system
this is when a person begins to think, for example
and transmit thoughts over a distance
or transmit the structure of Thinking
there to any other place
your own positive structure
creative

then there is an opportunity for influence here
on external processes in a generally direct way
it is not necessary to call there on the phone
or let's assume to interfere somehow
into the social order of things

and here is this variant of influence
the same as coming from God
and only effective where possible
in terms of harmony

i.e. why, for example, is there no influence
on general social processes yes
a person chooses for himself, for example there is a government, etc.

because it's a management issue
in this case it is again expressed in free will
man once as a person

so I recorded this situation somewhere
in the structure of its development

and specifically the nuclear power plant and the specific situation
this is a person's personal development
his personality
he had it somewhere already

and now it's enough to go out
to its own management structure
i.e. to know your level of Reality
try to understand
when a person sets these tasks for himself
and what did he pawn anyway

as a way to overcome challenges

A rather powerful one opens up before you
almost absolute diagnostic
management level
which allows
First of all, highlight
structure means location
these, in general, levels of solving your problems

i.e. you can see it quite well
how your tasks should be solved
from the point of view of what you know
that you set the tasks yourself
do you know when
set these tasks for themselves

i.e. in fact you are contacting
to your own Soul
where the Soul determines the path of your physical body
your Soul

i.e. unlike that
what for example is the Soul of God
can restore your body
and when you understand how the Soul of God works
you can do it yourself
at the expense of Consciousness
just similar optics just for everything
what i said

and when you see your own path

it turns out that you as a person are expressed in that
that the Soul is like it turns out it correlates
with the Soul of God
your Soul
correlates in terms of that
what is the intersection
namely the Soul of God
and your Soul
for example in the structure of the physical body
this process is often not systemic

i.e. your Soul intersects
in the structure of the physical body
only in those cases
when the execution options seem to coincide

i.e. you set the task
it may be long enough
or there many years or a decade ago

it is currently being implemented
For example there at the level of the right leg
interaction with the Soul of God occurs
and you see the correlation process
i.e. the process of renewal of your physical body

when you such correlation systems
you start to find
you can see
that there is a very strong resource
to rejuvenate the body
by fulfilling its original objectives

exactly those that you set for yourself
and must perform precisely as an individual

these may be natural tasks
not only Macrosalvation
They all have them as standard tasks

and there are personal tasks
this is what they consist of
why do you need them at all
why they should be done

when you see it and start doing it
but again through Macrosalvation

then you see that the body's renewal system
this is what you can call the step of God, yes

God stepping on the Earth or walking somewhere
It also rejuvenates
It also makes them viable.
all those systems where He passes

and His Soul which seems to fix
in this methodology His Physical Body
this is the path that comes from God
to Himself

i.e. God also determines
Your own tasks
just like a person actually
only he has tasks for example there are wider ones

and when you see
task self-determination system
and the solution system
then in solving problems and in solution segments
there is always the presence of God

and in the overall manifestation
not only for example the Soul of God
there is the Spirit of God
there is God's Consciousness there
and you can, for example, by personal will
see
how does God Consciousness affect you

those. your Consciousness
in correlation i.e. in interaction
with God Consciousness
can fully consider the processes of those
that man is truly Eternal

i.e. a person can be, for example, resurrected there
that he might not die
i.e. Consciousness relating
to the action of Eternal development

and after all people
which generally happen in extreme situations
they are very clearly convinced
that a person really can not die

For example in general, in some kind of extreme situations
a person can survive

but a person can also be completely restored
i.e. he can be resurrected
i.e. this action is generally of the same order

God's action in situational manifestation
God's Action Where Do You See God
in the form of, in general, the path shown by Him

if you pay attention to this path
you do survive for example

then if you reverse the path to the next system
as if on the Eternal system
then you really live forever

after all, the choice of path is practically the same
you are absolutely nothing here

Well, you don't come up with anything new there
you don't create anything new for yourself

all you have to do is choose a path
and go where there is, for example, Eternal Development

and as I said the choice of path
no different from the choice in an extreme situation

if we consider this technology
in relation to choice
as if in a calm, in a systemic, as if, development program, yes
and to the program that you yourself laid down

then it turns out that it is your own choice
this is what you see as the Infinite quantity

i.e. when you look at some Infinite property yes
space-time
then you see that this is your movement, for example, in Infinity
you can develop infinitely
at the same time your development is such
that you just chose for example there in a calm state
according to the characteristic of Infinite quantity

but a calm state is in itself

it is a part of Infinity
then this is an infinite quantity

there is a level
where in general it is not necessary to choose in principle
you just have to be in that state
in which you know for sure
that you, for example, live forever

for this this state
this is the level where your physical body is
common for example in the structure of action
in relation to oneself

i.e. that's when you
how you act towards yourself
let's assume there you restore yourself
are you solving some issues?
this is the Infinite level of development
where the action is conscious

it turns out to be a self-healing system

the control system there is a different Reality
the system of control, let's say, coming from you
in relation to the outside world
this is the level that
it is practically implemented in this way
that you are on the right track
when you constantly decide
control system
coming from oneself
in relation to Eternal development

and you decide in a state of general calm
better not to allow it
extreme conditions if possible

that's why it turns out
what is your normal physiological state
this is the Norm of Eternal Development

It is only worth it consciously at a certain time
I'm not saying that this needs to be done constantly or always
but at least at that moment
when needed to restore health
or some extreme situations

apply this system
self-regeneration
self-control
self-healing

and you will see that the level is well in general, your experience
when you gain a level to a certain status or something
of course it will lead to that
that you will have to solve more problems of some kind
or household or according to Macrosalvation

but you will also see
that each subsequent task is like this
that in essence, once you have decided all the previous ones
for example, you restored yourself
or made some kind of Macrosalvation management
it means you have resources and you have the opportunity

why i always recommend practicing more
in terms of getting results
exactly a specific result
there for their own personal tasks, for example

then it turns out that the next level
he is already more conditioned

because in Eternal development
the concept of , well, a kind of hard diagnostics of that
that a person is like this, for example lived there forever
there is no such thing
a person can know for sure
that he can live forever
if he is able to solve all current situations

the mechanism of his knowledge of knowledge is such
that he knows for sure that he, for example, lives forever

because well, he can basically live
there are a huge number of years there for example there are billions there
but here are billions plus one second
does a person have confidence
living there normally the next second

there are some nuances here
related specifically to the structure
development of a diagnostic control mechanism
when a person is confident in his abilities

then it turns out that from the point of view of technology
namely interactions with the Soul of God
here first of all it is necessary to identify
in the Soul of God
the structure of Eternity
in relation to the Physical Body of God

i.e. if the Soul of God
creates
human body
then accordingly the Soul of God
only by fixing the Physical Body of the One God
creates the Norm of His events

so highlight
in his physical body
that level
when you can say very clearly about yourself
what if you focus on this level
then you will be healthy
and there definitely won't be any problems
for example from the point of view of your life
you know how to live forever actually

Well for example, you know this now
but you will strive for this technologically
let it be suppose the level of the heart

and here you light up from the level of the heart
your whole body

as if by some clear, bright optics of Eternal life
it is the structure of Eternal life

and try to make this Eternal life
was inside you there exactly hard
inside the physical body

and already your glowing body
gave Eternal Life to others

i.e. here is a very clear criterion for you
the heart makes you eternal
inside as if yes bodies
and already the light coming as a consequence
which you generally may not have control over

he makes others Eternal

and do this management now
I will do it together with you
in order to obtain a specific result
now to solve my problems
through Macrosalvation

At the same time, try to solve the most difficult problems

i.e. this technology is as follows
that if possible, solve the most difficult problems now
and solve them realistically

i.e. the problem of a real solution
this means you continue to glow

i.e., for example, I continue the lecture material
and you try to constantly illuminate
that's exactly the structure of Eternal life
your physical body
exactly in two levels

and then you move on to the third level
when you passed the glow to another person
he actually reflected it ^{yes}
or partially accepted it doesn't matter

even if you conveyed the glow
and the reflection began ^{simply} according to optical laws
that is the accepted reflection by someone
will still give the same amount to this person
how much if he did it himself

for example why can God give one impulse
and then everything develops
in the structure of the Eternal development in essence

because the structure
it is precisely ^{in general} such a prolonged, ^{as it were,} Light
structure of mutual reflections
this is the structure of Eternity
expressed in the form of the Light of life

i.e. find exactly the glow of life
where the glow is life is endless

try to highlight this segment in your Consciousness
not just for example there is life or some everyday issues
that goes without saying

highlight in your Consciousness
segment where life is endless

and you will see that this is a structure
where does your Consciousness grow from?

i.e. in fact you walk all the time
according to the structure of Infinite Life
and these ones are like sometimes they are like frontal
growing in the form of often spheres
optical systems
this is the level of Eternal development

and when you enter this structure
you will see that for example the planetary system
which is now around the Sun
this is the structure of the same development of Consciousness

i.e. your Consciousness forms these systems
so that you can develop Forever

when you connect these concepts
then you will see that the solution to your questions, for example ,
if it is required extremely fast
then it can definitely be resolved
you just have to understand the system of relationships
as if at a distance

for example, if you ask a question
how are distant planets connected there
Jupiter, let's say, with Saturn
or there with the Sun yes we call the Sun a star

when we start thinking about these processes
then the body is being restored
in terms of action, it means
into a prolonged knowledge system

i.e. we can't touch it there
let's assume there is some piece of the Sun there with a hand for example
but we can realize it with Consciousness

when we understand

that with Consciousness we can do more
the body is being restored

also when we understand
that in order to achieve such knowledge
which ones exactly do we want
or what God gave
in relation to Eternal development
then it is enough to simply develop your Consciousness
to the level of Infinity
i.e. try to understand the structure of the next development

i.e., for example, let's consider the starry sky
and let's ask ourselves a question
well for the optical spectrum let's say
what's next
what's there anyway

here is the question itself, the very formulation of the question
this is development
from the point of view of body restoration

here are some very specific trainings
allowing the body to recover
from the point of view of human Macro-interaction

and at the same time we can consider
that interaction is precisely with the Soul of God
in this case it is human health

i.e. just highlight the interaction
in terms of production level
i.e. to pose a question

and secondly, try to be able to answer this question like this
as if the Soul of God was clearly present
i.e. you could select it generally whenever you want

i.e. for example if you have external control
towards you
and this control is some kind of event
this is basically a synthesis
or there, for example, localization in the optical range
all external events of the World

then it turns out that the event is controllable
through any structure of the World

i.e. if you, for example, there you go fishing
or go to the store there
then it is enough to go out in case of fishing yes
through some blade of grass near the fishing spot
influence there so the option is fishing

then if you go to the store
it is enough not to see the thing itself
and in general the store itself or the path and there, for example, the sidewalk

i.e. influence is possible through any structure
it is enough to just decipher and examine this structure
how can you influence the event

then it turns out that based on this
when you want to have a healthy physical body
which, for example, goes in the right directions
or for example reads a newspaper, it doesn't matter

just when you want to be healthy
you have to determine from this position
the structure of your physical body

i.e. try to understand
how does your physical body
must interact
in each specific case
in a specific physical space

when you already understand this level
i.e. you see that your physical body
interacts correctly
i.e. without any tough situations

then you see that you are practically giving to the body
Spiritual vision
i.e. the body begins to see with the Spirit

and when you start looking further

then you see that your Soul
this is the clear path of your physical body

if you ask yourself the question
where does a person get his thoughts from?
to go somewhere or do something

so this is absolutely precise knowledge of the Soul
in relation to the physical body

i.e. a person actually all the time
turns to his Soul
and takes this knowledge and forms a thought

i.e. the thought is formed
this is interaction
Souls of man
and the Soul of God in fact

and the physical body of a person
and the Physical Body of the One God
this is the path that they create together

because it turns out that the physical body of a person
it still exists
opportunity to act
the opportunity to create something
on a physical level

therefore the manifested systems
when we say that time is for example the Action of God
in relation to any event
it's one and the same

it turns out that if a person acts
by analogy with the Physical Body of the One God
then it may well be here
element of such control
that you will get a comparable result

precisely with Eternal development

which means you can Eternally develop
as a consequence logical consequence

what i said
it's basically just a logical level
some positions of primary management
namely practical management

i.e., for example, so that the nuclear power plant doesn't explode
for this you need to do some actions
and the analysis of these actions leads to the fact that

that the state of affairs is for example this
which I just said

or for example I do diagnostics of the plane
where nuclear warheads are transported
and the plane doesn't fall

but let's assume there were some precedents
that there was a possibility of a fall
then it turns out that I must know some Laws
so that such a catastrophe does not happen

then it turns out that these Laws are expressed
in the knowledge of the interactions of these optical structures
for example the Soul of God
The soul of man
or physically identified structures there
there is the Physical Body of God for example

and when we consider
human physical body
then this is the Image and Likeness of the Body of God
i.e. there shouldn't be any special differences there
in terms of the behavior of these bodies

but when you look
on a strategic path of development
then you see the difference
precisely in the Eternity of any segment of the Body of God
Physical Body of God

and when you consider His Soul
then the Soul fixing Him somewhere in space
it is the Soul that builds your body

here you can see that the instantaneous level , for example,

for God
this is the Eternal level for you

i.e. one fixation of God, for example, in Infinity
gives you Eternal development

i.e. it turns out that this is
Well as if some optical principle of a kind of scales
it is enough to fix two moments in Consciousness

Soul of God
fixing the Physical Body of the One God

i.e. to understand
as the Soul of God sees as if Yes
Well, in quotes it might even be "sees"
and if in essence
really sees through your eyes
Physical Body for example of the One God

as soon as you fix this situation
and you see that the Soul of God at the same time
builds your physical body
then it turns out that the Soul of God
this is a structure that builds
and the physical body of a person
and the Physical Body of God

and God as a Person builds the Soul itself

it turns out that it is a personal factor
it is higher than the investigative factor
i.e. including the material factor
there is a factor of the physical body

when you see this investigative factor
in fact, well, in the totality of interactions
you see that the personality is indestructible
The Soul That Is Eternal
can create an Eternal physical body
your physical body included

the thing is that there are such positions
what your Soul can create
in general health yes for example to other people
can give control over Eternal development
to other people

but does this apply to you?
that's another question
this is a special question

this basically applies to you
from God
you are designed that way

but when you start to act technologically

then it turns out that the attitude towards oneself
i.e. formation of attitude towards oneself
this is a special procedure of Eternal development

after all, a person who has developed an attitude towards himself
aimed at striving for Eternal development
this is already quite a lot
often this is the solution to the problem

but if he does this for example, well there let's assume irregularly
or he thinks that this technology
given for example for one-time use
or there for a one-time impact
even if there is a long period of time

it still means he doesn't consider it
its harmonious essence
in relation to God
i.e. my own personal task
i.e. he didn't consider it
my own, so to speak, personal happiness
in this action

it turns out that this is exactly the order of happiness
the order of revealing the structure of one's own event
as a joyful structure
as a structure that brings joy to you
to you personally
this is a special task of the individual

i.e. identify as much as possible
in the management structure
what will give you the opportunity for Eternal development
because you yourself want it that way

Well let's assume if you ask a question there
why do you want this
i.e. why do you need it

then the answer is by the way very simple here
to regenerate even one cell
For example there at one o'clock
you need to tune in for example there for a million years

i.e. take the weight characteristics of light
i.e. take photons, how much do they weigh, yes
each one separately

and see the weight of the cell
that's about a million years

i.e. to be able to manage this situation
you just need to be able to always get it out
their own conceptual systems , so to speak
on the level in general as if real actions

it turns out that when God gives control
coming from the very level of Eternity
then in this case it is a material analogue, so to speak
Weighing systems of the World
i.e. precisely the quantitative systems of the World

when we can just even measure
what number of processes need to be considered
in the form of photons
to get one material cell

even in the form of those photons
which we diagnose
due to the structure of Consciousness
and not those that may be
due to the simple light of ordinary physical

and when you start to see it
it turns out that the need for Eternal development is still there
this is still the reality of solving the problem

Well For example there in my management practice
there is evidence that it is possible to regenerate the organ
i.e. restore for example yes organ
which was supposedly removed
in conditions when the same surgeon who removed
he then records that yes, for example, he yes, I have recovered

although it seems like a person shouldn't regenerate

however, I have it in practice
such specific data that this can be done

so in this case
we must do as God does
i.e. God created organs
it turns out that He does this on an Infinite level
originally Infinite

it means the properties of your Consciousness
should be like this
that they are originally Infinite

I'm not saying that
that Consciousness must be something special

the concept of "properties of Consciousness"
by the way, this is not "expanding Consciousness" there
and not some other complex concept

it's just an orientation towards that
that this effect is achievable
when you as a person in general have given up
the possibility of this action
and practically laid down the control function
through this action

i.e. through another action
the control function is simply not implemented

for example, you can try very hard for a long time
build an organ by some other methods

but when you don't do it
just like God does
in this case, for this person it is meant

and how much will you transfer this to another person
that's another question
it's a question of systematic management

but in order to make control in this case
then it turns out that there is a task
still be able to transfer it to another
you still have a task ahead of you

you only need to do regeneration once
it will stand on you or hang on you or something let's say so Yes
in a good sense of the word
task
This should be done by everyone if possible
who will meet you on your way

then it turns out
what well in case if of course there is a precedent yes
there is a need

when you start to look at it that way
position of the World

in general, a fairly simple task arises
essentially a human task

there is a possibility of macrodestruction
as a person as a personality
you have to overcome it naturally

there is simply no other way out, no other option
i.e. it is just a normal adequate reaction to Reality

the second option to overcome this
then you have to do something yourself
and when do you start practicing
there to prove at the expense of ^{suppose} there is rejuvenation
due to the restoration of resurrections
and ^{in general} some other elements

where shown
that Spirit and Soul are those levels
which are capable of restoring, ^{for example} yes health
which are capable ^{of radically} changing
including Reality
towards Eternal development
towards solving your problems in general

it turns out that you can see quite well
what is your personal task
Here is the formed control task
mandatory management
it is aimed at you solving it logically

there is no need for any special criteria
there are convictions or ^{there let's assume} slogans
there are very simple tasks
which cannot be solved in any other way

how to diagnose an airplane ^{for example}
which carries well, some kind of problematic option, ^{yes}
even if any even if passengers
how to diagnose it
if you don't have the opportunity
see a plane in the distance

or a nuclear power plant

if there is some problematic cargo
how to make it so it is not a problem
the cargo itself

or if it is at all
some region or part of the planet
then how to make this region or part of the planet
preserved
or even the whole planet

after all, some external macrobodies are possible
a person must really live forever

i.e. he may well, for example yes, it is logical to expect
some external influence
so he must be able to overcome it

when you start thinking in general
Well, it's quite practical
it's just a practical level of Thinking

it turns out that the development of your own resources
Well , this can sometimes be step-by-step
sometimes it is an instant often path of development
your personal own
through overcoming some ailments
through solving some personal problems

but nevertheless I think
that this is still a path, it is not declarative
i.e. it exists in your Soul

this is initially a state of the Soul
this is a state originally given by God
and this is something you can do

the most important thing is that it is that level
which speaks about that
what can you do it
You just have to pay attention to this

after all, in the management system, according to my Teaching
you can always go out
to the control, as it were, even optical level
just a regular optical
where there is a solution to any management issues actually

you just have to go out yes
Well, there is a difference
or let's say go to the cinema
or spend two and a half hours
and still reach this level

or okay we can go to the cinema
and being there you
find this level

as if here the task of the individual arises
this is basically the task of solving the personality issue
in any conditions in principle
it is not necessary to go to the cinema

and so when you see
control system coming from you for example
Well let's assume if you still want to
go to the cinema
but the main thing here is to still think
that the cinema still exists
while there is yes for example civilization and planet

so when I look at
still have their own management system
I always say
what to do first Macro Management
help others
you will see
that you get significantly more for yourself

when you see
that in general you get significantly more
because you have
this one is kind of unique or something
Macro Salvation level
directed all the same through everyone
to you

you see that your personal training
i.e. for example you did Macrocontrol
and directed the training towards themselves

what you learned is still a system
in essence, everyone is learning the same
because your glow
it gives training almost all the same

to all people who have learned
first through Macrocontrol
then through your personal experience

so the next level is self-regeneration
means in relation to
for example to another organ
this is the next level

if you are overexposing
your own heart
Light for example of Eternal life of Eternal development
then follow how it is reflected
Light
inside your body

and you will see that the reflection
it practically builds your inner level

i.e. actually the internal organs of the body

therefore, it is possible to diagnose organs in an elementary way

by lighting up one pulse there in the heart area
It doesn't matter, it can be somewhere else
It's just easier to control from the heart's side
development of this impulse

and walking as if through this world
you will find out very easily
the whole state of your body

and deducing this state
into the space of the Soul of God
into the control space
where do you gain, for example, personal methodology
and the space of the Soul of God
may be inside you
i.e. where your own Soul is located

and when you see this intersection
you see that your own Soul
this is a fairly powerful level of knowledge

i.e. this is, in general, a knowledge generator
generator if you can call it that
there is energy for example

or a generator of some actions
which is practically very tightly connected
with a concept such as your own body
sometimes it's all the same

because the human physical body
this is also a part of the Soul

and when you see these connections
where the Soul builds your body
where your Consciousness builds the body
you can see quite well
that a person can overcome a situation for example
i.e. make the control come from it
let's assume there in Infinite Development

and at the same time he can quite see
what control he receives
man from this
this is his own training
to the next level of life

i.e. the more you manage
the more you can practically do in the future
have
already such a controlled level of management in general

and when you have this level of management
you take it and start to distribute it to others
i.e. to show that it is achievable

then basically you see
then it is definitely your control
implemented including for all others
it will definitely lead to that
that you can live forever

i.e. the main task
this is striving in general for Eternal life
try to achieve
real technologies of Eternal development of Eternal life
in this way
so you can see
that this desire
it is not only your path
but also the path of the Soul of God

in principle, this is the path of God Himself

when you see God at work
you act by analogy

the thing is that now I showed it for example
in today's seminar
quite a lot of external control systems

i.e. for example in words
I showed one side of the controls
due to personal and optical control
I sometimes made other control characteristics in general
going towards restoring your health
or there for the improvement of life events

the task is to be able to study everything
as soon as possible if possible
because today's lecture is actually a seminar
where the concept of a seminar includes
that you worked too
when i told you
and at the time when I was teaching a lecture course

try to combine the concept in this way
Souls of God
Souls of man
physical body of a person
so that the body is healthy
human physical body

but when you ask the question
so that the Physical Body of God is healthy
you will then receive even more health accordingly

i.e. try to work with concepts
Body of God
human body
for example the soul of a person yes
or the Soul of God
as with the concepts of knowledge of the World

i.e. when you really understand the situation
because you know her
well, that is , the so -called soft or transparent knowledge

i.e. knowledge coming from the outside

to you
to your physical body
knowledge of health

i.e. try to feel this wave
i.e. it is really possible to work on regenerating the body if necessary, yes
build control events

and in my opinion, as I already said
because in this case
God always gives a choice to the individual
it's just a choice
exactly well as if the possibility of this choice

and into the area of the Soul of God
you have this opportunity now
here is the choice of your development
into the area of the structure of the Soul of God

how the Soul of God restores
human physical body

when you for example this process
consider the methodology
consider and implement for example Yes
in their personal tasks

according to this technology
as quickly as possible to implement technologies
If possible, try to pass them on as quickly as possible

can be implicit or explicit
but due to the simple glow of the body

you know that for example Well, saints
let's assume those who scored
there are many optical control levels, yes
due to some favorable actions there
they emit Light that restores

and they themselves are in better conditions , for example
often in relation to the usual level
where there is no optical control for example

in this case if you save
from there a global explosion some object
anyway, you are doing enlightened

from God's point of view, work yes

you give a glow that can be
not in the form of optical luminescence
comes from you
and in the form of knowledge, for example

you can also recover
i.e. to cure some disease
and this experience is also a glow for everyone

i.e. this experience in the information space
it is saved
it is given by God to everyone at once

and therefore try to consider
their own activities
your own results
as a mission for universal salvation

try to see
this is the fundamental meaning
current level of Reality

because now we really need to do it this way
so that there would be no possible global destruction

and naturally if it can do yes
one person
then he can save everyone

This is where I end today's seminar.

thank you for your attention
