

GRIGORY GRABOVOY
The Teaching about God
Healing as an element of Eternity
15.07.2005

Hello again
The topic of today's seminar
this is my Teaching about God
Healing as an element of Eternity

in this topic i show
what is the healing technology itself, generally speaking
this is also a technology of Eternal development

because Eternal development is what it is
from the elements of the standardization of such and such a state
and at the same time the system of rationing
is considered as generally outgoing
from the level of Eternity

as God does for example
It is any finite element
considers and generally implements
as an element that comes from Eternity

and it turns out that we can do it here
see
well, some kind of continuity of connection
any recovery cycle
with what is embedded in the structure
generally speaking, the Eternal development of man

because if we consider, for example,
it's like a layer of control or something
which relates to the structure of Eternity as such
this is what it consists of
for example for human health

how to make a person live forever
at the expense of, for example, there are technologies of Consciousness
Here are the questions if you ask them

then we immediately come to the system of that
that a person has a relationship and is generally connected
with specific information at the job level

and here is this information
if you break it down and take it apart there
it just adds up
from elements of some dynamic ^{yes}
relating specifically to human health

it turns out that those elements that relate
to human health
they have a point of contact
between dynamic elements
which are manifested dynamically
and elements practically the same
which we ^{are actually} considering
as information

i.e. it turns out that if we ^{assume} we start working
at the level let's just ^{assume}
^{well,} some kind of speculative action, ^{yes}
then we highlight exactly the intersection point
between health conditions
and the state of Eternity ^{as if} an external environment
and the internal environment of a person

i.e. it turns out that we have
health element as information
which is an element of Eternity
in fact of contact simply with this information

and that's when we get this contact information
we begin to draw and define, ^{for example}
what we would like to receive in this information
at the point of contact
then we can actually speak of Eternity itself
make technology

here is the concept of "Eternity" made simply by technology
what should a person do so that he, ^{for example} , lives there forever

and when looking at this information
^{Well,} on the level that God is Eternally Living
having the ^{structure} of Eternal development
creates something else for Himself
there in the future ^{and} in the present time

then here we can consider a kind of interconnection
that in essence, for God, for example, illness does not exist , yes

and if so, then in essence we can
how to integrate this concept

into the structure of the action as it were
places of man actions of man
from some one place let's say yes there is no physical
a person can act
in Infinite number of information points

and by the level of all connections
we see that for now the signal is from a person
goes through all the Infinite so to speak connections
they come to him

then the signal has at least somewhere
two levels
this is what passing through the entire Infinite World
he well as if it were growing due to external interactions

or that when he touches a person again
which is located together as if in the transmission of a signal
then it can be unchanged

here there are at least two states

so that's when we compare
a signal that has accumulated experience and has come back
and the one that is unchangeable

then we see the space in which the person is located
in the information world actually

and here is the edge of this space
this is the structure of Eternity
isolated as a substrate

i.e. having come to such a glow by logic
we can this element
Well it looks like some kind of internal thing
Well, the state of the eggs there is literally
so it's like some kind of shell

and this element can be used
as an element of Eternity

allocated to the material system

i.e. dynamic there is natural so to speak
health condition
in the structure of Eternity has matter as its basis
it looks exactly like matter

if we start to see the situation further

it turns out that in general any element of matter
in reverse order
can be brought to the dynamic level of Eternity

if in this case we are talking about now
the man therefore determined
some amount of matter of Eternity
then we come back the other way
First of all, to the person, of course
but we also see the whole surrounding world
in interaction with all elements of the external World

then when do we start
Well how to consider the process further
matter which, for example, characterizes
state of Eternity
she has one appearance in relation to a person
and in relation to, well, other phenomena of the World
there to the animal world, etc.
it has a completely different appearance

i.e. , from this point of view, it is more porous there, etc.
and she's completely different

i.e. the matter of Eternity that relates to man
this is one type of matter
just like iron differs from carbon, for example Yes
i.e. there is a different density system here, etc.

and that's when we start to consider
these are the systems of interaction
different types of matter
then you can see
that man really has a place in information
it means due to the difference in material substrates
two Eternities
where it is almost clearly visible
that a person has the opportunity not to get sick

i.e. he has the ability to be
in that niche as if yes information space
where practically we have
it enough to have a clear position?
defined even geometrically
the position of the person's information
in the information space
that a person has well as if almost an absolute Norm

then it turns out that any other situation
which does not apply to this situation

and the Norm is determined precisely by the structure of the information
which is called the matter of Eternity

then any difference is always on a material level
matter of Eternity
visible

and it is clear that any difference
differs from the matter of Eternity in that
what is this generally speaking on matter as if in the direct understanding

because as the main substrate
Actions of God
we see the matter of Eternity
for God is active
He always gives the Eternal some kind of movement

God Eternal
and adding any single action
gives Eternity through matter

and it turns out that if near this matter
there is some other quantity there
then this is no longer God's action
it's like well, there is some kind of investigative management system there

and it turns out that then it is enough to simply say
that it is like a skill so "material" if so in quotes yes
to put it figuratively
than for example the position of Norma

i.e. it turns out that on the physical level

a person can observe as if well, there are some problems
there according to clinical manifestations of some disease
or there is no disease there is only information yes
that it is possible

then in essence this is the structure
it is actually attributed
to a number of information events
and not material

i.e. in the structure of physical matter
there are levels
which relate to the level of physical planes
where for example can we say that matter has been detected there

this is already a kind of rigid and objectified factor

but for a disease like this one you can consider
it is clear that this is not so
i.e. disease is not a natural state of a person

there, for example, is the death of a person
this is something that should be completely excluded
i.e. God is Eternal He has no death
therefore man should not have death either, etc.

it turns out that when we see
these are the positions in terms of, so to speak, interaction
then it turns out that we get
that's the healing procedure itself
as a procedure where the dynamic systems of Eternity

i.e. what is healing
this is a manifestation of some dynamic systems
and therefore in interaction
with static systems of Eternity in fact

and it turns out that in recovery
we see an element
not in the form of some kind of final substrate
not that an element taken separately from Eternity

it's just a different type of element
this is an element where dynamics are manifested

and when we start to consider
which is like a guarantee of Eternal life yes

at the information level

so here is the interaction
informative i.e. exactly
in a dynamic plan, as if informative
some kind of dynamic element of Eternity
with static element
it just gives the element of life
and of Eternal Life

i.e. we allocate information of Eternal life
in fact, as if in its pure form
among these material systems

when we start thinking
and how is this Eternal life manifested yes

then this is a powerful diagnostic factor
Reality in general

Reality is instantly diagnosed
at the point of greatest for a person
Well as if there was a possible problem

if you want to understand at all
what do you need to do first in this world

then here is the simplest option
to follow from the point of view of human health improvement
where does it connect
dynamic and static part of Eternity

and born actually as if revealed
structure of life
it is instantly as if in the form of a specific vector there
turns into the possibility of action
i.e. the action is immediately determined
which needs to be accomplished in time

and this is this system
like that in general, even Macro-creations yes
because we say of course
exclusively about creative actions
which must be accomplished in time

then it turns out that we see

what is Macrocreation
manifested as if simply in the correct level of action
there is no subsequent action
after action

it turns out that we
when we start talking about what we need
bring out the matter of Eternity
in the structure, for example, there is a full-scale action

i.e. at the one-time level of matter
we need to look at
how matter generally affects
for example, the speed of recovery of some person

then we see the following option
that any information
which one well let's say it 's not part of this matter
Firstly, it has a different shape.
it has a different spatial position

and with this information
you can be able to work through translation
well, some negative systems
into an informative characteristic of Reality
and work simply as with information

i.e. not only is this form unstable
but here it also works out
that we can minimize it
even at the level of logic
say that it's just information
and not a specific real problem

and when do we start
bring this management status
to the level of Spiritual action
it is clear that Spiritual action often relies
on the factor of Perception of this matter of Eternity

and then it turns out that if at the level of the Spirit
to perceive this matter correctly
this management structure

then we get, well, as a so to speak, feedback signal
we get a connection that is already quite clearly manifested
where these intersection levels are visible

between
dynamic element
and static
Eternity
but already inside the person

i.e. in the form of a human physical body
in the form of organization of the human physical body

and we can see
that when, for example, there is a task
getting it, so to speak, is not easy there
the structure of human Eternity
and even the whole cycle of organizing the Eternal Man ^{yes}
in information at least

then this is the management
it is actually quite strong in that regard
that looking at the structure of the organization
we see the manifestation of Eternity at every level

i.e. some, let's say, final actions of a person
manifested in the Infinite structure

and here you can see
that the element of healing itself
it is already reproduced according to the type ^{in general}
Well like the next action after the action

if we start to ask ^{ourselves} a question
and what about God who is absolutely healthy there
How does he do health improvement ?
what healing is for Him, generally speaking

then you can see it here
that God actually teaches man
exclude from the level of Reality
some negative systems

and gives the opportunity to do this personally to a person
in all aspects identified in more
in an earlier ^{state, so to speak,} of civilization
there are no problems there
Well, for example, there is a reference book where there are diseases, ^{yes}

but there are some other information systems
for the future process it is also necessary to ensure

so that there are no negative systems

for example, some action

and it turns out that here we can see
that's exactly what we'll say about that matter
which forms human health there
this is a level higher than transcription
outside world yes
on Human Perception

here each person determines for himself
well, some kind of development system on a physical level
where the Macroenvironment is projected all the time
at every moment of this person's development

and it turns out that the allocation of the matter of Eternity
actually gives a person the opportunity
clearly differentiate very stably
some processes in management
add control there for sure or minimize
or vice versa, do not add additional controls
and observe the system from the outside

and it turns out that when we, for example, do management
coming from the matter of Eternity
and into the matter of Eternity

i.e. we set up the management structure in this way
that you set the task of Infinite development

then it turns out that there are elements
who watch as if from the side
control
controls
well, yours for example

and on the other hand
if we develop the system
into the matter of Eternity
then we well let's say so to speak element
in some simplified words
must show
how it intersects with the external environment

i.e. how is the matter of Eternity
interacts for example
with any element of physical Reality

and how is this information distributed further?

i.e. when we trace
some individual elements of such connections
then we see that in any system
i.e. whatever it may be
there is always a Macro Rescue system

i.e. it's not some kind of key there
Well let's say it 's uncertain at that time
that it is difficult to get to it

what we are really talking about here is
what about my management technologies
that we just need to point at everything
that there are many for example yes elements
where such an approach as the matter of Eternity is used
what does this
a certain number of people

and then it turns out that the information is spread more widely
on the structure of the next event as it were
what happens after organized life
For example there is in the status of Eternal development

and here is where the element arises
that the healing itself
it's a kind of overflow
from the normalized future

into the structure of current time

i.e. if you need to do something very quickly
it's easier to do this from the point of view of knowing that
that in the future we can have it like this
a system of some kind of flow there projection yes
some events

then it turns out that even complex diseases
which have there for example
for example, there is a tumor nature there
or they are difficult to remove from the body

then it turns out that we can
see very clearly
that for many control factors
there for health improvement for example

This means there are no difficulties in taking the system out of control
i.e. to make a replacement as if yes to a new normal system

and in principle then it works out
that the element of health improvement for example
it is already a criterion
well, taking into account social aspects
is like a criterion
and social
and human yes
an element of healing

it turns out that these are the Eternal processes of human development
on the Spiritual level for example
they also give some information there
to the same press, etc.
that their action yes
in principle this is also a manifestation
some element of Eternity
it's just done as if latently

example, if you do it explicitly
then firstly we will get a greater effect
but they can also arise naturally
some points of view
which can be added there

but nevertheless, that's how life works
that each element still has
some kind of substrate of Eternity

and that's when we start setting the task
and if you take and select some elements
and from there, as it were, collect the structure of Eternity
what will come of this

so it's almost impossible to connect them together
because there
we are talking about the element of Eternity
it is still an infinite quantity

and if two Infinite quantities
are connecting
the intersection point also becomes Infinite
there is no such thing as formally or what understanding

some kind of such a substrate, let's say
identifying some final barrier
or some local level

and it turns out that
and in the healing mechanism yes
through the matter of Eternity
you need to see these transitions
where the element, for example, describes physical Reality
showed in the matter of Eternity
location point for example there specific well there are quantities
there is no specific food product for example Yes

the man wanted to drink juice
he needs to get it from a fundamental level
control
how is the juice projected there
in all connections

and how can we use it
some product
Well there is some action there
in order to identify in each element
the matter of Eternity

that's when we put such an element
as a management
and this control starts to work
as if already as some kind of applied action

then you can see it here
that the very matter of Eternity
this is, in general, a fairly specific value
having a specific volume, shape and quantity

and it turns out that we can
there, solving, let's say, the inverse problem
see
how does the action
from the point of view of the development of the World, for example Yes
in this direction

because we will always be faced with that
that in any case the development of the processes of the World is yes
processes of sustainable development of all mankind
these will still be the main questions

and we must therefore see very clearly
that in order to matter Eternity
collect and select
element of this matter
it is precisely the level of human health as such

we need to show then
what is really in every impulse
a person who is getting healthy
a system is laid down that comes from his future
where the future has contact there
with the Eternal development of man

i.e. from the current time
you can translate it for example
some hardware to some place
consider that this is an element of the future
which at some point is implemented there, yes

then it turns out
what if we are from the point of view of the matter of Eternity
we go through this process
then we have actually well basically here
Well, that's the status of management
that matter itself begins to be organized
due to, for example, people's thinking
man is looking for this matter

and it turns out that he finds it
then it is possible by the coordinate system
to determine what kind of system of thinking
was implemented

and when we start to see such a situation
then you can see
that each level , for example, of this type of connection
what we see for example is a situation at high speed

as a rule a person
considers high speed control
then the element is precisely a certain division
or there is a dispersion of the matter of Eternity
in the structure of the Eternal Administration
gives opportunities to every person
see
that he himself is capable of realizing in the matter of Eternity

i.e. his ideas
his technologies
his personal meaning of action there

and that's when people start to understand
that it is a controlled variable
that it is, in general, ordinary matter
then the following control status occurs
this is the depth of, as it were, control over matter
from the point of view of an outside observer

because the matter of Eternity as such
she also has
quite a good amount of technology
in implementation
there is some kind of super strong fabric there
or there is Infinitely strong ^{yes}
for example, there is, let 's say, a tissue system
clothes that don't wear out there, etc.

and we begin to see
management structure in this way
that in each case
when we talk about a single fact
manifestations of the matter of Eternity

we must definitely consider
all aggregate control systems
consider the system level
if it happened once on one level
what is collected ^{for example} by this system ^{for example}
control contexts

then it is necessary for these systems to be transferred
there in other places in other situations

and it turns out that the very matter of Eternity
it's ^{kind of an} applied aspect
isolation of the healing system from matter
This is, in general, a specific methodological system

and here is the first method
what do we highlight first
precisely ^{as if a discrete part}
i.e. from the Eternal ^{monolithic} system
we make a discrete system

and that's how we start doing it
the first element appears instantly
Well For example Means well, some kind of Reality
some object of information

and it turns out that we can follow it further
what if, for example, we set such a task again
then you can see
how the next piece of information appears, etc.

and from this we can see
that informative aspects in management
they often prevail
and you can work with information
there in the past yes in the present tense in the future

while
if we work through some mechanical systems
then they can only work for example there in the current time

so there is naturally an advantage
work due to the technology of one's own Consciousness
because you can always change the information
any second
there is no need to have any instruments there

so for example well the same goes for counter terrorism
so we can see very clearly
what if for example we work
from the point of view of the translation of the element yes
there is some life there
into the element of Eternity

then we see that there are no phenomena there
including terrorist possibilities there
some kind of development of the situation
they can't influence
on a certain substrate
precisely related to the fact that man is Eternal

now if we start to remove this substance
then we generally see a pattern of this type

what to implement
here is your personal control

First of all, you need to do management all the time

and secondly, here in the methodological base
discrete moment extraction
you can highlight it there
the next one is actually the next method

it consists of the following
what is control element detection
at the primary level of Perception
this is actually an element
but transferred to Infinity
with Infinite speed

i.e. if we consider such an element
as an element of action
it turns out that we have such concepts
for example, as "Infinite speed" as a derivative concept

and here is the third method
it allows differentiation
these Infinite speeds

i.e. to be able to Infinite speed
highlight
some comparative characteristics after all

because so that it would be clear what was happening, yes
in the World
Of course you need to be able to
different type of Infinite speeds
set at the level of, so to speak, the next action

and it turns out that we can then
well actually implement
Infinite control this way
that highlighting there the final phase of, as it were, external control

i.e. a somewhat unusual technology
nevertheless, we are any control systems
we make from there, for example, there our personality, yes, i.e.

and the action is as follows: Infinitely

how the outside world works
that any transition, for example, is from God
gives Infinite Peace at once

and so here is the next method of control
health so to speak Yes
in conditions where healing is an element of Eternity
consists in the fact that
what do you organize at the logical level
just on some platform
from which it already grows
in fact, a factor in the general development , so to speak,

and it turns out that there is a mistake in that
that for example a person might not get there , yes
Eternal development
it is not allowed here

if a person has such an idea, it is supported there
then technology provides him with
such a platform level
which allows one to realize oneself
towards Eternal development

it turns out that the following methodological option
this is the openness of the management system

i.e. if we have well let's assume some system
well, something like that, let's assume there are some devices there, yes
in management let's say so

and if we start
there is a control system to be made like this
so let's say we'll remove, for example , the control option there
Well, a dictaphone
you can always write down information
which, for example , implements
let's say some control signals

you can review this information
as information of the word
i.e. we passed on the information
the man learned

you can just look at it
as sound level
and he also works for Macro da Salvation

it turns out that the intersection of different forms
gives the same thing

For example there is the Eternal development of man

then it turns out that here is the transition
from the dynamic control phase
into static
where is the birth of life in terms of contact
we have a plan for specific action there
already specific technologies
which are methodologically identified
how technology is more future development

i.e. it turns out those elements
which are missing from the information
they are therefore in the future

at primary Perception
if you perceived something
and then you start interacting
with other elements
and that element disappears somewhere

here it is mechanically deduced
into the structure of a future event

and then it can be transformed and [...]
Well as if presented at the level so to speak
already some specific action

and when we start to see this management
like the management going on for example Yes
precisely with Infinite speed

then in principle it turns out here
that the solution to each problem
contains these elements of Infinite development

and these elements they are actually
well, so to speak, they are implemented in management
that any element of Infinity
contains
element of human life

i.e. it turns out that we have
element of human life
as an element that actually guarantees existence

there is Eternal development
at any point in space-time

based on this we can get
well, in fact, let's say those control systems
which we have

in the form so to speak well, those that we observe from the side

for example, if you ask yourself a question
how does a person manage in general
where does his control impulse come from?
what does he look like
and how does it generate energy there, for example, for control

then you can see it here
that by describing these systems there by classes and some levels
can be seen
that there is a certain class of information contact
where there is no action information as such

and it turns out that it is an element of healing
falls into the structure of Divine action there
as a single element yes For example

and it turns out
that for example the One God does the management there
from the point of view of some local private task
and a person can do management
by some global object

and then it turns out
God is forced to equalize points of view
so that there is no such thing as there are some other processes there
except for example the processes of sustainable development in society , etc.

and based on this
the next methodological level
to a greater extent
as a methodologically defined level
and not what the specific methodology is
consists in the fact that

what works from a methodology point of view
it is necessary to constantly identify the external space yes
where to invest technology
it is necessary to identify some earlier proposals

earlier communication systems
where it is possible to identify quite clearly
as if a sequence of actions of any system

then it turns out from the sequence of actions
we come to that
what a person has for example there is Eternal development

i.e. a sequence of actions

actually regulates at the logical level, so to speak
a certain system of relationships

and then it turns out that if we have in one place
for example, the selected faction level
so let's say Eternal development
there is human life there
on another level well let's say some other information

then the connection is at the joint level
it always comes first
it is precisely the situation of Eternal development
where further implementation is already underway
quite a lot of elements well like the following type yes

here is an element of Reality, it has been realized
and what is beyond this Reality

and that's when we start to analyze
this situation is deeper and what happens
that we have such an element
that we can consider the structure
of their past events
we can consider the overcoming system
some problematic events
in a person

and here is the element of interaction
dynamic matter and Eternal matter
it's practically already crossing over
into the structure of human perception
not even from the point of view of contact there
with human skin there
namely, in the structure of Perception of a person

and that's when a person begins to see
that Perception is his

his own
it can differentiate only that signal
which is considered useful to him
at the level of there Macroinformation

then through Mokroblast always find the system
For example there is the next development of the next management
always simple enough
it's enough just to see clearly
the control object located, for example, yes
where are you exactly
here at the moment of the action

i.e. the following control law is obtained
what if you managed and got for example
some kind of stable action
then this stable action spreads
on all elements of Reality

and then we get
for example, at the moment of any action
we get enough well as if a characteristic picture

that one can engage in a certain type of action
but at the same time it practically means Well, let's put it this way
no effort or something
from the point of view of the concept of "effort"
there are some informational materials

i.e. we come to the conclusion that
what if we consider
the element of life as the element of Eternity
then any source is the source of control

and it turns out
that the fixed value of control
some kind of event picture
it's already more of an element
Well, according to the logic, it's like Macro-actions

i.e. in each specific element
the system of Macro-action is manifested

and it turns out that if we, for example, wanted
make the management like this
what we need there quickly enough
consider management in terms of results, etc.

then it turns out that we must definitely
to do such management
that element of Eternity which denotes
namely the structure of Eternal life
it is crossed with Macro Eternity in this way
that in words this system is described
as a system of discrete and even seemingly random variables

for example , right now I describe it all the time
docking system
elements of dynamic Eternity there
elements of static Eternity so to speak

even here elements arise

what about the level of action of drivers there for example
they are looking at the structure
there we will say external Reality
as a structure in general Well so to speak, emerging
if there is a driver driving on the road, here's what you should consider
that the entire Eternal magnitude is transformed into a road
then he perceives it

and how does the power actually connect with the Eternal organism ?
all as if material Eternity

and that's when he makes a movement, i.e. controls the road
then he has a docking
at the level of Spiritual development and Consciousness
i.e. he understands the road at the level of the Spirit
not because he's watching her there

and the road changes on purpose I took a car there
driver yes For example
the road and external Reality

and it turns out that when we start to analyze
what should we do with this element yes
where to get it and apply it

then here you can highlight
as many factors of physical Reality as possible
there are some elements there, trees, branches, etc., leaves

and distribute control in this way
so that on each element

naturally distributed
the theme there is Macrosalvation

then over time these elements
will actually be implemented
in the form of a kind of construction of, in general, Eternal development

and we see that in each specific case
element of Eternity
which is defined there in the form of, for example, dynamics, yes
specific human action
and statics
this is the element that is sort of synthesized
at the level of human body action

i.e. synthesis is constantly occurring inside the body
these two systems to a greater extent

if you look at how these two systems
For example well, let 's say they interact by creating
some next steps

then by analogy with how God does it
He created some kind of system
and He is her for example yes it does

we see that in the elements of Eternity
where Eternity meets with anyone for example
but specifically with the Infinite level

we see that there are a number of elements
which can be discussed there discretely
For example, we can talk about that
what is Eternity in three-dimensional manifestation

but now I'm describing it in words
all the time discrete phases
there the meaning of management is different there

means in the control phrase
through for example one system
this one value will be in the control action
through another it is another value

and that's when we start to analyze, for example
the situation in this way

what for example do we need to do in management as such
to get all the time well how to receive
in fact, Eternal development
man and humanity as a whole

it turns out that we have to highlight
in each control
element of Eternity
which is related to the person himself

and when we start to analyze
these processes as discrete processes
as processes that move, so to speak, towards a person
then you can see that any element of Reality
with development he begins to realize
human form

and that's when we start to see
what's inside this form
interaction occurs
let's assume between internal information yes

well let's say the living level of human action
and between its Infinite development

then it is clear that there are future developments in the system
always highlighted
system of the most optimal development
where Eternity is more concentrated

so we can take
the structure of the matter of Eternity
arrange through discrete approach
i.e. we are approaching Eternity
and then we start to get closer
repeatedly there many times yes

we collect statistics, we say this
here are the material substrates of Eternity
and let's compare for example how they work yes For example

and when do we start
Well, this is a comparison of integration
dynamic system of Eternity
and static
we get what God has, for example, through God's Action
we have well actually always

element of such development
that having there, for example, some kind of final impulse
we have an Infinite consequence in its action

then here is the same thing by analogy
bringing out the matter of Eternity
in the structure of the fabric implementation there
this is what matter as such should be like
so that there is an Eternal number of years
were they used somewhere there ^{yes}
i.e. what should the material be?

and when we start using
^{Well,} there's already a different value there
that through Infinite development
there is only a form of information there, ^{yes}
there is a concept of "time"

however, we can in this form
from the current position enter
fairly certain control
and get this control like this
that even if you use
^{well,} actually, ^{like} discrete systems

in understanding this Reality

after all, how can one draw Eternity at all?
what does she look like ^{yes}

that's why i always talk only in levels
who mostly work around this process

because in the conditions of development of this system
it is necessary that there is, for example, even a backup system
worked almost simultaneously and in the same way

so there is no double as such
it works out there anyway
work in a single instrument system

and usually at the moment of docking
when the first signal comes from you ^{for example Yes}
and falls into the structure of the Eternal development there

it turns out that after analyzing
the structure of Eternity

from the point of view of simply studying the property
we can learn a lot
in order to mean some personal actions
take into account yes in management

for example, a person thinks
that a number of some situations
here are the ones that happen around it
these situations for example they can be
Well, let's say they are unfavorable
he wanted to change the situation there
I took and changed these mailboxes there, for example Yes

but still the task is the same
what will be the reaction to the person himself
there are no boxes to change there
there is no need for this

but precisely in the matter of Eternity
get the structure of Eternity
well, implemented for example yes with my wife

if a person there considers such a position
but there is
there is a concept of "actions well as if from the Divine level" yes indeed
a wife was created

and when we start to consider
such a phase of collective Consciousness
then here is the discreteness of the transition in speech
characterizes the area of information

i.e. the ability to , as it were, announce an action
if for a woman there it is her husband, for example yes in action
in reverse action

i.e. the ability to describe the system
through a structure as if approximate
for example, initially Adam has a wife there
in the development of the situation

and the next element of the World is not described here
there if there is a husband and wife
then we can assume that there is a child, for example Yes

i.e. here is the ability to convey information

without touching the information itself
as if by a reflective level and an external level
characterizes another of the human states
where a person is characterized precisely
precisely the external state outside of time outside of space

this way the area is revealed
which characterizes the Eternal Man as such
i.e. in the usual sense of the word, a person
all the time when he operates with these concepts
is in the structure of Eternity

i.e. for example , right now
there I define the text of the seminar
I am constantly describing the multi-level area of Eternity
in ordinary words
and the description goes by means of discrete approximations
to the system

for example I describe a system
near her yes
there is some kind of instant reflection
it is still a very powerful system
Infinity yes

Eternity is a very powerful system.
manifestations of a series of events
and work in this system
it is possible only by means of approximate descriptions

and when we start to enter
into the essence of the system itself
then here is the task of recovery
it turns out to be very simple
the one who is engaged in describing this system
is already in the phase of Eternal development

because he's like Well so let's say on information
brought into this phase

i.e. you also need to be able to work like that
Thinking description well as if with language and words
to be in the phase of Eternal development

if we start to take control
behind any word

from this point of view
then any word is logical
allows a person to be present
in the phase of Eternal development

Well, today I'm just in the lecture material
showed
how, through the verbal control option
using literally the discrete approximation principle
to different concepts
output all the time
for example, even the physical body of a person
in the phase of Eternity

thus speaking man
or the recipient of this speech
Human
is in the phase of Eternal development

then it turns out that a combination has occurred
structures of human life
for example there in the dynamic manifestation
with the actual state of the environment of Eternity

and this combination happened as it turned out
at the moment of human action

i.e. I just showed it
that this combination occurs
at the moment when a person acts
For example there by personal example yes

I say certain systems

which bring management into the structure of Eternity

and it turns out that if you position the controls correctly
you are there all the time
in the control phase of Eternal development

combination of recovery dynamics yes
and the elements of Eternity
this is the human condition
in the right position
In fact, Perception turns out

i.e. we are talking about only that

what needs to be formed correctly Perception

how to form it

you can pronounce individual phrases
as if showing how the control is carried out
as I just showed certain phrases
so they worked it out

i.e. completely discretely or in a logical way

and maybe for example in general it's easy to work
with this information well for example there without words yes

but in principle we still need to strive
to the universal level

and the universal level says that
what without words
Of course you can make control
but management must be effective and with words

moreover, it must be effective
even if we say different words

basically to save there from Macro yes
some problematic level
words can be completely different
the control should still reach
to the level of realization of God's tasks
namely the Eternal development of man

i.e. even the words spoken don't matter
in this case
if you kind of set the task
bringing control to absolute value

so this is the structure of Eternity
this is an absolute value
even the words there are out of control

and they
non-verbal level
in practice it may also not be very well implemented

and then a person comes to himself simply
in its natural Eternal state

and then further formed words
they are the ones he needs
there are some actions that they control, etc.

so here it is today
I have shown it many times
place
position
and the human condition
where is a person in the Eternal development really

i.e. when listening to this text
can be seen
how does it arise
it is the structure of the Eternity of space
in which a person is located

and you can use this space
precisely for absolute control
to get an absolute result let's say
at any distance
at any time, etc.

and in the practice of today's technology
if possible, work like this
that's where discrete thoughts go
this is a description of the magnitude of Eternity
or Eternity itself as such
which cannot be described, for example, by a logical word

but due to reflection it can be shown
that these are the places where the management takes place

in comparison with the collective phase
namely the collective Consciousness
shows that you are capable
actually receive
absolute control over your tasks

This is where I end today's seminar.

Thank you very much for your attention
