

GRIGORY GRABOVOY
The Teaching about God
The uniqueness of the action of the Soul
08.12.2004

Hello again
The topic of today's seminar
this is my Teaching about God
The uniqueness of the action of the Soul

In this seminar I show
that the very uniqueness of the action
i.e. the outgoing level is like this
that the Soul itself which is alone
in a person or in God for example
it creates a transition between
unique i.e. the only action
in the diversity of action

because in order to differentiate diversity
you should always keep that in mind
what is the division of diversity
to a number of unique systems
otherwise we have a monosystem again

that's why it turns out that the action is unique
it is , after all, some kind of characteristic
holographic as if complex multi-volume action
in this case the action exists
as outside the subject of action i.e. Yes as if an external system
this is how action exists within the system

i.e. it turns out that uniqueness
after all, it's not just the level of uniqueness as such
but also the system of work means that
the function of simultaneity precision is realized after all
so the presence of action yes
at any point in space time for example
or in action

that's why in this technology
for example, if we consider the problem
cure there from the disease
or just management of even some
Well For example there are non-standard events there or standard ones yes

it doesn't really matter, generally speaking, any
may even be rather distant events

then the following control characteristic is visible here
that in order to cure a disease, for example
you need to take some level
already precisely distant events
and consider the following status
In the world everything is standardized
the uniqueness of the action is such
what does Eternal unique yes human soul mean
creates all the same Eternal development status
at a certain level

and it turns out that we are from some very distant information
we get the normalized now here
i.e. what needs to be done
so that a person there, for example, would recover , yes
which you want to improve

so in this case the system is like this
that there is interaction
between
by your personal action
and generally speaking, a system of some kind of recovery of health

i.e. you have a reverse one that is still unique
impulse from action
and the impulse is correct
correct if it has the same basis
as an action of your Soul
i.e. you meet, as it were, the reverse action of your Soul

and you differentiate this reverse action
then it turns out that you are doing the right thing
this is the element of precision in this technology

action, for example , from some infinitely distant quantity
some volume in Infinite distance
I repeat here again
comes to the event level
i.e. for example for healing
or managing events of any kind
of course there is a creative plan there , etc.

and then you have a reverse wave level
where do you kind of fix it

i.e. you create the status of your Soul

i.e. by analogy with that
that when you act for example personally and in general
with your personality

then you act as God does

in this case your action element
it acts as your Soul acts

it turns out that well, by analogy with that
as God does
here is the action of the primary control status
this is your True real Soul
and your action means it is similar

then it turns out we can differentiate
where is your True Soul i.e. what does it look like anyway
and therefore, to act there in this way for example Soul
to some control object
or create an intermediate control object
and act, for example, indirectly
but then at least you see
that this is precisely the action of the Soul
this is a precise differentiated process
for your Consciousness

and here it is very clearly visible
that the uniqueness of your Consciousness
in that each element of Consciousness
and all Consciousness as a whole
interacts
with a specific precise element of your Soul
and this is actually a very tough logical principle
recognition of the action of the Soul

and when you start to see
these are logical ones, as it were well markers or something
even the areas are rather luminous
on the structure of the development of the Soul
for example in the control space
then this is essentially an ideology, so to speak
complex ideology of creation of the world
By God
at the point of Consciousness
and at a point of the external world

i.e. here is a very important value
when you work through selection
namely the unique level of the human Soul
where is the transition as I said
into a diverse system of actions

i.e. I didn't show ^{where} the transition itself is
I'm saying there is a single action there
but there is also diversity
and where is the connecting thread, can they be logically presented there?
but it is precisely the connection that is , well, in general, knowledge

but here we should nevertheless consider precisely this
reason
why ^{for example} do people often understand each other very easily ^{yes}
where the interaction mechanism exists
i.e. why does it exist from the point of view of the development of the World
are some similar systems ^{there}

and when you already
^{Well,} you are increasing this level of uniqueness
then it turns out that there is an area of information
which is arranged in this way
that any diversity ^{yes}
becomes a controlled process

because if there is interaction
some unique system
with the exit point of this manifold
i.e. ^{well like} complex information ^{yes}
any forms of information

in this case, here's what's quite interesting
here in this management
a fairly flexible and comprehensive management system
which speaks about that
that even unknown forms of information
interacting
precisely with the unique level of your Soul
are also manageable

and that means here there are, ^{for example,} the parameters of Love
i.e. action in Love
where the action can be there is some regional level

a target action there For example there is Macrosalvation

and there is an action that speaks about it
that this is precisely the unique level
as if in optically in optical manifestation
actions of the human Soul
this is a structure that recognizes
any system of social action
and absolutely instantly
and as if it begins to transform the structure
let's say it a bit abstractly

this is how God does it when he creates physical Reality
He is generally from God's point of view
in the absolute version of Perception, perhaps?
for a person
any element it must be autonomous

because what difference does it make to God in principle?
create gravity
or there for example, another control system
in this place
or increase or decrease

i.e. here is a similar element
it is visible that in the action of the Soul of man
we see the structure of the Soul, which means it is similar to the Action of God

i.e. if for example for the Soul of a person in action
we see the manifested Spirit
then here is precisely the Action of God
this is the Soul of a person, here is an analogy

and it turns out that well, this is still God's Action
so it turns out that we see at a logical level
from its own plane of Perception
what is God
i.e. if we proceed from the human plane of Perception
that God doesn't actually interrupt the contact level at all
on a certain plane of the Soul
i.e. God always shows the way shows the action

and then it turns out to be implemented
some event as if in a complex
make the management such that the World is what it is
i.e. He is like that from the start

and this is precisely the harmony of this action
is that you ^{kind of} live ^{there} happily forever
This is one of the most powerful technologies
namely Eternal life
This is the technology I'm talking about now
it is the uniqueness of the action of the human Soul

after all, the Soul is also an optical expression
and if you have learned to differentiate
uniqueness
there is a prolongation
then you are simply already in the Eternal system

i.e. there is basically more there in general
there is nothing special to do
you are already there
The soul is already Eternal

and so when you start
engage in differentiation
that's the easiest way
to approach this ^{phenomenon} practically
here are the differentiations
i.e. to highlight

in fact, we are talking about
in an abstract logical sense, ^{perhaps}
highlighting a unique area of information
which is ^{generally} satisfactory
some specific properties ^{yes}
some kind of management ^{there}
which highlights the structure of information
on Perception

in this case this information structure
is your personal Soul

and this is precisely the allocation system
considering that everything comes from the Soul itself
at the initial level
for the personality of a person
it is what it represents
here is a special technological cycle

because it turns out that the control level

Well, what could be more at the management level?
than the Soul of man and for man
This is the maximum control level, generally speaking.
in general action so to speak

and then the Action of God begins
in a logical sense it is true
because on the Spiritual level
often differentiation of such
something so clear does not happen
because of high speeds
and this is where the Action of God must be recognized
but on a logical level it is clear

and how does it work out here?
if in the Spiritual level
Action of God

this is the same type of information with the same glow
then logically these are completely different systems

so here is the selection precisely in the logical plan
so it turns out that a person still needs logic, right?
and not only there direct there flow Perception of information
and for example real management

i.e. from God's point of view it's okay means to Him
what's the logic there?
what is direct control
in principle it can convert or interchange
as if concepts
it may be the same thing

for a person it is here as if clearly demarcated
in this technology the value should be

i.e. we are consolidating the logical phase
we think what does logical phase mean
like she makes this border

but when is this border between
human action
and the Action of God
begins to be visualized in Consciousness
then it turns out that logic is a combination
The Actions of the Soul of God and in principle the True Soul of God
with the Soul of man

and this is what is obtained with such a combination
we have those things that give birth to logic

Well, there are trees, space , oxygen, etc.

this generates logical actions

i.e. if there is some road

to get through the road by some other route

except let's say with our feet

Well, of course you can go by car

but I mean in general, as it were

it's still the same action

typical action produces logical consequences yes

i.e. contact

Souls of God and Souls of Man

gives birth to the material world it turns out

in ordinary incarnation yes in ordinary manifestation

and to begin to act on this World

we in this case

knowing your Soul

I basically just highlighted it in the management right now

this very information

or the optical component of the Soul

just on the whole system of contact

i.e. you can examine your Soul

it can be viewed in dynamics

but it's easier to highlight the point of contact

then it is static this area

and that means the work of this area consists only in that

what do we need to highlight

the uniqueness of the Action of the Soul of God

that's all

in this system it turns out yes

We simplify the task very simply

as soon as we begin to understand and see

the uniqueness of the Action of the Soul of God

at the phase of these borders

then we see the problem

and the problem contains the answer

i.e. there is already a path of Infinite development

and this path is again your Soul

i.e. we begin to understand God

and when you start to develop
through understanding
then the path is known in advance
you are going somewhere well as if not constantly fixated on the control
and through understanding

and this is what I talked about a lot today
that a natural path to control opens up
this is how a person should be
in its Eternal development
it is not necessarily a permanent management
as if from the point of view
Well, this is management, but it is natural management.

i.e. the control is not realized or something
or rather it is not even perceived or one can say
and is not realized or perceived in many ways
as a system, let's say so something controlled
well, precise action

i.e. control of human movement and its development
it's the same thing

for example, you can say that there is a word
if we consider yes for example some word
well any, for example , I used the word there "more correctly" yes
well, "more precisely" there the word basically "faith" also begins
through the same first three letters there yes

so when we speak we can perceive
the name there is "Faith" for example you can have "faith in God" there yes
belief in some action or word "more correctly"

i.e. it turns out that in this case
example, here is a female name
and it turns out that if we consider such a system
then there is a combination here
for example, a woman's name and faith as such
for example, faith in God
and in principle in the future we can clearly separate
then the system
why did god create for example there is a man and a woman there
why did he separate them

i.e., delving into the analysis of the Soul of God
from the point of view of human perception
it means it is clear that every person
can call the same phenomenon by different names
from the point of view
he is free precisely from this point of view

so this is the division that results
one word for two structures
and one seemingly unique word, yes, "faith"
is divided into two semantic meanings
for Human Perception

and even more so here is a whole person
i.e. a person, a woman, "Faith" and "faith" as such, yes
"faith in God" for example
and is there faith in general, as if simply the concept of "faith", the third
meaning, etc.

and when we see that such a unique concept
logically it's very simple
it would seem that one concept has many meanings
but I sort of understood one word in this case like this
which I used simply

and if we consider the phenomena of Reality
then in any system there is
it is the branching of uniqueness
as if into components or into different semantic systems

i.e. in this way we really approach
to the concept of "God in Action" and in His manifestation
God naturally the more we get closer to him it turns out to be precisely in
management
the more in understanding His Action
we are considering some next action
then the more we see this nuance in principle
what we have in essence is that it turns out that this is the effect
we see how God creates Reality

because there is an increase in the number of concepts
from one approach

i.e. for example, there is a horizon

we can say so
We can approach the horizon with our Consciousness
but along the way we see
what Consciousness when in geometric level
it goes through some elements
here is the horizon somewhere far away , for example , five kilometers away

but there are trees there
i.e. our Consciousness is captured, as it were
or are there some fields there
these elements yes
but when we want to understand
and how did God even get here?
i.e. where is His trajectory He can also look like that

then it turns out we see the structure
precisely the unique line of God's Action
and this line is realized in the objects themselves, i.e. it is as if
in physical Perception these are the objects themselves
the same land, fields and trees there
and ultimately the horizon itself

we can look beyond the horizon
there mentally imagine yes
the one who developed, for example, a system of clairvoyance
he can, in principle, to a certain extent
managerial clairvoyance
see the following system there
what's beyond the horizon

but in principle any person
why do I say that My Teaching
anyone can learn there
any person can just this horizon
how to just perceive everything
as a system of branching of unique actions

what is unique about it, what is it unique about it
but at the same time it organizes diversity

then it will be logically clear
according to the previous phase of organization
it's clear what's there

i.e. if a car is driving on the road
it's clear that it's 10 kilometers away

even if it disappeared over the horizon
she still drives on the road or stands still
There are two options

it means the same thing here
if we know something well as if narrowing
in a possible variant of action
concept
i.e. "the unique line of God's Action"
we understand what is there

and controlled clairvoyance arises
just from understanding even
i.e. you can, for example, see a person
and immediately make management for its recovery

as if here in this case
there is no need to look into the diagnosis there
but you just need to see it there for example, a healthy person in the future
its unique properties and in general
just do it all to do management
so that he can just be healthy now
In principle, you shouldn't be interested in the diagnosis then
if he didn't tell you himself

You can of course watch it in full
diagnose understand diagnosis
but then it means that the diagnosis is still the control one
from the point of view that it is aimed only at recovery
i.e. you should diagnose it like this then
so that any diagnostics
even in your Perception
already improved his health

and therefore there is some factor
which speaks about that
that your approach is in the level of Perception
should improve health for example or improve events
it doesn't matter what it's about

you just have to do some element
as if immediately creating a more favorable background

Well, if the person there knows the diagnosis, that's a different question.
then the existing design is corrected
if for example he doesn't know
then all you do is regulate

and then it turns out
that this is Norma
this is the uniqueness of the Action of the line of God
this is the Norm of events, namely creative events

it's not difficult to determine it
By the way, it is visualized as a thread
in relation to the same horizon
you can even just try it practically
it's easiest there
it is when a person physically looks at the horizon
or at least perceives it spiritually

Well, in Spiritual vision the horizon is distant
and on the physical one you can just visually
and see how these lines are transformed into space

the same thing the Soul reproduces
Spiritual level of a person
i.e. God reproduces along unique lines
physical space that includes
for example Spiritual manifestations
action of the Spirit
and a person can see how the Soul creates the action of the Spirit
how does the Spirit reproduce at all

at the same time, at the same time, we can clearly see
how the Soul reproduces, for example, the following action
why does it appear at some point
this or that action of a person, i.e.
or around a person

that's what it's for, yes
there is a phase of collective Consciousness

often the action is manifested for that
so that there is a collective Perception
and a collective level of knowledge, so to speak
of this manifestation in the World

i.e. any manifestation of action is obtained
it's a system of sort of drawing attention yes
on yourself

so from the point of view of logic

man attracted God's attention

it means and because God considered him, so to speak Yes
although it is His creation
from a logical point of view I speak from the other side
this is again a collective action from each person
to Him
or from God to man

and the manifestation of man

this is already a fact that has been realized
i.e. since it exists
and this fact is practically speaking
It is no longer possible to change it with any information
it turns out that all external systems of the World
they practically boil down to this
that man lives always

there is logic here, these threads are visible

from each information object
to a person

i.e. he showed some action

he attracted attention

exists as if well, it's like the next level

like this, for example, we look beyond the horizon

some kind of system that, for example, could theoretically exist yes

you can get closer to the horizon

to see if it really is there, yes, i.e. to check

the same phase of objectification

Well, if we consider God's position there

what is an objective quantity for God in general

so He can do everything anyway

so it turns out that from His point of view

the objectification system is still an external system, a collective system of
control over a certain process

and that's how it is as when a person already moves to the collective phase

this is where the main control comes in

i.e. if we have, for example, again what am I saying

collective management arises

when the task is here yes as if a common task

but as if the center of the task yes

it is still the man himself

I say that every action

at some point it arises
to attract attention
if there is attention-grabbing going on there
by some action
that means people are paying attention
and they start working collectively ^{yes}
with this task or ^{with} this situation

therefore the very appearance of man
this is a completely unique action
why are people unique
and attracting everyone's attention , so to speak
in terms of, again, ^{satisfying} the external environment
i.e. Infinite development

I show it all the time now
the mechanism of Eternal life after all

Well, it's a simple fact for example, I kind of said there
that you need to turn off your mobile phone, but it still ^{rings}
i.e. the person attracts attention
For what
then we need to work on his problem at the moment

it means because the situation is like ^{this}
what we are now paying attention to ^{is, as it were ,}
on that structure
that for something, i.e. from the point of view of logic, this is a normal process
^{well there as if For example} it's not turned off ^{there} or they didn't pay attention ^{yes}
as it would seem logical on the phone

the same thing exists in the information system
places that don't ^{seem} to attract attention
i.e. there are cities, there are some points of collective action
but there is ^{just} space
It seems that even ^{there} people rarely appear or do not appear
hard to reach place

then it turns out how in this case attention is attracted
to this place ^{yes For example}
i.e. there is, ^{as it were,} such an understanding in this case
unique action

i.e. the action, ^{let's assume,} of one person
^{so let's assume} it's directed at someone else
here we have a closed system
there is mutual development of Eternal development

and what to do with a system that is completely torn off?

as if from the Consciousness of man yes

because people simply don't go there

Well, maybe these places already exist on the maps now

Well, what about a distant galaxy, for example?

there is a very simple motive here

as if in the Action of God

here we must already understand the motivation of God's Action

i.e. why did He create such places then?

so if we put the question logically like this

why not create continuous streets there

densely populated areas and all that

Means well, from the point of view of the motive of the action

Well, first of all, a person is free, he suddenly doesn't want to, yes

the first element is let's say logical

but in reality God shows his Soul

He shows that the Action of His Soul is so limitless

that He controls, for example, all processes at once, yes

and due to the fact that a person, for example, has

some transition systems for example

he somehow, one way or another, for example, attracts attention

or performs some actions

he understands that these spaces are controlled by him

there by joint actions

By the action of God

and so spaces must exist

which have a kind of neutral autonomous status

i.e. what we are talking about here is that joint action

organizes some external spaces

which have the same, in principle, independent status

and then it becomes clear to us

why one piece of information

touching with another saves

as autonomy

as well as a differentiated system

i.e. it becomes clear to us

why it doesn't matter at all to God

what to organize

there is a platform, some kind of mountain, cell, molecule, etc.

because the interaction mechanism
based only on unique action
as one element of information
well in relation to another
and also on the unique, for example, property of the development of God's Love,
yes
to the person to there to that
to confirm some system there
a person does exactly the same
he is there that attracts attention
it may be his love for God

there is love for God and therefore for man
love for God means love for man

and when does this level of management begin?
as if in implementation yes
it becomes clear that it is unique
i.e. the manifested action
from the point of view of uniqueness
Well, that is, what is unique?
no contact with external systems
this is also one of the properties of uniqueness
and therefore a stable system

assume that we can take out control
to the level of the next action, yes
we have this option
here to cure the disease yes
or make sure there won't be any relapses there
we must obtain the uniqueness of the system
in general information communications

i.e. under any combination of events
the system remains in equilibrium
it doesn't change at all
if it's just human health for example Yes

hence the property of uniqueness
it is also a characteristic of stability

and then we already understand
that when we consider
this discrete, so to speak, area of interaction
when one area of information interacts with another

then we see how God organizes
in discrete Action

For example there is gravity there

i.e. from the point of view of logic it is clear
there is some mass there and physical laws exist
but who gave the Perception of the masses
how did god give mass perception
for a scientist to go and figure out that mass exists

so in God's Action what difference does it make to Him
He gives the whole system in full
i.e. He must show the phase of logical Perception
must synchronize the phase of logical Perception
with a real existing object
and get for example the formula yes

so it turns out that at this entire level
the third property arises again
example , this is why it's so vast there
people build cities there, develop, build some technologies

and because this is the Law of Development
similar logical action

i.e. God showed the trajectory once and said the path
It causes this to happen well as if by itself
if you think about it, for example
in the True meaning of people's actions, so to speak
and think about why they are always building something there
they don't live there at the level of a primitive communal system, yes
Means Well, it's clear there's a civilization service there
some already ripe conditions

but by and large a person has the right to choose
there are people living in free settlements there now
nevertheless, civilization still develops
i.e. there is a certain objectified process
which if you highlight this line
God's line
then this is the line of Eternal development

and in Eternal development it is permissible
and generally speaking the direction of a person's life

should still be more favorable for the person himself
the man himself

i.e. it is like a correspondence to the social function of a person
social role and future development

or there in the political system it is a certain system
where the most favorable properties were revealed in the policy
there for a specific person

then it turns out that a person sort of chooses
is politics there
based on very clear fast levels of Perception
i.e. he chooses correctly all the time by the way
no matter what they say, it is in politics
A person always chooses, more precisely , a leader, for example, a party, etc.

because there is a combination here
there are economic, social systems, there are authorities, etc.

it turns out that based on this level
as if transformation of knowledge yes
we get the following
that in order to heal a person there
do some action, etc.

we must first know and have the technology
that we will definitely, i.e. in any case
we can there For example well, yes, to improve health
restore the health of any person there

well including myself

minimum level of Eternal development
a person must be able to do this
i.e. he should at least have it there For example there
well, practical health
for entry level action

to the next level
its event layer level of development of events
should be like this
that basically development occurs along the line of one's Soul
i.e. he doesn't seem to be making any effort
would apply this more to everyday life
as if to the everyday plan of human development
but I show that this is what it is

the level is somehow still of a higher plane at the same time

i.e. many people develop naturally
they have good events
but at the same time they don't necessarily make any effort there
they live naturally

and that's right
it means that when we talk about it
that they live naturally
Well then take a look
where does the Macrosalvation level exist
i.e. apply intellectual, simply logical efforts
to save everyone
no problem, here it is applied without stress

i.e. Save everyone
this turns out to be a fairly trivial task
it's just development
beyond the reach of the individuality of the human Soul
a person develops along his Soul line
and that's all
then there is no tension
Saving the World doesn't mean that there
it's like, well, if you compare it, you can't even lift ten kilograms
it's easier in this situation

because you are still Eternal

and you are actually developing
if necessary you can raise a hundred and fifty there and train yes
who needs it, who can raise it right away
that's not the point here

Saving the World is a natural state of being
a person is always doing something
and occurs at a certain level
this is Macro Salvation
inside his Soul

because he sees God
sees His tasks
and contributes in essence one way or another

and when he starts to receive

its own kind of intellectual phase of management , yes
in action
when he begins to see that he is capable of much
or there let's say everything from the point of view of Macrosalvation
i.e. he can do anything at all, just to
and will achieve Macro Salvation of Salvation of all

that's when the phase really emerges
why human events
as if they were light there yes, they are unambiguous and simple
it is in Macrosalvation in the phase of Eternal development there

because he is ahead with his Soul, in fact, yes
Well, the Soul is all the time after all
more like a level of advancement
and sometimes into Infinity

i.e. a person always sees Infinity
that he is alive and well there
this is where this system is, as it were well, some kind of golden pendulum
I call it conditionally there it just looks like a pendulum
gold color
to move it from Infinity here
and give it to everyone in their hands
let him carry it somewhere near his heart

then he is the Eternal Man
he has no problems
it develops forever and that's all

the only thing here is that this aspect needs to be very clear
what is the most interesting thing about this technology
Here we need to monitor very carefully
the naturalness of one's own systems of perception
it's technology after all

and we need to remember
how do we assume the control system yes
how does the control system work how would yours be
corresponds to what is natural for you always

this is how a person can understand what is always natural for him
you can remember some elements of childhood there
when he took the situation calmly there

well, that is, there is some kind of Norm
such a spiritual soul

more even than the Soul's Perception
i.e. he understands with his soul that he is in this state
this really means that it is a more comfortable system
This is exactly the control system that I am talking about now

and then it turns out that any action there
Well For example there that means any kind of systems
including phone calls there, let people at least sing songs there
in any situation when you need to listen to a lecture, for example, yes
this is normal in this situation

that's because there is a control line
coming from a person

coming from God at the same time, for example
and at the same time other people perceive everything correctly
because they see
this is the solidarity sense of the precision of development
the accuracy of development
and the accuracy of development in the Eternal level of development
this is where the phrase begins to unpack

and now this pendulum is already starting
little by little, as it were well or quickly it doesn't matter how
he begins to come to every person
and then it becomes clear that
why did god create this collective level
or something of reason and perception
that the level of action to you for example it is like this
what do you see that collective level
reproduces similar
the control system just like God does

i.e. on average it would seem yes
here is the collective phase of Consciousness
works the same way in contact
as God does
i.e. no one makes mistakes

when people come to this phase of management
all Eternal life is already revealed
already for everyone

there will never leave under any circumstances
i.e. he will never have it there
For example there are some problems there

Well at least he won't have biological death
exactly in this case
he gets into a zone, well , as described, let's say, in Shambhala, yes
some special space

this means that those who have passed away are beginning to be resurrected,
and often en masse
and this is this kind of control system
here is the system of resurrection of the departed
This is a special technology
with the simultaneous formation of space
masses there let's assume that the Earth often even by the way buildings

it will be possible to see
as an intelligent system
a person's thought becomes similar to that
how does god work

i.e. a lot can happen
at the level of, as it were, simple materialization of control objects

but this is only in that case
if this is the prevailing mass
integration of correct development it is united

i.e. it can be done locally
in the conditions of some terrain there, it is often flat
i.e. a large number of people act and help
there in the construction of some material systems

or well, there is a concept of "brainstorming"
there are many people gathering for heuristic analysis
and they solve some problem
it's a similar system
when there is a kind of localization of the system
i.e. the phase of autonomy is artificially added
in the system of collective Consciousness
and there questions begin to be resolved due to the coherence of actions

and for example why is that clear
that good will always triumph over evil
so let's say in such a figurative way , well , specifically
why will this always happen and will happen yes
eventually completely

because the collective phase

what God gave means for Eternal development
goodness will spread to all systems
and the disuniting one, well For example there is a phase of evil for example
it always has a local manifestation

i.e. since well let's say the evil phase so let's say
or some negative information
can't have real grounds yes
it's like floatability at first it exists
then it starts to bend
and the information seems to be decreasing
by status in any case

that's why they often say
that he has a high spiritual level there
correct positional level
it makes a person inaccessible
there for some negative impacts
this is where it is explained why

that often technology there is protection
is just intensive there Macro help yes
Macro-help for civilization as a whole
To the world
and that's all

a person gets into
here in this well like some kind of flow
Macro Management Level
and then it would seem that the negative forces would not be able to reach him
because they are just so far away
that they can't even get close
on information
it means they physically can't

i.e. this is where the thought comes into play
that the protection is, well , so -called protection , let's say
in fact, the natural state of affairs is this
that with the increase in the number of such control systems
Well, well as if the negative phase is simply squeezed out
from the collective management system
the concept of "death" is absent there, for example, etc.
gradually people get used to a different status of life yes

then the system becomes more flexible

there for example, like in Shambhala, there are mobile systems, etc.

and it turns out that it means here

Well, I use some descriptions of Shambhala

and so in Reality there for example Well there you can there

let's say we somehow get through there

those. integrated space

and the walls are not an obstacle there

i.e. there is , as it were, a different property of space-time

and this arises because

integrated

i.e. coherent thought in the physics of processes

it is very clear that the system is coherent

Here is a man who wants to go forward

then everything here is correct

and the entire system of collective Consciousness

it works as if for him

and a projection of the collective Consciousness in this case

is for example a building yes

if he doesn't want to go around the door

he can basically get through there

For example there through the wall theoretically yes

somehow or in a simpler way

but then, as a coherent Consciousness, it seems to expand the system

and a person in principle can quite well, as it were, use

other properties of the material environment

well, figuratively or literally

it doesn't mean that he just tears the wall apart and goes

but he seems to enter space in a different way

is this teleportation

maybe it could be a mechanism

right up to the point of dividing the walls there, etc.

or other systems of geometric designs

which are realized in this case

i.e. it turns out that it is the same as

Well, for God who created Reality

what difference does it make to him where to go

i.e. for Him Reality

it is a product of its own reproduction

man approaches the Action of God yes

he should also have some kind of such opportunity
implement one way or another

and it turns out that we understand what to do now
in the likeness of what God does

so we are just logically
we start to draw

there is a connection of their personal systems
i.e. their unique actions on Macroreality

and for this
what is Macroreality
what is your personality
must have personal characteristics
which you naturally and unconditionally possess
i.e. any person has it

and here's how to make it inseparable
element of external Reality
from your personality
i.e. to see as an extension of one's personality
so you have a desire to go there
took passed
there is a desire to quickly get to some place
once you got there you weren't late

with all this
you can kind of walk among the same sidewalks there yes
and you may not get the impression
that there is something else, some kind of acceleration there

Well, in my practice, for example, where I worked
Well, it's a very long distance, there's a flight test station there .
[...] technical base
I managed to get through it in a very short time
when external observations were as if
Often people even observed these conditions
but I had to hurry

so for me it was normal
I was walking, as a matter of fact, with a sort of normal step
but it turned out to be in a very short time
i.e. it was impossible to walk calmly there even if you were running
to walk such a distance
I nevertheless reached the right place

to the plane
until he flew away there, for example

i.e. this is actually the problem here
not what it looks like on the outside
It's just that when people saw it, they started recording it
and when does a person start doing this
then it's not noticeable, well is it for him?

i.e. he lives in the same environment
the environment does not change in any way
but some processes of acceleration of action arise

that's how they come about yes
from God's point of view
any action is adapted to the person
if he wants he will be there he will pass
in the logical phase the same space
and will end up there again

but why is this logic embedded in logic
that there is space there for several kilometers
bypass the logical phase in the collective Consciousness
as if Well, there's no point
and how to get around it
it exists yes in the collective Consciousness

and it undergoes adequate action
but at the same time it seems to be faster there

why does it turn out to be faster
he walks on his feet, right?
here from God's point of view
This is where coherence arises
i.e. the uniqueness of the Personality of God
the individual sets goals and achieves them

God perceives the personal tasks of each person
as well as objects of external Reality

if this is uniqueness
coherence with God
she well as if adapted to the conditions
Well, why does he need it anyway, and the person there
if someone needs to save please no problem
and it's just that there is no logical sense there at all

and it turns out that based on this
a very important property of this, for example , seminar arises
what is coherence
i.e. identifying a unique property of interaction
namely the unique line of interaction of a certain
which is visible to God and man

God immediately understands the tasks of man and helps Him
He begins to transform the space.
in Human Perception
i.e. makes his Perception similar to the Action of God

and then it turns out he is of course
will be in the right place at the right time

at the same time, I just kept track of the time
really such there ten fifteen there twenty five minutes
how they overcome it as if
over time they are overcome
i.e., for example, that's where I usually go
For example there for there thirty five minutes
Well, anyone can go there
you can walk like this in fifteen minutes, sometimes in ten
the time difference is clearly visible
it is perceived logically
and let's say at the same time, everything is the same

i.e. I'm just a person walking there and that's it
there on the sidewalk yes
the only effect is visual there like that, like more
Well as if the external situation is calmer

and here, well, that is , like, there is such a feeling
that there is less traffic there
i.e. some feeling arises

and here, well, it's just from practice, more like aviation
this action is optional yes
This is kind of necessary if a person is late for something
or maybe there really is some kind of Macro problem there
which needs to be solved

under normal conditions, just as a rule
it's not like there's a special level there
there is a need to control the digital level there

or make this action mandatory ^{there} systemically
but any action must ultimately be systemic

and it turns out that based on this
to achieve systematicity
here you apply it when necessary
precisely from the point of view of Macrosalvation
here is this interaction, ^{for example}, of God and man
consists in this case in that
what God shows
^{in fact}, its own management system
then He must have a physical human body
should show how it happens
from His Body
and show what or how His Body is developing

so here it turns out that there is one here too
very powerful intensive mechanism
^{for example}, health improvement
the mechanism of precisely Eternal development
to walk ^{as if} near the Physical Body of the One God
at least mentally
or ^{is it} really there ^{and} nearby

then it turns out
that then a person gains experience
because it goes in sync ^{yes} there

Well, of course this is not a formation
if ^{we} all go together in one direction
that is, the unifying principle , ^{well}, the commander, ^{for example} Yes

and it turns out that here we are
this is the unifying principle we have in that
what ^{well} ^{there} the formation passed correctly
or ^{there} is no need to build a group of people ^{there}

walked some distance
it has come true it is passed on to collective experience

and here it turns out that as soon as you start
pass on to collective experience
their received actions
knowledge gained
This is where the fundamental point arises
what is in today's lecture

you must show
the uniqueness of its action in relation to all
and in relation to yourself
see there well let's say absolute stability
well, some kind of certain power yes
in the action of your personality in Infinity and
into Infinity

i.e. you can see that the action is already going to Infinity
and through Infinity to transmit to each person

as soon as you can
By the way, this is elementary, this line is clearly visible
going into Infinity
you can instantly understand clearly
that based on the uniqueness of your Soul
Your perception of God is also on a unique level.

then you can do it in one action
transmit all knowledge at once
it is Macrosalvation first and foremost
in one action in any moreover

because you are differentiable by everyone
when you make yourself unique
then everyone sees you
and that's all

in this action you certainly achieve
in your management you must achieve
because everyone is paying attention
they turn to it of their own free will
You're not forcing anyone
you want to do it and you do it

it turns out you are harmoniously natural
you seem to be not making any particularly sharp efforts

In fact
This is a product of intellectual activity, of course.
under today's system of governance

here it is necessary to do it sometimes
sufficiently prolonged control
from the point of view of Perception

i.e. development of thought, thought management, etc.

and the most important thing is what you achieve here
absolutely harmonious management

as if based on its natural resources

i.e. you don't need to change much

i.e. almost anyone can master this system

very fast

so when you work on this system

the main thing is to highlight the uniqueness of each line

including yours

and be sure to reach the management system

this is where you can achieve

mandatory i.e. systemic management

their tasks

i.e. their solutions

favorable decision

This concludes today's seminar.

Thank you very much for your attention
