

GRIGORY GRABOVOY
The Teaching about God
The Universal Action of God
16.06.2004

Hello

The topic of today's seminar
this is my Teaching about God
The Universal Action of God

In this topic I would like to consider
principle of God's Action
when exactly does God act
for example at the initial moment of time
and in doing so an element of Infinite Action is created

i.e. if, for example, in this technology
be able to get the action immediately Infinite
Well, let's tell exactly the person who wants to receive it
for example the direct control effect

then it turns out that in this control element
it is necessary to consider first of all that
as God originally from Himself
carries out this Action
Well, that is, there must be action.
firstly directed
and immediately Infinite

for this it turns out that in this technology
we need to consider the totality
as a private, i.e. an action, for example , towards a specific person
but also the action is for everyone at once

and it turns out that when we want to look
on the applied meaning of this control technique
then first of all we need to consider
the structure of one's own Soul
when the Soul of a person begins to realize the action
together with the Creator with the One God

and when this action occurs simultaneously
i.e. God acts and man acts
it turns out that the action is truly universal

because when God acts
and at the same time a person

then it turns out that the person is acting correctly
it is clear that he acts infinitely

because the Action of God is Infinite

and in this control structure
must be considered first of all
element of such control
when a person through personal efforts
i.e. creating your own management system
maybe for example some super complex one
or there is a private management system
translate exactly into such an action

i.e. in this case we are talking about
that even for example some system of complex actions
this is also an Infinite level action

and so when we talk about this management technique
we need to consider that process
that in the Soul of a person any process
which comes from
from the Soul of man and from the Soul of God
this is the correct process

i.e. even if there is a person there
well, he does some everyday things
or does for example management
due to complex Macrosalvation technologies
then it turns out that these actions should also be co-directed

i.e. a person must receive control
the same as God shows and as God acts
in almost any system and in any situation

and in this connection in this control system
First of all, we need to consider
how does God work in the first place
i.e. when He builds His own Action
how does it suddenly become Infinite

for this we need to consider
The spiritual structure of God
when God makes management coming from Himself

but going first and foremost to people

because any system, generally speaking,
at the fundamental level of the World

it operates from the level
from like to like

so when you start
receive control from God personally
it turns out that we need to consider here
such technology
when you see that that signal let's say yes or that information
which comes to you personally
Firstly, it is Macro-creative
because you took it personally

i.e. it turns out that you are already personally responsible for that
what you do is the situation and information Macrocreative
for everyone, by the way

i.e. it turns out in the field of management technology
this is done well in general, it's a simple level
some filter is installed yes
that any information coming to you
immediately has a Macro signal that says that
that for everyone there is a level of Macro-creation

i.e. by the way it is possible to heal
in general, practically immediately, generally speaking, all diseases
what we are really talking about here is
that you can enter that area
where there is practically no disease yes
that's exactly at the management level
where you enter directly into the field of obtaining precision knowledge
where there are no diseases

and it turns out that by synchronizing
here with the Action of God
you get almost the same control
what's next Norma

i.e. here is the transition to the level of the Norm
it is a personal relationship with God
i.e. where God gives only Macro-creation
then it turns out that as soon as you enter

to this level of management
you get the norm anyway
because there is God's Action there
namely, universal Action

after all, God is originally, let's say, in a local place
in your Physical Body
He still acts Macro-creatively

so it turns out that if you follow
how is the signal going
Means well, to some specific place
you can get Norma in that same place

and it turns out that in management when you act like this
you can immediately pass the information to all people

i.e. when you try to convey to all people
information immediately
your soul becomes clear and bright
i.e. this generally becomes
this is the level of the World around you
that the light is realized immediately to everyone

i.e. you don't have to translate the structure
let's assume control at some logical level
or make some technology
the main thing is to show that your Soul is shining
glows with knowledge
namely universal life
Eternal Life
and the general, precisely universal Salvation

when we consider such a technique
for example, when it comes to resurrection
general resurrection
in this case it is the glow, for example, of the shower of those
Who knows this technology?
or even strives for it
causes the absence of that Reality
that death even exists

it turns out that the person is already becoming alive yes
or the person stops getting sick
or the disease doesn't exist at all

i.e. here we are talking about

about the radical level of management
when the Soul of a man is
Well, let's say, taking on a certain level of responsibilities, yes
and control as if by the level of action by the level of aspiration
precisely to the action of universal Salvation
solves the same problems on his own
as God shows and does

then it turns out that people are quite capable
It's really possible to develop forever

have this data now
that they are always evolving
have all the technologies of Eternal Development

and at the same time when we, for example, logically yes
people know that there is a level of management
when people, for example, due to current management technology
make the Eternal Development System
it turns out that a person is now able to immediately understand
that he has already mastered the technologies of Eternal Development

after all, initially God faces the same task
being for example yes in the Physical Body of a person
well just a person
He still builds the task of the next development

and it turns out that the person is
generally speaking, in such conditions
and here it is enough to know the technology
which will allow him to personally resolve issues
namely Eternal development
after all, the question, generally speaking, is only in the system of knowledge

and when do you start this management system
or development so to speak for universal development
distribute already generally speaking to everyone
then it turns out that you have that level of management
which is truly universal

i.e. you see where the general level of implementation of all is

i.e. there is a level of universal realization of Eternal life
as the level of, so to speak, collective Consciousness
and when you start acting on your own
you start to see how other people work

i.e. well, in fact it looks like this
that when you start acting like this
it's enough to just see how others act
who learned yes let's say so

but you can see what is in the Soul of a person
there is knowledge
which allow him to do this without fail
i.e. he has original knowledge

and it turns out that in order for knowledge, for example , yours, yes
pass on to another person

it is enough just to open a certain view to him yes
Perception of certain processes in this World

then it turns out that when he sees
how does it work specifically, for example, personally God Himself
he starts doing the same thing
and in principle through a collective management system
when the connection between your personal and collective
generally speaking, this is one control impulse

it turns out that you really come to that
what is your personal impulse control
it becomes universal
i.e. even when you are solving a specific problem

in this case i handed over control
on a logical level to a greater extent
control
so when you start working
for example, at the level of development of the structure of the Soul
it turns out that it is the spread of your Soul
in the management area
this is also logic, but the logic of the development of your Soul
in this area of information

for when God makes management
for example, into some system
It's actually there, yes.
The soul of God exists in the same place anyway
just like the Soul of any person in general
there is an action of the Soul, it is meant in this place

but there is also a principle of the existence of the human Soul
in that place

because originally when God created
the whole World and the whole Reality
He still initially came from within Himself.
therefore the Soul of any person
has unlimited access
at the level of Macro-creation

it turns out that at the moment of the creation of the Soul
God has shown at a certain level
the login system specifically for Macro Access

and based on this
we can do it in a practical way, so to speak
in such a pragmatic aspect

see how
in the conditions of, for example, the technogenesis of society
when exactly such a situation faces a person
that he is forced to control
a system for example of development of some technical devices yes
system of remote areas of information
let's assume satellite systems that may be problematic
in terms of opportunities there
the beginning of some global catastrophe, for example

although there is now data that such a catastrophe will not happen
nevertheless we must be able to
technological control is still necessary in any case
any technical system yes

and not only technical
but any systems that can be
for example, harmful to humans
meaning the endless development of civilization

this is the case where the question arises
in front of every person
his action is correct
in order to ensure precisely Eternal development
what technology does it lead to exactly that
that Eternal development will generally go on
simply harmoniously creative

here the question is still about choosing a solution

in the system of Macroinformation
after all, Macro access
this is also a skill from Macroinformation
highlight a specific one
it is the local level of management

i.e. there is some information

For example there is information from television, newspapers, etc.
and it turns out that when we have
generally speaking from the media
if we see the aspect of this action
Infinite action of some level of development
then we can fully control the Infinite Future

after all, the task of Infinite development
this is actually control
beyond the Infinite level of future development

and in this case

Well For example there from our practice of diagnostics of aircraft we assume

I even did this kind of diagnostics , among other things
sometimes it was necessary due to production needs
that I did diagnostics
for the entire level of development of this aircraft yes
until it is already at a generally non-functional level
i.e. when the plane is already being written off
for example, due to old age and wear and tear of the material

it turns out that the next level is here
we need to make management so that
in essence, the structure of the material wear
was not implemented
in the information development system

i.e. this element can perceive itself

Human

that's why he is like God

he can perceive any level

where is the level for example well, some limbs yes

a person can, for example, this plane

or there we will restore, let's say, make an extension of the resource

or get experience on how to do it

so that his personal development becomes Infinite

i.e. at any final level

there is an element of opening the Infinite Plan

for example, any finite quantities
there is Macrogalaxy starry sky
any control systems
where there is precisely a level of some kind of locality yes
contains the Infinite System

and so that for example in that plane, well in that specific one
I suppose I diagnosed the plane
to give an accurate forecast
need to know
namely the Infinite phase of development
from a certain period, as it were

when this Infinite phase is visible
all events are quite easy to follow

God made the government this way
and I do so
so that control can take place
from the level of, as it were, omniscience

i.e. it is very easy to show the development system in this way
what comes from God
this is an action that is also ongoing
and from a person

i.e. simultaneity of action yes
God and man

then it turns out that this is where it starts
it is the level of universal harmony
and it is immediately clear that this is an airplane
it's not just that it will have some defects there
and he definitely flies there safely
that's exactly it, there won't be any disasters there at least
and in general
including aviation accidents, even minor ones

i.e. the management status is immediately established

if in management
for example, to lay down the status of universal development
then it turns out to be what I said
absence yes for example, diseases in people

absence of any problems
this is the exit level
into a specific information system
Well like just a transition, let 's say so

and when is this transition level
is carried out in this way
that the Action of God is located
for example in the Physical Body of a person
and yet it is all visible
that God is the only one who can
be in the Physical Body of a person
when for example God acts in conditions
the same way a person acts
what problems does a person have to learn

i.e. formally he should
For example take a closer look at some details
well , and make a similar control system, for example

i.e. in this case in order to have
Eternal development is precisely in the Infinite plan
it is necessary through any completed forms so to speak Yes
be able to highlight
namely the management structure of the Infinite level

but it turns out if we consider
the shape of the human body
then it is clear accordingly
that the human body has the same level of access
as if yes to the individual to himself

i.e. it turns out that if , well, in general, this is the approach
or consider in a general context
the structure of human personality development
then in this case
enough from a certain point of view
to examine and know oneself
what you are doing is not just some kind of control system, yes
for your future events
but you are already building events for yourself in the Infinite Plan

i.e. in this case we are talking about
that you should highlight the structure
where is the Soul organizing the body
interacts with God with the One God

it is in the process of organizing the body

here is a rather important and key point
it is connected with that
that the allocation of this design in management
when the action of the Soul is precisely manifested
in creating your own ^{physical} body
for the body is also considered as a part of the Soul

then we can see
that the Action of God and man
happen simultaneously
for God is also originally
He created the human body

it turns out that we can in the context of just knowledge
these are ^{basically} the nodal points of the Universe
see how it functions
it is our own Infinite Future

because that's what we're talking about
that the technologies of Infinite development
they must be very specific
perfectly structured
including technologies of Spiritual management
should also be structured
or ^{there is} Soul management

structured does not mean they are complex
they can be quite simple
but you must see it absolutely clearly and precisely
that future development is Infinite
and the technologies, generally speaking, are already with you now
i.e. they are with you now

if you own this control system
it turns out that you are watching ^{quite calmly}
for all future events
you don't have problems you build them
and build based on that
that you are doing some personal business of yours
but at the same time events are being built

i.e. in this case the Infinity of action
expressed in that

what are you doing at the same time ^{actually}
still a universal action

i.e. their local actions
and the general action on the Macro-construction of events

i.e. it turns out that this is on the logical and Spiritual level
This is the Law
and which is the Law
formed by your own Soul

then it turns out that you are based on the same level
when ^{for example} you look
that God builds your body
and when you see how the Soul builds the body
you can see how the Soul transmits knowledge
to your Spirit
and your body
precisely according to Eternal development

i.e. you can reach the level of the Soul
where does the Soul have this knowledge
The soul is still eternal
knowledge, in fact
this is the level of access to the Soul
this is the knowledge

i.e. True access to the Soul
This is generally speaking the management of the Infinite level of
development
then you see exactly the Infinite status
of your own Soul

because by analogy with how the Soul of God is structured
anyway your Soul has all the Infinite development
i.e. there are no finite or tense forms

it turns out that it is precisely to find access
to the development system
having ^{recognized} the criterion level
in general, even having perceived
it is enough to at least perceive
at the level of the logic of knowledge
we have a virtually infinite level
which you can walk along safely
and generally speaking there are no problems there

i.e. the more humanity develops in this regard
the less problems he has in essence

because technology accumulates
in terms of external control, so to speak
and the further level becomes more stable in general
i.e. it becomes more widespread
to the level of obtaining the following knowledge

it turns out that in general there is a manifestation here
exactly the person you are
i.e. you see the control that comes from you personally

that's when you start to see and realize this kind of management
you see how directly
God
simply by the fact of its existence
With my knowledge
By Your Action
or just by yourself
transfers knowledge to you
Personally from myself

then you start to see
your own Infinite Status

it turns out that you are
as if in one field of information
and here there are no problems for gaining knowledge

and when you start to act
precisely from the point of view of management
when you act for example on Infinity immediately
then a number of aspects arise in development

when for example there are elements
let's assume past development yes
or current
future
then the need arises here
rigidly fix stable forms
aimed at favorable development

i.e. a person who has
for example, just the Health Standard

or there is the Norm of Events
should be able to based on current standards
or based on those that he even just built, yes
in your Perception in management
he must be able to make these forms infinite

then it turns out that any Norm and the light of this Norm
creates the next Norm

i.e. this technology looks like this
that due to the fact that a person
for example, produces controls
due to the fact, for example , that these elements
already have an optimal shape
at least in his Perception
or in his Thinking

i.e. a person must strive
favorable level of development
it works out for you in any case

and then he gets Infinite development
because the next level
then it becomes more accessible to him

and here it turns out that having built the necessary control system
in any case it is meant
of course Macro-creative case
for everyone

then it turns out that you are doing the management
coming from you
and at the same time you see
that God accepted your personal control
may well act the same way
as if simply passing on knowledge to you due to the fact that
that your knowledge is
generally speaking in your own systems of Perception

i.e. you can already
at the level of personality action in Infinity
that's what I say all the time now
about your action in Infinity in essence

and so it turns out that you can
consider this action

For example as if it were purely a control action

i.e. when you see yourself in Infinity
and you are acting now
so that, generally speaking, the information reaches you, for example Yes
in that Infinity
it turns out it will take some time
and you work at the organizational level all the time
at the level of information creation

and when you translate yourself
to the level of Infinite Action
then of course the following tasks arise before you
i.e. tasks exactly when Eternal development shows you
that level
what are your tasks, generally speaking?
the next level of Reality creation

i.e. you can act all the time
and it turns out that here is the form itself, yes
your physical fitness now
human
this is a form of action in essence

i.e. return as if yes at the level of Perception
with its own physical form
this is the level of Infinite action
but yours
i.e. your physical body is a Macro action

i.e. when you start to see yourself from here
then it turns out that, generally speaking, there are no problems in that
to have normal health
because it's enough
in Infinite Action
in Infinite Development
to single out some fraction of Norma
and get from here just a light control element
on yourself
and it turns out that you just have a Norm of health , for example , yes

in terms of what else needs to be had
and the Norm of Events
it turns out that you can do it
do management this way

that any generally speaking remote Norm
Well, it's better if it's Norma
will be fully controllable in the future
or is it completely under your control?
then you
even at the expense of management
you get an event system
and get your own body
the physical body is obtained from Macroreality

i.e. considering that let's say this is a linear task
in the Infinite Future you are
but if the future is infinite
then the more I get closer to you, yes
so you are sort of at the level of logic and are moving away yes
on Perception
because if you are in Infinity
then the approach to you is infinite

and it turns out that in order to
that's exactly what it takes to make a finite value, for example, Infinite
needs to be considered
own status of the Infinite Life
when you still through finite quantities
get Infinite status of your development

in this case any any final action
it's all too early to eat you
you look at yourself, generally speaking

and therefore it turns out that it is enough
for example, this seemingly Infinite level
translate and still project again yes
all phenomena of Reality are obtained
in such a way, as if in general terms
on yourself
and it turns out that you see how you act
from outside

i.e. the transition of control
from your Soul yes
into external Reality
it becomes completely clear to you
i.e. how do you act from your own structure?

then it is clear that there are no destruction systems, generally speaking

i.e. you are constantly on the move
You
and Macro level of management
and at the same time you are thus
your own body
create

i.e. it turns out that in order to bypass, let's assume there's a macro disaster there
macro there nuclear war
it's enough just to bring it out
for this control
in Macrosense

and if you have Infinite time
then it turns out to be just like a screen
bring out information disperse
Actually, there are no problems again, yes
in this case a person

i.e. here in this case
it is enough to know the processes of interaction of Souls
it is precisely when we consider
maybe even a combination
i.e. when we consider
when your Soul acts on the Spirit, i.e. yes
and we can act
in combined information systems

i.e. if we work for example
in the information combination system
i.e. Spirit Soul
then it turns out that we can do management quite well
from generalized systems

i.e. the Soul interacting with the Spirit yes
we have a generalized domain
which forms, for example, an element of Reality
and creates some next Reality

i.e. there are areas that can be designated , for example
some other ones in general even in management
in words yes
and make these elements like this
so that these words create Reality

i.e. here is the element
when originally

The Word creates Reality

it can be seen as a technology of action

for example, this design is determined quite simply

if you help the plants grow ^{there}

or somehow you restore or treat a person

for example , from a complex disease, precisely from a complex disease

then it turns out that if you

for example, you make the control come from you

and create some new area

then the implementation of new words is possible

then it turns out that here we can trace

that here is an external action

here are the words ^{yes}

this is an approach to you

i.e. in the creation of the word you see

that information begins to concentrate

and you see events approaching you

the word is formed

this is the fixation and development of events

and when do you want to consider

the action of the word ^{for example} in the Infinite Plan

on some element of Reality, generally speaking

well any element of Reality

it turns out that we can see

touch of the word

with some level of information, and any level at that

where the word creates Infinite status

any level of information

those. sound ^{suppose} words

when it comes into contact with some element of Reality

the word itself is preserved naturally

but at the same time the sound transmits some information

just on a physical level at the level of a sound wave

and it turns out that the word that ^{yes} transmitted the sound wave

it has an Eternal status in itself

because it already exists

here is the factor of existence
where do you see
it is the perspective of the Infinity of the action of the word
because there is a factor of the existence of the word
that's all ^{yes}
i.e. it is recorded somewhere, written down, etc.

and it turns out that when we speak
about this type of management
what we have is Infinite development
and we need, ^{for example}, to form a management system like this
so that you receive local events
then it needs to be fixed
at the level of the primary information created
can be generalized
maybe the information is not necessarily that it is
is defined by some specific words
but it is enough to show that you are implementing
it is precisely the construction of Infinite development

and that's when you see
what does it mean that this development is truly Infinite
in your Perception
you understand quite clearly that it is no longer there
it is precisely the level of final development
i.e. no, ^{for example} there is biological death

i.e. you see the technology at its full level of development
when you consider generally speaking the general positions ^{yes}
in terms of management
when interacting
namely, ^{for example}, with the One Physical Body of the One God
you can very well see the further development like this
that your personality is already there
generally speaking at all levels of information
and all levels give you
namely Eternal and Infinite development

i.e. it is important to realize here
that Eternal and Infinite development
this is all that surrounds you, generally speaking
and in any manifestation by the way

and when you start this level of awareness
bring into life in terms of implementation ^{yes}
i.e. to translate into technology, ^{so to speak}
on the technology of further actions

then it turns out that the following element arises here

here is the Infinite Action
some element of time
then it turns out that you can
for example or generally speaking without moving away anywhere

just go
along this Infinite, as it were yes to the development system
Well, from this world it's just about taking control, actually
and there are no problems
but it is possible
they really won't be there by the way

but the question then is
how is knowledge transmitted to others in general

this is how God sets the task
that all development systems
this is a mandatory transfer of knowledge
generally speaking, to everyone at once

then it turns out you should
if you are in one
only in this kind of light system yes
developed a precise level of control
then the question arises of knowledge transfer
you need to control how you transmit to everyone at once

then it turns out that you get the opportunity
it's quite possible to build your own
there is some light next yes
management level
next light of development

and from here it turns out that here is a person
why should be absolutely free
this is the necessity of the action of Infinite development

i.e. he can always set his own level
precisely for the Infinite transfer of knowledge

and when a person does a private action
and endlessly transmits knowledge
it turns out that he again does a general action

i.e. it is enough for any local action
bring in the context of the Endless Transfer of Knowledge
for example for all future generations
for all future development
including your own

it turns out that you can practically guarantee
at the level of your own Soul
where the Soul creates your own Spirit
by managing personal

what you have here is endless development in this area

It is enough to translate this area now
into the system of Perception yes it works
Spirit is an Infinite quantity
The soul is precise knowledge precise control
the system of your Perception on the logical status
this is what when you see
what for example is the information destruction system
it may be absent
i.e. it can be taken out of control
and knowledge, for example, can be built in this way
that the next development is that
that your physical body is Eternal and the physical body
always exists
you can quite well proceed from
from the structure of a kind of external development
make your body absolutely healthy
have the necessary events there
as for myself yes
precisely in terms of Personal Perception
Thinking
Souls
The spirit of man
and for the physical body

many people have some problems
are supposedly diseases there
because they often or share
or there Well let's assume they don't have time to take care of it there
about the state of health, for example, in physical terms

and it turns out that for that
so that this system is precisely harmonious
in terms of Eternal development
it turns out

that originally Infinite Perception
i.e. awareness of the whole World
as your Infinite personality in fact
this is what we are talking about

when you start like this
to perceive the World harmoniously
then your physical body is an aspect
as well as harmonious development in this World

it turns out that you then
even in your big affairs
some urgent matters

anyway, you find a place for yourself, for example , yes
to control oneself, as it were
in the general information system

and here you can see even more precisely, absolutely precisely
universal action of God
where is God active
i.e. the one who gives you knowledge also takes care of you

i.e. you can see
that the broader your point of view, so to speak Yes
the more voluminous your action
the more harmoniously and healthier it develops
it is your physical body

i.e. you can do it based on your personal context
in this case i am talking
it is precisely about the personal context of management
get the perfect Health Standard
It is enough to just see how God does it

i.e. even learn from some specific local values
you can learn from those people
Well let's assume who has mastered the control technology
and here we can consider the following question
that learning is not necessarily linear

i.e. it is enough to consider it there
what is the direct action of the Soul
yes, a person, generally speaking, a person's personality
to some event in direct aspect

and it turns out that you can do it

for example to see
that this action let's assume it
generally speaking it can be universal

i.e. it is enough to study how another person
for example, he mastered the technology of management by Macrorescue
and at the same time implement it, generally speaking, in any direction

i.e. this is exactly how Reality is created
that we can quite well talk about that
that the transfer of knowledge
from some, for example, final element of the action
this is the Infinite transfer of knowledge in a creative sense

why is it clear that it is the system of creation
it will always have infinite development

civilization will always develop after all
precisely towards creation
because it is precisely the aspect of any action
Infinite development is happening
precisely in Macro-creation

and it turns out that when you
for example, you see this system of knowledge
then according to the system, it is precisely simplicity that we will say yes
presentation of the management structure
i.e. when you understand the system quite simply

after all, the task of management
this is still an understanding of a simple control system in essence
i.e. it should be simple for you

and when you perceive the whole world
as harmoniously as your own personality
then it turns out well then what is simpler
because personality for you is always your own
in general, in universal harmony

and based on this
when you still perceive technologically
the entire external world in terms of universal harmony
it turns out that the personality and the external world
this is also universal harmony
and any business you have is carried out

now as an applied control system

make it a management task according to your personal tasks
according to the tasks of the universal Eternal development
and from the point of view of Eternal development

I will work with you
try to work gradually, i.e. harmoniously

i.e. now I will do the same with you management
then work for some time

try not to go out while working
from that level
what is harmony
The personalities of God and the personalities of man
the originally harmonious Personality of God
She still gave complete harmony
human personality

i.e. in principle a person can do it quite independently
make management
God will always naturally help in any case
the only thing you need to understand here is
what exactly is the level of universal harmony
this is the solution to any of your ^{endless} tasks

here I have already moved on to that
that tasks should be formed Infinitely
i.e. to the Infinite level of development immediately

and when you start to do management ^{for example}
to get a local implementation
his private task
it is clear that the light of the Infinite solution of future problems
or even generally speaking their creations ^{yes}
in your creative aspect of development
there is already a solution to your current problem

i.e. the technology in this regard is very simple
and here it is simply clear
that the accumulation of light of future development
on solving a particular problem
in any case it solves your problem

i.e. in fact, in this case we are talking about
that it is necessary to create a system of future events so

so that the Light definitely gets in
for any of your tasks
and the tasks of all mankind in general
all over the world

here it turns out
that your Soul must do the work
which is as follows
that firstly you solve problems
Well, let's say spatial, ^{yes}
what is needed
here now
in the future ^{there}
in the Infinite Future
precisely in space or ^{there} in time including the future

but there is also a personal task here
i.e. this is when your personal tasks become universal
the task is precisely to follow
to the level of God's Infinite development ^{yes} For example
one of the tasks
or the personal task of Eternal development

then it turns out that it is still Eternal Development
this is also God's task

you ^{kind of} see that ^{no matter how} you act
you act anyway
in the level of harmony with God

then it turns out that your task is management
consists in the fact that
that you should get total control
right now and right away
but still get that level
when your local tasks are finally implemented
after all, you understand right away

here it is
your Soul's access level
to the level of general knowledge
and to the level of management it turns out the whole Macroreality

i.e. the light of all tasks
which you will set ^{and} decide for yourself in the future
i.e. this says that
that is not needed ^{there} specifically now

create some future tasks ^{there}
somehow come up with or write out ^{yes let's assume}

but you just need to feel or know
harmony of your personality
precisely in the Infinite development
precisely in the Infinite status of development
but generally speaking it is real in Infinite development

i.e. when you see it this way
the system of its future development
it turns out that you can see quite well
that in order to solve your specific problems
you only need to do everything
it turns out that all tasks can be combined
at the level of your Soul
that these are the tasks of your personality

for example, when God made all Reality universal
it was the task of His Person
i.e., precisely so that any, ^{say,} element of Reality ^{yes}
first of all a person
built in the image and likeness of God
and actually created from the beginning
together with the person himself, in essence

so that he could do the same completely
be free to be wherever he wants
to create wherever he wants
and be infinitely free

i.e. it turns out that this is the essence
of one's own Infinite freedom
in essence it is Macroharmony and personal harmony after all
i.e. when you
^{well} not because i mean you meant
maybe some maybe just from the point of view of harmony
elements of development
when did you perceive harmony
as an element of the action of some physical ^{thing}
or maybe there is harmony from that
that you listen to music ^{yes} or just Consciousness of harmony

what is meant in this case
namely the Infinite harmony of personality
where personality is a must
it is manifested

and man lives forever this status of harmony

i.e. it is still quite a large number, ^{yes}
the problems to be solved are still essentially

but we are talking about the Infinite level of problem solving

then it turns out at some level
A person must know exactly what God is doing
those. absolutely
in this situation

and if we ask the question about that
that ^{we assume in some cases} ^{yes}
the man clearly does his management
and he is completely free
but in order to develop for sure
and know now
that he has the technology of Eternal Development
he still needs to know this for sure

then it turns out that he must understand God
how does he build it, generally speaking?
the system of its future development

Well for example as a person
and at the same time He ^{transmits} knowledge
but He conveys knowledge entirely in words

i.e. you can master the words ^{yes} let's say
everything is already exact knowledge
words are an element of precision

it turns out if we
we pass the word to Infinity
or ^{is there} a personal Action of God
then we go to Infinity
i.e. we look at ourselves from the Infinite level ^{yes as if}
it turns out that a person can see himself quite well
based on that
that the Action of God is in Infinity
gives exactly the final realization
i.e. they are like some final actions

i.e. it is absolutely clearly visible
in general how does God do these actions
so that they are Macro-creative

i.e. it is enough , for example, to just take them and do ^{yes}
but man, naturally, is again completely free
he can take it and do it right away
maybe we can ^{assume} to count
what can he do in the future

and it is clear that he is busy, he has a lot of different things to do
but God is always ^{well} ^{basically} builds
and generally speaking, I built it for the whole future like ^{this}
and the system, ^{so to speak}, of its management and people
that man always has the status of the Truth of God
that a person is not mistaken in essence
i.e. it always acts at a certain level like this
as God gives him

it turns out that based on the personal context of the action
all people have something to do with it
those who are ^{there} are engaged in something completely different
levels of management
they still act like that at some level
how does it do in general in terms of knowledge transfer
God but this is how He is
precisely from the point of view of Macro-creation, of course

but when, ^{for example}, other people begin to understand this
then it turns out that the context of your own personality
i.e. creating ^{your own structure} ^{there}
and including organic
or creation of personality structure

this is generally speaking the warmth of God the light of God
i.e. you can see even
at the level of ^{well} ^{let's say} physical quantities

i.e. you can determine where ^{it is} ^{yes} the warmth of God
i.e. the warm Soul is the Soul of God
comes into contact, ^{let's say}, with the Soul of a person
and from here you can see how your Soul works
i.e. you see that your Soul
acts accurately and she makes no mistakes

i.e. a person has
and ^{generally speaking} it is the only possible level
that man does not make mistakes precisely in Infinite development
This is where we need to understand absolutely clearly

this structure

It is precisely in Infinite development that he has no mistakes

it turns out that when you want to see absolutely clearly
technology of God's work
you must see that in Infinite Development
you are not mistaken in essence

but logically and so clearly ^{yes}
man makes no mistakes
when he acts as God acts
i.e. this is the logical phase of control

in this case I gave you the personal phase of management
those. control by the Personality of Godhead

it turns out that when you start
work in the personal aspect
then any action it becomes
completely understandable completely conscious
and you define yourself very clearly
your own way
and then you know for sure
what is truly Eternal Development
this is your personal development
that you have technology
because your personality as a person
she is quite capable of implementing and has
all this technology

i.e. you are convinced of this
because you are now ^{for example} here ^{yes}
or you are going somewhere in the future about your business

and then it turns out that you realize this because
that is the whole external World ^{and that is the whole Reality}
already ^{well} in the end you see it because
what do you even eat

when you come to this level of harmony ^{actually} Yes
in the Infinite it is management
then it turns out that the universal Action of God
it is at the same time Infinite knowledge
which are constantly transmitted to you
precisely in the general action in the general development

i.e. you see
personal context of management
as your own
and other people
and God too

it turns out that you can say for sure
this is what will happen to you for example through there
including long term yes

if you want to consider the aspect
namely the process of Infinite development
then we can look at specific events
somewhere out there in Infinite Time

i.e. it is possible simply by means of glow
for example structures from your heart
get to the level
namely, the Infinite, as it were, information management
and see yourself in the Infinite Future

as soon as you let's say so work yes
with this information system
then you will see that the World i.e. the dynamics of light
she becomes different
The world becomes such that light becomes flexible

i.e. in this control system
unlike, for example, earlier ones, yes
linear systems of light development

light also takes on the form of a person in essence

i.e. you see that the form is going, for example , to a person
fits a person
she only goes to him

i.e. if we consider in this case
Light coming from Infinity
then he doesn't go some chaotic way, but rather the way
and he goes like this
that it definitely fits your shape

and you get yourself
because you know generally speaking
where light is produced

and here when you begin to approach this Light
you already see God with your own eyes

i.e. how does it work yes

how does he do

precisely at the level of knowledge

i.e. you can see

that the coming Light has your form

creates your Eternal body

for the original Light

the logic is very simple

the original Eternal Light

he lies down on you

creates the Eternal structure of your body

it turns out that you are clearly Eternal yes

it's clear to everyone

so in this case I am giving this lecture

quite common

in terms of further general knowledge

because this knowledge is simple for everyone

i.e. when we talk about the level

namely universal namely Eternal and Infinite development

it turns out that it is not only for those who practice, let's say Yes

control system

through the practice of universal development or Eternal development

but generally speaking for those

who, among others, does not do this

This is what we are talking about now

i.e. when we talk about that

how to transfer to these management structures

knowledge of the Eternal development

it turns out that there is a fairly objective Law

these rays also go to them

the element of Light of already flexible Light is also imposed

the one who specifically gives life coming from God specifically

and when you see that these lines are rays

are transmitted to all people

then it turns out that you can see quite well

as a specific person in general

to pass on this knowledge

i.e. either this beam movement
do it for example just well let's say more adapted yes
at your expense
or, for example, show the control system
if you have time

but in each specific case
time should be for each specific person in essence

and it turns out that when it comes to human matters
it is about universal governance
it turns out that in this case
namely, universal management for Eternal development
we mean
that every person should still be able to do
pass on to every person
knowledge of Eternal development

i.e. this is a special task, generally speaking
but nevertheless it is concrete
for example, clairvoyance technologies , so to speak yes or Spiritual vision
what is closer in essence is the Spirit who sees from the beginning
means formative and interacting
with Soul
gives an accurate vision of Reality
precisely in the applied aspect of management

and it turns out that it is here
still taking into account all interests
i.e. precise vision
God can see everything accurately
He always sees everything from the very beginning, including the whole
future.
because there is a relationship here after all
with each level of Reality
generally speaking with every person
in terms of the exact level of management in Eternal Development

after all, every human action is aimed at that
to know
that's how I said any value of the external world
this is also a certain school , let's say, yes
knowledge of Eternal development

and when do you start personal practice
enter

into any element of Reality

i.e. for example there is this tree in front of you ^{yes}

or any element of Reality

there's just some kind of air, a landscape, a house

you can easily enter it there

the system of Eternal development for all

and make it so that the reflection

namely the Light of Eternal Life

namely the Light of the flexible Light coming from God

personally from God

so that this Light may be spread so

so that another person who ^{so to speak}

not engaged at the ^{moment}

For example there are technologies of Eternal development

he would have received the correct status of Eternal Development

i.e. to transfer knowledge

from any level of Reality

and all at once

when you get to this level

then you see that ^{generally speaking} then a person

it's quite a unique choice ^{, so to speak, yes}

in the control system

or your own behavior

how to make future life happy ^{for example}

and ^{for example} based on what he already sees

that he has infinite life

then it turns out there is a task

it is precisely Macrosalvation for everyone after all

i.e. under no circumstances

there is no other person who ^{is like} he didn't behave ^{there}

he cannot be deprived of the elements of Eternal development ^{there}

i.e. any person in any case

over time, he will master this technology

it turns out that the relationship

to any person to any personality

should be completely ^{in general Well} essentially equal ^{yes}

as God does

equal treatment in terms of

and Eternal development

and in terms of providing all the knowledge

for Infinite Development

and, as I said, regardless of the status of the individual

then it turns out that at this level
people have a very clear
level of information exchange
i.e. when they are at such a level
mutual perception
i.e. this means Macrorespect turns out ^{yes}
Macro access to the systems of universal Salvation
providing this access, etc.

i.e. elements
with all this, a person, of course, remains a person
i.e. no elements of personal generalization ^{there}
in this case it does not happen
i.e. a person is a person, but she is conscious

a person makes a conscious decision
provide knowledge of general development
to all

and here it opens
^{in general,} quite a unique status
in the depths of every personality
i.e. in the Soul
it is at the level of the beginning of the organization of the Soul of man

i.e. a person who knows what awaits him ^{, so to speak, yes}
in the future, and in the Infinite
and good events await
he then begins to think about it
how events actually develop favorably
hand over

i.e. it means that at a certain status
the personality is at such a level
what is her personal task
^{well} generally speaking, the personal task of any person, ^{so to speak}
to transmit knowledge of the Eternal universal development

that's when you start to enter such a status
then it turns out that your harmony lies in that
so that everyone has Eternal development
so that everyone can Eternally develop in their physical bodies

then it turns out that we have a structure

such a harmonious so to speak World yes
developed by our Perception
and originally set by God

for the Eternal God created the Eternal World naturally

it turns out that we have the status of such a plan
that any person
remaining a completely independent person
i.e. no one has the right under any circumstances
there is some way to influence it
or there to determine its development
well, if of course it means that he acts creatively
if a person does not act creatively
then we get social systems of society
they still restrict such movements

but nevertheless when we mean
that at the full level of personality development
when he is still a man and sees
that he is completely free
and he is free precisely in society
i.e. in any social environment
in any information environment, let's say Yes
at any level of Infinite development

here is the level
namely his personal Infinite development
this is just the level of action now
to ensure Infinite development
everyone and yourself

i.e. it means that it starts to come out
as if into the structure of its past development
and see that for example the past development
in some aspects when a person
let's assume there was some reason for worrying there yes
or something he in the next action for example Yes
I have to do something like this
well it makes it necessary to concentrate there
his skills of knowledge or attention, etc.

or a combination of such events yes
so that he has something from a person
it was realized exactly as he wanted

then it turns out that when you start working

you see that any of your actions
leads precisely to the system of Infinite development

i.e. you see what choice means here
exactly well let's say your management also consists of that
that every person must definitely learn

Well, if some person, for example, doesn't know
future development systems yes
or is he there for example, can't be sure, yes, exactly
what he does, for example, systematically and precisely
then this information still turns out to be somehow
comes to you
and you need to transfer the knowledge here

i.e. it turns out that seeing your own development means
you have Eternal self-development
at the same time, the structure is like that of obtaining knowledge
i.e. transmission of information
it is absolutely known to you

this is where to send information
it often happens like this
what in the general area of information
this is a very specific area
and you are definitely passing on your personal knowledge
on Eternal Development

then it is clear that you are definitely developing Eternally
because even at the current moment in time
you still pass on knowledge
how can you well in general, you convey knowledge correctly

and when will you learn it?
to transmit precisely the knowledge of Eternal development
individually to each
generally speaking there are all elements of the World
it turns out that further development
this is the attainment of the next level of knowledge
and transmission of information
again for Eternal development
in the general plan

this is where you move into the general plan
then Eternal development it becomes already
well, quite acceptable to a person

i.e. a person becomes interested in developing forever
because the overall plan
these are all the following systems of the World

and it turns out that a person has
my own turns out well so let's say it 's interesting yes
in this development
because when it comes to Eternal development
the task is still there

that a person should harmoniously
at the level of the physical plane
at the level of setting tasks
i.e. it should develop here harmoniously
and generally speaking always
i.e. it is necessary to create another system of interests, as it turns out
for personal development

because in any case after a certain time yes
the question is well For example there a person mastered some systems of knowledge
for example, he mastered all the knowledge that exists , and then
well at least socially manifested
then he sets the following tasks

it turns out that it is precisely the creation of interest , so to speak
for the development of humanity into Infinity
this is not a special action after all
i.e. well as if it were not an artificial action
not what they told people there
there is an infinite number of tasks there
and for example it is necessary to perform yes

in fact, we are talking about something completely different
i.e. a person must live forever and develop forever
because God is Eternal and he develops like that

and it turns out that then a person must
interacting with God
to develop precisely in the happiness of development
this is what should be the happiness of development
and not some kind of enumeration of tasks, yes For example

and it turns out that based on this
everyone has
the personal nature of their own actions
Well, if you ask the question
where did any actions appear in front of a person anyway

and why did he at some point decide to do something ^{there}
initially generally speaking

then there is the happiness of interaction with God
truly with God
i.e. true from the point of view of both God and man

and when you start acting like that
you see that any action must be
firstly, completely specific and correct

i.e. in this case any action
completely linear ^{so to speak} yes it folds out
into a number of very clear ^{well in general, there} are no guidelines

if ^{for example} a person is just a person walking down the street
and they ask him a question
here from the point of view of development
what is there in the world ^{now} For example

then the status of this development is that
what is clear is that there is a possibility ^{there} for example global destruction
there are some personal processes ^{there, etc.}
but first of all, the possibility still exists
and therefore
since it is clear that it will not be
he still has to solve these problems
he must be able to solve problems
standing quite clearly before him

for example, well , there is a certain satellite, ^{yes}
the same question again
then it turns out that they still need to be managed

in the conditions ^{there} cyborg systems need to be controlled
any system at a distance
regardless of the level of origin of this system

and it turns out that based on this
a person naturally must
first of all, put ^{in general} as an answer ^{yes to yourself}
^{in general,} already a linear problem
ability to manage personally from any situation
at least by those systems
well, which ^{for example} can lead

to the possibilities of global war, etc.

i.e. this is again the development of the Spirit of the Soul
to the level of action on this system yes

and when, for example, already in the further Infinite development
The world acquires, well, essentially, infinite forms
there is another level of matter there
then the management task becomes even more general

i.e. there is a management task there
factions of the collective Consciousness
collective Consciousness creating matter

and here it turns out that he should already be preparing for that
to make governance universal
and get precise control right away
although there is also a collective

i.e. the task of precision control of personal for example Yes
in collective action

and it turns out that based on this we can very well have
for example, the task of general management is such
what a person should see first of all
your own status for example in Infinite Development
and at the same time see
that he personally develops as a free person

i.e. you should see that here in general
Well, that's how the control system works
that you get control
as coming from oneself
and from everyone
but this is the management that God does

i.e. to be able to manage is obtained by social status
and what does it mean to be able to manage your own personal affairs
highlight
and be able to direct the status of general development
precisely in Eternal development

i.e. this is actually a task
Well, it's quite complicated
nevertheless, each person faces a task

after all, the task is not only to manage ^{there}
some separate blocks of information ^{yes}
or ^{there} with technology
but of course there is also the task of management
all social aspects of development

and it turns out that it is
a complete level of personal freedom ^{in general}
when a person acts completely freely
allows the individual to truly control
almost all event systems

i.e. complete freedom is, ^{in general} , complete access

and it turns out that when you start
make the control already going ^{for example} from you
then here is the answer again from the same person
Well, who answers the question?

what to do next
it is clear that this is still full responsibility for ^{everyone}
and the control is again universal

i.e. besides the fact that development ^{yes}
the ability to Spiritually control any system
this is the first element, ^{so to speak}

and the second is that the system is still a personal decision
i.e. a person must do this
not even because it exists
Well ^{as if} such an element of circumstances ^{yes}
that a lot of nuclear weapons, chemical ^{weapons}, etc. have been created ^{there} .

and because, ^{in general}, the task of the individual here is like this
what is personality in the World
still has to manage
almost all elements of the Reality of the World

and it turns out
^{well}, it's good if the question is just ^{there} exactly in that
that the problem has already been solved ^{that} there is no global war
will gradually be structured
nuclear chemical weapons distribution system
^{well}, any global destruction systems in general

but there are still elements of the Macro level, ^{yes}
some planets of the system, outer worlds, etc.

it turns out that in Infinite Development
a person should still control
all elements of development in Infinity
he should still be able to control it
generally speaking, any system, wherever it is located
and no matter what volume they are, there are properties of quality, etc.

and it turns out that then he should know
generally speaking the status of God's Action
in a particular situation
generally speaking in any situation where action is required
and God and man

then it turns out that he
should actually be able to see
Action of God
not only for example yes, for personal purposes
and not only for the tasks of its management there
he must be able to recognize the Action of God
as a person

i.e. precisely the Infinite Action of God

and it turns out that for a person it is by the way
this level is quite simple

because a person, he kind of feels yes
gets to know and recognizes another person
at the level of internal perception
at the level of Perception of one's personality
he can also perceive it quite well
and the Action of God

and it turns out that here in this case
we are talking about development after all
namely the level of the human Soul
i.e. when the Soul of a person carries out exactly those actions
which a person in principle carries out
like personality for example

i.e. the Soul acts in this way
that the personality of a person and the Soul
this is still the Action of God as a whole

i.e. here in this case
God determines the level of governance

and at the same time
a person's personality for example Yes
The personality of God is that action
which is aimed at Infinite development

i.e. here in this case
The Personality of God and Man
they intersect precisely in the Soul of man

because the Soul initially contains all knowledge about God
exactly at the initial moment
when God created the Soul

but later on, when interaction occurs
Souls and God
it turns out that the Soul creates a system of events
and at the same time this system of events
She interacts with God in a certain way
in terms of, for example, a personal level of decision

and here when we talk about it all the same
where did the tasks originally come from yes
Infinite development of man

it turns out that they are largely taken
from the development tasks of the whole world
generally speaking of all systems
and as a rule this is about each individual person

and here if you want to see
for example, initially their own tasks
then it turns out that you should consider
tasks of any person
and then you will see from the Infinite forms yes
from this Infinite light actually
see your own light
i.e. your own task

why is the soul of man
one way or another sets a task for himself

thus the selection from the Macro level
local Light of the Eternal
this is again the formation of your tasks as well

but considering that people live in the World

and can live forever
and many have already mastered it
technologies of Eternal development
it turns out that the formation of tasks is already infinite for you
i.e. you initially chose the path of living in society
to live where there is precisely the Infinite World
it turns out that the tasks are often like this
that they don't need to be specially formed ^{there}
they already exist ^{yes} for the solution

and it turns out that here is the existence of tasks
the existence of precisely Infinite development
it is your personal choice
and the choice of interaction with other people
in terms of providing them with assistance
in terms of providing technologies of Eternal development
and still the ability to work with people
so let's say to interact on information
to pass on knowledge in this way
so that they would have Eternal Development

i.e. it means that it is not just ^{about} gaining knowledge
or let ^{'s assume} those technologies
which ^{for example} allow them
Well it's easy to get healthy ^{there}
or live ^{there permanently, for example,} **even** ^{yes}
in the physical body

because the technologies of Eternal development
this is the ability to manage the structure of Eternal Reality

and here is the aspect of contact
of this structure of Eternal Reality
with a person
this is also a special aspect of knowledge
because the structure of Eternal Reality
she possesses again a different Light

i.e. Light coming from the matter itself
and the Light coming ^{for example}
how about you
so does the one who comes from God

i.e. in this case you see
the structure of God
almost like just physical Light
coming towards you

it is the knowledge of God

and then it turns out that you
precisely by perceiving these light streams
seeing what your action is
you enter the system of interaction with God like this
that your life is already becoming like this
what are you next events next level of life
make you happy
because you know what to do next
i.e. you always know what to do next
this is how the control element appears
in terms of universal Salvation, moreover

i.e. not just ^{there} to solve personal problems
and you, first of all, you know
what to do for the universal Salvation

and that's when you have this level of control
translate ^{as if} closer to yourself ^{yes}
i.e. you start to analyze and translate into logic
translate, ^{for example,} to the level of structural actions
it turns out that any structural action
i.e. any thought of yours, any action
this is what is sent to you by God
for the knowledge of the general development

and you can do it too
this is precisely the general development
universal Eternal development

universal life
to consider as the structure of universal Eternal life

i.e. what is meant in this case
you can consider
how is the development going ^{for example Sveta} ^{yes}
coming from, ^{for example,} the Personality of God
how does this light go to a plant ^{for example}

and consider what the difference is
^{for example} how God transmits knowledge to a plant ^{there}
how god imparts knowledge to people
how does God inform ^{so to speak} ^{Yes}
some elements of Reality

when you consider it

Well let's assume there goes the Light on the stone

then it turns out that it is clear here
that man is a completely different level of Reality
and Light has continuity

i.e. to determine
how to transfer knowledge to a person
it's enough to just go out
to a continuous Infinite line

from the point of view of other elements
there is a discrete system
because
The personality of God and the personality of man
it's the same level of Reality

it turns out that the knowledge is the same
as if you are there Well, listen in silence
as if internally yes
to the personality of another person
do you know the state
i.e. you know the truth, yes it turns out
the following and the truth

and it turns out that you can know
all future development
have a very precise level of control
only due to that
that you will, as it were, internally tune in to the Personality of God
and make this management accordingly
almost universal in your particular tasks

only by tuning into the Personality of God
where God already creates and created the whole World

Now make this level of Perception or something
and solve your problems with this action
and the tasks are universal
your personal tasks
according to the general level of Eternal development

when you do the management, look
so that for example the Reality that is specifically in front of you yes
element of Eternal development of Eternal life
exactly the level of Reality that is in front of you

so that he always has the status of Eternal Life
necessarily Eternal life

i.e. in this case a simple aspect of that
that you have achieved knowledge
that you have the technology of Eternal Control
i.e. Eternal development
consists in the fact that
that the element of that very Reality
what do you see in front of you level of management
and the one that achieved it, for example yes to Eternal life
this is a factor Reality that you can do it

well, that is, any level is in front of you
has the structure of Eternal Life

i.e. at the same time someone has, for example, right away and that is enough
someone has later someone already had before

this is when you start to enter
into such a management structure
what does it mean if a person thinks that he has enough
Well, that's good, then he lives peacefully forever
and helps everyone else yes

or when you see
that any element of Reality
Well for example, a person has mastered it enough
or he passed control to some element
Well let's assume there in any
informational
spatial
temporary environment
and this knowledge is there and it provides Eternal development
For example there are many other people there

then as soon as you enter
into this system of sorts of dynamic knowledge yes
dynamic knowledge like this
coming from you personally
but you know what it is at the same time
and knowledge coming from God

i.e. when you enter this management structure
it turns out that any system
it becomes quite clear simple

and knowledge spreads

Well in general it's much easier and much faster
if you see
namely Infinite status
spreading your own knowledge

in general knowledge is best to see all other people
how this knowledge also spreads infinitely
to Eternal development

then it turns out that you come
to the Personality of God
which, in addition to giving knowledge
It also increases the system's control capabilities .
i.e. It gives certain technologies
you can see how God gives technology to people
for example, he looks
at what point yes
Well, some specific actions are performed
at the level of physical Reality
at the level of the information management plan
what at what moment and how to act

i.e., for example, an action to solve personal problems
can be an instant action
and for example the action on Macrodevelopment
it may be an action even before that level

i.e. if you decide instantly
then it means you are doing Macro-creation
even before the level of his decision

i.e. you come to the structure of your own Soul
where is your soul it is practically
sees the whole Reality, generally speaking, this is how
that God gave her exactly that vision
by which you can immediately have
namely general and private management

i.e. combination
namely, general management
and private management
in this case it is one action

and when you for example do the control in this way
what is your management task

this is a task of universal management after all
where you see the Infinite Light of events
coming towards you
from each person
then it turns out that you can still see there
for example, private management of each person, yes, somehow
what is he passing on to you
namely the Infinite Light of knowledge

i.e. it turns out that through knowledge
people can do general management
and the experience accumulated by each person, for example , yes
in solving your own problem
this is a universal experience

and that's exactly how it is at the next level
as if the management of the human Soul
it turns out that a system of generally universal connections is set up

i.e. you see here
that when for example we make universal management
then we actually make it more intense
namely, general development

i.e. we transfer knowledge instantly to everyone

the following yes knowledge, well, which you, for example, have mastered
due to its technologies
due to the fact that you taught someone yes
or due to the fact that you solved your problems
and other people have mastered and solved the problems in the same way
and pass on knowledge to others yes

and it turns out that this is already a different light
this is light created by people
where people can do it themselves
namely, universal control
and they can decide for themselves
as personal tasks
and so are the tasks of all yes
of the whole civilization
and naturally the tasks of Eternal development then

naturally in any case
God will always help people
the question is that people already have
the device is a specific technological device

precisely for Eternal personal development

then it turns out that when you set a task

there for example, your own and start solving it

It is enough to consider this perspective of Reality

this is exactly the one I just talked about

what is the identification

Light of action of all people

and in general there is no such action

that people are quite capable of acting and deciding

just like God works

this means that there is also knowledge coming from God

i.e. to see this angle

then all tasks become quite achievable

and here it turns out that Eternal life

that's pretty much it

Well, in general, it's a simple personality characteristic.

inherent to every person

To do this you just need to tune in and live forever

Thank you very much for your attention
