

GRIGORY GRABOVOY
The Teaching About God
Simultaneity of the action of the human Soul
22.05.2004

Hello again
The topic of today's seminar
This is my Teaching about God
Simultaneity of the action of the human Soul

in this management structure
we are considering the system of simultaneity of action
when the Soul acts
as at the same time for example inside the body
as if by the internal positions of human Consciousness
and or for example human actions
it also simultaneously affects the external world

in this regard, the human body
this is an action coming from God
to a person
and to the Soul of man
i.e. the body is also an action

i.e. in this case it would seem static yes
picture of the human physical body
this is the structure of the body of action
in this control system

so when we look at
for example, the logical meaning of this phenomenon
then it is completely clear that the inner feeling, for example, yes
inner feeling
often causes a change in external Reality

i.e. even if we consider this aspect of management
that when you somehow perceive
on a sensory level
let's assume some object of information
then another object well let's assume there are autumn leaves there yes
and inside there is a certain feeling

it depends on the inner feeling
External Perception changes

i.e. this is the imposition of a kind of external level of feelings
This is a familiar concept to everyone, a phenomenon, so to speak

on a sensory level
to the level coming from the body
from the internal state of the Soul, as it were
from the inner state of the Soul, so to speak, yes
The soul stands at this moment inside the body

and in this way it is very easy to view in general
where is she standing
in what part of the physical body
the action of the Soul occurs

then you can see the organization
what organ ^{yes}
what part of the body
acts on Reality

those. interaction process
Souls of Man and Reality
just like God does
it is a process of continuous creation
external and internal
i.e. sensory and emotional Reality
or Thinking including

it turns out that Consciousness
this is a product of control and accounting of relationships
of this action

i.e. Human consciousness is formed in this way
that a person begins to analyze and combine
all these actions
in order to obtain concentrated control , for example, yes
Well, basically, managing some event

i.e. it is clear that a person always controls an event
based on the dynamic state of your body
in this case
according to this control system

and it turns out that we can quite well consider
how does a person, for example, gain control
from the point of view of God's Action
when the Soul of a person for example builds
your own physical body

those. in this case the term is applicable
that the Soul has its own physical body

and when we start to look at this position
then from the point of view of the technology of reincarnation, let's assume
it is clear that the Soul is constantly engaged
the task of Eternity of the physical body in this case

and when we talk about that
that the Soul, for example, is fully realized
so it turns out that the Soul must have
Eternal physical body
in which the action of the body
Well, in general, some events and actions
in humans, they are generally often considered
in the direct sense
that this person did this and that
Well, the physical body of a person, yes
or he said or did something

i.e. it turns out that the action is reduced
as if to the physics of human action

and here is the dynamically acting human body
i.e. a body reproducing some phenomena
around himself
those for which a person is personally responsible
and also the body where the action is
this is, for example, the desire of the human Soul for God
are considered equally by God
in the human consciousness

in general, it's quite well, so by ear it seems to be a complex formula
nevertheless, if you walk along it
listen to it or write it out
you can see that even in the first Perception
she acts as if she is simple

i.e. as soon as we go deeper
in the complexity of some concepts
let's assume related to the body
or with the interaction of the body and God yes
the bodies of man and God
it turns out that there are no destructive processes here

here only is there the radiance of the Eternal Light of development

and it turns out that here we have that status
that the Eternal Light of Development
i.e. precisely that Divine light
which exists, for example, in the physical body of a person
it's starting to show

i.e. a person begins to see
its own Divine light coming from God
from the original and from the One God
for everyone and for the person himself

then it turns out that in this case
human aspect of activity
it generally takes on the aspect of an action in progress
as from a person
and to a person
but already from the True God

i.e. a person due to True enlightenment, so to speak, let's say so
in understanding precisely the Macro-creation of actions
of your body
gets a specific area
in your Perception in information
let's assume that it can be removed
but in general it is manifested specifically in some local place
as a kind of spherical system, let's assume
where he sees the Action of God in that plan
that God shows absolutely everything about the person himself

i.e. not only, for example, some specific events
but also shows how to combine in general
events in integrity
provided that each system is event-driven
maybe well in general, to have a different emphasis on management, or something
from the point of view of both God and man

i.e. there is a complex area there
where a person is he always eternally alive
because he will definitely create himself correctly
the man himself
it's such a specific area
where a person understands at the level of Spirit
that he will always create himself in that Reality

and that's when a person comes to this understanding
that he is able to create himself
in that Reality in the future for example or in some place
he understands that he does not depend on circumstances
as if of the external world

and the outside world is already beginning to exist
The world is practically in general the actions of the Spirit and Soul of man
where Consciousness is simply control
structure of external material objects

for example, a person came to some street
there is a house there
and so that this house doesn't fall down, for example, yes
well let's assume even in the Perception of a person
not to mention the real physical environment

you need to do it this way
so that a person can organize his body in such a way
that this house is also organized by man
i.e. it turns out that it is like around the body
organizes external Reality

but so does God
he is around his physical body
organizes Reality
in this case Reality has
the properties of the construction of the human physical body in this case

i.e. any element of Reality
contains it turns out well as if to say energy and action
and not even the person himself
but as if some external energy
internal energy of action
this building is the home of some event

and when we look at it this way
we are beginning to understand
what besides the fact that the physical body of a person
arranged in such a way
that this body is still an action
according to the principle of simultaneity of action of the human Soul
precisely because the Soul acts
and as if outside the body
and inside
the body should also have such a function

and therefore we come to this in many ways logically
the truth is more on the logic of the Spirit, namely Spiritual development

and when we look at it from the same principle
then it turns out that
any building
any element of external Reality
any event
all these phenomena must have some similar structure

and if we consider it the other way around
then we see how the building is being constructed

from the point of view of their information organization
Well how can we say it, you can call it that
that the dynamic structure of the building
or some kind of unique, so to speak, Soul of some building
"The soul of the event" well in quotes maybe yes

how these phenomena fit into the material environment
the principle of a kind of [...] figurative analogy

then we begin to understand
that these phenomena of external Reality are such
that the so-called, well, let's say, Soul of the building
or there is the Consciousness of the building
some building information
this is precisely a dynamic environment
by controlling which you can change the shape of the building
Well, for example, to remove some short circuits so that there is no fire

it may not be the most appropriate form to engage in
because it's unnecessary
the building is standing well and it is standing comfortably yes

here is the criterion when you shouldn't do something
what has already happened and is fixed
this is a strict criterion for the objectification of Reality

i.e. the world is built so why break the conditional
or bend the wall of a building with Consciousness
when everything is fine anyway yes

i.e., no extra actions are provided
generally speaking in the control system if it is not connected

there for example there **with Macrosalvation**

if for this it is necessary to bend the wall of the building
and turn off some switch
then in principle it can be done
but why yes
when can you just turn off the switch remotely

and it turns out that based on this
when we look
for example, the device system is already kind of the opposite
human body
Well, again, in a dynamic sense
interaction with the same building
how can a person earn money there in principle
some well , let's say there are some problems

if exists
Well, the level of human action
as actions on Perception
i.e. a person perceives
I say "if it exists"
but it exists i can admit yes
according to the Perception of the dynamic system of the building
how to influence the design of the building

but if I say "if it exists"
then this means it exists
I just expressed the structure in words
for the Perception system

this is the difference between words and implementation
I want to say, for example , that let's say there is some molecule from the Moon
will fly here and harmless
it will be harmless for, let's say, the Earth

if I say then what are the criteria in that
that I can attract yes
I have to take the lab setup
put a device there to measure this molecule
and get it here as if formally
within the framework of modern physics

i.e. words so that they coincide with the action
should have some kind of action attribute

so that's when we talk about that
that admission is action
and for God it is one value

i.e. God allows and acts simultaneously

For Him, the concept of "if" has a different meaning
than for a person
because for Him the concept of "if"
this could be an event
as well as unfulfilled
just like a person might say
and if he goes one way then for example it will be something like this
an unfulfilled event he did not go this way

for God the concept of "if" is
to have this road in Reality but not to go let's assume yes

so it turns out that God is in a dynamic system
it gives off a sort of high-voltage arc

in simple terms, it is a control system
she is always in a very compressed state, as it were
in deformed
or in super high concentration so to speak yes
in optical terms
but the truth is in the distant Perception for Consciousness

i.e. here are the distant systems
regulate approximate Reality

and when for example these distant systems
in general, they regulate management yes
we we get the next level

what exactly well as if a super-remote system
as if the most distant system
this is the level that if we consider
let's assume a level of as if approximate Reality
then there is a certain bridge that regulates
in optical terms
namely approximate elements

for example, there is a table there and some kind of building structure
that is, some kind of light rays that act
as if at the level of organization
for example, this building

and therefore the building is located at this point in the Universe
in this form

It's very easy to get out here
on the structure of these rays
and then look at the design idea
i.e. look at the drawing diagrams
see how the drawing is connected
let's assume with let's assume there with that
that maybe there is some problem with the building yes
there might be some kind of crack there, etc.

i.e. it turns out that we can proceed from that
how about information in general
any element of Reality is built
find problems explicitly
i.e. the coincidence of information with actions

here the same exact principle arises
as an Action of God, and connected with that
that man already understands the Action of God

i.e. I brought to the fact that the dynamic, for example, Body of God
becomes understandable to the human body
i.e. the human body understands the Body of God

and when do you start
to see such a structure of Reality
after all, it's a manifestation
well physical system of physical matter
this is also an Action, including the Body of God
One and Physical

and these are the lines of construction from the Physical Body of God
any elements of Reality
in this case they become visible
it's enough to just understand everything
action yes mechanism of action

it turns out that
this is precisely the docking of the human physical body
with the path that God actually took
gives exactly Eternal development to a person in this case

i.e. its dynamic environment

i.e. the body is aware of all connections
because in this case I was talking
from the point of view of human body language
for God
Perceptions of God

and when does the human body begin to develop like this
you can take absolute control
all approximate systems
i.e. well, there is concern for relatives
about all people ^{yes}
about Macrosystem

you can take it by reaction and, in general, understanding with your body
some phenomena of Reality
distant or close
take control and, as it were, exercise care
beyond the super-remote elements of Reality
without straining yourself

i.e. here is an element of the Macrosystem
for example, the Universe is some kind of completely distant
for example, the starry sky shines on a person, even if
then Perception is generally primary
goes at body level
from the point of view of the Spirit of God

and you often may notice this
what is the primary level
^{how} does the beam fall on the body first

and it turns out that when you perceive it
i.e. the body is in dialogue mode with the external environment

and here you can see that the Soul is acting through the body
acts simultaneously in all points of Reality
i.e. we bring the rays together, bend them and project them
it works on your body
but already with his Consciousness

i.e. Consciousness begins to bend these rays
and we see how Consciousness works in general
then we enter the function of Consciousness
let's look at it in general
what kind of mechanism is this ? Well, it's like a force field of some sort .
where there are no levers but the action takes place

then we are already getting closer to ourselves
and we begin to analyze in general
where does our Consciousness grow from?
from the point of view of his absolute understanding
just like here is an absolute understanding of the building ^{yes}
on optical power structures
coming from God and from people

and then it is clear that Consciousness
this is all that is manifested in this World
i.e. we see Macro-consciousness
that our Consciousness controls Macroconsciousness

then Consciousness becomes intelligent
in Infinite Development
i.e. we see that he is not just a person
controls some elements ^{of the current Reality} ^{yes}
and in Eternal development he can control the Macrocosm

i.e. all Infinite events
even if ^{only} for the ^{next} million years
I don't say anything ^{there} at all

but it can already be distinguished then
it's really possible to even work on this
^{as if} a path of prolonged such an absolute future
and it is clear that Consciousness can regulate this environment

i.e. Consciousness falls into the regulatory structure
namely , in fact, the systems of Eternal life support

and when Consciousness begins to understand
^{as if} it possesses an independent level of intelligence
then Consciousness begins to build a person
and the person already understands
that this is a pleasant construction for the person himself
i.e. he builds himself
but at the same time understanding absolutely precisely
what happens at the level of the Spirit ^{and} at the level of the body

and this is the understanding of the Thinking of the body actually
makes it possible to work in this way
that you begin to see manifested systems
because God built them

i.e. it is one thing for a building to be built by people
and in this case you begin to see another thing
and how is it here and where is it here
God Himself and personally worked

and when you start to see this system
then here comes such a thing
indeed, universal harmony is very welcome
where you can , for example , completely restore your health
if there are any problems
or cure from the most serious diseases of any kind
any person at any distance
because you are entering the system, in essence ,
as if in resonance with the whole Reality
but precisely with that part where God Himself is

and at the same time, let's say, you don't constantly ask God
questions there you get some answers all the time yes
although this can also be done there quite easily right away
just like in physical conversation

and at the same time you simply by your actions
are in expanding harmony

why is the universe expanding
from the point of view of visual observation
this is a harmonious system of development
although the orthodox view is physical
She thinks it's a problem

in fact, it's the opposite - harmony

this is the development of the structure of Consciousness
towards the Infinite Life
and Infinity must also be expressed visually
that something is expanding in width

if we pose the question of Eternal development and see the narrowing
then what kind of Eternal Development is it then?

and it turns out that this is our Consciousness
tied to the external universe then
and it is up to us to expand it to what extent

i.e. we want to increase the speed there , then the stars
or let's reduce it just to prove it

again in a temporary version
then we need to build a very large laboratory
but so far physics does not possess such a property

but due to the structure of the Spirit, this can also be analyzed
that you really do that ^{yes}
you can influence
there on super-remote objects or super-close ones

and that's when you start to see
that the management is going
and by super-remote and super-approximate
then you select an area in your Consciousness
where is the distance and the approach
this is a logically introduced level

you take and place, fix some area
that ^{for example} is approximately here
some outer distant galaxy
here it shines ^{there}, let it be for billions of light years
it doesn't ^{really matter}

or even beyond the visible spectrum
here are all the known quantities in the Universe ^{yes}
in optical perception
here is everything that the Spirit can know
and what's next in general beyond this value, ^{yes}

when you start moving on
you come to yourself
but ^{somehow} just on the other hand
from the point of view of internal understanding of this process
i.e. you perceive with both body and Soul at the same time

i.e. the difference between the body and the Soul is not captured there
if only to emphasize, i.e. to fix
rigid structure of the Spirit
then it's completely visible
where is the body
where is the soul
precisely in Perception

and it turns out that here is knowledge
beyond the level of possible knowledge
it's the man himself again

but as if merged both in Soul and in body

and when do you start

Well, it is precisely in the structure of your personality, yes

in your Perception

when you start to analyze the system like this

what is so distant

here is an approximation

you see yourself but already as a manager

i.e. you can study your actions from the outside

how to make the internal system

was projected

as if in you on information yes

and what level of management do you have without interfering?

into your system of sensations, there are feelings, sensitivity, etc.

i.e. as if not interfering with oneself, in other words, yes

some level of special management

well, that is, without even bothering, you could say so

how to do what you like and manage at the same time yes

the model is in a mechanical geometric understanding

it's actually very simple

there is just such a management for everything

what you observe as if from the side

at the same time you perceive yourself

in the Spirit

definitely in real height

i.e. it is impossible to work there at the level of similar systems by the way

a person must work on himself

always at the level of its own size

in this and in general the best is always

if you have reached the level of similarity

i.e. they took you and looked at you as if you were smaller

you will have to recover

for God He always has one structure

if a person starts to work as if

in your Perception on different systems

then he is forced to take the form anyway

precisely the form of God

so it turns out that

as if the Image of God is obtained

and in this case
similarity is action in dynamics

i.e. similar dynamic action

then you just watch some event of yours ^{there}
look at how it lies ^{as if} in a light projection
on you on the internal system

be sure to consider that the event does not affect
on your inner level calm
which is now ^{for example} yes

let's say you are watching this video
and you have such, ^{let's say}, a state when you are calm
and in this case you need to work ^{for example}
with more complex systems
we need to maintain a level of calm
and project the system
^{like on some geometric screens} ^{there} yes
but already located inside the Soul of a person
i.e. inside the physical body

so you start to see very clearly
like any of your actions with external events ^{yes}
builds you
i.e. you come to the conclusion that Consciousness
has the function of constructing a physical body
and very simple in a linear version

here is some event
some leaf ^{there} a hundred kilometers from here ^{yes}
I see him there and watch how he influences
^{Well}, of course, that's the essence of it
there is a very powerful factor of human security here

in essence, nothing can influence a person
this is how God created man
if the person himself does not allow entry
this information

and the task is in processing and, ^{as it were}, conversion, ^{yes}
redistribution of this information

why a person perceives this or that information
why does he get tired ^{there} or, ^{for example}, has some problems

very clear, as if according to a diagram, you can even make it up
like a map of action
and tie it to the Macroverse
and see all your manifestations at all levels at once

here is the simultaneity of action
will be absolutely clearly visible

and the so-called layer level arises
i.e. for example, there is a map of the starry sky
and there are certain layers
where your actions are manifested

it's elementary, it's like reading a book
take and turn the page
look at this point in the Universe
what is your action
now what are you doing here yes

i.e. according to this control system
you can find any characteristic
its action in any place
because of the simultaneity of action
it is really simultaneity

so i.e. I said here about that
which I would like to emphasize here once again
what is this simultaneity
indeed in all aspects of its understanding
i.e. it is not just a verbal expression

that's why there is a word status initially
word acting initially
and is there a word that means

in this case it is the active word
the word also has an action form
and the form of the fixing level

and from here we begin to see
what is the active word
this is what gives knowledge to everyone

then it turns out that a person receives True knowledge
if he for example well let's say it doesn't have exact coordinates

in this case, how [...]
or is there some external practice that affects him ?
but he needs to have a new one absolutely new
practice here is God and at the present time

then he can get this word in the correct form
he can get any word in the correct form

and that's how only a person
such a dynamic function of the word
begins to understand

the sound of a word in general is also dynamics
this is also like the work of the Soul
then it turns out that
or even body work
well due to the fact that a person
the physical body pronounces the word yes, for example

you can write it, you don't have to pronounce it
but it's the same word yes
and the action can be the same
although spoken at intervals of a second
this could be a different action

when a person sees it
then it turns out that the word
this is the organization of man
with the correct understanding of the word

then we need to take a look
and where, for example, is this word
i.e. it turns out that this word is inside a person

i.e. it turns out that we kind of have a management structure
well let's say we hear some words yes
Now let's assume there's a conversation on the phone

we can see the reflection on the ear yes
but we can also see a reflection as if inside the Soul

i.e. it turns out that based on this
we can understand quite well
that the word exists externally yes
there is a man saying something there
but we can perceive in this time
some kind of state of the word

and it turns out that based on this
if there is a person talking on the phone
or is he even thinking about it , what is there to talk about?
then we have an active word
word active dynamic
but coming from the Soul of a person

this is what the Soul says
how to talk to god at all For example

It is easier to speak with God with your soul
Well, actually, the Soul is the direct path to God
this is the expression of God in the universality of the World
and in the personality of a person
but in the form of an independent system, as if completely
and the independent level is connected with that
that the Soul understands the tasks completely
at the time of creation

and it turns out that when you
let's assume you are already starting to speak with the word of the Soul
but at the same time the Word of God
then you are synchronized
i.e. you coincide, let's assume , in action

and it turns out that we can then
all this external information
which exists but as I described
Macro-micro level model
or close distant
then you shape yourself simply with the word of understanding

i.e. the word of understanding differs from the word of action
do you understand what is happening
but you may not consider the status of the word

i.e. you see that there is understanding
you can call this state with the word yes
but if you call him
the model is fixed in control

but here it turns out that we need to act
to the management level
i.e. before the events are realized

and here you can heal, generally speaking

thus colossal diseases
as if which actually

and well, actually the concept is something like "colossality"
volumetricity yes volumetric i.e. very large

but I used the word "colossal" and changed it
this is "ear" this is life actually yes
if we apply the word to a complex disease
the word itself already cures the disease
serious illness
For example, I don't say "heavy", I say "colossal"
one word already deprives half of the disease status

and it turns out that we can work with words
as if from this position
treat almost any disease again
but as if speaking at the level of understanding the process of action

i.e. why at one time or another
the word is pronounced
why are sound forms of control created there yes
why suppose we have such a level of management
let's say we want to take some action
faster there, slower there

and we begin to understand
the internal nature of the action
of your own
i.e. in this case we see
that some reasons are, well, sort of being realized
because there is a specific spectrum
external events yes or internal

i.e. we begin to learn
what kind of events in the world await us
i.e. why we make this or that decision
and here the most fundamental question arises
why do we like something and not like something else , for example
main characteristic often in the state yes
A person wants to like everything

and when we begin to analyze ourselves as if from the outside
in this understanding
it turns out that when we consider
the whole system

as a general dynamic
when we see the simultaneity of all actions
all phenomena of Reality
then we like it, it's universal harmony
when we see the manifestation of the simultaneity of all and in everything

and if we see that some system is fixed
and the system itself, for example, needs to be managed, yes
then it turns out that this is well for example, refers to such a term
like "I don't like it"

Well, this is a rather conditional characteristic in management
but nevertheless we will be able to highlight
immediately the presence of possible problems
seeing the feeling there "like it or not"
this feeling often does not need to be called by a word

in this way we can move to the control language
actually, where it is not necessary to call something by words
it is enough to manage the concept of "like-dislike"
or for example a concept that is close to this

i.e. to form some kind of internal language of your own
in management
which is understandable to you
Generally speaking it is understandable
and it can be all at once if you want
but this is your personal language
language of communication with God
essentially with God where God creates all the words of Reality

and when you need to be precise
of this language
you then create a pre-verbal level of language
where God understands you
because you speak to Him with your Soul
pre-verbal level of the Soul
the level of organization where the Soul was originally

and when you start to see it
you see that Souls they just communicate with God
it means that the one who has a Soul is always Eternal yes
and everyone has a Soul

and from here we get the management structure
when we see only because of that

if we are clean Yes, we understand absolutely
The action of God or the Word of God
or we just see God correctly
what does he want to give us
then we can live forever in perfect harmony
in this case the element of action is an element
as if observing in essence, as if purity of action
i.e. the correctness of the position

but then a certain , well, actually, such a situation arises
that a person who is not used to living somehow
in such a harmonious level, so to speak
calm development and management
he often starts searching
some external systems that would do
development, let 's say, more concentrated
or something more stormy

and it turns out
that all external events are generally problematic
a person finds it for himself independently
you can see that the creation of problematic events
these are often the actions of the same person

and when we start to analyze
these are the action structures

it is clear that there is a concept of a kind of "habit of harmony"
if a person after the city bustle , so to speak
gets to the shore of the lake there
or is located somewhere under some tree
or there he looks at the surface of the water
then at first he gets used to it, yes

so this is the state of human addiction
it turns out that a person still has to
in this case get used to this level
where there is a non-verbal level of control
and the management of the Soul

it's the same as there some kind of vigorous activity
and calm contemplation
so that's when you move to contemplation control
then it already exists, basically, well as if the highest level of management
where all systems are dynamic
any system is so dynamic

that it merges into a single level of Reality

and only movement of this level of Reality
i.e. just point the optics in the right direction
well, like a kind of "gentle flashlight" conditionally
in quotes "affectionately"
just very soft control in this case

and you see that wherever you bring it
non-verbal level at that
you are doing well in management

there is a nuance in this control system
to convey its structure
I always have a task and all people always have this task
the task of forming one's actions
then here is precisely the task to convey
i.e. to highlight this action in terms of knowledge to others
because it turns out to be a personal factor
i.e. a deeply personal factor of management
where are you and God

and when you already show others
how do you do it
This is where the status of coverage arises
i.e. universal action
it still arises here
as it always happens and this is how the world works
it is precisely the task of universal Salvation

i.e. there is only one level of control
bring to the level of universal Salvation
it is clear that, firstly, you already have this in this system
The soft control level does not pass from this system
rigid factions arise and management is as if
i.e. this is , in general, without universal Salvation
the system in this case is simply not implemented

and when you kind of set this task
it turns out that at this moment it is precisely management
I showed that I didn't use this word
but at the same time, the word, for example, "universal" yes
and even in general at the beginning of the lecture he didn't talk about it
that we set the tasks of Macrosalvation
because it is obvious from the start yes

but this clarity comes
when you technologically put the control
and in every action you see that it is so

then when you put it into logic
this is the beam that passes through
at the level of a phrase, for example, yes, "universal Salvation"
to the level of real universal Salvation
there the phrase is no different from Reality in this case

here is tough and completely in this case
unique in general in many ways he is the only one
from the point of view of any Perception
factor
that here the phrase is no different from Reality

you see that all your control
is exposed to everyone
and then comes the joy of universal life
you see what people have
i.e. you show this experience yes
another level of knowledge appears before you immediately
the next one is already longer there
in terms of distance even
prolongation and time and distance

and it turns out that here you see
what is the next task
where the following control should be applied
and since this is a system of simultaneity of action, yes
dynamism and maximum harmony

when you see the dynamism of all phenomena
and the simultaneity of their manifestation throughout the World
in the whole element as if its action

if the action is the whole world yes
in this case it is also possible
apply as a management technology

then it turns out that a problem arises
here you have made the control
Just now you've mastered the controls and you've got it right
and for example, they literally just did it again
and now a new task yes

a person begins to think

yes, let's ^{assume it} works out well
everything would seem to be ^{fine} and I would work with this element ^{all} the time
but there is a fundamental point here
that's why a person likes something at all
in principle, how God arranged the World in this regard

He showed through the dynamism of the system
that any system is manifested everywhere
then it should be fine everywhere, ^{yes}

i.e. in fact He has a task
master any level of management at all

and it turns out that based on this
a person ^{generally} performs a task
the one that God made in his time
at the creation of the World

and this task is hers from the very beginning
when a person's Soul chooses a certain path
she is, i.e. he tries in some action
to know always the whole world as a rule

and here it turns out that so that there would not ^{be such} a transition
in the sense that I just mastered the system
and then you have to study again
here ^{is} a kind of system
that all the preliminary systems they operate
i.e. static dynamic local
for the direction is towards universal Salvation
always give effectiveness to any system

but here is the inner knowledge
why does a person do this or that action
here it comes already as an unconditional action, not verbal
i.e. a person sees what is coming to him
and the task of the next action
it is he himself
man is action
in the understanding ^{of} the whole world, ^{yes}
and himself

i.e. the person's personality becomes harmonious
then he stops getting tired
then he has no diseases ^{there}, etc.

i.e. it turns out that it is not necessary
that he was there just like five minutes ago
finished studying the system
everything worked out perfectly for him there, for example
and he should immediately learn something new in a second
not necessarily
he can drink tea there and there, for example, in three seconds study
or let's say in a day yes

the question is not like that the question is that
that he must realize the movement of personality
it turns out to be expressed throughout the world
to yourself

i.e. his personality
this includes the entire external world in essence

but here there is simply no such inseparable
in this technology
connections

and it is he who receives this
as information of your Consciousness
but at the same time he sees the expression of his own personality
in all elements of Reality

i.e. his body expressed in any system
This is actually a colossal amount of energy
because it's one thing
Well, energy can be in an indirect sense
but in essence and in the direct

because if a person comes
there are some ways to charge somewhere near trees there, etc.
but since it is in general
this tree itself
in many ways in this system
then why should he go to the tree

it is enough to simply perceive this tree
then he will get the whole complex and the tree will also be healed

i.e. it turns out that he perceives it in the tree
the structure of that
how is he even correct
what is he doing in this place in this point of the world yes

his personality how is it formed
and in general why is the world arranged this way
that he came across some tree on his way ^{there}
in general, what is the structure of the expression of an event as such

i.e. the task is , in general, abstract, ^{yes}
somewhere in mathematical logic even if we reason
then there is no need to set such a task at all
Who cares ^{why} a certain tree is standing where

but from the point of view of what a person should understand exactly
the nature of the phenomenon of any system ^{and} at any distance
then it turns out that he is obliged to know
what is the meaning of this tree anyway
from the point of view of both man and God
from the point of view of everyone generally speaking

i.e. he should understand then
^{there} he is somewhere walking on another continent
any person
or even any level of Reality
but first of all a person
need to understand
how exactly do these systems relate to each other?

trees
in his Perception
a person who doesn't even know at all
that there is a tree ^{yes}

but then he gives knowledge
and how can this person see this tree?
if he thinks so, he gives knowledge
in terms of development ^{actually} as if controlling clairvoyance
to any other person
i.e. he gives another person the opportunity
Login
in the World of Universal Connections

i.e. it would seem that he is solving his problem
and gives knowledge to everyone

and it is precisely in this technology that it is expressed
my system is precisely for the dissemination of my Teaching
where it is enough to understand
fundamental depth of some phenomenon
and knowledge instantly becomes universal

in this case, the concept of "disclosure" is as follows
that firstly it is the disclosure of knowledge
that this is essentially a very strategic
distant even in many ways in terms of distance and time
your task

i.e. the task of any person in essence and generally speaking
form all others in this case
namely to live forever
and he always solves this problem in this regard
i.e. we see these connections

it turns out that the presence of a person
i.e. the simultaneity of the action of the Soul ^{yes}
and ^{there, for example,} information about the physical body of a person
this is, in fact, even a necessity

i.e. the presence of a person
in any element of Reality
it turns out that it is necessary
and not just some kind of static system of the World

i.e. this is again the dynamics coming from the task of a person
for man is still moved in this way
that he acts in conjunction with God
but God has this property, ^{so to speak}

and it turns out that human research and development
towards towards the properties of God
towards the very Action of God
then allows us to calculate any cause of diseases ^{there}
spread out over ^{there for example,} to some schedule
or some kind of scheme, ^{so to speak,} a cartogram
^{there} in the form of a map present this action and the algorithm
any system of actions
i.e. to understand the internal system of events

and then it turns out there are no unsolvable problems
even on logic it's simple

i.e. it turns out
that then the power ^{and will the power} of the mind of the human mind is such
what ^{if we give him a little time} there
then it will definitely solve the problem

so that he had this time ^{means}

there is just a task as if in a reservation
or what time per unit of action

i.e., in general, there can be different events
and therefore the task of a person is such
that he should be able to do so at any time
so that the technologies of Eternal development
were real technologies in action
in the current one and not in some
maybe not in some future action
and already now he should have
a system of , so to speak, absolute control
be able to distribute instantly pass on to others

if we assume there is a possibility of an explosion of some object there
he must reset so that there is no yes
or to the object
or a person who can interfere, let's say, etc.

moreover he must do so
so that no one gets hurt
not just dump it on someone yes
and the responsibility lies entirely with the person himself

i.e. precisely the element of the next action
this is a necessity that was initially given
already in a mild form, so to speak
not that there is a need for heavy action
this is no longer a stressful situation

a person begins to think and breathe
and now his Soul begins to breathe
just as the Soul of God breathes
it breathes exactly like the smell of freedom, yes
free action scent
and not some kind of constantly tense situations, etc.

and when a person begins to see this action, for example
it turns out that he sees the open Soul of God
because he only needs to know more
i.e. to open your Soul wider
the more he sees that it is directed towards him
from the Soul of God
He sees a more open Soul of God then
more well luminous in relation
to him specifically

and to all at once

here an element arises
what he sees then is the simultaneity of action
and to him
and to everyone

then he learns from Him how to speak with someone
or some action
Well, maybe in some specific situation
or action in this way
that it solves a private problem
make the problem work right away
for the universal salvation

this is where technology comes in
already at the human level of logical understanding
where the logic is completely simple and clear
i.e. the state of well how can this be applied here
such a term
as if "absolute rationality of each fraction of Consciousness"
and remotely
you see the rationality of the structure of the remote system of the World

i.e. some microparticle, a piece of a plant
structures of absolute reason
i.e. you begin to see that these are intelligent systems and phenomena
and they exist in the structure of decision making
i.e. they also have such tasks
like a person's personality, for example
and in principle they somehow solve them

then you can come in
into the structure of interaction with these systems
just like a person in a group
logs in
well, like some tension of collective action, yes
like some kind of field
and there is interaction between team members, often without words
simply due to some internal state

and in the same way you enter into interaction
with some elements of Reality and that's it
Reality becomes manageable
you know for sure that there will be no problems

this is the main prognostic characteristic
here is the outline that you built
and mostly in many ways by ourselves
sometimes only ourselves

and when you already see it
it is clear then that any action in general in any case
it is realized for you
Well as best as possible

and when you see for example that this action
you can improve it as much as you want, let's say yes
it turns out that the control system here is like this
that in order to do some action
we can first of all consider
the hard factor of Reality
i.e. how is Reality connected with you in this case ?
and see that any of your actions
it is always an action where you are always essentially
generally speaking, you understand almost everything there

that's when you go out
on the structure of such a level of knowledge yes
universal understanding
because with the simultaneous action of the Soul
i.e. the Soul acts everywhere at the same time
that means she has all the knowledge

and it turns out that you naturally understand it this way
how should it be understood
i.e. there is nothing else, then you understand correctly
and then you control the whole Reality at once

I think it is important to reflect here
that simultaneity is a control system
all of Reality at once

because action is control

and that's when you enter such a system
control begins to take place very quickly
often even as if somewhere independently but correctly
as if to externally track
but at the same time you are actually in control
you can even follow how you do it

and then it is a colossal experience first of all

colossal management practice
work like that
and moreover it is a very intensive management system

so in this system it is enough to log in
to this level of universal understanding
understanding of accuracy
correctness of action
understanding the structure of action
and you will definitely implement management

This concludes today's seminar.

thank you for your attention
