

GRIGORY GRABOVOY  
The doctrine of the human body  
**Method of human body regeneration  
through the action of the Soul**  
02.12.2003

Hello again  
the topic of today's seminar  
is my Teaching about the Human Body  
and the subtopic is the Method of regeneration of the human body  
through the action of the Soul

In this topic I am considering first of all  
the structure of the development of the Soul  
which is around itself  
organizes the human body

and at the same time the physical body of a person  
I consider the body as similar  
To the Physical Body of God  
from the point of view of human perception

then it turns out  
that the Spiritual Action of God  
on organizing your body  
it's the same as a physical action  
bodies of the Soul

This is where you have to be very careful  
to this term what is the concept  
the body of the Soul originally existing  
well, in the form of , for example, information from the human body, yes  
but in the Soul

and at the same time for God  
information of the body of the Soul as such means well the concept let's say yes  
and information of the human physical body  
this is one level of concepts

when we come to the Perception of God  
from this point of view  
then we see what God built  
for example, there is Your Physical Body

after having inspired  
external information objects  
By your desire By your action

and the body took the form of a man

when we begin to see spirituality  
external some objects of information external actions  
then we also get an element of humanization of the body  
but through knowledge of the Soul  
i.e. the Soul knows what it already knows

when we start to consider this element  
then here in principle  
any even serious human disease  
becomes completely surmountable only because  
that the Soul recognizes its healthy state  
expressed as for example  
healthy physical body of a person

and it turns out that in order to regenerate  
your physical body  
first of all you need to do this  
so that the Soul would actually recognize  
what she did before  
by analogy with the Physical Body of God  
but in human perception

i.e. the Soul must consider  
a system of understanding the Physical Body of God  
as the development of the human body into Infinity

it turns out that we are talking about that  
that the Spirit and Soul of man  
concentrated for example in Consciousness yes  
in the idea we assume Eternal life  
these elements of Reality  
for God they are concentrated so  
that God sees His healthy Physical Body  
in the human body  
in the form of a human body

i.e. so that God would know  
for people from people's point of view  
knowledge of God from the point of view of people  
Your Physical Body in a Healthy State  
People should have a healthy physical body

and in this regard here is the task  
namely regeneration of body restoration  
this is the task of following  
it is precisely God's tasks in essence  
in terms of Eternal development  
of his own physical body

i.e. so that God would be, strictly speaking  
so on a human level I'm sure <sup>yes</sup>  
that His Physical Body  
at the same time it is the same as the human body  
was Eternal

then it turns out that He must create  
elements of the development of the world are such  
that the physical bodies of people are also Eternal

and then the man believed <sup>yes</sup>  
into your Eternal physical body  
creates the Faith of God  
about the Eternity of the Physical Body  
in relation to  
as to your body  
and to the human body

here I specifically introduce the term Faith of God  
Faith of God in, for example, Eternity and His Physical Body

i.e. we see that God produces such an element  
like faith  
by spreading the physical body of man  
in Infinite Development

and at the same time the development of this element  
occurs in a similar way to that  
how does a person believe

i.e. if a person believes in God  
then God believes in man

this is precisely the element of faith  
he is completely adequate  
like God  
it's the same with humans

therefore faith is a direct channel of communication

God and man  
and that is why all religions are built on faith  
here it is absolutely clear that faith is formed by God Himself

and it turns out that He also forms  
and Your Faith  
well, actually, sort of for myself  
but in essence, as if for Himself, He forms for man  
so that a person perceives His own development

after all, man sees that God is developing the World  
and in connection with this he develops

For example yes your physical body  
Well, there comes a man out  
into space into outer space  
dressing in some kind of spacesuits

but at the same time to go into outer space  
it is necessary for a person to actually calculate  
your life support system  
for this he must know  
elements of the material there of the natural world for example

and these elements of the World  
this is essentially the manifestation of God  
in relation to a person

i.e. God gives the opportunity  
to know nature to build let's say a spacesuit  
but if we do it at the expense of Consciousness  
then in fact a person can  
create your own habitat  
only due to Consciousness

as God does  
in relation to His Body

The Eternal Body of God  
it is Eternal, basically everywhere  
it doesn't matter whether it 's a vacuum or a physical environment  
filled with oxygen

God has the ability  
create oxygen there, for example  
even if it's local there  
within the framework of the task of its existence, let us assume in a vacuum  
and create a temperature regime yes

for normal functioning  
of the normal human body

when these phenomena intersect  
i.e. the possibility of creating it by God  
and <sup>that means</sup> man's desire to go into space  
a structure like a spacesuit appears

i.e. all future development is man-made  
it is possible to consider it quite specifically  
in the form of what will be  
in the next element of the development of civilization

you just have to set the task  
such as she is

in a simple, even mathematical formulation  
but based on that  
that the Physical Body of God is provided  
at the same time it is  
the physical body of a person  
and it is self-sufficient in any environment

and from here comes any formal mechanism  
calculations of the same spacesuit  
what it should contain, etc., etc.  
this will be a consequence of this stated task  
it will be immediately clear what to do, <sup>for example</sup>

another question is that any spacesuits  
any systems <sup>there are</sup> replacements <sup>yes</sup>  
life support of a normal person  
in the form of devices <sup>there</sup>  
some external controls  
such as medicines  
this is essentially a system <sup>of</sup> external control  
aimed at temporary compensation  
just a normal state <sup>of</sup> the body

so it turns out that replacement, i.e. recovery, <sup>yes</sup>  
abandonment of these control systems  
are drugs <sup>there</sup>  
some instrument systems, etc.  
is expressed in the fact that we must very clearly  
at the level of the Spirit  
connect  
Body of God Physical Body of God

and the physical body of a person

as soon as the Spirit does such work  
then the physical body of a person becomes healthy  
regardless of external circumstances

This is a very important control element.  
related to the fact that  
in this case, external circumstances will be formed in such a way  
that his body will be healthy  
provided that for example other people can for example yes  
not even know such technologies for some time

but as soon as other people find out  
for example, everyone will learn that it is possible to self-recover  
can be regenerated for example there is any organ  
then the physical body passes  
to a completely different level of personal development

in this case, he takes this level into account  
development of all other bodies

i.e. the body becomes unaffected  
For example there is no physical object  
not subject to aging for example there are diseases, etc.  
because that's how everyone is made

that's why God strives for that  
so that the body of any person would be Eternal  
because the information is all so  
for example we take let's assume there is soil and planets  
or take stones  
or we take some, even some separate ones  
levels of Reality there are trees

when we know that unification exists  
according to the principle of the structure of the world  
we can quite say  
future forecast system of development of this World  
For example there for trees, for stones, let's say, etc.

and when we say that this is exactly how everything is arranged, yes For example  
one type of trees or one type of rocks  
stones can exist for millions of years without changing  
trees there some specific period of time

then we unify

your Perception  
your knowledge  
to the level that the Soul of man and the Spirit of God  
this may be a single level in knowledge

that it is only worth comparing some elements  
and give some, let's say, unified conclusions  
we will be able to know what God gives, namely God  
for example, if we, well, sort of consider  
this is the concept of the Spirit that  
so let's assume if we consider  
very difficult moment in general, yes, such as it is

let's consider suppose  
"there is a certain bay, well, on the sea" yes

and here we can fully consider  
the level of self-reproduction of human speech, let's say  
from the fact that he perceives this bay  
some outer bay there

well, which, for example, is for his internal state  
is  
precisely the level of the general development of the World

i.e. it allocates a bay  
like some specific object for example  
in your Perception

then it turns out that the Spirit of God  
perceives this bay  
as the development of the human Soul  
in Your own Perception

i.e. here is the reproduction of speech, for example, of a person  
delivered  
to the level of natural process with God  
i.e. the word is reproduced in the same way  
how the Word of God is reproduced

this is very important  
go to  
to the level of, as it were, anticipation in speech

Here is God, for example, if He speaks  
in some cases he says  
in the following words yes for man

i.e. they can be understood by him  
let's assume in some next action

and so it turns out that if we want  
go to  
let's assume the level of speech composition  
because God does this with His own, for example, physical body  
then we must consider  
objects and phenomena  
interconnected with each other

i.e. I wanted to explain here  
which we can well say  
what does Spirit mean let's assume God  
and the word "bay"  
where it contains, let's say, a word like "boom"  
first we just change the first letter  
"spirit" replace the letter "d" with the letter "b"

for the universal Perception of God  
where is the maximum number of elements of Reality  
can be as if contained  
in one impulse of Perception

here in the general mass of information  
in general sound phases  
often these are approximately the same background concepts

this is how god made the division of the word  
how to hear all the words  
when suppose there is a level of separation yes for example like this  
what about the letter "b" and the letter "d"  
she's close enough  
by phonetic sound level  
for a person

and when we look at it here  
the word let's say "bay" yes  
we begin to attract the visual image  
then we see  
that the visual image provides identification  
i.e. it gives a kind of clarification of the image of auditory perception

and God looking at the bay  
He can say  
what for example "spirit" and let's assume there is a "bay"  
if we "t a" divide yes

and we leave only "boom"  
then it turns out that in principle  
well, whatever let's assume in the concept of "bay"  
if we take a stone there we throw it into this bay  
and we say "boom" and let's say a stone fell

here is the sound form of the elementary action  
in relation to the given environment

and that's when we start to differentiate  
all these Perceptions are of God  
I want to show you now  
from the point of view of the Perception of God  
what do sound forms look like  
how can a person perceive this

because they are diverse  
and for God by unification  
any word is generally equal for Him

here is God all the elements of Reality  
perceives  
as completely unified  
and completely unambiguous

it turns out that in principle for the Perception of God  
there may be no difference in words

i.e. you can say any yes for example words  
but at the same time God perceives them in such a way that He builds them

i.e. He is simultaneously  
and builds  
and perceives them as different words

it turns out that when building an organism  
here to regenerate the body  
provided that it is necessary, for example grow there if the organ yes  
or simply regenerate the cell

you need to do it this way  
so that different as if in phonetic sound  
different in functional systems  
phenomena and concepts  
were of the same type  
in relation to the One in logic Eternity of God

and it turns out that this is a complex concept  
here is an opportunity to replace the transcription of the sound  
the words "spirit" yes

for example, a person wants to say a certain word  
but he can replace it with another one  
but at the same time it is expressed  
the primary spiritual meaning of his speech

for example he wants to talk about the Spirit  
but it can talk about the bay  
while implying  
some internal memories  
as if a reaction of the Spirit  
on the state of this bay on some nature

and when we start to enter  
here is the depth of these concepts  
we see what is being built here  
human physical body  
where there is no difference in words

i.e. we come to the conclusion that  
that there is no difference in words  
this is the construction of the original word man yes  
for God  
which is heard  
both to God and to man alike

that's if we want to understand  
how does God hear for example  
and how can we suppose that He, for example, well, transforms the sound there  
through Your Physical Ear we will say yes

it turns out that we must formulate  
the word "man"  
and get the same displayed sound

and where does it sound from  
reverse wave of the word man  
there is God

i.e. you can find it specifically  
the location of God  
by the word "man"

but when we say "man"  
we see another person

and we perceive a person in general  
i.e. God's creation  
this is already an investigative level

and it turns out that the primary Word  
it does not contain any other words  
besides this

i.e. any other words  
against the background of this Word  
have a kind of one-dimensional sound  
i.e. you can say different words  
but you can hear the word "man"

and here it exists  
another principle of management  
for body regeneration  
related to the fact that the Soul of God  
perceives it very specifically  
difference  
not only in words and vibrations yes  
but the same semantic meaning

let's say for example there are words yes  
naturally denoting often that  
that even when they are different in meaning  
on the Spiritual level we can perceive them  
like words that seem to be in time  
in general, they are distant in implementation

i.e. we can talk about words  
that the word is action  
and the word is, let's assume, the content of the action  
or the word has a secondary meaning there , etc.

and then if we have here  
Well as if words of equal structure  
for reproduction in the future

then in order to reproduce the physical body yes  
for example some speech  
we can well proceed from the fact that  
that the Soul of God knows completely individually  
knows every word  
according to its fundamental deep, as it were, semantic meaning

i.e. God perceives words in essence

so for Him it makes no difference in principle  
what words are spoken

why is god present everywhere  
and sees information on his own Consciousness  
because He perceives the essence of any phenomenon  
including the essence of words

then the sound form  
it doesn't matter at all  
although it would seem like a paradox  
what is the sound form  
this is the content of form and word

but if i say  
let's assume in the word for example "dictaphone"  
I'll say a word , for example, "movie camera" or "photo camera"  
at the same time I can say that I covered some area  
which relates to technology

but if I want to say that all of them  
Well, they are engaged in recording some kind of Reality  
there is sound and image yes  
sound and image at the same time  
then in principle knowing about it  
I can hear different words  
but to perceive them as the main action yes

God also perceives a certain quintessence in that  
what does a person want to tell Him?  
in every word  
and in every action

i.e. every person  
for God  
he is close he is here

and when this happens  
then a person can realize his place  
specifically near God  
and become completely healthy  
well, practically in an instant  
if he finds the terminology  
will find a method  
will find his inner path yes  
the path of its development  
when words no longer have meaning

he can speak in different words  
one and the same  
or to talk about something in sentences  
but at the same time express  
in general, some kind of following Spiritual action

i.e. when words have no meaning  
then there is the sincere state of God  
in relation to a person  
this is how man perceives God  
but God is always sincere to man

and it turns out  
a person enters a state of sincerity on his own

and here we see  
that a perfectly healthy human body  
this is the body that spontaneously forms words  
i.e. words coming from the body

not because they logically exist yes  
and because the human body realizes words  
in terms of the Divine development of the body itself  
then the words flow softly and easily and they fall precisely

in this regard  
when, for example, the principle of overcoming is at issue  
i.e. try to replace one word with another  
with the preservation of the Spiritual yes  
the original Divine meaning of the word  
when for God it doesn't matter what the word is

and move on  
to the logical control level  
related to what is pouring  
Well there is pure speech there  
completely logical level of words  
everything is fine, as if the speech is clear and confident

combining these two levels  
we see the Thought of God  
in relation to a person

i.e. how God intended man  
initially  
in the human plane of Thinking

i.e., by giving human functions to His Thinking  
so that man could know His Thought  
did he even do this management  
in relation to a person  
when for Him everything is one

and what's more, God forms everything  
in real time  
including the word  
and the meaning of this word

i.e. it turns out  
at the time of formation  
He can change its meaning.

God who controls all Reality  
if you tell Him, for example, "spirit"  
and man understands the Spirit  
as an element of Spiritual and Management

there is a concept of Spirit  
like some kind of spirit , for example there  
at the level of human perception  
it could just be the spirit of a person as such yes  
not the Spirit acting from man  
and as if the external spirit , etc.

if we have a multi-angle level  
then God can replace him and say, for example, "boom"  
adding then "that" in his Perception  
and through human perception  
perceive that  
what a person might say is "the spirit of this bay"  
i.e. dialogue between man and God is possible with words

and when do we pronounce this word, for example ?  
then we can move forward with complete confidence  
for the Word is from God yes  
one of the canons of management

when can we this word  
transform into action  
before it comes into effect  
the word itself

we can change on the move  
the semantic level of the word is so

so that the body interacts with the word harmoniously

and now you just have to reach this level  
then the Thinking will be harmonious  
in relation to the person himself  
if a person thinks in words

but if he, for example, thinks in images  
or just sees and understands the information  
then understanding is a reflection  
the elements of Reality themselves  
the sound of words is like

music of words yes  
music of the conceptual apparatus of the external world  
in relation to a person

so this is this conceptual apparatus  
formed solely by God  
for Eternal development

here if you want to see  
where is the Action of God  
then for Eternal development  
this is this level of management

I'm making things more complicated here on purpose  
this is exactly the kind of lecture material  
in order to see what  
how does it work for example there is a human physical body  
in management  
from the word yes  
or by the way  
and at the same time how it is reproduced by words  
state of the physical body

i.e. the meaning of this control is that  
that the person is  
in the state of the physical body  
which is approximated or equal in certain actions  
the state of the Physical Body of God

and then the body realizes the words  
means he realizes his words  
which are aimed, for example, at Macrosalvation  
to achieve actions of this body  
because the body is in harmony

not because he is a man, first of all he is doing something there  
then he starts to think  
how to implement this word

and word and action  
match  
in the state of the physical body

Well, in general, the essence of this management of this process is that  
what if God can give any shade of meaning  
any word  
in the original action

then here the person gives  
always unambiguous meaning  
aimed at the Eternal development of man himself  
any word that is reproduced  
here in the harmonious state of his body

and from here we can quite say  
what then in principle  
and for a person it makes no difference  
pronouncing certain words  
because he sees Reality himself

as soon as he sees Reality  
Well, that's absolutely adequate  
and at any distance  
then this is the level of overcoming  
sound like a word  
there is a phonetic syntactic level of it

when a person overcomes such a level  
he begins to see at any distance

i.e. overcoming  
verbal fixed there for example the status of the word  
this is also practically omniscience  
because the person gets into  
within the framework of the real world  
where God builds this World

then he is not mistaken, for example, in prognostication, yes  
then he can do it quite well  
absolutely precise control systems  
for your development

then he sees his body completely healthy  
and how to get there

and this movement is generally like this  
that a person essentially becomes like  
a partner in the Action of God  
in the organization of the World in its fullness  
including in words  
and the word is influence  
hereditary system of the World including

and at the same time the concept of "overcoming"  
Means well, the sound, i.e. the meaning of the word  
it also consists of the fact that  
that a person brings his control into that  
for example, so that there is some kind of formulated diagnosis there , yes  
was not a real diagnosis  
for a person in the next second

you just have to overcome it  
this sequence of negative words as if Yes  
which is contained  
in some well there is an undesirable diagnosis for a person

and translate this structure into health for yourself  
then we get external words  
in principle then they don't matter at all  
if they do not satisfy the health status of the person

This is one of the management methods  
when can you change at all  
means the content of the word is the opposite

because in this case I said that  
what do we suppose if we look at the word "spirit"  
that word well in general, phonetically, it sounds similar  
the word "bay" can be divided into two parts  
and adding "t a" at the end  
we through Perception  
we can quite feel some kind of spiritual action yes  
of this bay  
according to possible human recollection  
which was there before yes

some Spiritual Perception  
this is a relationship with the Thought of God  
complex concept

then gradually transferring this technique  
at the level of means of counteraction in fact  
negative and verbal level  
some diagnosis

you can get health  
not even because we are talking about counteraction  
because only those words concern us  
which are harmonious with us

and as you see  
the level of growth of the physical body of a healthy person  
from the Soul of man  
I translated the system in this case into word transformations  
where there is means some  
I started with the fact that phonetic sound systems  
may be indifferent

i.e. you can have one thing in mind  
and in principle make the management broader  
but this word is a certain framework principle yes  
what's inside this word  
there is a certain semantic parameter  
which for God is in principle indifferent to him

God in His Action  
maybe the meaning of this parameter  
change for all people at once

and in this regard we can well say here  
what is this concept of "change" for a person  
this is normal health  
in relation to Eternal development

and at the same time a person develops  
from your Soul as well  
that God creates a structure of faith for man

as a given structure  
He does exactly those actions  
which convince a person  
in Infinity for example there is Mira first yes  
large elements of some external development are being created  
space Macrocosm it is Infinite

and this Infinity

can be translated quite well  
into the structure of Infinity of each element of the body

i.e. in human Thinking  
where there is no verbal level, for example  
and there is only a specific, let's say, visual level  
and management level  
going well let's say from , for example, the external information environment  
not necessarily only visual or auditory

then by analogy with that  
as God sees  
every element of Reality  
a person can see every element in the same way  
if he sees the element in projection  
to the universal Word

and that's when we ask the question, for example  
and what is this universal Word  
generally speaking  
it could be sound  
it could be a form  
i.e. the Word passes  
into a specific element of Reality  
in Human Perception

and it's quite possible well how to approximate Perception  
having made some projection  
on let's say a plane yes  
where all signals from external Reality come  
and say that from this plane  
for myself to say so as to establish  
such a management position  
for example, there is a signal level  
and he is already like that  
that all signals were previously entered here

the plane somehow processed these signals  
you can enter the parameter of this plane  
and these signals come to you already in the same form  
in which they are most optimal  
for your events  
and events of the whole world

i.e. you are actually doing some  
sluice-filtration system  
which is the managing one

in relation to all external signals

i.e. you can transform all words  
having assigned some parameters to a generally intermediate action yes  
when some already fixed system  
changes external parameters

but then it turns out that you become visible  
from the outside, let's assume the same managers

i.e. the control space begins to become denser  
if everyone starts doing such actions

that's why God He often for example yes invisible to people  
because He brings the meaning of transformation  
in any action  
in terms of the Eternal development of people

and Eternal development  
this is Infinite space  
and Infinite Time

that's why there are such systems  
Well as I would describe now  
in the form of airlock seals  
transforming information  
this is the Soul  
which grows the physical body of a person

i.e. the growth of the human physical body  
in space and time  
by analogy with the same tree  
but for example, it means if , for example, just classify  
the growth of a tree or some species of tree  
just some kind of vegetation yes  
as some kind of law of nature, for example  
then for man as such there is no such law  
in principle, generally speaking, no, essentially

in the Image and Likeness of God  
a person can change the structure of his development  
but at the same time, for example, preserving  
then there is a similar habitat there  
so that other people who don't know how  
for example, to create oxygen in a vacuum  
they must learn this

as soon as they learned  
a person can then, in principle, overcome  
any space  
any time  
but in order for it to overcome accurately  
all external parameters of information  
must be universal

he must know for sure  
that he will end up in some galaxy there , for example  
and or create a device  
which will definitely transport him to some place

it turns out that by analogy with that  
how does god do it  
here is the physical health of a person  
his healthy physical body  
this is Infinity of access  
both in space and in time

i.e. The True Reality of Health  
from God's point of view  
this is access  
while a person cannot move there, yes  
for example, let's say by teleportation or by another way  
precisely dependent on Consciousness  
and not from some technical system  
but not everyone at least can do it

then it stays here  
access element  
as an element of acquiring knowledge  
and knowledge must be positive  
for the human body  
for his Soul

and so internally it's almost like  
in the human body  
growth of the Soul  
and it turns out that the Soul  
as if it grows into a human body

that part of the Soul  
which is determined by God  
in His Consciousness  
It actually grows into the human body  
and here a person's faith in God appears

this is exactly the process it is like that  
that faith in God is essentially  
human action in relation to God  
and understanding that  
how is his physical body created at all

and from this point of view we see  
that all, for example, processes of Reality  
so that we have well positive as if good yes  
in prognostication for the human body  
the level of development of his physical body

we need to do this  
so that the whole future is concrete and strictly defined

and at the same time those concepts that have  
Well let's assume a uniform phonetic nature  
they would be brought by a person  
to the concept that a person needs

if they have different types of systems  
let's assume there is a negative diagnosis, the person does not need it  
then it must be overcome  
another status of a person  
status of non-verbal type

which means this is a status close to the status of God

and when, for example, you enter this structure  
then in fact one can say  
that then the human body will be completely healthy  
for any combination of words of information, for example

i.e. it doesn't matter to a person  
what intermediate systems  
verbal  
or informative  
event-based  
while there are people present near the person

and when you see for example at the same time  
for example another person  
then he is absolutely specific  
understands you without words

Now I am talking about the principle of telepathy

i.e. the person who is looking at you  
and understands  
what do you think  
what do you want  
and what are you thinking about  
in terms of, for example, Eternal Development  
i.e. those thoughts that you want to convey to him  
not everything in a row, after all  
namely the ones you want

then here it turns out  
that for example for the same elements there is the resurrection of people  
or cure for serious diseases

there is a very simple  
the principle of accumulation of knowledge needed for that  
so that , for example, there resurrect everyone at once

and therefore, here is the section  
My teachings about the human body  
where I show that the body is growing  
practically in action of the Soul  
or from the action of the Soul

in principle, the growth of the Soul  
this is the human body  
for the Perception of God  
and into Infinity

we see that here, well, it 's quite  
in general it can be clearly defined  
what for example is the criterion of physical condition  
For example let's assume there is human health  
or for example event paintings  
this criterion is  
the level which is first of all laid down  
as in the Soul of God  
so it is in the Soul of man

i.e. God and man  
have practically no generally related nature  
according to the structure of your own body

i.e. we have a certain bridge  
which comes from the human body  
and directly concerns  
namely the Body of the Physical Body of God

i.e. the Souls of man and God  
they are connected  
with this kind of peculiar bridge  
which consists of that  
that this is the Spirit of all people taken together  
and the Spirit of God  
simultaneously  
this bridge is this substance

and when, for example, we begin to develop  
The spiritual structure of people  
in terms of Eternal development  
then the bridge is strengthened  
we can easily cross this bridge  
walk and get healthy

i.e. you just need to have this bridge  
we begin to approach God  
to the Physical Body of God

as I said  
if a person finds  
the path of transformation of the verbal plane  
then he will be near God  
he becomes Eternally Healthy

after all, many criteria for achievement  
Well for example the structures of God  
this is, for example, the level of prayers  
level of meditation  
level of transformation of a word or image  
in order to be in that place  
where God made man concrete Eternal

i.e. He actually assigned him some kind of task  
His own development of this person  
where he must perform God's tasks

i.e. as soon as a person generally understands logic  
tasks before God  
he quickly recovers  
is in good health  
and moves towards Eternal development  
in general, it can be transformed like this

but in this case I showed

what I just showed  
this is growing information  
coming from the human body  
and created by the human body

i.e. it is possible to create information  
Well, there is logic there , yes  
to take control of the object from the point of view of  
logic there goal task  
and can we take the support system on the human body  
and creating information  
show  
how is the body for example Well it functions there  
or should function  
in relation to the Body of God  
in relation to oneself

when we start to see this information yes  
at any distance  
see in other people

then it turns out that we are dealing with  
with fairly compact information, generally speaking

i.e. here is the human body  
this is a specific , generally local place  
there in time and space  
and information about the human body  
it is quite compact

that's why in my Teaching  
precisely according to the physical body of a person  
I'm considering  
principle of information transfer  
It is precisely in the educational plan that this  
that a person goes to structures  
that governing word  
which, for example, is harmful to humans there , yes there

and based on the fact that he came out  
he goes to the level of simple telepathy  
i.e. the glow of bodies  
like the saints shine  
this is information

and this glow gives knowledge  
to all the people around

Moreover, this glow can even heal  
if the other person agrees yes

and when does it start  
Well, this is kind of unique in general yes, universal glow  
then the human body begins to react to the information in this way  
that any word becomes acceptable to him  
and the word starts to play  
and God at the same time

i.e. this is not the task of the human body alone  
and it is not even a task for his harmonious state, for example  
which, for example, reproduces those words there  
which are needed now

and this is at the same time  
and the Action of God in one word

as soon as he gets to that level  
Human  
he sees that  
Spirit of God  
and the Spirit of man  
they are one  
in relation to  
and to their own bodies  
and in relation to their own Souls in essence

God  
when I said this word "bay"  
I meant that there is also the Perception of the Bay  
and there is , for example , the fact that  
Well, let's assume the bay itself  
at this very moment she is created by God  
at the moment of Perception

and then a person begins to see, let's say  
what is Spiritual action yes  
in the creation of this bay  
and what is the supposed action going on  
from the physical level  
from physical condition for example

but for God  
and Spiritual action  
and the action of the Physical Body

generally speaking it's the same thing  
God He is all-manifested

and once we come to this understanding  
then here is the physical body  
really becomes Eternal  
and having the property  
transform any information  
in the right one yes  
for him for the physical body  
Thus  
that man is then already by analogy with God  
can say that there is a word "bay"  
for him it carries all the information of the given word  
and physical  
and how to influence this yes for example physical Reality  
and everything connected with it

and at the same time he can say  
what is the Spirit of God

for the Spirit of God it is practically the same  
for His physical presence, for example  
in this place and right on the bay  
in the form of a Physical Body

means for the Perception of God  
from a human point of view  
it's all basically the same

a person can see  
The Physical Body of the One God on this bay  
when will he realize that  
his physical body  
and his Spiritual state  
this is a single factor

and he doesn't have to distinguish  
Well there is a distinction between the word "boom" and the word "spirit" for example  
"bay" from the word for example the same variant "spirit" yes  
because it is enough for him to see God there  
in this place

as soon as he sees God  
he will see everything that happens  
and everything that was connected with it  
what did God want to tell him here

and when he starts to see it  
it turns out that he is at the same time with God  
creates any Reality  
including the Reality of Eternal Development  
the man himself

i.e. it can replace  
the word there, for example, is "bay"  
or the word "boom"  
on the word "Spirit"  
and through Spiritual development  
to be Eternal everywhere  
but already by the willpower of the person himself

then you can make there not a "bay" but, for example, a "field"

and the transcription of "field"  
in relation to the Spirit  
she is completely different  
this is already a human transcription

so in principle, for example, if we introduce such a concept  
like "Eternity Bay" yes  
how to understand

Well for example "Eternity"  
Well, in principle there might be some kind of bay there  
in outer space

but then it turns out  
that she is the way when it is already real there  
for God further is the real thing

for a person he will still think  
well "Eternity Bay" walk a billion kilometers  
and then is it really Eternity ?

and it turns out for God  
the concepts are completely unambiguous

but for example the "field of Eternity" for a person  
this is a clear concept  
if he gets into the field of Eternity  
he is in the field of Eternity

so when a person enters

for example, transcription of own control  
into knowledge  
it becomes human and already divine  
simultaneously  
for God taught man to act this way

but the difference is that  
what is the beginning of training yes for example on the word "bay"  
or in general it doesn't really matter  
in any other words  
which may have  
internal content and action yes  
simultaneously  
in terms of, for example, Eternal Development

In principle, one can give any other example  
the main thing is to show  
that God changes simultaneously with the word  
and action  
can be changed at all  
the semantic principle of the word itself  
at the time of its organization  
and at the same time for all people

then considering that God does it  
sometimes or for example does not do but it is God's work  
then we can very well say  
what is the human business to build on this field  
For example there is a city there yes  
or develop this field there into Infinite Development  
from the point of view of the technology of Eternal Life

i.e. we can do whatever we want  
build on this field

and when we assume further we begin to develop  
from this point of view  
the growth structure of the physical body  
from the Soul of man  
then we see  
what is the physical body of a person  
this is the Soul  
as the person himself  
but this is the Soul of God among other things

when we realize this position  
it becomes clear to us

as God sees  
how does he hear yes  
how does he walk  
i.e. the physical motor functions of God

because for example the organization of the Body of God  
She is still different in essence  
He constantly organizes and understands it.  
how does he do it

and when does He, for example, understand this?  
it is clear that then the body is generally invulnerable in principle  
because He can organize it wherever He wants  
based on  
Consciousness  
Spirit  
and on the basis of that , in general  
that His body is indestructible and real

in essence, universal harmony  
well, as if with the Eternal Environment actually  
there is Infinite development  
He is also building a system of Infinite development.

that's why it turns out  
that you just have to start building correctly  
Infinite Development System  
the body also becomes Eternal

it means on the physical body of a person  
In general, even architecture has an influence  
some external events yes  
and that these phenomena were disposed towards man  
for example, a person there was healthier because of this

let's assume a simple question  
how to get healthy  
walking around the city and seeing some well there are signs yes  
some buildings, some posters , etc.

for this you just need to  
transform in your Consciousness  
how to install a filter  
level of the Physical Body of God  
i.e. on the same projection  
and receive  
only transformative positive factor

Well, it would seem to be the easiest way, yes

but this is a mechanical path in general  
it can be a bit tiring  
transform something all the time

and how to harmoniously enter the system  
we must build this world with God  
simultaneously

then it turns out  
that the body participates, i.e. it helps  
the processes taking place there  
in these buildings

it reacts to everything  
as if it were my own, well in terms of Eternal development  
i.e. the body needs it for Eternal development

It is not for nothing that the human physical body  
ended up here  
and it goes, for example, in some specific place, yes  
and in general it reacts, let's say, to specific events

so it is very important to see here  
what is the physical body of a person  
this is an ongoing action  
as if from God  
and man too  
simultaneously  
when a person is involved  
from your physical body in action  
well, that is, the remote action of the body in fact

this is a new parameter in management  
when the body itself acts remotely  
because it is spiritual  
i.e. it understands correctly and is inspired  
a person understands with his Consciousness  
that spiritualization is God's spiritualization

i.e. not just a level, for example  
as if of his own and spirituality  
the man thinks  
that he is spiritualized, let's assume  
and yet how inspired he is  
this may be from the point of view of the problems being solved there, etc.

it is clear that he was originally inspired by that  
that God directed him  
if he does it correctly  
then he is healthy  
he is inspired by the understanding of the correctness of what is happening,  
etc.

but in this case I'm talking about something else  
spirituality in that  
that God is really present here

i.e. the vision of one's spiritualization  
from the original God  
how did god create the body in the first place  
Including with my spirit

when a person begins to understand this  
he sees that we are dealing first of all  
Well, it's people, *yes*, through human perception  
with that  
what other people perceive

i.e. we communicate or *create* or do some things  
in that aspect and in that case  
when we can *in general*  
*as if* all the processes of Reality  
translate into structure  
maybe collective *and* including Perception

and therefore  
God gives everyone equal knowledge, *generally speaking*.  
expressed absolutely universally in that case  
when everyone has the same body  
*for example* , in people

and it turns out that the bodies are identical  
it's the same level  
God-sent knowledge

and it's worth it just *well* even if in this technology  
one person will learn  
technologies of Eternal development  
and they will be like this, *for example*

even if *it 's just there* for a moment  
for an Eternal number of years

he will be able to convey  
this one and only impulse

maybe there  
or a long lecture course  
or just one single glow there yes  
milliseconds, picoseconds are not important  
instant  
or simply the glow of the Soul

then all people will be truly Eternal  
because at least one has achieved this

but the point is that from the point of view of God's tasks  
and other elements of Reality  
For example there are animals cats dogs  
here are the ones near the person  
wild animals plants remote there  
they too must be Eternal

and it turns out that  
level of luminescence propagation  
from the human body yes  
it must be infinite  
generally speaking for all elements of Reality

and as soon as a person enters this state  
what is his light  
this is the light of Infinity  
for all elements  
he then becomes in a certain sense  
already absolutely healthy

i.e. for him then  
any external object is that level  
where he transmits the knowledge of Eternal development

and he practically  
is deified by analogy with God in general  
how God makes the Eternal for people

but since God makes the Eternal  
and for other elements of Reality  
he can still learn here too  
in this action

therefore, at this level of management  
which I just mentioned  
It is precisely about the level of the physical body of a person

Here we can fully consider such a process  
what is desirable in this technology  
as close as possible  
keep in Perception  
Physical Body of God

try to work more from the harmony of the body  
even reproduce words from the harmony of the body  
often doing body control  
and not from sound systems  
as if there were even some words

and when you do the management  
we need to get to that level  
where you are very clear and quite fast there  
you see at the level of the so-called, well, for example, telepathy  
and you help in real time  
to everyone around you

and the main thing  
this is Macroprevalence of the body  
although it is located  
in one place  
and at the same time  
on all phenomena of the World

then you have a completely healthy body  
having precisely Eternal development

as a practice  
well, sort of in general it might even be  
practical level of perception or something  
own development of Perception  
it is necessary to do as much as possible with that  
to kind of work with sounds and words

i.e. transformed sound  
how can it be translated  
into the sound of the word you need  
but already at the level of the Soul

i.e. if I say well there's some  
for example, you change the ending in the word yes

and you get the same control  
as from the word gde gde the ending is not changed

and this is the principle of management  
will allow you  
any elements of Reality  
transfer  
to a level that is positive for you  
for your physical body  
and will allow you  
manage actively enough  
help others

I am finishing this seminar today

Thank you very much for your attention
